📰 Today's Top Stories

On the reliability and reproducibility of qualitative research

👤 noreply@blogger.com (Daniel Lakens) 📅 2026-02-08 📖 14 min 📝 2927 words

TWENTY PERCENT STATISTICIAN

Summary: <p class="MsoNormal">With my collaborators, I am increasingly performing qualitative research. I find qualitative research projects a useful way to improve my understanding of behaviors that I want to explore with other methods in the future. For example, some years ago I performe...

Structural and dynamic embedding of the mouse functional connectome revealed by functional ultrasound imaging (fUSI)

👤 Pepe, C., Mariani, J.-C., Urosevic, M., Gini, S., Stuefer, A., Ricci, F., Galbusera, A., Iurilli, G., Gozzi, A.

📅 2026-02-07 📖 1 min 📝 148 words BIORXIV NEUROSCIENCE

Summary: Functional ultrasound imaging (fUSI) is an emerging hemodynamic neuroimaging modality whose potential for connectome-scale network mapping remains largely untested. Here, we establish a non-invasive transcranial fUSI protocol and an fMRI-inspired preprocessing framework that enable robust resting-st...

Attention and body awareness: The role of inhibition and the management of cognitive resources in the perception of spontaneous sensations.

📅 2023-07-20 📖 1 min 📝 210 words CLINICAL NEUROSCIENCE

Summary: When the body is attended to and viewed, it appears that only a subset of bodily sensations enters awareness. Some of these sensations can be felt on the skin even though no stimulation triggers their perception: They are commonly referred to as spontaneous sensations (SPS). It is hypothesized that ...

Dreaming about pain: Dreams series of a chronic pain patient.

📅 2025-06-09 📖 1 min 📝 172 words DREAMING

Summary: The occurrence of physical pain in the dreams of healthy individuals is relatively rare, while patient populations report pain more frequently in their dreams. This study conducted dream content analysis on a long dream series (N = 4,254) from a patient diagnosed with a chronic pain-inducing illness...

Transient activation of potent progenitor cells is required for spinal cord regeneration

Weinholtz, C. A., Zhou, L., Saraswathy, V., Xu, Y., Shaw, D. K., McAdow, A. R., Park, D., Shin, J., Solnica-Krezel, L., Johnson, A. N., Mokalled, M.

2026-02-07 1 min 194 words BIORXIV NEUROSCIENCE

Summary: Adult zebrafish exhibit full recovery following spinal cord injury. Transient expansion of stem cell-like progenitors is thought to underlie their regenerative capacity. Yet, our understanding of the identities and contributions of the crucial stem cell populations that direct spontaneous neural rep...

A silent Kv channel subunit shapes PV neuron action potential waveform and short-term synaptic plasticity during high-frequency firing

👤 Sanika GaneshTheresa M. CantyBernardo L. SabatiniaHHMI, Department of Neurobiology, Harvard Medical School, Boston, MA 02115

📅 2026-02-03 📖 1 min 📝 44 words PNAS NEUROSCIENCE

Summary: Proceedings of the National Academy of Sciences, Volume 123, Issue 6, February 2026.
SignificanceVoltage-gated ion channels are broadly expressed yet serve cell-type-specific functions. We demonstrate that the Kv6.4 silent subunit is selectively expressed by fast-spiking parvalbumin-positive (...

Nullcline Analysis Provides Dynamic Mechanisms for the Differences in Electrical Activity of Distinct Subpopulations of Midbrain Dopamine Neurons

👤 Knowlton, C. J., Stojanovic, S., Jahnke, M., Roeper, J., Canavier, C.

📅 2026-02-04 📖 1 min

📝 250 words

BIORXIV NEUROSCIENCE

Summary: Previously, electrophysiological differences between subpopulations of midbrain dopamine (DA) neurons were identified based on projection targets, including distinct responses to hyperpolarization and in the regularity of pacemaking. Here we explored single-compartment models of three subpopulations...

A Distinct Communication Strategies Model of the Double Empathy Problem

Enrique Calderoli, Maria Cristina Varriale, Fl\'avio Kapczinski

2026-02-04 1 min 151 words

ARXIV QBIO NC

Summary: arXiv:2602.02562v1 Announce Type: cross Abstract: The double empathy problem recasts the difficulty of forming empathy bonds in social interactions between autistic and neurotypical individuals as a bidirectional problem, rather than due to a deficit exclusive to the person on the spectrum. However...

Visual Strategies During a Cooperative Mechanically Coupled Bilateral Task

Burgardt, R. T., Hawe, R. L.

2026-02-03 1 min 250 words BIORXIV NEUROSCIENCE

Summary: A subset of bilateral tasks requires one arm to perform a stabilizing role while the other completes a movement, such as slicing a loaf of bread. Visual attention during bilateral tasks has previously been examined with bilateral reaching tasks, demonstrating that visual attention switches between t...

Geometric Fragility in Alzheimer's Disease: Probing the Loss of Hippocampal Hierarchical Abstraction via Contrastive Point Cloud Modeling

Wang, Y., Chang, Y., Zhang, J., Cai, M., Yan, J., Zhao, H., Alzheimer's Disease Neuroimaging Initiative

2026-02-03 1 min 147 words BIORXIV NEUROSCIENCE

Summary: While human spatial cognition relies on hierarchical abstraction to integrate local features, Alzheimer's disease (AD) pathology is often reduced to local volumetric atrophy. We propose geometric fragility as a distinct failure of global topological integrity within the hippocampus rather than a mer...

Efficient task generalization and humanlike face perception in models that learn to discriminate face geometry

Lee, S., Ying, Z., Dey, A., Jeon, Y.-N., Issa, E. B.

2026-02-03 1 min 217 words

BIORXIV NEUROSCIENCE

Summary: Artificial deep neural networks (DNNs) can excel at face recognition from 2D photographs where both shape and appearance cues abound; however, DNNs have rarely been challenged to recognize faces strictly based on face geometry. Here, we show that DNNs, even those fine-tuned on face photographs, had ...

Mesenchymal Stromal Cell Therapeutic Potential to RestoreNeurovascular Integrity in Machado-Joseph Disease

👤 Barros, I., Lobo, D., Lopes, S., Martins, I., Silva, A., Silva, C. H., Gomes, C., Nobre, R. J., Pereira de Almeida, L., Miranda, C. O.

📅 2026-02-03 📖 1 min 📝 310 words BIORXIV NEUROSCIENCE

Summary: Background: Machado-Joseph disease (MJD), or Spinocerebellar Ataxia type 3 (SCA3), is a neurodegenerative disorder caused by an expansion of the CAG repeat in the MJD1/ATXN3 gene, which encodes for a polyglutamine-expansion in Ataxin-3. Similar to what occurs in other neurodegenerative disorders, th...

Implicit learning of melodic structure: A role for pitch?

2024-01-22 1 min 180 words PSYCHOMUSICOLOGY

Summary: Growing evidence suggests that pitch influences musical processing, with melodic processing being enhanced in higher pitch ranges (e.g., Fujioka et al., 2005) and rhythmic processing being enhanced in lower pitches, and these effects may have a basis in elementary properties of the auditory system (...

Autonomous sensory meridian response (ASMR): A PRISMA-guided systematic review.

📅 2023-11-02 📖 1 min 📝 156 words CLINICAL NEUROSCIENCE

Summary: The present PRISMA-guided article systematically reviews the current state of research on the autonomous sensory meridian response (ASMR). A systematic literature search was conducted in Pubmed, SCOPUS, and Web of Science (last search: March 2022) selecting all studies that conducted quantitative sc...

Social bodies: Preliminary evidence that awareness of embodied emotions is associated with recognition of emotions in the bodily cues of others.

📅 2023-03-06 📖 1 min 📝 229 words CLINICAL NEUROSCIENCE

Summary: We experience and express emotions via our bodies, and we are also able to infer the emotional states of others by observing their movements and postures. The ability to extract affective bodily cues in social contexts may be achieved via internal simulation, which is closely associated with experie...
