Evaluating dual-path temporal fusion strategies for multi-modal hand gesture recognition under limb-position variability

Shen Zhang, Hao Zhou, Rayane Tchantchane and Gursel Alici

2026-02-27 1 min 281 words JOURNAL NEURAL ENGINEERING

Summary: Objective. Wearable biosignal-based hand gesture recognition is a key enabling technology for prosthetic hand control, but its reliability is often affected by limb-position variability and other real-world confounding factors. This study aims to systematically compare dual-path temporal fusion arch...

Microglia surveillance is directed toward neuron activation during sustained intracortical microstimulation

👤 Colin Preszler, Kevin C Stieger, Keying Chen, Guangfeng Zhang and Takashi D Y Kozai

📅 2026-02-27 📖 1 min 📝 225 words JOURNAL NEURAL ENGINEERING

Summary: Objective. Intracortical microstimulation (ICMS) is a widely used tool for neuroprostheses, but its long-term efficacy is often limited by foreign body response and neuroinflammatory responses at the electrode-tissue interface. Microglia orchestrate neuroinflammation and regulate synaptic plasticity...

ARXIV CS HC

Summary: arXiv:2603.02379v1 Announce Type: new Abstract: We propose a decision-theoretic framework in which a robot strategically can shape inferred human's prosocial state during repeated interactions. Modeling the human's prosociality as a latent state that evolves over time, the robot learns to infer and...

Extracellular stimulation and ephaptic coupling of neurons in a fully coupled finite element-based Extracellular—Membrane—Intracellular (EMI) model

👤 Aslak Tveito 📅 2026-02-12 📖 1 min 📝 298 words FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: IntroductionThe extracellular potential surrounding neurons is of great importance: it is measured to interpret neural activity, it underpins ephaptic coupling between neighboring cells, and it forms the basis for external stimulation of neural tissue. These phenomena have been studied for decades, ...

Connectome lateralization in autism across the first 14 years: heterogeneity related to developmental stage, hemisphere, and pathophysiology

👤 Liu, Q., Li, Q., Li, X., Wei, X., Zhang, X., Zhou, W., Zhang, L., Ren, T., Huang, C., Tan, H., Huang, L., Liu, K., Chen, J., Xu, W., Zhang, Q., Kendrick, K. M., Zhao, W., Li, F.

📅 2026-03-03 📖 1 min 📝 143 words BIORXIV NEUROSCIENCE

Summary: Hemispheric lateralization is fundamental feature to neurodevelopment, yet its dynamic evolution in autism across childhood and underlying molecular mechanisms remain unknown. Thus, using a large-scale resting-state fMRI dataset (n = 1553, ages 1-14), we investigated developmental heterogeneity in c...

Glial ceramide orchestrates Lipid Droplet homeostasis and age-dependent motor function in Drosophila

👤 Garg, L., H, K., DEIVASIGAMANI, S., Ratnaparkhi, A., RATNAPARKHI, G. S.

📅 2026-03-03 📖 1 min

📝 181 words

BIORXIV NEUROSCIENCE

Summary: Glia cells have emerged as equal partners to neurons in the development and maintenance of the nervous system. In this study, we examine the roles of ceramide metabolism and intracellular transfer in glia, contrasting these with those of neurons. We find that glia are more sensitive to the cessation...

Brain Transcriptomics Across Diverse Sleep-Wake Manipulations Reveals Multiple Homeostatic Pathways in Drosophila

Rosensweig, C., Shah, A., Sisobhan, S., Andreani, T., Allada, R.

2026-03-03 1 min

338 words

BIORXIV NEUROSCIENCE

Summary: Sleep is governed by two processes: a circadian process that times sleep and wake and a homeostatic process that drives sleep as a function of prior wake history. Discovered in the fruit fly Drosophila, the period (per) gene is a universal cornerstone of the circadian clock, robustly oscillating at ...

Hopx expression marks Aβ clearance astrocytes in Alzheimers disease

👤 Cao, D.-D., Dong, J., Liao, X.-Y., Teng, Y.-Y., Gu, Y., Luo, Z.-G.

📅 2026-02-28 📖 1 min

📝 149 words

BIORXIV NEUROSCIENCE

Summary: Astrocytic dysfunction is closely associated with nearly all types of neurological diseases. Targeting astrocyte regulation has thus emerged as an important potential therapeutic strategy for neurological disorders. However, mechanisms that induce astrocyte dysfunction under pathological conditions ...

Dreaming about pain: Dreams series of a chronic pain patient.

📅 2025-06-09 📖 1 min 📝 172 words DREAMING

Summary: The occurrence of physical pain in the dreams of healthy individuals is relatively rare, while patient populations report pain more frequently in their dreams. This study conducted dream content analysis on a long dream series (N = 4,254) from a patient diagnosed with a chronic pain-inducing illness...
