Prefrontal-medullary circuitry is necessary for sex-specific responses to metabolic stress in rats

Dearing, C., Lukinic, E., McCartney, C., Myers, B. | 2026-02-12 | 1 min | 249 words

BIORXIV NEUROSCIENCE

Summary: Chronic stress increases risk for metabolic disorders, including diabetes mellitus. Additionally, projections from the infralimbic cortex (IL) to the rostral ventrolateral medulla (RVLM) regulate endocrine stress responses. However, the neurobiological basis for chronic stress effects on glucose hom...

Asynchronous cortical recovery from sleep inertia: region- and frequency-specific dynamics following deep NREM sleep

👤 Hu, C., Shimane, D., Nakahara, K., Takeda, M. 📅 2026-02-10 📖 1 min 📝 136 words

BIORXIV NEUROSCIENCE

Summary: Sleep inertia (SI) is a transient state of impaired alertness and cognition after awakening, typically exacerbated by prior deep sleep. Despite its prevalence, the fine-grained temporal dynamics of brain activity during this transition remains poorly understood. We employed trial-by-trial behavioral...

Heterogeneous single-cell dynamics support stable population codes for objects in the mouse anterior cingulate cortex

👤 Descamps, L. A. L., Clawson, W. P., Carvalho, M. M., Rogerson, T., Hazon, O., Chadney, O. M. T., Schnitzer, M. J., Kentros, C.

📅 2026-02-09 📖 1 min 📝 323 words BIORXIV NEUROSCIENCE

Summary: Remembering our environment and its principal features is essential to our survival. The anterior cingulate cortex (ACC) has been implicated as a key region in remote memory (Frankland et al., 2004; Goshen et al., 2011; Almaguer-Melian et al., 2025). Whilst most studies investigating the ACC's contr...

Generics in science communication: Misaligned interpretations across laypeople, scientists, and large language models

Uwe Peters, Andrea Bertazzoli, Jasmine M. DeJesus, Gisela J. van der Velden, Benjamin Chin-Yee

2026-02-09 1 min 145 words ARXIV CS HC

Summary: arXiv:2602.06190v1 Announce Type: new Abstract: Scientists often use generics, that is, unquantified statements about whole categories of people or phenomena, when communicating research findings (e.g., "statins reduce cardiovascular events"). Large language models (LLMs), such as ChatGPT, frequent...

DataCrumb: A Physical Probe for Reflections on Background Web Tracking

Sujay Shalawadi, Katrina Hv\'itklett, Anna Stentoft Ries, Aisho Mohamed Ali, Florian Echtler

2026-02-09 1 min 152 words ARXIV CS HC

Summary: arXiv:2602.06177v1 Announce Type: new Abstract: Cookie banners and privacy settings attempt to give users a sense of control over how their personal data is collected and used, but background tracking of personal information often continues unnoticed. To explore how such invisible data collection m...

The Eye-Head Mover Spectrum: Modelling Individual and Population Head Movement Tendencies in Virtual Reality

Jinghui Hu, Ludwig Sidenmark, Hock Siang Lee, Hans Gellersen

2026-02-09 1 min 152 words ARXIV CS HC

Summary: arXiv:2602.06164v1 Announce Type: new Abstract: People differ in how much they move their head versus their eyes when shifting gaze, yet such tendencies remain largely unexplored in HCI. We introduce head movement tendencies as a fundamental dimension of individual difference in VR and provide a qu...

Hear You in Silence: Designing for Active Listening in Human Interaction with Conversational Agents Using Context-Aware Pacing

👤 Zhihan Jiang, Qianhui Chen, Chu Zhang, Yanheng Li, Ray LC

📅 2026-02-09 📖 1 min 📝 156 words

ARXIV CS HC

Summary: arXiv:2602.06134v1 Announce Type: new Abstract: In human conversation, empathic dialogue requires nuanced temporal cues indicating whether the conversational partner is paying attention. This type of "active listening" is overlooked in the design of Conversational Agents (CAs), which use the same p...
