## NeuroMark-SZ: A Holistic Resting-State-fMRI-Based Model for Divergent Functional Circuitry in Schizophrenia

👤 Jensen, K. M., Ballem, R., Kinsey, S., Andres-Camazon, P., Fu, Z., Chen, J., Haas, S. S., Diaz-Caneja, C. M., Bustillo, J. R., Preda, A., van Erp, T. G. M., Pearlson, G., Sui, J., Kochunov, P., Turner, J. A., Calhoun, V. D., Iraji, A.

📅 2026-03-14 📖 1 min 📝 247 words BIORXIV NEUROSCIENCE

**Summary:** Schizophrenia is a severe neuropsychiatric disorder. Efforts to describe the underlying biology and establish diagnostic markers through non-invasive neuroimaging methods are ongoing, resulting in a range of theoretical brain-based frameworks. Prominent frameworks for aberrant schizophrenia-associat...

## A spinal substrate for modular control of natural behavior

Nicola, F., Li, L., Riesenmy, T., Pursley, R., Roome, R. B., Markowitz, J. E., Levine, A.

2026-03-14

1 min

187 words

BIORXIV NEUROSCIENCE

**Summary:** Natural behavior unfolds as coordinated sequences of body movements. This organization suggests that behavior may be built from discrete motor patterns, yet how such arrangements are implemented by neural circuits remains unknown. Here, we combined kinematic analysis, muscle recordings, genetically ...

## Dynamic shifts in brain criticality support cognitive processing

Chang, H., Chen, W., Karaba, L. A., Mei, X., Harvey, R. E., Tang, W., Fernandez-Ruiz, A., Oliva, A.

2026-03-14

1 min

176 words

BIORXIV NEUROSCIENCE

**Summary:** Systems operating near their critical point, or close to a transition between order and disorder, have computational advantages. In the case of neural networks, proximity to criticality is proposed to support optimal brain function. However, different cognitive processes rely on disparate computatio...

# Neutrophil-targeted delivery of circSCMH1 unlocks an acute anti-thromboinflammatory function to restore microvascular perfusion in stroke

👤 Xu, L., Huang, X., Zhou, Z., Jia, Y., Leng, S., Bai, Y., Han, B., Yao, H.

📅 2026-03-13 📖 1 min

📝 232 words

BIORXIV NEUROSCIENCE

**Summary:** Objectives: Futile recanalization (FR) after endovascular thrombectomy (EVT) is driven by neutrophil-mediated thromboinflammation, yet conventional neuroprotectants fail to address the spatiotemporal complexity of stroke injury. This study aimed to identify the clinical link between circSCMH1, tradi...

## Barely depictive: Predicting imagery vividness relative to perception with EEGNet

Vanbuckhave, C., Ganis, G.

2026-03-13 1 min 217 words

BIORXIV NEUROSCIENCE

**Summary:** Previous studies suggest that visual mental imagery (VMI) acts as a weaker form of top-down visual perception (VP), with the two becoming more similar as VMI vividness increases. However, this relationship remains ill-defined, and it is unclear precisely how much weaker VMI is relative to VP. Here, ...

## Principles and Operation of Virtual Brain Twins

📅 2025-04-21 📖 1 min 📝 209 words REVIEWS BIOMEDICAL ENGINEERING

**Summary:** Current clinical methods often overlook individual variability by relying on population-wide trials, while mechanism-based trials remain underutilized in neuroscience due to the brain's complexity. This situation may change through the use of a Virtual Brain Twin (VBT), which is a personalized digit...

## A transition-prone brain state precedes spontaneous behavioral switching

Wanken, P., Edelman, B. J., Behera, L., Martinez de Paz, J. M., McCarthy, P. T., Mace, E.

2026-03-09 1 min 224 words BIORXIV NEUROSCIENCE

**Summary:** Animals exhibit behavior in the absence of external stimuli or explicit tasks. Is the initiation of such spontaneous behavior shaped by internal brain states in a predictable manner? If so, does it engage specific brain circuits independent of behavioral form? Here, we studied the initiation of unin...

## Strong Reward Signals, Weak Transfer: Limits of Spatial Priority Map Plasticity Across Task Contexts

Asko, O., Stavrinou, M. L., Hagen, T., Espeseth, T.

2026-03-09 1 min 255 words

BIORXIV NEUROSCIENCE

**Summary:** Reward learning can bias attentional selection, but whether spatially biased reinforcement produces durable, context-general changes in spatial priority over days, and what neurophysiological signals track such learning, remains uncertain. We combined electroencephalography (EEG) and pupillometry wi...

## Ex vivo Infrared Nerve Stimulation on the Rat Sciatic Nerve: Challenges and Pitfalls

👤 Izquierdo Geiser, C., Muenkel, C., Schlett, P., Campbell, P., Borisova, G. D., Wegner, C., Somerlik-Fuchs, K., Hofmann, U.

📅 2026-03-09 📖 1 min 📝 215 words BIORXIV NEUROSCIENCE

**Summary:** Infrared nerve stimulation (INS) offers millisecond-scale, electrical artifact-free activation of peripheral nerves, yet rat ex vivo studies remain scarce. We present an INS setup utilizing a lens system for free-beam focus for rat sciatic nerves partially submerged in a nerve bath, making re-wettin...

## Image modifications reduce differences in natural-image encoding by retinal ganglion cells between natural and optogenetic stimulation

👤 Ramakrishna, V., Gollisch, T.

📅 2026-03-09 📖 1 min 📝 249 words BIORXIV NEUROSCIENCE

**Summary:** Photoreceptor degeneration is among the leading causes of blindness and optogenetics as a potential therapeutic measure has garnered much attention over recent years. In this approach, light-sensitive molecules like Channelrhodopsin-2 (ChR2) are inserted into neurons in the retina to play the role o...

## invertmeeg: A Unified Python Library and Benchmark for 112 M/EEG Inverse Solvers

Hecker, L. 2026-03-09 1 min 235 words BIORXIV NEUROSCIENCE

**Summary:** Magnetoencephalography (MEG) and electroencephalography (EEG) source imaging requires solving an ill-posed inverse problem for which numerous algorithms have been proposed over the past decades. However, these methods are scattered across different programming languages, software packages, and publi...

## A Physics Informed Neural Network (PINN) framework for fractional order modeling of Alzheimer's disease

👤 Mohamed Hafez 📅 2026-02-18 📖 1 min 📝 155 words FRONTIERS NEUROINFORMATICS

**Summary:** This study presents a novel fractional order model of Alzheimer's disease (mental disorder) using the Caputo derivative to accurately capture long term memory and hereditary effects in neurodegeneration. The mathematical model incorporates key pathological constituents including neurons, amyloid bet...
