Network Models of Neurodegeneration: Bridging Neuronal Dynamics and Disease Progression

2026-01-16 1 min 196 words REVIEWS BIOMEDICAL ENGINEERING

Summary: Neurodegenerative diseases are characterized by the accumulation of misfolded proteins and widespread disruptions in brain function. Computational modeling has advanced our understanding of these processes, but efforts have traditionally focused on either neuronal dynamics or the biological processe...

Optogenetics: Pinpoint Light on Precise Neuromodulation

2025-11-06 1 min 137 words REVIEWS BIOMEDICAL ENGINEERING

Summary: Optogenetics has emerged as a pivotal tool in neuroscience, enabling intricate modulation of targeted neurons within the nervous system. Despite its transformative potential, achieving high spatiotemporal resolution in neuromodulation remains a significant challenge, particularly in free-behaving an...

Colourful predictive templates in early visual cortex

Bartsch, M. V., Spaak, E., de Lange, F. P. 2026-06-12 1 min 145 words

BIORXIV NEUROSCIENCE

Summary: Predictive processing theories suggest that our brain constantly predicts incoming sensory information, though the level of granularity and concrete sensory content of these predictions is debated. In this study, we investigate whether predictions in visual cortical areas carry information about col...

Sensory stimulation triggers different spike responses in serotonin and dopamine neurons in the dorsal midbrain tegmentum.

Földi, P., Müller, K., Magyar, D., Nagy, G. A., Hajos, N. 2026-06-12 1 min 205 words

BIORXIV NEUROSCIENCE

Summary: The dorsal midbrain tegmentum, including the dorsal raphe nucleus (DRN) and the ventrolateral periaqueductal gray (vlPAG), contains diverse neuronal populations. Within this region, serotonin (5-HT) and dopamine (DA) neurons are the principal monoaminergic cell types and exert widespread influence o...

Early resource scarcity drives persistent transcriptional changes and vascular remodeling in the female prefrontal cortex

Andrews, E. R., Crist, R. C., Silva, A. I., Chehimi, S. N., Miranda, G., Shuey, J., Berhane, L., Hoot, L., Harris, E., Cuarenta, A., Wimmer, M. E., Bangasser, D. A., Reiner, B. C.

2026-06-12 1 min 249 words BIORXIV NEUROSCIENCE

Summary: Early childhood poverty is an environmental risk factor for psychiatric and neurodegenerative disorders, yet the cellular mechanisms by which resource scarcity produces persistent brain vulnerability remain poorly understood. The medial prefrontal cortex (mPFC), which regulates executive function an...

Anatomical organization and origins of VGLUT3-positive axon terminals in the lateral septum.

Elvers, L. I., van der Veldt, S., Fortin-Houde, J., Ducharme, G., Amilhon, B.

2026-06-12 1 min 226 words BIORXIV NEUROSCIENCE

Summary: The lateral septum (LS) integrates afferents from multiple brain regions, including the raphe nuclei. The organization of these inputs contributes to the regionalization of LS functions, for example spatial coding in dorsal LS and emotional regulation in ventral LS. Raphe-LS projections include glut...

Head circumference assessment in pediatric MRI: a pilot study of manual measurement methods and automated segmentation-based alternatives

Eva Bültmann | 2026-06-12 | 1 min | 321 words | FRONTIERS NEUROSCIENCE

Summary: PurposeHead circumference (HC) is an important clinical parameter in neuropediatrics, but it is often missing or outdated in referral information. This can lead to subjective, reader-dependent estimation during MRI interpretation. We first aimed to compare magnetic resonance imaging (MRI)-based meth...

Just one moment: Unifying theories of consciousness based on a phenomenological “now” and temporal hierarchy.

2024-04-04 1 min 216 words CLINICAL NEUROSCIENCE

Summary: A prevailing pessimism in the scientific study of consciousness is about it having too many theories. With theories of consciousness becoming increasingly isolated from each other, recently, several proposals have been put forth to cull the number of theories in contention. Here, building on a sugge...

Comparative analysis of lucid dream deepening techniques.

2024-02-08 1 min 231 words CLINICAL NEUROSCIENCE

Summary: Lucid dreams (LDs) can be characterized by the presence of metacognition during dreams. LDs may have initially low perception vividness. In this study, we compare the effectiveness of eight techniques for increasing perception vividness, or deepening techniques (DTs), in LDs and the effectiveness of...

Investigations into retrocausal effects in cueing tasks.

2024-04-04 1 min 195 words CLINICAL NEUROSCIENCE

Summary: We set out to test the limits of retrocausation. Across eight experiments, we cued participants about the identity, location, timing, and whether a response should be made, after the participants had already responded. Location, timing, and whether to respond did not have a systematic retrocausal ef...

Virtual reality and neuromodulation in the induction of out-of-body experience (VR-NIOBE): A proof-of-concept new paradigm for psychological and neuroscientific study of an altered state of consciousness.

2024-02-08 1 min 277 words CLINICAL NEUROSCIENCE

Summary: Virtual reality (VR) has been used to induce out-of-body experience (OBE), but the construct validity of prior methods has been criticized. The current research evaluated a new VR paradigm to induce OBE that included implementation of a brain–computer interface (BCI), affording a means of neuromodul...

How optimal is the “optimal experience”? Toward a more nuanced understanding of the relationship between flow states, attentional performance, and perceived effort.

2024-09-12 | 1 min | 253 words | CLINICAL NEUROSCIENCE

Summary: Flow is defined as the “optimal experience” of complete engagement with a task. It is thought of as a distinctive state of mind that is characterized by heightened attentional focus and perceived effortlessness and comes with performance improvements. Putting to test this common understanding of flo...

CSF1R-Mediated Microglial Engagement Is Required for Stress-Induced MMP-2/9 Activity

Taborda-Bejarano, J. P., Tovar, J. P., Allen, M., Natarajan, J., Garcia Keller, C. | 2026-06-11 | 1 min

188 words | BIORXIV NEUROSCIENCE

Summary: Stress is a major risk factor for numerous neuropsychiatric disorders and induces enduring synaptic plasticity within the nucleus accumbens core (NAcore), a key brain region involved in reward and stress-related behaviors. Previous studies from our laboratory demonstrated that stress-induced plastic...

The Limited Range of Motion of the Knee Does Not Fully Explain the Altered Neural Control of Plantar Flexors During Gait in Non-Neurological Knee Flexion Contracture

Cruz-Montecinos, C., Boonstra, T. W., Maas, H.

2026-06-11 | 1 min | 242 words

BIORXIV NEUROSCIENCE

Summary: Knee flexion contracture (KFC) may occur in the late stages of arthropathies, including osteoarthritis and haemophilic arthropathy. The impact of KFC on neuromuscular control remains unclear, particularly for the affected ankle plantar flexors. Surface electromyography (EMG) is widely used to assess...

A Fully Endovascular Neural Interface

Stanton, J., Talei Franzesi, G., Spinazzi, E., Haupt, J., Orbach, D., Sisti, J., Jamiel, M., Zhang, E., Lavine, S., Connolly, E. S., Konofagou, E., Boyden, E., Shepard, K.

2026-06-11 | 1 min | 141 words

BIORXIV NEUROSCIENCE

Summary: Electrical stimulation of neural circuits is expanding therapeutic strategies to modulate brain, autonomic, and immune functions. Devices delivered endovascularly offer a less invasive alternative to conventional implanted electrodes, while delivering spatio-temporal specificity superior to noninvas...

Bone Morphogenetic Protein Pathway Modulates Parkinson's Disease Genetic Risk and Promotes Motor Recovery

Rajkovic, A., Zhang, M., Sahu, R., Liu, L., Mishra, M., Komkov, D., Rosenstein, I., Kahn, J., Friedel, R. H., Gan-Or, Z., Brodski, C.

2026-06-11 1 min 199 words BIORXIV NEUROSCIENCE

Summary: Progress toward disease-modifying Parkinson's disease (PD) therapies is hindered by limited understanding of pathogenic drivers and lack of therapies that restore the damaged dopaminergic (DA) neurons driving motor deficits. We investigated the role of the bone morphogenetic protein (BMP) pathway in...

Identifying cybersickness causes in virtual reality games using symbolic machine learning algorithms

Thiago Porcino, Erick Oliveira Rodrigues, Flavia Bernardini, Daniela Trevisan, Esteban Clua

2026-06-11 1 min 225 words ARXIV CS HC

Summary: arXiv:2606.12214v1 Announce Type: new Abstract: Virtual reality (VR) and head-mounted displays are constantly gaining popularity in various fields such as education, military, entertainment, and health. Although such technologies provide a high sense of immersion, they can also trigger symptoms of ...

Channels and Substrates: Distributed Cognition as an Interaction Model for Ubiquitous Analytics

Niklas Elmqvist, Panagiotis D. Ritsos, Peter W. S. Butcher

2026-06-11 1 min 153 words

ARXIV CS HC

Summary: arXiv:2606.11986v1 Announce Type: new Abstract: Traditional HCI interaction models assume a single monolithic interface and a stable sensorimotor loop. These models fit poorly with cross-device (XVA) and ubiquitous analytics (UA), where interactive data sensemaking unfolds across multiple devices, ...

Neuroendocrine influences on dynamic cerebrovascular function and implications for functional MRI

Wright, M. E., Driver, I. D., Crofts, C., Davies, S., Steventon, J. J., Schwarzkopf, D. S., Murphy, K.

2026-06-10 | 1 min | 277 words | BIORXIV NEUROSCIENCE

Summary: To fully profile how ovarian hormones interact with cerebrovascular function, it is vital to consider, not just resting physiology, but also dynamic aspects of cerebrovasculature that support neural activity. This study uses hypercapnic cerebrovascular reactivity (CVR) and the visually-evoked haemod...

The hedonic evaluation of neurofeedback stimuli is fast, automatic and implicit: An ERP study on stimulus design.

Naas, A., Cai, D., Shabestari, P. S., Kleinjung, T., Ribes Lemay, D., Neff, P., Sonderegger, A.

2026-06-10 1 min 248 words BIORXIV NEUROSCIENCE

Summary: Introduction: Neurofeedback (NFB) has demonstrated efficacy in treating various disorders, often achieving substantial symptom reductions. Despite its effectiveness, a significant percentage of users (non-responders), fail to benefit from NFB. Addressing this issue, the study at hand investigates th...

Gateway: patient olfactory neurons for large-scale discovery in neurodegenerative disease

Zhu, K., Sanfilippo, M., Oh, M. A., Ahmed, M., Aldrich, A., Nyberg, D., Sauteraud, R., Dalva, N.

2026-06-10 1 min 201 words BIORXIV NEUROSCIENCE

Summary: An estimated 42% of Americans over age 55 will develop dementia, but the molecular understanding of dementia and neurodegenerative disease is constrained because the living human brain cannot be routinely sampled during disease progression. Olfactory sensory neurons provide a clinically accessible n...

Untrained Convolutional Neural Networks as Feature Extractors for Structural MRI

Encin, A., Pepe, I. G., Chatelain, Y., Dickie, E., Glatard, T. | 2026-06-10 | 1 min | 88 words

BIORXIV NEUROSCIENCE

Summary: We demonstrate that features extracted from structural MRI using un-CNN, an untrained convolutional neural network, achieve predictive performance comparable to or exceeding that of state-of-the-art pretrained foundation models across three structural MRI datasets and three downstream tasks. Un-CNN ...

Hill-Based Reformulation of the Hodgkin-Huxley Model for Interpretable Neuronal Excitability

Saab, B., Fahs, J., Daou, A. | 2026-06-10 | 1 min | 200 words | BIORXIV NEUROSCIENCE

Summary: Conductance-based models of neuronal excitability depend critically on the mathematical form used to describe voltage-dependent ion channel gating. The classical Hodgkin-Huxley (HH) formalism employs empirically derived rate expressions fitted to squid giant axon data that are not readily transferab...

The mouse superior colliculus promotes competing actions independently of sensory inputs

Takacs, F., Bimbard, C., Booth, G. M., Robacha, M., Shinn, M., Socha, K. Z., Harris, K. D., Coen, P., Carandini, M.

2026-06-10 1 min 141 words BIORXIV NEUROSCIENCE

Summary: The superior colliculus (SC) is thought to integrate visual and auditory signals and help select actions, but it is unknown if and how these capabilities jointly contribute to behavior. Here, we show that the SC promotes competing actions independently of stimuli. We trained mice to locate an audiov...

Dynamic network reconfigurations during task engagement following resting state in adolescent onset schizophrenia

Bowei, O., Theis, N., Rubin, J., Prasad, K. M. 2026-06-10 1 min 254 words

BIORXIV NEUROSCIENCE

Summary: Understanding how functional brain networks in resting state configurations reorganize to perform cognitive tasks is critical for uncovering the nature and mechanisms underlying network dysconnectivity in psychiatric disorders. We applied energy landscape analysis (ELA), a statistical physics-based ...

GABAergic projection from the subiculum to the medial entorhinal cortex in mice and rats

Aimi, T., Shibuya, T., Umeno, H., Karasawa, K., Tsutsui, K.-I., Ohara, S., Kitanishi, T. 2026-06-10

1 min 198 words BIORXIV NEUROSCIENCE

Summary: The subiculum (SUB) is a major hippocampal output hub that routes information to cortical and subcortical targets, and its long-range projections are considered excitatory. Using enhancer-driven adeno-associated viral vectors to selectively label {gamma}-aminobutyric acid (GABA)-releasing neurons ac...

Multi-timescale learning signals in Drosophila dopaminergic neurons

Choi, W., Srinivasan, S., Grover, D. 2026-06-10 1 min 217 words

BIORXIV NEUROSCIENCE

Summary: Learning often requires inference over hidden task structure, including features that predict outcomes. In mammals, prediction-error signaling by midbrain dopamine neurons is considered central to learning, but how these neurons reflect the progression and stability of learning remains unclear. Usin...

4 Phenylbutyrate Plus Gene augmentation: A dual therapy To Rescue of SLC6A1 Variant Associated Developmental And Epileptic Encephalopathy

Delahanty, A. J., James, K. C., Song, Z., Grace, E., Wang, J., Bassette, M., Kang, J.

2026-06-10

1 min 296 words BIORXIV NEUROSCIENCE

Summary: Background: Pathogenic variants in SLC6A1, which encodes the {gamma}-aminobutyric acid (GABA) transporter GAT-1, cause developmental and epileptic encephalopathies (DEEs) through reduced GABA uptake, impaired transporter trafficking, and functional haploinsufficiency. 4-Phenylbutyrate (PBA) is a cli...

A Neuronal Gene Expression Program Underlying Sustained Network Activity

Kim, J. W., Eliscu, R., Yong, A. J., Lee, S., Jan, Y. N., Hwang, T., Lareau, L. F., Ingolia, N. T.

2026-06-10 1 min 152 words **BIORXIV NEUROSCIENCE**

Summary: Neurons function within interconnected networks and must continuously adjust their firing properties to maintain stable network activity. Although these adjustments require long-lasting molecular changes, the neuronal gene expression programs that support sustained network activity remain largely un...

The Critical Period Microbiota Shape Brain Plasticity

Damiani, F., Ashtiani, K. C., Tognozzi, A., Abdelkarim, S., Cornuti, S., Caldarelli, M., Baldi, P. F., Tognini, P.

2026-06-10 1 min 151 words **BIORXIV NEUROSCIENCE**

Summary: The gut microbiota is increasingly recognized as a regulator of brain function, yet its role in experience-dependent plasticity during postnatal development remains largely unknown. Here, we show that disrupting the gut microbiota with antibiotics during critical periods of visual cortex development...

Hearing Lips and Seeing Voices After Fifty Years: A Large-Scale McGurk Illusion Dataset for Audiovisual Speech Research

Wang, Z., Li, G., Yu, Y., Wu, J., Yu, Z., Meng, Y., Wang, S., Dong, C. 2026-06-10 1 min 202 words BIORXIV NEUROSCIENCE

Summary: Efficient face-to-face communication relies on the integration of auditory speech and visual articulatory signals. Over the past five decades, the McGurk illusion has been widely used as an index of audiovisual speech integration. However, substantial variabilities in susceptibility to the illusion ...

APOE4 genotype, blood-brain barrier leakage and ischaemic stroke subtype and location

Laing, K. K., Valdes Hernandez, M. d. C., Thrippleton, M., Makin, S., Chappell, F. M., Dando, O., Vasoya, D., Armitage, P. A., Wardlaw, J. M.

2026-06-10 1 min 304 words BIORXIV NEUROSCIENCE

Summary: Background: Apolipoprotein E (APOE) has been implicated in blood-brain barrier (BBB) dysfunction and may influence ischaemic cerebrovascular disease and cerebral small-vessel disease (cSVD). This study examined associations between APOE genotype, BBB permeability, and infarct distribution in patient...

Critical flicker fusion thresholds predict attentional blink magnitude

Haarlem, C. S., Tiernan, J. G., Kelly, M., Cooney, L., Jackson, A. L., Mitchell, K. J., McGovern, D. P., O'Connell, R. G.

2026-06-10 1 min 135 words BIORXIV NEUROSCIENCE

Summary: The critical flicker fusion (CFF) threshold is a psychophysical measure used to quantify the temporal resolution of the visual system and is known to vary across individuals. However, it is unclear if this measure is stimulus-specific, or if it may represent a more fundamental processing rate for vi...

Intensity-dependent topographical expansion of sensory representations

Zhang, L.-B., Dehghani, A., Hu, L., Sadil, P., Losin, L., Lindquist, M., Wager, T. 2026-06-09

1 min 214 words BIORXIV NEUROSCIENCE

Summary: Neuroimaging studies typically assume that sensory properties are encoded in response magnitude within fixed neural populations. However, this approach does not capture changes in the spatial extent of activation topography, despite growing evidence for its behavioral relevance. Stimulus intensity p...

Age-Related Alterations in Multispectral Somatosensory Gating: Evidence for Partial Compensation in Attentional Performance

Virlley, M., Xi, Y., Bell, N. M., Pruitt, T., Guo, L., White, S., Yu, F. F., Lacritz, L. H., Rossetti, H., Cullum, C. M., Shah, A. M., Davenport, E. M., Maldjian, J. A., Proskovec, A. L.

2026-06-09 1 min 227 words BIORXIV NEUROSCIENCE

Summary: Healthy cognitive aging involves selective changes, with relative preservation of some domains and decline in others, particularly attention, inhibitory control, and executive function. Somatosensory gating (SG) refers to the brain's ability to suppress neural responses to redundant tactile input, c...

Distinct electrophysiological profiles of bacterial mechanosensitive channels for sonogenetic actuator selection

Xin Li, Chenguang Zheng and Yutao Tian | 2026-05-28 | 1 min | 248 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Sonogenetics combines ultrasound stimulation with genetically encoded mechanosensitive (MS) ion channels for cell-targeted neuromodulation. Actuator choice, however, remains largely empirical because in vivo electrophysiological response signatures are rarely compared under matched condit...

A sex-balanced longitudinal developmental task-free fMRI rat dataset.

Mc Loone, D. P., Breen, A., McParland, C., Harkin, A., Kelly, C. 2026-06-09 1 min 105 words BIORXIV NEUROSCIENCE

Summary: Here we present a preclinical longitudinal developmental dataset spanning pre-puberty (juvenile) to early adulthood in Wistar rats. Thirty-six rats (18 female) were scanned during five sessions at approximately postnatal day 28, 35, 49, 70 and 91. A standardised consensus protocol was used for anima...

Intravenously Delivered Lipid Nanoparticles Access Acute Spinal Cord Injury via Disrupted Vasculature

Hellenbrand, D., Burger, J., Bolstad, L., Larico, M., Lefebvre, O., Ram Klein, R., Eslami, A., Murphy, W., Hanna, A.

2026-06-09 1 min 200 words BIORXIV NEUROSCIENCE

Summary: Trauma to the spinal cord disrupts the blood-spinal cord barrier and triggers a secondary injury cascade characterized by inflammation and progressive neuronal and glial cell death. Therapeutic cytokines and growth factors have shown promise as a treatment in preclinical studies, though their clinic...

Whole-brain analyses identify anterior cingulate μ-opioid signaling as a critical mediator of placebo analgesia in neuropathic pain

Rehal, S. K., Boorman, D. C., Cho, C., Karimi, S. A., Fazili, M. I., Augusto, C. A., Burek, J., Khaled, F., Gami, S. R., Frankland, P. W., Martin, L. J.

2026-06-09 1 min 210 words BIORXIV NEUROSCIENCE

Summary: Placebo analgesia reflects the capacity of learning and expectation to engage endogenous pain-control systems, yet the neural circuits that support this phenomenon remain poorly understood. Here, we establish a conditioning-based placebo analgesia paradigm in mice following peripheral nerve injury a...

Acute stress induces circuit-specific alterations in mesolimbic and nigrostriatal inhibitory transmission and potentiates operant learning

de Carvalho Schuch, H., Woo, J., Kugler, H., Jiang, K., Ostroumov, A.

2026-06-09

1 min

227 words

BIORXIV NEUROSCIENCE

Summary: Acute stress can facilitate learning about stimuli that predict rewarding outcomes, yet whether stress similarly potentiates acquisition of reward-directed actions remains less well understood. Reward learning broadly depends on dopamine signaling within mesolimbic and nigrostriatal pathways. Dopami...

Chronic Stress Exacerbates Long-term Microvascular Network Dysfunction Following Brain Trauma

Rozak, M. W., Dorr, A., Patel, S., Koletar, M. M., Attarpour, A., Du, Y., Osman, J., Hill, M. E., Mester, J. R., Burke, M. J., Hamani, C., Sled, J. G., Goubran, M., Stefanovic, B.

2026-06-09 1 min 282 words BIORXIV NEUROSCIENCE

Summary: Background: Preexisting factors are among the strongest predictors of recovery following traumatic brain injury (TBI), with chronic stress closely associated with permanent disability and worse long-term outcomes. While chronic cerebrovascular dysfunction is linked to these poor trajectories, as imp...

Lineage tracing and live-cell imaging reveal that NeuroD1 does not reprogram microglia into neurons

Li, X., Li, Y., Cao, Y., Hu, N., Yang, B., Ouyang, P., Jin, Y., Gao, S., Peng, B., Rao, Y.

2026-06-09

1 min 142 words

BIORXIV NEUROSCIENCE

Summary: Induction of glia-to-neuron conversion is a promising regenerative strategy for treating brain injuries and neurodegenerative diseases. Previous studies have suggested that NeuroD1 can induce microglia-to-neuron cross-lineage conversion. However, it remains highly controversial. To conclusively dete...

Otoprotective effect of MnTBAP in cisplatin-induced hearing loss

Mehmood, S., Bhatia, P., Jamesdaniel, S.

2026-06-09

1 min 196 words

BIORXIV NEUROSCIENCE

Summary: Objective: Cisplatin, a life-saving chemotherapeutic drug, causes ototoxicity. Although sodium thiosulfate is used to prevent ototoxicity in pediatric patients, no other intervention has been approved for clinical use against cisplatin-induced hearing loss. Hence, there is an urgent need to identify...

Robust learning-driven structural and functional plasticity of spines in the mature mouse cortex

Fariborzi, M., Eaves, D. G., Demir, L. Y., Wu, Y., Skeens, A., Hruska, M., Ribic, A.

2026-06-09

1 min 139 words **BIORXIV NEUROSCIENCE**

Summary: Spines in the adult cortex are thought to be highly stable, and that their capacity for modest remodeling supports learning. Using a visual association task and a multilevel imaging approach in adult mice, we found a robust learning-driven increase in the complexity of spine nanostructure, as well a...

Predictable Mean-Field Chaos in Random Recurrent Networks

Alkesh Yadav, Vladimir Shaidurov, Jonathan Kadmon | 2026-06-09 | 1 min | 138 words

ARXIV QBIO NC

Summary: arXiv:2606.08805v1 Announce Type: cross Abstract: Dynamical mean-field theory recasts deterministic chaos in random recurrent networks as an effective stochastic process. We show that for analytic nonlinearities with sufficiently fast Fourier decay, this stochasticity is only apparent: the continuo...

How do we think and what is the neural circuit mechanism for it? Possible roles of working memory and inner speech in thinking

Hitoshi Sakano | 2026-06-03 | 1 min | 206 words | FRONTIERS HUMAN NEUROSCIENCE

Summary: Animals detect changes in the surrounding situation and predict what is likely to happen next by evaluating the current sensory information to that of a prior associative memory. Using working memory with inner speech, humans are able to flexibly predict the future situation and devise appropriate s...

Working Memory as Programmable Fast Weight Computation

Jiang, L., Zhu, Y., Liu, J. | 2026-06-08 | 1 min | 176 words | BIORXIV NEUROSCIENCE

Summary: Working memory (WM) stores information after sensory input disappears and later retrieves it in a task-relevant format, but the mechanism unifying storage and retrieval remains unclear. Here we combine neural geometry analyses of macaque dorsolateral prefrontal cortex activity during a visuospatial ...

Cardiac Timing Biases Creative Exploration and Exploitation

Torno Jimenez, F., Lloyd-Cox, J., Di Bernardi Luft, C., Herrojo Ruiz, M., Bhattacharya, J.

2026-06-08 | 1 min | 243 words | BIORXIV NEUROSCIENCE

Summary: Creative thought depends on the ability to flexibly alternate between exploring new ideas and exploiting familiar ones. Although neural mechanisms supporting creative cognition have been extensively studied, whether bodily rhythms contribute to the moment-to-moment regulation of idea generation rema...

How a Predictive State Observer Can Self-Adapt Its Sensory Prediction-Error Correction Gain: Closed-Loop Evidence from a Muscle-Driven Reaching Task

Kobayashi, J.

2026-06-08 1 min 252 words BIORXIV NEUROSCIENCE

Summary: We ask how a forward-model-based predictive state observer should set its sensory prediction-error correction gain during muscle-driven reaching, and whether that gain can be adapted from agent-available signals - innovation history and per-episode reaching outcome - rather than from swept oracle la...

Muscle-specific motor unit firing characteristics in elbow flexors and extensors after cervical spinal cord injury

Benedetto, A., Jenz, S., Farley, M., Heit, B., Sangari, S., Beauchamp, J. A., McPherson, L., Heckman, C., Perez, M., Pearcey, G.

2026-06-08 1 min 219 words BIORXIV NEUROSCIENCE

Summary: Individuals with cervical spinal cord injury (SCI) often exhibit asymmetric recovery of upper-limb function, with greater weakness in elbow extensors than flexors. To determine whether muscle-specific changes in motor unit (MU) behavior contribute to this disparity, we identified MU firing instants ...

Exploring Reinforcement Learning for Fluid Transitions Between Clinical Mental Healthcare and Everyday Wellness Support

Tony Wang, Qian Yang

2026-06-08

1 min 183 words ARXIV CS HC

Summary: arXiv:2606.06800v1 Announce Type: new Abstract: Mental health struggles wax and wane, yet clinical and wellness interventions typically operate separately, causing frequent breakdowns at care transitions. We explore reinforcement learning (RL) as a means to build digital health systems that deliver...
