Anterior temporal lobes show route-dependent sensitivity to conceptual specificity: Evidence from MEG and EEG

Law, R. M. C., Hauk, O., Lambon Ralph, M.

2026-09-30

1
min

200
words

BIORXIV NEUROSCIENCE

Summary: Understanding how the brain represents meaning at different levels of specificity, from general categories (bird) through combined phrases (nocturnal bird) to specific exemplars (owl), is a central question in semantic cognition and its disorders. The anterior temporal lobes (ATL) have been implicat...

Attractor dynamics underlie sequence working memory in data-constrained recurrent neural networks

 Pals, M., Macke, J.
H.

 2026-10-01

 1
min

 228
words

BIORXIV NEUROSCIENCE

Summary: Sequences of stimuli can be maintained in working memory by encoding each item, together with its position, as a distinct pattern of neural population activity. Competing hypotheses about the underlying dynamics have been proposed: patterns of activity might be supported either by stable attractor s...

Selective Hippocampal Reactivation Driven by Neocortical Feedback Supports Memory Transfer in Predictive-Coding Networks

 Paul,
S.

 2026-10-01

 1
min

 241
words

BIORXIV NEUROSCIENCE

Summary: During sleep and quiet wakefulness, the brain spontaneously revisits neural activity patterns associated with previous experience, a phenomenon known as reactivation. Reactivation is considered to support systems consolidation, the process by which memory retrieval becomes progressively more depende...

VRPTR prediction of individual language activation and uncertainty from resting state fMRI

Di Giovanni, D. A., Collins, D.
L.

2026-09-30

1
min

247
words

BIORXIV NEUROSCIENCE

Summary: Resting-state connectivity can predict task-evoked fMRI activation, but correspondence with an individual task map may partly reflect a shared population pattern. We evaluated the Variational Resting-state-to-Task Prediction Transformer (VRPTR), a three-dimensional encoder-decoder combining a compre...

Gait kinematics dynamically tune optic flow motion-in-depth perception during human locomotion

 Horrocks, E. A. B., To, J. Y. L., Mareschal, I., Saleem, A. B.

 2026-09-30  1 min  158 words

BIORXIV NEUROSCIENCE

Summary: Behavior generates continuous sensorimotor contingencies that the brain must process. In particular, locomotion produces optic flow, which is frequently noisy and ambiguous during navigation. Integrating non-visual self-motion signals can therefore provide a computational advantage to resolve this s...

Selective nigrosome vulnerability in Parkinson's disease revealed by histology-anchored ultra-high-field quantitative MRI

 Li, R., Kirilina, E., Bazin, P.-L., Stige, K. E., Unsgard, R., Brammerloh, M., Gylterud Kvalsgard, I., Kristoffersen, A. L., Berntsen, E. M., Goa, P. E., Damier, P., Tzoulis, C., Doan, T. P.

 2026-09-30  1 min  196 words

BIORXIV NEUROSCIENCE

Summary: Selective vulnerability is a hallmark of Parkinson's disease (PD): post-mortem, dopamine-containing cell loss in the substantia nigra first and most severely affects calbindin-poor compartments termed nigrosomes. Testing this in vivo has been limited by circularity, as MRI studies have delineated ni...

Protocol for Single-Cell Patch-Proteomics: identify specific proteins associated with electrophysiological properties from individual neurons

 Althaus, J. C., Cao, Y., Song, Y., Haghani, A., Callaghan, R., Moore, S. J., Parker, S. J., Kaczorowski, C. C.

 2026-09-30  1 min  75 words

BIORXIV NEUROSCIENCE

Summary: Single-cell patch-proteomics is a novel and powerful technique combining electrophysiological and quantitative proteomic characterization from individually sampled neurons. Following whole-cell patch clamp characterization of neuronal excitability, we collect intracellular contents and, using the la...

Episodic memory adaptively expands retrieval through typicality-guided transformation while concrete details remain accessible

 Delmarco, M., Gonzalez-Garcia, C., Linde-Domingo, J.

 2026-09-29

 1 min

 216 words

BIORXIV NEUROSCIENCE

Summary: Memory faces a fundamental challenge. It has to become flexible enough to be accessed by novel cues without losing the specific information that defines each individual episode. Whether memory transformation solves this problem by sacrificing details or by adaptively expanding retrieval while preser...

BIORXIV NEUROSCIENCE

Summary: Nonlinear neural networks develop structured internal representations, yet how their geometry is determined by the tasks being learned remains poorly understood. Here, we develop an analytical framework for piecewise-linear feedforward and recurrent networks that links learning, activation-region st...

Evaluating the value and limits of null-models for Lesion Network Mapping

van den Heuvel, M., Libedinsky, I., Quiroz Monnens, S., Repple, J., Cocchi, L.

2026-09-29

1 min

198 words

BIORXIV NEUROSCIENCE

Summary: Lesion Network Mapping (LNM) is a method used to map symptom-related circuits in the human brain. Recent work has raised concerns about the method and the specificity of LNM-derived networks, which often show high spatial overlap across unrelated conditions. Null models have been proposed to address...

Aperiodic dynamics track cortical state shifts during sleep K-complexes

 Kaplan, E. S., Schindler, J., Voytek, B.

 2026-09-29

 1 min

 247 words

BIORXIV NEUROSCIENCE

Summary: Sleep microarchitecture is defined by brief electrophysiological events such as K-complexes(KCs), which are traditionally interpreted as discrete oscillatory phenomena involved in sleep maintenance, sensory gating, and cortical down-states. However, electroencephalography(EEG) also contains aperiodi...

The astrocytic secretome increases adult hippocampal neurogenesis and spatial memory in health and disease

 Vilademunt, M., Carron, C., Casse, F., Richetin, K., Gebara, E., Ginggen, K., Nicolet-dit-Felix, J., Piano-Vieira, L., Toni, N.

 2026-09-29

 1 min

 146 words

BIORXIV NEUROSCIENCE

Summary: INTRODUCTION: Adult hippocampal neurogenesis (AHN) plays an important role in memory and is regulated by astrocytes. Since astrocytic function deteriorates with pathological ageing and Alzheimers disease (AD), we hypothesize that the astrocytic secretome may rescue AHN and cognition. METHODS: We tes...

The representation of vocalizations in structured noise in the mouse auditory cortex

 Cai, Z., Peters, J., Arends, S., Englitz, B.

 2026-09-29

 1 min

 220 words

BIORXIV NEUROSCIENCE

Summary: Efficient processing of complex acoustic signals within noisy environments is a fundamental challenge for the auditory system. This study investigates the cortical representation of structured noise and vocalizations embedded in it using widefield calcium imaging with the high-speed Calcium indicato...

Whole Brain Cellular Activation After Mu and NOP Receptor Agonism Identifies Differential Regional and Network Consequences

 Martinez, M., Ozawa, A., Van Zant, D., Thornberry, J., Toll, L.

 2026-09-28  1 min

 242 words

BIORXIV NEUROSCIENCE

Summary: Mu opioid agonists, the most widely used opioids, produce analgesia, respiratory depression, constipation, and reward leading to substance abuse. Like all opioid receptor family members, mu receptors are Gi/o-coupled and inhibitory, yet mu-mediated disinhibition of GABAergic neurons propagates downs...

words

ARXIV CS HC

Summary: arXiv:2609.30466v1 Announce Type: new Abstract: Everyday Extended Reality (XR) systems aim to provide context-aware access to the right functionalities at the right time and place, with minimal manual reconfiguration as users switch context. Yet these interfaces are hard to evaluate: current protot...

SW-VEI-Net: A Physics-Informed Deep Neural Network for Shear Wave Viscoelasticity Imaging

 2026-01-12  1 min  226 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Quantitative viscoelasticity imaging via shear wave elastography (SWE) remains challenging due to complex wave physics and limitations of conventional reconstruction methods. To address this, we present SW-VEI-Net, a physics-informed neural network (PINN) that simultaneously reconstructs the shear e...

Feasibility of Dual Probe Pulse Wave Imaging of the Abdominal Aorta

2026-01-12 1 min 233 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Pulse wave velocity (PWV) is an indirect measure of vessel stiffness, that has the potential to serve as a meaningful parameter for risk stratification of vascular diseases, such as abdominal aortic aneurysms (AAAs). However, assessing the PWV and pulse wave patterns in the complete abdominal aorta ...

Ideas for Python-based, procedurally generated stories please

 /u/ JulieMewMew  2026-09-27  1 min  250 words 

Summary: <!-- SC_OFF --><div class="md"><p>Hi everyone! So I'm working on a weird personal project where I have code that generates stories based on my writing, and it uses the random library and many nested lists and functions. Essentially, every character has a list of words they may use in a situation, an...

BIORXIV NEUROSCIENCE

Summary: Reading behaviour is sensitive to contextual demands. For example, when reading to study or answer questions, readers strategically allocate more attention to goal-relevant sections, read slower, and regress more frequently to extract specific information based on task demands. This suggests that re...

Three dimensional reconstruction of the human nucleus accumbens reveals topographic organization and molecular heterogeneity of D1-islands across the anterior posterior axis

 Phillips, R. A., Yao, J., Bach, S. V., Del Rosario Alvia, I., Du, Y., Maguire, S. E., Zhang, R., Miller, R. A., Kleinman, J. E., Hyde, T. M., Martinowich, K., Maynard, K. R., Hicks, S. C.

 2026-09-26  1 min  219 words

BIORXIV NEUROSCIENCE

Summary: Spatial transcriptomics has transformed molecular characterization of the human brain, but most studies profile individual two-dimensional tissue sections and therefore cannot capture molecular organization across 3D neuroanatomical axes. Here, we developed a spatial genomics framework to reconstruct...

Presynaptic GABA Signaling Enhances Synaptic Inhibition Without Mitigating Persistent Dentate Gyrus Hyperexcitability After Status Epilepticus

 Subramanian, D., Ratnadurai Giridharan, S., Irfan, A., Santhakumar, V.

 2026-09-25  1 min

 292 words

BIORXIV NEUROSCIENCE

Summary: The dentate gyrus (DG) is a critical regulator of cortical input processing in the hippocampus, supporting spatial navigation and memory processing. In epilepsy, the DG undergoes extensive structural and functional reorganization that diminishes its ability to filter afferent inputs, resulting in en...

BIORXIV NEUROSCIENCE

Summary: Animals navigate through dynamic environments in search of resources. Dopaminergic systems are known to control movement and assign motivational value to cues, actions and outcomes, but how they guide ongoing locomotion towards a goal remains unclear. Here, we demonstrate that *Drosophila* mushroom bo...
