Spacing theta-burst stimulation enhances synaptic potentiation in the vulnerable prefrontal cortex

Zolis, A., Hsieh, A. H.-Y., Venkatesan, S., Ingram, R., Georgiou, J., Zrenner, C., Collingridge, G. L., Rajji, T. K., Lambe, E. K.

2026-09-01 1 min 168 words

BIORXIV NEUROSCIENCE

Summary: Neuromodulation with intermittent theta-burst stimulation (iTBS) is a clinical treatment for major depression. One postulated mechanism of iTBS is to strengthen the synaptic connections which activate the prefrontal cortex to regulate mood. With ex vivo electrical stimulation and neuronal calcium im...

Hyperglycemia Activates Retinal Photoreceptors to Induce Neuroglial Inflammation

Huerta, I. D. I., Uddin, M. I., Penn, J. S.

2026-09-01 1 min 156 words

BIORXIV NEUROSCIENCE

Summary: Abstract Diabetic retinopathy (DR) is a major cause of vision loss in working-age adults. Accumulating evidence suggests that retinal photoreceptors contribute to the initiation and progression of diabetic retinopathy. In this study, we investigated whether hyperglycemia directly alters photorecepto...

A neuro-computational approximation of the qualities of mental images

Stecher, R., Kaiser,
D.

2026-09-02

1
min

245
words

BIORXIV NEUROSCIENCE

Summary: Mental images are challenging to study, given that our conscious experience is notoriously hard to access. The currently prevalent introspective methods are inherently subjective and can thus only provide limited access to their qualities. Here, we developed a neuro-computational approach that appro...

A reproducibility-audit framework for generalizable versus dataset-specific molecular transition boundaries in Alzheimer's disease

Kim, Y., Heo, W., Park, S. J., Kim, Y., Cho, Y.
E.

2026-09-01

1
min

204
words

BIORXIV NEUROSCIENCE

Summary: Molecular staging of Alzheimer's disease (AD) increasingly defines transition boundaries along single-cell pseudo-progression trajectories, yet whether such boundaries reproduce across brain regions, cohorts and molecular modalities is rarely tested. We present a permutation-controlled audit that co...

Layer 5 anterior cingulate cortical neurons engage dorsolateral periaqueductal gray excitatory neurons to facilitate the affective component of pain

Kaslow, J., McCallum, W. M., Francois, A., Corder, G., Kremer, E. J., Ritola, K. D., Mercer Lindsay, N., Scherrer, G.

2026-09-01 1 min 270 words

BIORXIV NEUROSCIENCE

Summary: Pain is a conscious perceptual experience characterized by its aversive quality and consequent motivation to quench pain perception. The anterior cingulate cortex (ACC) critically contributes to the emotional dimension of pain. In both humans and rodents, ACC neural activity increases during acute a...

Ancient Somatosensory Circuit Architectures Employ Flexible Molecular Strategies

Lee, H., Frazel, P. W., Singer-Freeman, E., Cavanagh, A. E., Shin, H. D., Rice, K., Selvaraj, S., Alu, M., Kim, H., Loomis, C., Liddelow, S. A., Baek, M., Dasen, J. S.

2026-09-01 1 min 184 words

BIORXIV NEUROSCIENCE

Summary: The extent to which conserved neural circuit architectures depend on shared molecular specification programs remains unclear. Here, we address this question by examining the somatosensory system of the little skate, *Leucoraja erinacea*, an early-diverging vertebrate that retains ancestral features of...

The circadian system is affected by Alzheimers disease independently from amyloid beta deposits

Calligaro, H., Khov, B., Noel, K., Glina, A., van Rosmalen, L., Ramasamy, R., Li, Y., Lam, M. T. Y., Le, H., Kim, K.-Y., Ju, W.-K., Ellisman, M., Panda, S.

2026-09-01 1 min 302 words

BIORXIV NEUROSCIENCE

Summary: Circadian disruption, notably sleep disturbances, serves as an early indicator of Alzheimers disease (AD), preceding cognitive symptoms like memory loss. The suprachiasmatic nucleus (SCN) governs biological rhythms and receives direct retinal input via melanopsin-expressing retinal ganglion cells (m...

Molecular and functional profiling distinguishes PACS1 syndrome variant from PACS1 loss-of-function in iNeurons

Schroder, A. L., Gomez-Maqueo, X., Golinski, S. R., Phoumyvong, C. M., Smith, R. S., Guemez-Gamboa, A.

2026-09-01 1 min 198 words

BIORXIV NEUROSCIENCE

Summary: PACS1 syndrome is a rare neurodevelopmental disorder caused by a recurrent de novo missense variant (p.R203W) in the PACS1 protein. However, it remains unclear whether the p.R203W variant acts through a loss-of-function or alternative mechanism. Here, we used isogenic iPSC-derived neurons (iNs) to d...

An egocentric map prioritizing peri-personal space in the mouse rostro-lateral visual area

Sosa, M. J., Brooks, S., Bluhm, M., Lei, E., Noel, J.-P.

2026-09-01

1
min

169
words

BIORXIV NEUROSCIENCE

Summary: All physical interactions between an organism and its environment occur within the space immediately adjacent to and surrounding its body, its peripersonal space (PPS). This space has been extensively studied behaviorally in humans, and through sparse single-neuron recordings in primates. However, h...

Neural coding of isopentyl acetate alarm pheromone signals in the honey bee brain

Lin, T., Smith, B. H., Lei, H.

2026-08-31

1 min

186 words

BIORXIV NEUROSCIENCE

Summary: Alarm pheromone is a high-priority social signal in honey bees, yet direct evidence for how its major component, isopentyl acetate (IPA), is encoded in antennal lobe remains limited. Here, we combine intracellular recording, neuronal staining, and three-dimensional reconstruction to examine neural r...

Pre-FIB Layer-Mapping Cryo Tomography (PLCT) for Depth-Resolved in Situ Structural Analysis of Multilayered Tissues

Wang, F., Lin, X., Rao, B., Lai, X., Yu, L., Sun, F., Qu, J., Zhang, J.

2026-08-30

1
min

215
words

BIORXIV NEUROSCIENCE

Summary: Cryo-electron tomography (cryo-ET) enables near-native visualization of subcellular architectures, yet applying it to moderately thick, multilayered tissues such as the retina is hampered by inadequate vitrification and inaccurate depth-targeting. Here, we developed PLCT, an integrated approach comb...

Structural generalization and continual learning enabled by factorized entorhinal-hippocampal memory and entorhinal-parietal action circuits

Hwang, J., Neupane, S., Jazayeri, M., Fiete, I.

2026-08-30

1
min

301
words

BIORXIV NEUROSCIENCE

Summary: Flexible behavior requires generalizable memory and learning. For example, we rapidly learn to commute in new cities by reusing our knowledge of Euclidean two-dimensional space and structures like roundabouts and subway systems without forgetting how to get to a favorite restaurant back home. Yet we...

Not All Explanations Are Sought: Information-Seeking Psychology for Human-Centered XAI

Andrea Beretta, Salvatore Rinzivillo2026-08-311184minwords

ARXIV CS HC

Summary: arXiv:2608.27464v1 Announce Type: cross Abstract: This position paper argues that human-centered explainable AI (HCXAI) should incorporate insights from the psychology of information seeking. Drawing on Sharot and Sunstein's framework of information-seeking motives, we propose that people evaluate ...

Between Algorithm (AI) and Intuition (Human): Preserving Designer Agency in AI-Assisted Sensemaking of Qualitative UX Data

Md Haseen
Akhtar

2026-08-31

1
min

178
words

ARXIV CS HC

Summary: arXiv:2608.28420v1 Announce Type: new Abstract: The integration of AI into qualitative design research presents a fundamental tension: how do we leverage AI while preserving the subjective, intuitive judgments that define design expertise? This paper examines this question through a case study of a...

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: Recurrent Neural Networks (RNNs) are widely used to model neural activity in Computational Neuroscience. Here, we explore the mathematical foundations of three fundamental procedures that can be implemented: temporal rescaling, discretization, and linearization. These techniques provide crucial tool...

Descending somatosensory and motor cortical inputs shape auditory processing in the midbrain

Kim, G., Kang, H. Y., Han, J., Sanchez-Valpuesta, M., Lee, J., Kim, S.-G.

2026-08-29

1
min

184
words

BIORXIV NEUROSCIENCE

Summary: Integrating multisensory and behavioral information is essential for sensory perception. In the auditory system, multisensory and behavioral influences emerge early in subcortical structures. Descending projections from non-auditory cortical areas are well positioned to convey such signals, yet how ...

Distinct Patterns of Directed Brain Connectivity in Focused Attention, Open Monitoring, and Loving Kindness Meditation: An Electroencephalographic Granger Causality Study with Long-term Meditators

2026-08-13

1
min264
words

COGNITIVE NEUROSCIENCE

Summary: The present study applied spectral Granger causality (GC) analysis to EEG recordings obtained during focused attention meditation (FAM), open monitoring meditation (OMM), and loving kindness meditation (LKM) in highly experienced meditators. The aim of the investigation was to characterize distinct ...

Spatial Grouping Modulates the Link between Individual Alpha Frequency and Temporal Integration Windows in Crowding

2026-08-13

1
min195
words

COGNITIVE NEUROSCIENCE

Summary: Previous research has linked endogenous alpha oscillations (~7–13 Hz) to temporal integration windows in visual perception, with higher individual alpha frequency predicting improved temporal segregation. Here, we investigated whether alpha-rhythmic temporal integration is a factor in visual crowding...

words

BIORXIV NEUROSCIENCE

Summary: Neurodegenerative diseases, including Alzheimer's disease (AD), are strongly associated with aging. However, the molecular mechanisms underlying pathological brain aging remain incompletely understood. In this study, we used a mouse model of telomere attrition, a major driver of cellular senescence,...

The BAF complex works with FOS to regulate human neuronal activity-dependent ASD-associated gene programs

Trowbridge, S. K., Choi, G., Carter, A. C., Petrocelli, J. E., Robb, J. E., Koreman, G. T., Chen, S., Doan, R. N., Davis, C. P., Harmin, D. A., Griffith, E. C., Karczewski, K. J., Harper, J. W., Greenberg, M. E.

2026-08-27 1 min 216 words

BIORXIV NEUROSCIENCE

Summary: The BAF chromatin remodeling complex is critical to normal brain development, and rare variants within genes encoding BAF subunits are a common genetic cause of neurodevelopmental disorders, including autism spectrum disorder (ASD). Yet the factors that direct BAF binding across the neuronal genome,...

AffectRoute: Role-Structured EEG and Peripheral Physiology for Subject-Independent Affect Regression

zhang, r., Jia, X. 2026-08-27 1 min 275 words

BIORXIV NEUROSCIENCE

Summary: Subject-independent affect regression from physiological signals remains challenging because emotional responses vary substantially across individuals, widely used datasets provide only coarse trial-level annotations, and heterogeneous physiological modalities may not contribute reliably when treated...

Cortical TRPV1 modulates sensory processing through TRPA1-dependent mechanisms

Amrutha, L., Gharaei, S., Sakai, K., Arabzadeh, E., Kheradpezhoh, E.

2026-08-27

1
min

141
words

BIORXIV NEUROSCIENCE

Summary: Transient receptor potential vanilloid 1 (TRPV1) is classically recognised as a peripheral ion channel involved in nociception, but its physiological role in cortical sensory processing remains poorly understood. Here, we investigated whether cortical TRPV1 modulates tactile perception and sensory r...

A conserved serotonin receptor pathway is a druggable modifier of Tau pathology, neural circuit formation and neurodegeneration

Tsap, M. I., Navrotska, V. V., Labus, J., Ponimaskin, E., Yatsenko, A. S., Shcherbata, H. R.

2026-08-27 1 min 162 words

BIORXIV NEUROSCIENCE

Summary: Tauopathies are devastating neurodegenerative disorders characterized by Tau hyperphosphorylation, neurofibrillary tangle (NFT) formation, neuronal dysfunction, and cognitive decline. Here, we establish a new *Drosophila* tauopathy model expressing eGFP-tagged human TauWT or the disease-associated Tau...

Pupil size and pupil change correlate with distinct cortical neurochemical systems across the adult lifespan

Riley, E., De Rosa, E., Anderson, A. K.

2026-08-27 1 min 180 words

BIORXIV NEUROSCIENCE

Summary: Pupillometry is often used as a proxy for locus coeruleus (LC) activity, but whether this relationship changes across the lifespan is unknown, and important to establish due to the known change in LC biology with age. We collected simultaneous pupillometry and multi-echo fMRI in 89 adults aged 19-78...

Developmental NMDA receptor signaling regulates cerebellar unipolar brush cell number and dampens excitability

Hariani, H. N., Pena, G. G., Joshlin, Z. E., Balmer, T. S.

2026-08-26

1
min

241
words

BIORXIV NEUROSCIENCE

Summary: Unipolar brush cells (UBCs) are excitatory interneurons that have a characteristic dendritic brush that amplifies and extends incoming signals in the cerebellum. UBCs transform synaptic input through their ionotropic and metabotropic glutamate receptors. Differential regulation of receptor subunits ...

"Auditory brainstem response latencies, but not amplitudes, are associated with gray matter volumes across the human auditory pathway in older adults"

San-Martin, S., Aedo, C., Vidal, V., Leiva, A., Delgado, C., Delano, P. H., Medel, V.

2026-08-26

1 min 394 words

BIORXIV NEUROSCIENCE

Summary: Introduction: Auditory brainstem responses (ABRs) are routinely used to assess neural timing and function along the auditory pathway. In older adults, however, peripheral hearing loss, central auditory dysfunction, and broader structural changes in the brain may converge to shape the recorded respon...

CViT-ESP: Lightweight Pre-trained Vision Transformers for EEG-based Epileptic Seizure Prediction

Mohammad, U., Parani, P., Saeed, F.

2026-08-26

1 min 229 words

BIORXIV NEUROSCIENCE

Summary: Background and Objective Epileptic seizure prediction is a critical challenge requiring the discrimination of subtle preictal physiological changes from interictal brain activity. While deep learning has shown promise in this domain, existing models often face limitations due to small EEG datasets, ...

Preferential innervation of endometriosis by hyperexcitable Ret/GFR α 1+ nociceptors associates with target GDNF and clinical pain

Dourson, A., Fluegel, M., Kim, A., Mwirigi, J., Morales, M. E., Borja, R., Golden, J., Bardawil, E., Ross, W., Nahman-Averbuch, H., Gereau, R.

2026-08-26 1 min 189 words

BIORXIV NEUROSCIENCE

Summary: Endometriosis is a prevalent condition characterized by chronic pelvic pain that is frequently refractory to treatment. While the mechanisms underlying this pain remain poorly defined, clinical evidence often indicates that lesion innervation, but not disease stage (e.g. number and depth of lesions)...

Acupuncture-related peripheral stimulation as a candidate neuromodulatory model of insomnia: clinical evidence, sleep-wake circuitry, and translational limits

Penglong
Yu

2026-08-26

1
min

190
words

FRONTIERS NEUROSCIENCE

Summary: Acupuncture-related peripheral stimulation is often discussed as a non-pharmacological option for insomnia disorder, but its relevance to sleep neuroscience depends on more than improvement in sleep questionnaires. This critical narrative Review evaluates whether acupuncture and related acupoint-bas...

Development and validation of highly selective monoclonal antibodies for the detection of huntingtin neopeptides

Doherty, E. M., Missineo, A., Tomei, L., Alaimo, N., Martufi, P., Zavattieri, M., Colicchia, V., Cariulo, C., Fodale, V., Seguin, J., Esquina, C., Huang, N., Wu, H.-Y., Pace, J., Phillips, J., Landles, C., Dominguez, C., Munoz-Sanjuan, I.

2026-08-26

1
min

282
words

BIORXIV NEUROSCIENCE

Summary: Huntington's disease is caused by a CAG repeat tract expansion in the huntingtin gene, resulting in production of pathogenic N-terminal huntingtin protein fragments associated with disease pathology. Despite their central role, detection of these fragments has relied on a limited antibody repertoire...
