Dietary magnesium supplement enhances memory through Hippo signaling

 Wu, Y., Treiber, C. D., Waddell, S.

 2026-10-08  1 min  190 words

BIORXIV NEUROSCIENCE

Summary: Dietary magnesium (Mg²⁺) supplement enhances memory in mammals and *Drosophila*, but whether and how Mg²⁺ changes molecular states of neurons, remains unknown. Here we used single-cell RNA sequencing to map cell-type specific transcriptional responses to memory-enhancing dietary Mg²⁺. These analyses r...

Season-long head acceleration exposure, prior contact-sport history, and cognitive performance in British amateur American football players

 Weightman Potter, P. G., Rose, E., Tolliday, N., Bond, B.

 2026-10-07  1 min  257 words

BIORXIV NEUROSCIENCE

Summary: Background: Head acceleration events (HAEs) are common in contact sports, but season-long exposure and its relationship with cognitive performance in amateur British American football remain poorly characterised. Methods: Thirty male players were recruited from three British American football teams....

A research on the typical images of animals in the dreams of Naxi.

 2026-09-10  1 min  157 words

DREAMING

Summary: Animal images in dreams have long been studied, yet existing research is not systematic or in-depth. The Naxi, a small Chinese ethnic group (about 320,000), possess a rich cultural heritage. In their belief, animals mediate between humans, deities, and nature, while dreams are key communication chan...

Successor representation supports structural learning of syllable sequences

Liu, J., Wang, Y., Feng, J., Zhao, H., He, Q., Yang, X., Liang, B.

2026-10-06

1 min

154 words

BIORXIV NEUROSCIENCE

Summary: Humans efficiently learn the temporal structure of speech, yet the underlying cognitive mechanisms remain unclear. Recent research in visuospatial sequential memory has proposed the successor representation (SR), important in reinforcement learning, which encodes multi-step transitional relationship...

Latent dentate gyrus engrams formed in infancy scaffold adult learning

Haar, S., McKenzie, C., Josselyn, S., Frankland, P.

2026-10-06

1 min

135 words

BIORXIV NEUROSCIENCE

Summary: Infantile amnesia refers to the loss of event-based memories acquired early in life. In mice, however, these memories are not erased; selective optogenetic stimulation of engrams formed in infancy leads to memory recovery in adulthood, indicating that infant-formed engrams can persist in a latent fo...

words

FRONTIERS NEUROSCIENCE

Summary: Introduction Spinal cord injury (SCI) causes substantial motor impairment, driven by neuronal loss, axonal disruption, and impaired synaptic connectivity. Temporal interference (TI) stimulation is capable of modulating neural activity, but its therapeutic potential in SCI remains largely unexplored. ...

MSANet: a multi-scale spatiotemporal adaptive network for EEG-based driver fatigue recognition

 Xiaosong
Peng

 2026-10-06

 1
min

 219
words

FRONTIERS NEUROSCIENCE

Summary: Electroencephalography (EEG)-based driver fatigue recognition remains challenging because fatigue-related patterns are distributed across multiple temporal scales, inter-channel relationships vary across samples, and inter-individual differences complicate cross-subject transfer. To address these is...

Mixed emotions evoked when incongruent outward appearance and motion are combined

 Hiroshi Yamada

 2026-10-06

 1 min

 178 words

FRONTIERS NEUROSCIENCE

Summary: Understanding mixed emotions is crucial for capturing the ambivalence of human information processing. However, how specific visual factors, such as outward appearance and motion, interact to evoke these conflicting feelings remains unclear. Here, we present three-dimensional (3D) characters as visu...

An open-set learning framework for EEG-based sleep stage classification

Qiunan Feng, Chang Li, Hu Peng, Heyuan Qiao, Rencheng Song and Xun Chen

2026-09-27

1
min

175
words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Existing sleep stage classification methods generally rely on a closed set assumption. They assume all sleep categories are predefined, which overlooks unknown sleep patterns encountered in real world electroencephalogram (EEG) analysis. This study overcomes this constraint by identifying...

Asymmetric Adaptation of Catch-up Saccades with Artificial Central Scotomas

 Dore, S., Black, J., Blohm, G., Khan, A. Z.

 2026-10-05  1 min

 272 words

BIORXIV NEUROSCIENCE

Summary: In fully-sighted individuals, pursuit and saccadic eye movements work together to foveate moving targets; pursuit attempts to match target velocity, while catch-up saccades re-align the fovea to the target if it deviates during pursuit. Although saccade-pursuit interactions are well understood in he...

Magnetic Field Enhanced Docosahexaenoic Acid Delivery for Acetylcholine Restoration in Alzheimers Disease an In Silico Study

 Dasgupta, M., Konar, A., Nagar, A. K.

2026-10-05

1 min

249 words

BIORXIV NEUROSCIENCE

Summary: Alzheimers Disease (AD) is characterised by the progressive depletion of Acetylcholine (ACh), a neurotransmitter essential for cognition and synaptic communication. Docosahexaenoic acid (DHA), the predominant omega 3 polyunsaturated fatty acid in neuronal membranes, raises cerebral ACh and supports ...

Distinct EEG microstate signatures across different pain types

Rabiei, P., champagne, a., Barrette, L.-E., Fakhry, N., Masse-Alarie, H., Coll, M.-P.

2026-10-05

1
min

247
words

BIORXIV NEUROSCIENCE

Summary: Pain is associated with dynamic brain reorganization. Electroencephalographic microstates can characterize transient large-scale brain states, yet findings across pain studies are inconsistent. Two features may contribute: conditions have been studied in isolation, and analytical pipelines vary wide...

Decoding Spikes From Multiunit Data

 2026-01-22  1 min  250 words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Communication and control in biological systems is mediated by the timing of discharges –spikes– from excitable cells such as neurons and muscle fibers. Each spike is associated to a characteristic waveform that can be captured by sensors. The waveform's characteristics depend on the cell's biophysi...

BIORXIV NEUROSCIENCE

Summary: TAR DNA-binding protein-43 (TDP-43) alterations are a key hallmark of amyotrophic lateral sclerosis (ALS), frontotemporal dementia (FTD), and other neurodegenerative disorders. Increasing evidence links these conditions to viral infections, but it is not known if and how viral pathogens may be affected...
