The limbic navigation system as a hierarchical RNN

👤 Ji, Z., Zhang, H., Gorantla, K., Burgess, N.
📅 2026-10-21 📖 1 min 📝 184 words

BIORXIV NEUROSCIENCE

Summary: Path-integration-trained recurrent neural networks (RNNs) can reproduce grid-like and head-direction-like representations, but most existing models rely on low-dimensional velocity inputs and do not capture the hierarchical organisation of the brain's self-localisation circuit. We introduce a hierar...

Opposing reward-epoch population coding in anterior insular cortex dissociates sign- and goal-tracking despite equivalent conditioned responding

👤 Keefer, S. E., Martin, D. A., Calu, D. J.
📅 2026-10-21 📖 1 min 📝 248 words

BIORXIV NEUROSCIENCE

Summary: When Pavlovian lever cues predict reward, rats diverge in how they express learned associations: sign-tracking (ST) rats approach and engage the cue with greater persistence, while goal-tracking (GT) rats approach the reward site and are more consistently outcome-sensitive. The anterior insular cort...

Function-oriented microglial transcriptional scores in Alzheimer's disease: resolving terminal functions beyond activation states

Tu, A., Liu, S.
2026-10-21 1 min 192 words BIORXIV NEUROSCIENCE

Summary: Alzheimer's disease (AD) staging based on amyloid-{beta}, tau, and neurodegeneration does not capture heterogeneous microglial functions. Existing transcriptomic scores indicate microglial activation or state similarity but do not resolve post-activation functions and are not directly comparable acr...

Glymphatic System Is Enhanced in Anti-NMDAR Encephalitis and Facilitates Antibody Influx and Clearance in the Brain

Wang, D., Liu, J., He, F., Liang, Y., Guo, Y., Zhang, Y., Chen, D., Xu, Z., Wu, Y., XU, K.
2026-10-21 1 min 304 words BIORXIV NEUROSCIENCE

Summary: ABSTRACT Background: Anti-N-methyl-D-aspartate receptor (anti-NMDAR) encephalitis is an antibody-mediated neuroinflammatory disease. How pathogenic autoantibodies enter and are cleared from the brain parenchyma remains poorly understood. The glymphatic system (GS) mediates cerebrospinal fluid (CSF)-...

A new epigenetic framework for DNA methylation, hydroxymethylation, and gene expression during brain aging.

👤 Ocanas, S. R., Hoolehan, W., Pham, K. D., Wright, C. T., Tooley, K. B., Ansere, V., Machalinski, A. H., Stanford, D. R., Kulpa, A., Ray, H., Kellogg, C. M., Huffman, D. M., Richardson, A. G., Stout, M. B., Beckstead, M. J., Chucair-Elliott, A. J., Kirkland, J. G., Freeman, W. M.

📅 2026-10-21 📖 1 min 📝 195 words BIORXIV NEUROSCIENCE

Summary: DNA modifications are epigenetic marks added directly to DNA bases that can stably or dynamically regulate gene expression, allowing cells to maintain their identity while also having flexibility to adapt to changes in their environment1. Aging is often thought to disrupt this regulation, causing ce...

Distinct spatial organization of human hippocampal perfusion and microvascular pulsatility across age

👤 Guo, F., Kim, A. J., Zhao, C., Dong, T., Liu, Z., Yang, Z., Jann, K., Shao, X., Jahanshad, N., Mather, M., Wang, D. J.

📅 2026-10-21 📖 1 min 📝 165 words BIORXIV NEUROSCIENCE

Summary: Arterial pulsation can modulate neuronal activity through mechanosensitive pathways in mice, but whether vascular pulsatility is similarly related to neural organization in humans remains unclear. Here, using 7T MRI in 35 young and older adults, we mapped cerebral perfusion and microvascular volumet...

Activity-gated exocytosis drives myelin remodeling required for adult learning

Lam, M., Dehtiarov, O., Geraghty, A. C., Yalcin, B., Duan, L., Iyer, M., Schuster, K. H., Monje, M., Hughes, E. G., Zuchero, J. B.

2026-10-21 1 min 133 words BIORXIV NEUROSCIENCE

Summary: Myelin remodeling is emerging as a dynamic facet of plasticity in the adult brain. Learning and sensory experience induce remodeling of existing myelin sheaths through incompletely understood mechanisms, leaving its causal contribution to adaptive behaviors unclear. Here, we identify activity-depend...

Generalized prefrontal task-progress sequences efficiently encode task structure

Tarahi, O., Koshy, K., Sauer, J.-F.

2026-10-21 1 min 143 words BIORXIV NEUROSCIENCE

Summary: The medial prefrontal cortex (mPFC) occupies a central role in executive function including decision-making, rule learning and cognitive flexibility. Here, we investigated how mPFC populations represent the animal's progression along sequential task stages. Freely moving mice performed an odour-guid...

PODXL regulates the neuronal entry of α-synuclein aggregates

Neupane, S., Sustic, L., Maraio, L., Bouris, V., Mariutti, G., Ribeiro, R., Yin, J.-A., Melki, R., Legname, G., De Cecco, E., Aguzzi, A.

2026-10-21 1 min 192 words BIORXIV NEUROSCIENCE

Summary: Cell-to-cell transmission of -synuclein (-Syn) aggregates is a key event in Parkinson's disease (PD) pathogenesis, yet the neuronal surface factors that govern uptake of pathogenic -Syn fibrils remain undefined. We developed a flow cytometry-based CRISPR activation screen for modifiers of -Syn prefo...

Spontaneous brain-wide rotational dynamics constrain cue-evoked behavior

Chen, S., Xu, Y., Gökmen, D. E., Fruchart, M., Doiron, B., Vitelli, V.

2026-10-21 1 min 233 words BIORXIV NEUROSCIENCE

Summary: Uncovering low-dimensional representations of brain-wide neural dynamics and their relationship to behavior remains a central challenge. Here, we show that spontaneous brain-wide rotational dynamics constrain cue-evoked behavior and learning. To systematically establish these findings, we developed ...

What should AI forget? A design and taxonomy for negative space governance in AI memory

👤 Eryue Xu, Ke Ding, Ting-Yu Chang, Tianshi Li, Masooda Bashir

📅 2026-10-21 📖 1 min

📝 149 words

ARXIV CS HC

Summary: arXiv:2610.27607v1 Announce Type: new Abstract: AI memory personalizes assistants, yet users want some disclosed information forgotten. We characterize the negative space of AI memory, where protection should take precedence over potential future personalization benefits. From 179 incidents reporte...

Comparing re-referencing methods for human intracranial EEG

Kolibius, L. D., Parish, G., van der Plas, M., Ter Wal, M., Rollings, D., Gollwitzer, S., Walther, K., Hopfengärtner, R., Hamer, H., Wimber, M., Hanslmayr, S.

2026-10-20 1 min 237 words BIORXIV NEUROSCIENCE

Summary: Stereo-electroencephalography (SEEG) involves the implantation of depth electrodes in the brain to monitor epileptic seizures for surgical feasibility. As the electrodes advance into deeper limbic structures, the macro contacts distributed along the shaft record electrical activity from more lateral...

Dietary vitamin B5 positively regulates intestinal neuropeptide secretion in C. elegans

Jia, Q., Calof, A., Sieburth, D.
2026-10-20 1 min 190 words

BIORXIV NEUROSCIENCE

Summary: Vitamin B5 is an essential vitamin that must be acquired via diet or by the gut microbiota, and vitamin B5 deficiency or altered vitamin B5 metabolism leads to a variety of physiological and neuronal disorders. We conducted a genetic analysis of the effects of exogenous vitamin B5 in C. elegans, and...

A community benchmark enables high-resolution, cross-lab quantification of mouse social behavior

Marks, M., Yang, R., Liu, Z., Ye, R., Scaria, L. K., Golden, S. A., Sun, J. J., Pereira, T., Kennedy, A., The Days of our Mice Consortium

2026-10-20 1 min 125 words BIORXIV NEUROSCIENCE

Summary: Social behavior is a sensitive readout of brain state, but quantifying rodent social behavior at scale has relied on siloed, lab-specific tools. We assembled Days of our Mice (DooM), a benchmark of manually annotated video and pose tracking spanning 15 laboratories and 33 social and solitary behavio...

Infantile amnesia results from differential memory retrieval in humans

Power, S. D., Werwach, A., Peikert, A., Fey, M., Forbes-Mitchell, T., Hild, J., Buss, C., Lindenberger, U., Ryan, T. J., Werkle-Bergner, M.

2026-10-20 1 min 233 words BIORXIV NEUROSCIENCE

Summary: Infantile amnesia, the inability to recall memories from our earliest years, is the most common form of forgetting in mammals. Whether early memories never form, decay, or persist but become inaccessible remains unknown. Here, we investigated the nature of forgetting during the infantile amnesia per...

Intracranial Evidence for the Cerebellum’s Role in Semantic Processing

📅 2026-10-19 📖 1 min 📝 159 words COGNITIVE NEUROSCIENCE

Summary: Language impairments in patients with cerebellar damage or dysfunction strongly implicate the cerebellum in language processing but the nature, timing, and specificity of its contributions are unclear. A clinical trial of cerebellar stimulation for motor recovery after middle cerebral artery stroke ...

Neural Distinctions between Social and Nonsocial Reward Anticipation: An Examination of Activation Magnitude, Representational Patterns, Individual Differences, and Functional Connectivity

📅 2026-10-19 📖 1 min 📝 235 words COGNITIVE NEUROSCIENCE

Summary: Prevailing theories emphasize a “common neural currency” for social and nonsocial rewards, particularly during reward anticipation. However, direct comparisons of social and nonsocial reward anticipation remain limited, and clinical observations suggest that social reward processing can be selective...

Exploring Neural Mechanisms Underlying Error-related Impairments in Active Working Memory Suggests an Adaptive Shielding of Contents during Cognitive Control

📅 2026-10-19 📖 1 min 📝 302 words COGNITIVE NEUROSCIENCE

Summary: Goal-directed behavior relies on cognitive flexibility—the ability to rapidly adapt ongoing thoughts and behaviors while preserving task-relevant information. The performance monitoring system optimizes such behavior by detecting and evaluating errors, whereas the working memory (WM) system maintain...

Alignment of visual brain encoding models with individual perceptual similarity judgments

Daniel Chong, Haomiao Chen, Keith W Jamison, Raja Marjieh, Ilia Sucholutsky, Nori Jacoby, Amy Kuceyeski

2026-10-19 1 min 245 words ARXIV QBIO NC

Summary: arXiv:2610.22569v1 Announce Type: new Abstract: Encoding models that predict brain activation responses to images have traditionally been trained to maximize accuracy when predicting observed brain data. However, their internal representations may not reflect individual human perception. In this wo...

Spatiotemporal transcriptomic dynamic across the auditory pathway from young to old age in 5xFAD Alzheimer disease mice

Kong, Y., Zhai, T.-Y., Zhao, H.-B.

2026-10-18 1 min 248 words BIORXIV NEUROSCIENCE

Summary: Auditory dysfunction can precede clinical dementia, but the molecular progression of Alzheimer disease (AD) pathology from the sensory periphery to auditory cortex remains poorly resolved. We performed bulk RNA sequencing of auditory cortex (AC), inferior colliculus (IC), cochlear nucleus (CN), and ...

Long-Range Glutamatergic Projections Target Hippocampal Cajal-Retzius Cells Through Atypical Receptor Signaling

👤 Moan, K., Quattrocolo, G.
📅 2026-10-18 📖 1 min 📝 186 words
BIORXIV NEUROSCIENCE

Summary: Cajal-Retzius (CR) cells are a population of early-born, transient neurons that serve an indispensable role during embryonic brain development. Postnatally, most CR cells undergo programmed cell-death, except in a few areas, including the hippocampus, where they persist until adulthood. The hippocam...

Brain-thought states during movie-watching reflect shared sensory anchors and film- and person- specific processes in association cortex

👤 Wallace, R. S., Hardikar, S., Ketcheson, S., Mulholland, B., Goodall-Halliwell, I., Mckeown, B., Chitiz, L., Milham, M., Xu, T., Margulies, D. S., Ho, N., Karapanagiotidis, T., Poerio, G., Gonzalez-Alam, T., Turnbull, A., Skipper, J. I., Bernhardt, B., Leech, R., Wammes, J., Jefferies, E., Smallwood, J.

📅 2026-10-17 📖 1 min 📝 244 words BIORXIV NEUROSCIENCE

Summary: Naturalistic paradigms such as movie-watching have transformed functional neuroimaging by capturing cognitive dynamics during rich, real-world experiences. A fundamental challenge, however, is determining whether the neural signatures identified during these experiences reflect general principles of...

Neural categorisation of rhythm in human newborns

👤 Barbero, F. M., Lenc, T., Gallard, A., Jacoby, N., Polak, R., Varlet, M., Foulon, A., Moghimi, S., Nozaradan, S.

📅 2026-10-17 📖 1 min 📝 200 words BIORXIV NEUROSCIENCE

Summary: Music is ubiquitous across cultures, and humans engage in social interactions through music from early in life. A cornerstone of these interactions is rhythm categorisation, allowing the sheer diversity of rhythmic inputs to be mapped onto internal rhythm categories. The pervasiveness of certain rhy...

Longitudinal associations between task-control network functioning, cognition, and the environment in early adolescence

Paige, K. J., Michael, C., Molloy, M. F., Kardan, O., Angstadt, M., Sripada, C., Hyde, L., Heitzeg, M., Weigard, A.

2026-10-18 1 min 250 words BIORXIV NEUROSCIENCE

Summary: Neural maturation in the "task-control" frontoparietal and dorsal attention networks is thought to support the development of adolescents' cognitive and adaptive functioning. Further, theory suggests that family and neighborhood contexts shape brain network development. Yet, few longitudinal studies...

Prior visual context accelerates the emergence of object representations

Clarke, A., Gu, Y., Krugliak, A.
2026-10-16 1 min 149 words BIORXIV NEUROSCIENCE

Summary: Our knowledge about how the world is structured allows for predictions about what objects we might see next. Visual context is known to impact the perception of subsequent objects, but we do not know what context does to the mental representation of those objects. Using MEG, we tested how a scene co...

Delayed maturation of hippocampal trisynaptic circuitry underlies the protracted development of episodic-like memory

McKenzie, C., Ramsaran, A. I., Saderi, M., Haar, S., Josselyn, S. A., Frankland, P. W.
2026-10-16 1 min 121 words BIORXIV NEUROSCIENCE

Summary: The ability to form high-resolution episodic memories emerges relatively late in development, but the circuit mechanisms underlying this transition are unknown. CA1 receives entorhinal input through a direct monosynaptic pathway and an indirect trisynaptic pathway via the dentate gyrus and CA3. In m...

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Fast and accurate decisions are fundamental for adaptive behavior. Theories of decision-making posit that evidence in favor of different choices is gradually accumulated until a critical value is reached. It remains unclear, however, which aspects of the neural code get updated during evidence ac...

Regional Brain Structural Changes During the Transition from Acute to Chronic Neuropathic Pain: A Longitudinal Study in a Rat Model of Orofacial Pain

👤 Doshen, A., Crawford, L. S., Kang, J. W. M., Salberg, S., Macey, P. M., Mychasiuk, R., Barry, J., Keay, K. A., Henderson, L. A.

📅 2026-10-14 📖 1 min 📝 254 words JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Brain imaging studies have identified structural alterations in individuals with chronic neuropathic pain, particularly in regions involved in sensory, emotional, and cognitive processing. However, most studies remain cross-sectional, leaving the temporal progression of these changes during pain ...

Corticotropin-Releasing Hormone Differentially Modulates GABA and Non-GABA Nucleus Tractus Solitarii Neurons

Gama de Barcellos Filho, P., Dantzler, H. A., Brumfield, J., Wright, H. R., Cummings, K. J., Hasser, E. M., Kline, D. D.

2026-10-14 1 min 249 words JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Peripheral cardiorespiratory reflexes respond to various stressors and are processed in the brainstem nucleus tractus solitarii (nTS). The paraventricular nucleus of the hypothalamus is reciprocally connected to the nTS and influences cardiorespiratory function partly through corticotropin-releas...

Beta Oscillations and Pupil-Linked Arousal Regulate the Updating of Cognitive Models

Marshall, C. R., Wang, M., Lawrance, E. L., Kolling, N., OReilly, J. X.

2026-10-14 1 min 205 words JOURNAL NEUROSCIENCE CURRENT

Summary: <p>The beta rhythm (neural oscillations in the range 13–30 Hz) is associated with the control of movement. Discrete movements (such as a button press) are bounded by a premovement dip in beta power and a postmovement beta rebound, which are thought to release and terminate the action, res...

Individualized Network Topography in Pre-adolescent Children and Adults Using Naturalistic Precision fMRI

Rai, S., Godfrey, K. J., Graff, K., Tansey, R., Merrikh, D., Yin, S., Feigelis, M., Demeter, D. V., Vanderwal, T., Greene, D. J., Bray, S.

2026-10-14 1 min 221 words JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Group-averaged network definitions, commonly used in developmental functional connectivity research, limit our understanding of how network topography may change with age and can lead to inaccurate estimates of age effects on intra- and inter-network functional connectivity. Here, we collected a ...

Late Cross-Modal Biases in Neural Spatial Representations Revealed by EEG Decoding

Buhmann, Z., Robinson, A. K., Mattingley, J. B., Rideaux, R.

2026-10-14 1 min 188 words JOURNAL NEUROSCIENCE CURRENT

Summary: <p>During audiovisual perception, spatial information from vision and audition is combined, often producing biases such as the ventriloquist effect. While these interactions are well documented behaviorally, it remains unclear when cross-modal information begins to alter modality-specific spatial re...
