A Point-of-Prescription Safety-Check System for Adverse Drug Reactions in Rural Bangladeshi Hospitals: A Feasibility Study

Shahir
Abdullah

2026-08-28

1
min

216
words

ARXIV CS HC

Summary: arXiv:2608.27239v1 Announce Type: new Abstract: Adverse drug reactions (ADRs) are a major, largely preventable source of patient harm. In high-income settings, electronic health records store a patient's allergy history and warn prescribers when a contraindicated drug is ordered; in rural Banglades...

Surrounded by Friends: Design and Evaluation of Immersive Layouts of Egocentric Network for Visual Analytics

Kentaro Takahira, Takanori Fujiwara, Wong Kam-Kwai, Kento Shigyo, Leni Yang, Hiroaki Natsukawa, Yalong Yang, Huamin Qu

2026-08-28

1
min

180
words

ARXIV CS HC

Summary: arXiv:2608.27194v1 Announce Type: new Abstract: This paper explores design considerations for egocentric network layouts in immersive environments, providing fresh empirical insights that enhance egocentric network analysis. An egocentric network focuses on the topological and semantic relationship...

Network Models of Neurodegeneration: Bridging Neuronal Dynamics and Disease Progression

2026-01-16

1
min196
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Neurodegenerative diseases are characterized by the accumulation of misfolded proteins and widespread disruptions in brain function. Computational modeling has advanced our understanding of these processes, but efforts have traditionally focused on either neuronal dynamics or the biological processes...

2026-08-26

1 min
190 words

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Oral mechanosensation underlies feeding, speech, and grooming, yet our understanding of the neurons and their terminals in the oral cavity remains limited. The trigeminal ganglion (TG) and geniculate ganglion (GG) provide mechanosensory innervation to the tongue, but their individual contribution...

A Human-Factors Guided Cognitive Model of Visuospatial Complexity in Embodied Active Vision

Vasiliki Kondyli, Jakob Suchan, Mehul Bhatt

2026-08-26

1
min

225
words

ARXIV QBIO NC

Summary: arXiv:2608.23572v1 Announce Type: new Abstract: We propose a novel framework for the analysis of multimodal data -- encompassing visual, auditory, and spatial stimuli -- foregrounding the role of complexity in embodied perception and interaction in dynamic, naturalistic settings. Grounded in theori...

Biophysical Characterization of the human Nav1.9 sodium channel in trigeminal ganglia and dorsal root ganglia neurons

Shi, Y. P., Cotta, T., Orozco, I., Chen, F., Miron, Y., Kondo, R., Chapman, M. L., Krafte, D. S., Ghetti, A., Carlin, K. P.

2026-08-25 1 min 268 words

BIORXIV NEUROSCIENCE

Summary: In human dorsal root ganglia (DRG), and trigeminal (TG) neurons, the various voltage-gated sodium channel (Nav) isoforms play critical roles in the firing of action potentials, which drive electrical impulses that encode somatosensations including, itch, and pain. The SCN11A gene encodes the tetrodo...

Sex Chromosomes and Gonadal Hormones Contribute to B Cell Antibody Responses in Aging and Alzheimer's Disease

Zuppe, H., Casali, B., Reed, E.

2026-08-25 1 min 158 words

BIORXIV NEUROSCIENCE

Summary: It is increasingly appreciated that B cell populations in the brain shift during aging and Alzheimer's Disease (AD), contributing to neuroinflammation and cognitive decline. Though the underlying mechanisms remain unclear, biological sex is likely a key regulator since differences in B cell antibody...

Structural integrity of auditory-linguistic brain networks varies with cognitive status and accounts for speech-in-noise deficits across the adult lifespan

Bidelman, G. M., Stirn, J., Eisenhut, Z., Borowski, L., Shin, C., Lewis, E., Zhou, M., Shah, P., Doty, A., MacLean, J., Rizzi, R.

2026-08-25 1 min 311 words

BIORXIV NEUROSCIENCE

Summary: Difficulties in speech-in-noise (SIN) comprehension are ubiquitous in the aging process. There is now growing evidence that declines in hearing function might also accelerate early cognitive decline in older listeners. Older adults' poorer SIN abilities are related to abnormal neural representations...

Neuronal quantification in the primary motor cortex of mouse brains fixed with solutions from human gross anatomy laboratories

Gerin-Lajoie, A., Frigon, E.-M., Adame-Gonzalez, W., Dadar, M., Boire, D., Maranzano, J.

2026-08-25 1 min 312 words

BIORXIV NEUROSCIENCE

Summary: Background: Brain banks usually provide small tissue blocks fixed by immersion in neutral-buffered formalin (NBF). While still underexploited for research, gross anatomy laboratories could provide full brains fixed by perfusion with solutions better suited for gross anatomy dissection. However, the ...

Information Flow and Traveling Waves show distinct cortical trajectories

Alamia, A., Grimaldi, A., Canales-Johnson, A., Komatsu, M., Chavane, F., Vinck, M.

2026-08-25

1 min 145 words

BIORXIV NEUROSCIENCE

Summary: Traveling waves (TWs) are a hallmark of cortical dynamics, proposed to organize neuronal activity across space and time. Yet their propagation can oppose the causal flow of information, challenging their functional interpretation. We demonstrate this using computational simulations and validate our ...

C. elegans Nuclear Hormone Receptor NHR-49 promotes attractive chemotaxis independently of its role in fatty acid metabolism

Wu, J. T. W., Ermakova, G., Yan, J., Kepler, L. D., Zhang, M. E., Wang, Y. K. O., Liu, Y., Rankin, C., Taubert, S.

2026-08-24 1 min 237 words

BIORXIV NEUROSCIENCE

Summary: All organisms must sense and adapt to environmental cues to survive and thrive. In the nematode worm *Caenorhabditis elegans*, the nuclear hormone receptor *nhr-49* is required for lipid homeostasis, stress resilience, pathogen defense, and longevity. In addition, recent studies suggest that NHR-49 cont...

BEHAVIORAL NEUROSCIENCE

Summary: The hippocampus plays a critical role in contextual learning and memory processes. The ability to associate memories and behaviors with the learning context likely involves interactions between the hippocampus and other brain regions where the basic elements of the memory may be encoded. Here, we ex...

Remodeling oligodendrocyte lipid metabolism via liver X receptors overcomes inflammatory blockade of remyelination

Lee, J. J., Smith, M. D., Deng, X., Hu, J., Love, A., Jing, J. S., Gharibani, P., Deme, P., Mohammadnia, A., Cui, Q.-L., Chitsaz, D., Dhukhwa, A., Gonzalez Cardona, J., Fitzgerald, K. C., Harrington, C. A., Chamling, X., Antel, J. P., Haughey, N. J., Calabresi, P. A., Kornberg, M. D.

2026-08-15

1
min

218
words

BIORXIV NEUROSCIENCE

Summary: Multiple sclerosis is characterized by immune-mediated demyelination and inefficient remyelination, owing to impaired differentiation of oligodendrocyte precursor cells (OPCs) into myelinating oligodendrocytes (OLs). Inflammatory cytokines within multiple sclerosis lesions inhibit OPC maturation and...

Brain State Dynamics and Developmental Differences in Reading Comprehension

Zhang, J., Liu, L., Chen, J., Zhao, N., Li, H., Yang, X., Meng, X., Ding, G.

2026-08-20

1
min

204
words

BIORXIV NEUROSCIENCE

Summary: Reading comprehension is a complex cognitive task that involves dynamic interactions between the brain and external information. Previous studies on reading development primarily focused on localized or static brain activities. However, it remains an enigma how brain state dynamics evolve with devel...

Oxytocin promotes advantageous inequity preference by modulating the fairness norm enforcement system

Yao, S., Qing, Y., Wang, J., Zhang, Y., Lin, H., Zou, H., Zhang, Q., Kendrick, K. M.

2026-08-20

1
min 199
words

BIORXIV NEUROSCIENCE

Summary: Aversion to inequity is innate in humans and constitutes a major contributor to social tension. Such aversion can be triggered either when one receives more (advantageous inequity-AI) or less (disadvantageous inequity-DI) than others. However, it remains unclear whether oxytocin can modulate how hum...

Nucleus reuniens is organised as parallel circuits rather than a prefrontal-hippocampal relay

Passlack, J., Valentinova, K., MacAskill, A. F.

2026-08-20 1 min 158 words

BIORXIV NEUROSCIENCE

Summary: Interactions between the prefrontal cortex (PFC) and hippocampus (HPC) are crucial for flexible and memory guided behaviour. Because there are no direct projections from PFC to HPC, it is widely presumed that information is shared through a disynaptic projection via the nucleus reuniens (nRE), a ven...

REDDIT PYTHON

Summary: <!-- SC_OFF --><div class="md"><p>Hi everyone,</p> <p>I'm learning OSINT and Python from Android, and recently I've been experimenting with HikerAPI together with an Osintgram-based project using Termux.</p> <p>My goal was to see how practical it would be to work with an Instagram API directly from ...
