Decoding Spikes From Multiunit Data

2026-01-22

1
min

250
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Communication and control in biological systems is mediated by the timing of discharges –spikes– from excitable cells such as neurons and muscle fibers. Each spike is associated to a characteristic waveform that can be captured by sensors. The waveform's characteristics depend on the cell's biophysi...

Cue-guided performance is disrupted during pedunculotegmental-induced motor arrest

Bonfils, M., Larsen, S., Sorensen, R., Burm, H., Sobriel, K., Houser, G., Dmytriyeve, O., Tano, M., Berg, R. W.

2026-07-13 1 min 150 words

BIORXIV NEUROSCIENCE

Summary: Optogenetic stimulation of the rostral pedunculotegmental nucleus (PTg) induces global motor arrest, but it remains unclear whether this is merely a suppression of motor activity or a broader disruption of brain processes required to guide action. We developed a visuospatial cue task for rats, to te...

From Sight to Touch: Haptic Sensory Integration Can Facilitate Multi-Limb Coordination

2026-02-16

1
min283
words

TRANSACTIONS HAPTICS

Summary: Humans possess an innate ability to seamlessly coordinate movement across multiple limbs, whether driving a motor vehicle, playing a musical instrument, or performing other daily tasks. Here, supplemental sensory information, such as haptic feedback, can enhance this coordination in applications ran...

Lightweight Wearable Fingertip Haptic Device With 3-DOF Directional Force Feedback Based on Fingernail Stimulation

2026-02-25

1
min150
words

TRANSACTIONS HAPTICS

Summary: Wearable haptic devices face a trade-off between providing rich feedback and preserving natural fingertip sensation. Current multi-DOF systems encumber the fingerpad, interfering with fingerpad sensory capabilities, while lightweight devices offer limited 1-DOF feedback. To address this, we present ...

Compelling People to Move: Recent Progress in Haptic Technologies for Human Motion Induction in IEEE Transactions on Haptics

2026-05-18

1
min164
words

TRANSACTIONS HAPTICS

Summary: Inducing human motion through haptic feedback is a long-standing objective in haptics research. Traditionally, such interaction has relied on mechanical systems that physically apply forces to the body using motors, linkages, or grounded devices. However, recent studies published in IEEE Transaction...

FRONTIERS HUMAN NEUROSCIENCE

Summary: Introduction Electroencephalography (EEG) is commonly used in neuroscience to study cognitive and emotional processes, often showing functional lateralization. Alpha asymmetries are frequently interpreted as a reverse marker of functional asymmetries in cognitive activation. However, the role of moto...

BIORXIV NEUROSCIENCE

Summary: Amyotrophic lateral sclerosis (ALS) is a fatal neurodegenerative disease whose diagnosis often remains delayed. Skeletal muscle is increasingly recognized as an early contributor to ALS pathology. Using lipid imaging mass spectrometry (LIMS) in Tibialis anterior muscle from hSOD1G93A mice across dis...

Perceptual distortions in PredNet and quantification of top-down/bottom-up flow

Yuichi
Yamashita

2026-07-07

1
min

177
words

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: Perceptual distortions are widely observed in various psychiatric diseases, including Autism Spectrum Disorder (ASD). Recent Bayesian models of psychiatric disorders and learning disabilities propose a general theory grounded on the concept of “aberrant precision.” However, these models have yet to ...

Age-Related Differences in Bimanual Coordination Are Associated with Increased Cerebellar Activity and Reduced Frontal Recruitment

Weakley, A. S., Noven, M., Madsen, K. H., Lundbye-Jensen, J., Siebner, H. R., Karabanov, A. N.

2026-07-10 1 min 212 words

BIORXIV NEUROSCIENCE

Summary: Bimanual coordination declines in late adulthood, but the neural mechanisms underlying these changes remain unclear. Age-related differences in brain activity have been interpreted either as compensatory recruitment of frontal cognitive control regions or as a shift toward feedback-based control, su...

Music-evoked nostalgia and charitable giving: A cross-cultural study in the United States and Mexico.

2024-01-22

1
min192
words

PSYCHOMUSICOLOGY

Summary: Nostalgia, a past-oriented emotion characterized by complex affective responses, is a pervasive and fundamental human experience. Prior research has demonstrated that nostalgia serves various socioemotional functions, such as promoting a sense of belonging, enhancing one's perception of meaning in l...

Preferred music listening does not affect cognitive inhibition in young and older adults.

2023-10-12

1
min227
words

PSYCHOMUSICOLOGY

Summary: Previous literature has found links between music listening and cognitive performance. Specifically, background music may play a role in modulating cognitive inhibition. However, determining what type of background music affects cognitive inhibition throughout the lifespan has not been studied. The ...

Dopamine Abundance Uncouples Neurodegeneration and Lifespan in a *C. elegans* Model of Parkinson's Disease

Willicott, C. W., Altman, T. J., Kimble, L. C., Berkowitz, L. A., Caldwell, G. A., Caldwell, K. A.

2026-07-09

1
min

181
words

BIORXIV NEUROSCIENCE

Summary: The neuropathology of Parkinson's disease is characterized by -synuclein (-syn) aggregation and dopaminergic (DAergic) neurodegeneration. While neuronal loss in *C. elegans* -syn-induced neurodegeneration models is temporally age-dependent, prior research indicates it is uncoupled from the organismal ...

Connexin 30 mutation rescues high-frequency hearing, reduces gap junctional coupling and alters potassium currents in cochlear Deiters cells

Simoes, P., Lukashkina, V. A., Lukashkin, A. N., Levic, S., Russell, I. J.

2026-07-09

1
min

249
words

BIORXIV NEUROSCIENCE

Summary: The early-onset, high-frequency hearing loss phenotype of CD-1 mice is rescued by the A88V mutation of the connexin 30 gap-junctional protein, despite a reduced endocochlear potential (EP), which drives cochlear hair cell receptor potentials. The mutation enables organ of Corti (OoC) extracellular r...

ARXIV CS HC

Summary: arXiv:2607.06778v1 Announce Type: new Abstract: Augmented reality (AR) can enhance visual perception for people with low vision (PLV) by overlaying multimodal information. Selection-based augmentation further allows users to flexibly choose and augment relevant information while reducing distractio...

ARXIV CS HC

Summary: arXiv:2607.06761v1 Announce Type: new Abstract: We present a rehearsal-oriented system for creating responsive built environments during theatre devising workshops. The system connects bespoke sensing modules for gesture, position, and speech recognition to light and sound outputs through a visual ...

ARXIV CS HC

Summary: arXiv:2607.06754v1 Announce Type: new Abstract: Co-designing with families for environmental sustainability relies on participatory imagination, yet habitual family roles and uneven participation, especially between adults and young children, often constrain it. A second challenge is continuity: wo...

Flowcode: An AI-Powered Programming Environment for Scaffolding Iteration in Creative Computing Education

Tiffany Tseng, Liliana Hanem Seoror, Jeevika Adda, Meitalia Factor, Rona Darabi, Kiley R Matschke, Tiffany Fu, Annie Lin, Alekhya Maram, Arya Sinha

2026-07-09 1 min 137 words

ARXIV CS HC

Summary: arXiv:2607.06721v1 Announce Type: new Abstract: Building upon found examples is a popular way people learn to code, especially in creative coding communities where sharing projects and remixing are common practices. But effectively doing so requires being able to 1) understand how existing code wor...

Exploring the Interaction of Explanation Styles, Context, and Trust of AI Privacy Redaction in AI-mediated Interactions

Roshni Kaushik, Maarten Sap, Koichi Onoue

2026-07-09 1 min 243 words

ARXIV CS HC

Summary: arXiv:2607.06687v1 Announce Type: new Abstract: AI-mediated communication is increasingly being utilized to help facilitate interactions; however, in privacy sensitive domains, an AI mediator has the additional challenge of considering how to preserve privacy. In these contexts, a mediator may reda...

words

ARXIV CS HC

Summary: arXiv:2607.06681v1 Announce Type: new Abstract: Knowledge workers switch between applications thousands of times per day, spending nearly a tenth of the work year transitioning between digital applications in a process called digital fragmentation. Whether this fragmentation reflects who an employee...

ARXIV QBIO NC

Summary: arXiv:2607.07429v1 Announce Type: cross Abstract: In this work, we reviewed different approaches in mathematical modeling of biologically plausible neural systems. Models are characterized and classified based on their common features and special use cases. In addition to spiking models, different ...

ARXIV QBIO NC

Summary: arXiv:2607.06626v1 Announce Type: cross Abstract: Recent Vision-Language Models capture increasingly complex aspects of human cognition. Here we ask whether this alignment extends to reward valuation, which we assess in a mechanistic framework built on clinical tests that were developed to evaluate...

BIORXIV NEUROSCIENCE

Summary: The cortisol awakening response (CAR) marks the transition from rest to wake phase by a sharp increase in cortisol levels upon awakening in the morning. This increase may assist in cognitive and behavioral awakening, but its function is not fully understood yet. In this pilot study we aimed to provi...
