Today's Top Stories

Spatiotemporally dynamic noradrenergic regulation of cortical networks

Barnes, C., Cini da Silva, F. A., Xu, P., Cardin, J. A.

2026-05-13

1 min

158 words

BIORXIV NEUROSCIENCE

Summary: Brain activity and cognition exhibit state-dependent fluctuations that may reflect the influence of neuromodulatory systems, including norepinephrine (NE). Although the activity of noradrenergic neurons is strongly coupled to sleep-wake cycles and pupil dynamics, suggesting a global arousal signal, ...

Maternal high-fat diet drives sex-specific microglia remodeling of serotonergic reward circuits

Bilbo, S., Patton, M., Sun, W., Stanley, L., Paredes, A., Kang, J. Y., Schettewi, Z., Horvath, B., Dziabis, J. E., Devlin, B., Vaidyanathan, T. V.

2026-05-13

1
min

158
words

BIORXIV NEUROSCIENCE

Summary: Maternal nutrition shapes offspring brain development and influences lifelong risk for neurological disorders, yet the circuit-level mechanisms linking maternal metabolic state to offspring behavior remain poorly defined. Here we show that maternal high-fat diet (mHFD) disrupts microglia-serotonin i...

Postweaning social isolation induces gene expression alterations and histone modification dysregulations in nucleus accumbens (NAc) neurons

You, J., Uematsu, A., Jouji-Nishino, A., Saeki, M., Kishi, Y.

2026-05-13

1
min

209
words

BIORXIV NEUROSCIENCE

Summary: Lack of social interaction results in various behavioral abnormalities in rodents, including increased anxiety levels, altered sociability, and impaired cognitive ability. Epigenetic factors regulate gene expression, however, how they contribute to juvenile social isolation (jSI)-induced behavioral ...

Simulating the spectrum, not the syndrome: Large scale individualized modeling of oral reading in stroke aphasia

Staples, R., DeMarco, A. T., Laks, A. B., Turkeltaub, P. E.

2026-05-13

1 min

192 words

BIORXIV NEUROSCIENCE

Summary: Computational models are a linchpin in our understanding of the neurocognitive basis of reading. These models can simulate idealized profiles of alexia syndromes, but in reality, individuals with alexia present with a wide range of mixed deficits rather than idealized syndromes. To provide a complet...

Behavioral evidence challenges species-specific ocular morphology as a primary constraint on human gaze-following

Shafiei, M., Arnous, Y., Taubert, N., Giese, M., Thier, P.

2026-05-13

1 min

150 words

BIORXIV NEUROSCIENCE

Summary: Previous research suggests that humans are extremely sensitive to object-directed eye gaze, which effectively guides their attention toward objects of shared interest. This contrasts with non-human primates, who typically require much more salient eye-gaze cues to achieve comparable attentional orie...

Spatiotemporal encoding of touch signals in the human somatosensory and motor cortices

 Cattabriga, M., Alamri, A. H., Hobbs, T. G., Emonds, A. M. X., Sobinov, A., Gaunt, R. A., Greenspon, C. M., Valle, G.

 2026-05-12  1
min

 255
words

BIORXIV NEUROSCIENCE

Summary: The sense of touch is fundamental for dexterous manipulation, object interaction, and body awareness. It is primarily processed in the somatosensory cortex (SC), yet our understanding of how tactile information is encoded at the level of neural populations and single neurons in humans remains limite...

Quantitative Analysis of External Urethral Sphincter Stimulation Parameters for Modulating Urinary Output

Wang, Y., Tushar, M. A. K., Lucero, O., Zimmern, P. E., Li, Z.

2026-05-12

1 min

180 words

BIORXIV NEUROSCIENCE

Summary: Objective: Neurogenic lower urinary tract dysfunction (NLUTD) impairs bladder control and remains difficult to treat. We aim to define how electrical stimulation (ES) parameters of the external urethral sphincter (EUS) affect urinary leakage thresholds to guide neuromodulation strategies for NLUTD. ...

BIORXIV NEUROSCIENCE

Summary: Real-world distractors occur in environments whose states change at different rates. We asked whether such volatility alters early attentional gating or instead changes the criterion for committing to a response. Observers performed an additional-singleton search task with concurrent eye tracking wh...

logLIRA: a method for reliable suppression of electrical stimulation artifacts enabling short-latency neural response recovery

 Francesco Negri, David J Guggenmos and Federico Barban

 2026-05-11  1 min  256 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. We propose logLIRA, a novel method for the rejection of intracortical microstimulation artifacts in electrophysiological recordings specialized in the recovery of short-latency evoked activity. Additionally, we introduce a comprehensive comparison framework to evaluate the performance of ...

181 words

BIORXIV NEUROSCIENCE

Summary: Developing sensory systems may have heightened sensitivity to exaggerated features that emphasize diagnostic information, as shown by the benefits of infant-directed speech for language acquisition. Here, we examine this sensory exaggeration hypothesis in the visual domain by testing whether cartoon...

Presynaptic GABAA Receptors Mediate Ethanol-Induced Suppression at a Central Auditory Synapse

 Nerlich, J., Jovanovic, S., Keine, C., Hallermann, S., Milenkovic, I.

 2026-05-11  1 min

 143 words

BIORXIV NEUROSCIENCE

Summary: Acute alcohol consumption impairs speech perception, particularly in noisy environments, but the synaptic mechanisms underlying this auditory deficit remain unknown. Here, we investigated how low-dose ethanol modulates the endbulb of Held synapse in the Mongolian gerbil cochlear nucleus, the first c...

Show HN: OpenGravity – A zero-install, BYOK vanilla JS clone of Antigravity

 ab613  2026-05-11  1 min  340 words

HACKER NEWS

Summary:

Hi. I'm a high school student studying for my GCSEs. I was using Google Antigravity heavily for my side projects, but I kept hitting the usage limits, and getting random "agent terminated" errors. So I decided to try build my own version of the IDE. I love the UI, so I copied it as accurately as ...

Detecting Beta-Amyloid Plaque via Low Rank Based Orthogonal Projection and Spatial-Spectrum Detector Using High-Resolution Quantitative Susceptibility Mapping for Preclinical Studies

 2025-09-24  1 min  203 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Detecting beta-amyloid ($A\beta$) plaques at different stages is crucial for accurate assessment and effective intervention in Alzheimer's disease (AD). In this study, we developed a novel method for reliably identifying $A\beta$ plaques, characterized by sparse negative susceptibility values, in pr...

BIORXIV NEUROSCIENCE

Summary: Aldehyde dehydrogenase 1A1-positive (ALDH1A1+) dopaminergic neurons (DANs) are preferentially vulnerable in Parkinson's disease (PD), yet how their activity is modulated by presynaptic inputs remains poorly defined. Here we investigated the role of glutamatergic input by conditionally deleting Grin1...

Retrosplenial PV and SST interneurons shape egocentric spatial precision and stability

 Oh, D., Yang, J., Shin, J., Kwag, J.

 2026-05-11  1 min  148 words

BIORXIV NEUROSCIENCE

Summary: Accurate navigation requires egocentric representations of environmental geometry to be continuously updated by self-motion while remaining stable over time. The retrosplenial cortex (RSC) is central to this process, yet how local inhibitory circuits support this balance remains unclear. We show tha...

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: The hippocampus is thought to support spatial memory and navigation by constructing predictive representations of the environment. Predictive map theory formalizes this function as a successor representation (SR). However, existing models assume a fixed and uniform distribution of place fields, desp...

Tai Chi alleviates pain on fusiform-lingual and rolandic operculum-insula circuit in older participants with chronic low back pain: a randomized controlled neuroimaging trial

 Lili Peng

 17

2026-05-11

1 min

334 words

FRONTIERS HUMAN NEUROSCIENCE

Summary: BackgroundChronic low back pain (CLBP) is a common clinical syndrome and a leading cause of disability. The high disability rate associated with CLBP is more susceptible to reduced labor capacity, poorer quality of life, and increased psychological, social, and medical burdens. Tai Chi is an effecti...

A continuum of asynchronous states in cerebral cortex networks, and how they determine responsiveness

 Bassat, M., Tesler, F., Destexhe, A.

 2026-05-09  1 min

 118 words

BIORXIV NEUROSCIENCE

Summary: The awake brain is known to display asynchronous (AS) states during periods of attention and arousal, but the responsiveness properties of such states remain unclear. Here, we investigate this question using computational models of spiking networks of excitatory and inhibitory neurons, mimicking rec...

Evaluating the Sensitivity of Dry and Gel-Based Wearable EEG for Cognitive Load Estimation

Idehis, S., Masias Bruns, M., Emami, P., Duraisamy, S., Leiva, L. A., Arapakis, I.

2026-05-08

1
min

202
words

BIORXIV NEUROSCIENCE

Summary: Purpose: We present a large-scale (N=120) comparative study of gel-based and dry electroencephalography systems for cognitive load analysis in tasks involving information visualization stimuli. Although dry systems are increasingly adopted owing to their portability and fast setup, their sensitivity...

Within-Trial Noise Accounts for Inhibition of Return

Seidel Malkinson, T., Bourgeois, A., Wattiez, N., Chica, A. B., Pouget, P., Bartolomeo, P.

2026-05-08

1
min

131
words

BIORXIV NEUROSCIENCE

Summary: Inhibition of return (IOR) refers to the slowing of response times (RTs) for stimuli presented at previously inspected locations relative to novel locations. However, the exact processing stage(s) at which IOR occurs, and its nature across different response modalities, remain debated. By reanalyzing...

UP-REGULATION OF SYNAPTOBREVIN-2 TO DELAY AGE-RELATED COGNITIVE IMPAIRMENT

 Miller, J. B., Seth, A., Rafiq, A. M., Han, W., Deak, F.

 2026-05-08

 1 min

 150 words

BIORXIV NEUROSCIENCE

Summary: The slowing of executive function and memory impairment are the leading hallmarks of cognitive decline with age. The exact cause of this change is unknown and is the focus of aging research. Expression levels of Vesicle Associated Membrane Protein 2 (VAMP2)/Synaptobrevin-2 (syb2) are decreased with ...

FRONTIERS NEUROSCIENCE

Summary: Temporal lobe epilepsy (TLE) is frequently accompanied by disruptions to sleep and circadian rhythms, which substantially contribute to disease burden. Human studies are often confounded by antiseizure medications, limiting insight into underlying mechanisms. Animal models therefore provide critical...
