Sex-Dependent Proteomic Remodelling During ex vivo Degeneration of Young and Aged Murine Peripheral Nerves

Bergmann, D. L., Cirri, E., Kirkpatrick, J. M., Sacramento, E. K., Stabenow, L. K., Orah, N., Boehm, L., Walter, M., Bauer, R., Morrison, H.

2026-08-10 1 min 379 words

BIORXIV NEUROSCIENCE

Summary: Introduction: Peripheral nerve ageing leads to profound proteomic remodelling, with shifts in metabolic and inflammatory signalling pathways resembling changes that occur during nerve degeneration and regeneration following injury. Moreover, aged nerves exhibit impaired degeneration and regeneration...

Epilepsy and premature mortality driven by inhibitory neuron dysfunction in a mouse model of SCN1A gain-of-function neurodevelopmental disorder

Hill, S. F., Rosenthal, Z. P., Goldberg, E. M.

2026-08-09

1
min

216
words

BIORXIV NEUROSCIENCE

Summary: The gene most commonly implicated in epilepsy, SCN1A, encodes the neuronal voltage-gated sodium channel subunit NaV1.1. SCN1A variants that reduce sodium current ("loss of function" variants) cause Dravet syndrome, a neurodevelopmental disorder defined by treatment-resistant temperature sensitive...

PEDF/PEDF-R Signaling Regulates Retinal Phospholipid Homeostasis and Photoreceptor Survival

Bernardo Colon,, A., Crawford, S. E., Agbaga, M. P., Wang, Z., Schey, K. L., Becerra, S. P.

2026-08-09

1
min

176
words

BIORXIV NEUROSCIENCE

Summary: Pigment epithelium-derived factor (PEDF) promotes photoreceptor survival through its receptor PEDF-R, a phospholipase involved in retinal lipid metabolism. To define the in vivo function of the PEDF/PEDF-R axis, we generated mice lacking Serpinf1 (PEDF) and Pnpla2 (PEDF-R). Combined loss of Serpinf1...

Conductance-based reversal potentials in spiking recurrent neural networks enhance energy efficiency and task performance

Martin Vinck 2026-07-30 1 min 173 words

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: Spiking recurrent neural networks (SRNNs) rival gated recurrent neural networks (RNNs) on various tasks, yet they still lack several hallmarks of biological neural networks. We introduce a biologically grounded SRNN that implements Dale's law with conductance-based stands for a-amino-3-hydroxy-5-met...

Whole-brain modeling of dynamic causal circuits in human cognition using amortized variational inference

Lee, B., Rouillard, L., Diniz, L. L., Jiang, L., Ambrogioni, L., Ryali, S., Branigan, N., Mistry, P., Cai, W., Wassermann, D., Menon, V.

2026-08-09 1 min 200 words

BIORXIV NEUROSCIENCE

Summary: Understanding dynamic mechanisms underlying cognition remains a major challenge in human neuroscience. Here, we develop, validate, and apply Multivariate Dynamical Systems Identification with Amortized Variational Inference (MDSI-AVI), a novel computational framework designed to address critical cha...

COGNITIVE NEUROSCIENCE

Summary: Transitive inference (TI) is a cognitive process in which decisions are guided by internal representations of abstract relationships. Although the mechanisms underlying transitive learning have been well studied, the dynamics of the decision-making process during learning and inference remain less c...

Neural Dynamics Underlying Repeated Learning of Visual Image Sequences

2026-06-01

1
min255
words

COGNITIVE NEUROSCIENCE

Summary: Humans possess a remarkable ability to recognize visual objects with high fidelity, supported by complex neural mechanisms underlying memory retrieval. ERP studies have identified two key neural signatures of recognition memory: the parietal old/new effect and the frontal old/new effect. Despite ext...

Social Motivation and Hippocampal-Cortical Structural Development in Adolescent Girls

Goldberg, M. N., Reck, A. J., Skyberg, A. M., Murty, V. P., Pfeifer, J. H.

2026-08-08

1
min

199
words

BIORXIV NEUROSCIENCE

Summary: Adolescence is a fundamental developmental period marked by dramatic socio-affective and physiological changes, including shifts in social behavior and maturation of underlying brain architecture. In girls, this period coincides with the onset of the pubertal transition, which fundamentally influenc...

Two types of response inhibition failures in humans

Acker, S. F., Wessel, J.
R.

2026-08-08

1
min

150
words

BIORXIV NEUROSCIENCE

Summary: Response inhibition is a key control function that allows humans to perform safe, goal-directed behaviors. The dominant behavioral-computational model holds that response inhibition fails when the inhibition process is too slow to intercept unwanted movements. However, many have hypothesized that so...

BIORXIV NEUROSCIENCE

Summary: Rett syndrome (RTT) is a severe neurodevelopmental disorder caused by mutations in MECP2 and characterized by impaired neuronal maturation and synaptic dysfunction. Positive allosteric modulators of AMPA receptors (AMPA-PAMs) have shown therapeutic promise in RTT models, but the determinants of tre...

Anomalous Emotion Regulation & Reward Network Connectivity Underlying Suicidal & Non-Suicidal Self-Injury in Early Psychosis

An, C. L., Dhaher, S., Kilicoglu, M., Turner, J. A., Westlund Schreiner, M., Moe, A.

2026-08-07

1 min 246 words

BIORXIV NEUROSCIENCE

Summary: Background: Individuals with early psychosis (EP) have elevated risk for suicide, the leading cause of death in the first five years following diagnosis. Non-suicidal self-injury (NSSI) significantly predicts suicidal behavior, yet studies of self-injury often exclude participants with psychosis. We...

The conscious experience of thinking aloud: Are positive feelings associated with better think-aloud performance?

2024-12-30

1
min216
words

CLINICAL NEUROSCIENCE

Summary: The think-aloud interview is a psychological procedure used to measure an individual's cognition in solving a task. However, very little is known about how an individual's conscious experience of the interview might be associated with their performance during the interview. This is consequential as ...

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: Neurons near a subcritical Hopf bifurcation are distinguished by their ability to produce subthreshold oscillations, maintain bistability between rest and repetitive spiking, and fire preferentially in response to inputs near their intrinsic resonant frequency. Simulating these properties in large n...

Summary: arXiv:2608.04475v1 Announce Type: new Abstract: Despite the promise of virtual reality (VR) for intuitive spatial interaction, volume visualization (VolVis) in VR remains constrained by high rendering costs and motion discomfort. Recent advances have shown that representing volumetric scenes with 3...

Revisiting Channel Effectiveness: A Multi-Dimensional Evaluation with Primitive Visual Stimuli

Soohyun Lee, Seokhyeon Park, Minsuk Chang, Jinwook Seo

2026-08-06

1
min

191
words

ARXIV CS HC

Summary: arXiv:2608.04435v1 Announce Type: new Abstract: Established channel effectiveness rankings primarily assess magnitude estimation accuracy in complete chart contexts, often neglecting other perceptual tasks such as discriminability, separability, and pop-out. To address this gap, we conducted crowds...

Preference-Driven Online Adaptation for Personalized Interaction Initiation in Proactive AI Assistants

Yufeng Wang, Wei Zhang, Zhiquan Wen, Jinwu Hu, Linhui Xiao, Tianlu Pan, Qingfang Zheng, Mingkui Tan

2026-08-06 1 min 216 words

ARXIV CS HC

Summary: arXiv:2608.04416v1 Announce Type: new Abstract: AI assistants are typically reactive, relying on users to initiate interactions. Proactive assistants go beyond this paradigm by autonomously initiating interactions based on users' activity contexts. However, appropriate interaction timing is user-sp...
