BDNF and glucocorticoids modulate neuroplasticity via direct interaction between TRKB and glucocorticoid receptors

Brunello, C. A., Gil Ortiz, M., Pastor Munoz, P., Araujo, J. P., Caceres Pajuelo, J. E., Avila Marti, J. C., Lyytikainen, E., Tonelli, S., Didio, G., Le Joncour, V., Castren, E.

2026-04-08

1
min

204
words

BIORXIV NEUROSCIENCE

Summary: The overlapping effects on neuronal plasticity of acute increase in glucocorticoid levels and the BDNF-TRKB signaling indicate a deep interconnection between the two pathways. Moreover, chronic stress with elevated glucocorticoids levels and downregulation of TRKB signaling associated with reduced B...

Human-specific multicopy gene FRMPD2 promotes synapse formation via recruitment of neuroligin 1

Huo, Y., Patkar, A., Merth, K., Gilbert, J., Man, H.

2026-04-08

1
min

163
words

BIORXIV NEUROSCIENCE

Summary: FRMPD2 is a human-specific multi-copy gene with higher mRNA expression in brain tissue, but its role in synapse formation and neurodevelopment remains unknown. We find that FRMPD2 is a neuron-specific protein with a high expression level in human brains compared to rodent brains. FRMPD2 overexpressi...

Fluid amyloid- β (A β) biomarkers reflect early β -sheet-rich A β deposition during the preclinical stage in Alzheimer's disease model 5XFAD mice

 Yagihara, H., Saito, Y., Takeuchi, T., Seki, K., Minakawa, E.
N.

 2026-04-08

 1
min

 249
words

BIORXIV NEUROSCIENCE

Summary: Early detection of disease progression using clinically-relevant biomarkers in animal models is important for mechanistic studies and for developing therapeutics in neurodegenerative diseases including Alzheimer's disease (AD). The preclinical stage of AD, when amyloid- β (A β) starts to acc...

A human neuron-microglia tri-culture platform to study the influence of microglia on developing neuronal networks in vitro

 Guerrisi, S., Pavlinek, A., Cunningham, O. L., Chennell, G., Vernon, A. C., Srivastava, D. P.

 2026-04-08  1 min  244 words

BIORXIV NEUROSCIENCE

Summary: Human brain function is dependent on synaptic architecture and function between a range of different cell types. Glutamatergic and GABAergic neurons provide the basis by which the excitatory and inhibitory balance is achieved in cortical networks, and microglia interact with them to shape synaptic a...

BIORXIV NEUROSCIENCE

Summary: Strabismus, or misalignment of the eyes, is a heritable disorder frequently associated with vision loss and decreased quality of life. Incomitant strabismus, where the degree of misalignment differs based on gaze angle, can arise from mutations in genes that regulate the development of extraocular m...

Stretch-Evoked Motor Responses in the Brainstem are Modulated by Task Instructions

Nikonowicz, R. C., Reddy, N. A., Medina, M. C., Bright, M. G., Sergi, F.

2026-04-07

1 min

202 words

BIORXIV NEUROSCIENCE

Summary: Reliable noninvasive measurement of human brainstem activity during motor control remains challenging due to small anatomical structures and physiological noise, yet it is essential for understanding descending contributions to rapid feedback control. We used brainstem-optimized whole brain function...

Integrated metabolomics and proteomics from voxelated cortical hemispheres of adult rhesus monkeys

Wu, Q., Brigande, A. M., Lutz, M. W., Shi, P., Disney, A.

2026-04-07

1 min

203 words

BIORXIV NEUROSCIENCE

Summary: The spatial organization of molecular networks across cortex likely contributes to differences in local circuit vulnerability in aging and Alzheimer's disease; yet many existing molecular datasets sacrifice spatial structure, sampling only a handful of regions per brain. Here, we present a framework...

Reading skills modulate the audiovisual congruency effect in orthographic processing in children: an ERP study

 Silvia
Brem

 17

2026-04-02

 1

min

 199

words

FRONTIERS HUMAN NEUROSCIENCE

Summary: IntroductionIntegration of written and spoken information is crucial for reading acquisition. Correspondingly, individuals with reading difficulties exhibit deficiencies in audiovisual (AV) congruency processing. The timeline of AV congruency processing in children and the influence of reading skill...

COLOR VISION UNDER BLUR: IMPLICATIONS FOR PERCEPTION AND EVOLUTION

 Altinordu, N., Boynton, G. M., Fine, I.

 2026-04-07  1 min  136 words

BIORXIV NEUROSCIENCE

Summary: Color is a prominent feature of visual experience, yet humans can recognize objects easily and accurately from grayscale images. We examined whether color becomes more useful when spatial information is degraded due to blurring. Participants viewed naturalistic scenes in color or grayscale, and repo...

Shared and Unique Connectivity Signatures of Reading and Language Deficits

 2026-03-12  1 min  253 words

COGNITIVE NEUROSCIENCE

Summary: Reading ability depends on multiple cognitive skills, including decoding and language comprehension, which can vary widely across individuals—even among those with similarly low reading performance. To better understand the brain basis of this variability, we used connectome-based predictive modelin...

When a Man Says He Is Pregnant: Event-related Potential Evidence for a Rational Account of Speaker-contextualized Language Comprehension

 2026-03-12  1 min  296 words

COGNITIVE NEUROSCIENCE

Summary: Spoken language is often, if not always, understood in a context formed by the identity of the speaker. For example, we can easily make sense of an utterance such as "I'm going to have a manicure this weekend" or "The first time I got pregnant I had a hard time" when spoken by a woman, but it would ...

Guziński

 2025-12-11

 1
min

 267
words

FRONTIERS NEUROINFORMATICS

Summary: BackgroundTimely and accurate assessment of acute ischemic stroke is crucial for determining eligibility for mechanical thrombectomy. The Alberta Stroke Program Early CT Score (ASPECTS) is a widely used tool for evaluating early ischemic changes on non-contrast CT (NCCT), but its interpretation is s...

AMSA-Net: attention-based multi-scale feature aggregation network for single image dehazing

 Miao
Zhang

 2026-02-17

 1
min

 222
words

FRONTIERS NEUROROBOTICS

Summary: ProblemDeep learning technology promotes the development of single-image dehazing. However, many existing methods fail to fully consider the haze density and its spatial distribution, which limits the improvement of dehazing performance.Proposed solutionTo address this issue, we propose an attention...

Multimodal imaging reveals no evidence for magnetite-based magnetoreceptors in the mole-rat eye

Moritz, L., Nath, K., Walsh, E. P., Sternberg, A., Becher, E., Lange, A., Falkenberg, G., Brueckner, D.,

Diwoky, C., Bredies, K., Brammerloh, M., Howard, D., Paterson, D. J., Medjoubi, K., Irsen, S., Wolf-Kuemmeth, S., Zhang, L., Daniel, M. M. M., Simpson, D. A., Begall, S., Malkemper, E. P.

2026-04-06

1

min

200

words

BIORXIV NEUROSCIENCE

Summary: Magnetoreception, the ability to perceive the geomagnetic field, is widespread across animals. The underlying sensory mechanism remains elusive, but a long-standing hypothesis proposes single-domain magnetite linked to mechanosensitive ion channels. The Ansell's mole-rat (*Fukomys anselli*) is a subte...

Bridging the microstructural gap in human connectomics using hierarchical phase-contrast tomography as a reference for diffusion MRI in the human brain

 Wanjau, E., Chourrout, M., Maffei, C., Balbastre, Y., Keenlyside, A., Brunet, J., Sharma, A., Huang, S. Y., Tafforeau, P., Fischl, B., Yendiki, A., Lee, P. D., Walsh, C.

 2026-04-06  1 min  157 words

BIORXIV NEUROSCIENCE

Summary: Diffusion MRI (dMRI) allows us to image the human connectome non-invasively, yet it provides indirect estimates of axonal orientations based on the diffusion of water molecules in millimeter-scale voxels, hence struggling to resolve complex micrometer-scale fiber geometries. Invasive methods for ima...

The long noncoding RNA Dory is required for female but not male spatial learning and memory

Jung, S., Cummins, M. J., Altaf, S., Heggen, R., Poljak, A., Delerue, F., Ittner, L. M., Mattick, J. S.

2026-04-06

1
min

187
words

BIORXIV NEUROSCIENCE

Summary: Large numbers of long noncoding RNAs (lncRNAs) exhibit region- or cell-specific expression and subcellular locations in the mammalian brain. We analyzed the expression and function of the mouse lncRNA 2700046G09Rik (also called Sgms1os1), which we have named Dory due to sex-specific disruption of sp...

words

BIORXIV NEUROSCIENCE

Summary: Neuroimmune signaling is increased in postmortem brain tissue from individuals with alcohol use disorder (AUD), and growing evidence suggests that it contributes to persistent alcohol-related neuroadaptations. Interferon regulatory factor 7 (IRF7), a transcription factor downstream of endosomal Toll...

Morphine and methamphetamine trigger divergent post-transcriptional neuroimmune landscapes in the dorsal striatum

 Tuesta, L. M., Margetts, A. V., Bystrom, L. L., Vilca, S. J.

 2026-04-05  1 min  198 words

BIORXIV NEUROSCIENCE

Summary: Opioid and methamphetamine use disorders (OUD and MUD) are characterized by enduring neural adaptations within brain reward circuitry, yet the cell-type-specific post-transcriptional mechanisms underlying these changes remain poorly understood. While microglia are essential for maintaining central n...

CycleGAN models show consistent brain MRI synthesis across datasets supporting downstream tissue characterization in multiple sclerosis

 Yunyan Zhang  2026-03-12  1 min  259 words

FRONTIERS NEUROINFORMATICS

Summary: BackgroundSecondary quantitative analysis of brain magnetic resonance imaging (MRI) can provide valuable information for many neurological diseases, including multiple sclerosis (MS), but it demands complete datasets that are often unavailable clinically. We investigated how image synthesis via deep...

Dynamic cortical routing mediates temporal attention

Zhu, J., Tian, K., Carrasco, M., Denison, R.

2026-04-04

1
min151
words

BIORXIV NEUROSCIENCE

Summary: Selecting information from dynamic streams requires mechanisms that prioritize a visual stimulus at a specific moment over preceding and subsequent stimuli at the same location. Whereas selective temporal attention has been found to enhance neural responses to stimuli, its impact on communication be...

Role of spinal sensorimotor circuits in triphasic muscle command: a simulation approach using goal exploration process

 Aymar de Ruggy  2026-03-11  1 min  287 words

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: During rapid voluntary elbow movement on horizontal plane, a stereotyped triphasic pattern is typically observed in the electromyograms (EMGs) of antagonistic muscles acting at this joint. To explain the origin of such triphasic commands, two types of theories have been proposed. Peripheral theories...

381
words

BIORXIV NEUROSCIENCE

Summary: Introduction: Body mass index (BMI) is widely used to screen for weight-related health risks during adolescence. Prior neuroimaging studies have assumed a linear relationship between BMI and brain microstructure, potentially obscuring how this association varies across the BMI distribution. Using re...

The Cerebellar Engine: Multiscale Digital Brain Co-simulations Reveal How Cerebellar Spiking Architecture Shapes Cortical Coherence

 Geminiani, A., Meier, J. M., Perdikis, D., Ouertani, S., Casellato, C., Ritter, P., D'Angelo, E. U.

 17 2026-04-04  1 min  216 words

BIORXIV NEUROSCIENCE

Summary: The impact of cellular activities on large-scale brain dynamics is thought to determine brain functioning and disease, yet the causal relationships of neural mechanisms across scales remain unclear. Recently, the cerebellum has been reported to affect whole-brain dynamics during sensorimotor integra...
