Neuronal avalanches in awake macaque V1 and V4

👤 Solovyeva, K., Popov, P., Makarova, A., Lebedev, M. 📅 2026-10-16 📖 1 min 📝 203 words

BIORXIV NEUROSCIENCE

Summary: Neuronal avalanches are cascades of synchronised activity whose sizes follow power law. Analyses of avalanches shed light on cortical dynamics operating near a critical point. In awake monkeys, avalanches were found in motor and premotor cortex, where they are invariant to temporal binning, detectio...

Striatal D2-neurons gate D1-mediated associative encoding under uncertainty

👤 Goulton, C. S., Nolan, C. R., Roschanzamir, N. R., Tran, M. G., Matamales, M., Bertran-Gonzalez, J.

📅 2026-10-16 📖 1 min 📝 151 words BIORXIV NEUROSCIENCE

Summary: Goal-directed actions are established through the encoding of predictive relationships between behaviour and its consequences, a process involving dopamine-dependent plasticity in the dorsal striatum. Early phases of learning entail complex associative landscapes from which useful action-outcome con...

History of opioid use disorder correlates with altered neuroimmune signatures in the human dorsal root ganglia

Barry, A. M., Schaub, M., Lesnak, J. B., Vines, E., Arendt-Tranholm, A., Franco-Enzastiga, U., O'Brien, J. A., Sankaranarayanan, I., Shiers, S. I., Silveira Prudente, A., Sondermann, J. R., Wilde, M., Xian, F., Khan, T., Cervantes, A., Funk, G., Horton, P., Davidson, S., Berta, T., Dussor, G., Schmidt, M., Price, T. J.

2026-10-16 1 min 113 words BIORXIV NEUROSCIENCE

Summary: Understanding mechanisms for the negative reinforcing effects of opioids are fundamental to improving patient care. Using human dorsal root ganglia (DRG) from donors with and without opioid use disorder (OUD), we set out to examine functional and molecular correlates of chronic opioid use. At a mole...

Structural topology shapes regional roles in neuronal avalanche initiation and termination

De luca, M., Demuru, M., Troisi Lopez, E., Gallo, E., Cafaro, G., Duma, G. M., Depannemaecker, D., Casagrande, G., Quarantelli, M., Granata, C., Sorrentino, G., Sorrentino, P., Angiolelli, M.

2026-10-16 1 min 166 words BIORXIV NEUROSCIENCE

Summary: Whole-brain dynamics unfold as fast, discrete, transient events known as, neuronal avalanches, whose propagation is constrained by the connectome, that is, the large-scale scaffolding of structural connections wiring the brain. However, the role of the connectome in determining the topographies of t...

Climate Physicalization: Bridging Tangible Interaction and Data Visualization for Environmental Communication

👤 Milena Vuckovic, Marlene Huber, Fabrizia Bando-Bechtold, Daniel Cornel, Daniel Pahr

📅 2026-10-16

📖 1 min 📝 170 words ARXIV CS HC

Summary: arXiv:2610.21401v1 Announce Type: new Abstract: Raising awareness of climate topics, such as urban heat mitigation, requires communicating complex data to a broad audience. Data physicalization has emerged as a novel method to connect audiences to such complex topics through tangible forms while al...

Short-Term Plasticity of Contrast Surround Suppression During Repeated Psychophysical Measurement

Jin, N., Zhang, Q., Cai, Y.

2026-10-15 1 min 173 words BIORXIV NEUROSCIENCE

Summary: Perceptual surround suppression is commonly treated as stable within a testing session, but recent evidence for normalization reweighting suggests that suppressive interactions can be modified by recent visual input. Here, we asked whether surround suppression changes over minutes of repeated measur...

Synaptic microRNA dysregulation orchestrates aberrant glutamatergic transmission in a human neuronal model of 22q11.2 deletion syndrome

👤 Niu, W., Guo, J., Ran, X., Parker, D., Li, X., Yu, S., Imes, S., Purcell, R., Michalski, C., Guo, E., Jiang, S. Y., Xu, E., Bassell, G. J., Mulle, J. G., Ousley, O. Y., Pearce, B., Feng, Y., Bearden, C. E., Walker, E. F., Cubells, J. F., Qin, Z., Duncan, E., Wen, Z.

📅 2026-10-15 📖 1 min 📝 235 words BIORXIV NEUROSCIENCE

Summary: 22q11.2 Deletion Syndrome (22q11DS), the most prevalent chromosomal microdeletion disorder in humans (incidence ~1 in 4,000 live births), arises from hemizygous deletions of a 1.5-3.0 Mb region on chromosome 22. Notably, 20-30% of individuals with 22q11DS develop schizophrenia (SCZ) by early adultho...

An Engineering Explanation of Human Vertical Reaching: Optimal Trajectory Planning of Asymmetric Velocity Profiles in the Vertical Plane via a Softplus-Based Generalized Dynamic Jerk Cost Function.

👤 Kabbani, M. B., Marouf, A.
📅 2026-10-11 📖 1 min 📝 375 words

BIORXIV NEUROSCIENCE

Summary: The results in this article demonstrate that the central nervous system CNS plans trajectories in the vertical plane by minimizing a Generalized Dynamic Jerk GJerk cost function, which we have proposed as an advancement of the traditional Minimum Jerk cost function. While the traditional Jerk cost f...

Raf-MEK-ERK signaling mediates FLT3-induced mechanical allodynia and reduced morphine analgesic efficacy in male rodents

Leyris, J.-P., Ajas, D., Bertin, J., Sar, C., Mallie, S., Cunha, T. M., Ango, F., Moha ou Maati, H., Mechaly, I., Valmier, J., Rivat, C.

2026-10-11 1 min 204 words BIORXIV NEUROSCIENCE

Summary: The cytokine FL and its receptor, Fms-like tyrosine kinase 3 (FLT3), contribute to chronic pain and to the maladaptive effects of morphine but the intracellular mechanisms underlying these effects remain incompletely understood. Here, we investigated the contribution of the Raf-MEK-ERK pathway to FL...

ASC specks and α-synuclein amplify microglial NLRP3 inflammasome activation and co-localize with Lewy body pathology

👤 Thakur, K., Peladeau, C., Hewitt, M., Baumann, K., Cai, D., Woulfe, J. M., Tomlinson, J. T., Schlossmacher, M. G., Sandhu, J. K.

📅 2026-10-10 📖 1 min 📝 236 words BIORXIV NEUROSCIENCE

Summary: Neuroinflammation is a hallmark of several chronic neurodegenerative disorders, including Parkinson's disease (PD) and other synucleinopathies, and is closely associated with microglial activation. The inflammasome adaptor protein apoptosis-associated speck-like protein containing a caspase activati...

A Bayesian approach to volumetric analysis in rare neurodegenerative disorders

👤 Ho, S. Y. S., Schmidt, T. V., Ghosh, B., Rowe, J., Rittman, T.
📅 2026-10-10 📖 1 min 📝 321 words

BIORXIV NEUROSCIENCE

Summary: Identifying regional brain atrophy is critical for understanding neurodegenerative disorders. Traditionally, group comparisons rely on frequentist statistics, utilising p-values and point estimates that offer limited characterization of uncertainty. Bayesian methods provide an alternative by estim...

A Computational Model Captures Orexin-Dependent Modulation of Memory Consolidation.

👤 Shakleina, P., Guy, A. T., Trombetta, E. M.
📅 2026-10-10 📖 1 min 📝 240 words

BIORXIV NEUROSCIENCE

Summary: Hippocampal sharp-wave ripple (SWR) events occur during post-experience rest and sleep and play a significant role in memory consolidation. Recent ex vivo studies have found orexin-driven neuromodulatory effects on SWR parameters and proposed that they can influence memory consolidation. Additionall...

Inferotemporal cortex stimulation is perceived before its onset

Shahbazi, E., Nguyen, D., Ma, T., Afraz, A.

2026-10-10 1 min 170 words

BIORXIV NEUROSCIENCE

Summary: Neural response latency measures when stimulus-evoked activity becomes detectable, but it does not reveal when the brain assigns the causal contribution of that activity to events in the external world. We define this temporal adjustment as projected delay and measure it in the macaque inferotempora...

Identifying Network Factors Driving Changes in Brain Connectivity During Aging via Stochastic Actor-Oriented Models

Garrison, E. K., Sotero, R. C., Orlandi, J. G., for the Alzheimer's Disease Neuroimaging Initiative

2026-10-10 1 min 191 words

BIORXIV NEUROSCIENCE

Summary: Brain network organization emerges from ongoing network dynamics that continuously create, maintain, and reorganize connectivity patterns. At both the structural and functional levels, these dynamics shape network evolution throughout the lifespan. Here, we introduce a data-driven framework based on...

Using the aperiodic slope across learning to predict sleep-based memory consolidation

Anesbury, A., Caldwell, H. B., Lushington, K., Al Safadi, M., Chatburn, A.

2026-10-10 1 min

248 words

BIORXIV NEUROSCIENCE

Summary: Homeostatic mechanisms adjust synaptic strengths to regulate neuronal activity across wake-sleep cycles. Although sleep supports memory consolidation, limited research has explored how sleep-induced homeostatic changes influence memory outcomes in humans. The EEG-derived aperiodic slope (1/f) could ...
