Short-term monocular deprivation engages rapid, inhibition-gated ocular dominance plasticity in mouse visual cortex

 Di Marco, I., Sansevero, G., Berardi, N., Sale, A.

2026-04-14

1 min

229 words

BIORXIV NEUROSCIENCE

Summary: Ocular dominance (OD) plasticity has long served as a canonical model of experience-dependent cortical plasticity, traditionally thought to be confined to a developmental critical period. Recent human studies, however, show that brief monocular deprivation of just a few hours induces rapid and fully...

PNAS NEUROSCIENCE

Summary: Proceedings of the National Academy of Sciences, Volume 123, Issue 15, April 2026.
SignificanceHow animal behavior develops is still a mystery. It is presumably determined to some extent by genes and modulated by environment and experience. We here find both genetic and environment-dependent s...

Transcranial magnetic stimulation to frontal cortex, unlike occipital stimulation, does not disrupt exogenous attention

 Chen, Q., Lee, H.-H., Hanning, N. M., Carrasco, M.
  2026-04-14
  1 min
  271 words

[BIORXIV NEUROSCIENCE](#)

Summary: Orienting covert attention to a target location improves performance across a wide array of visual tasks [1, 2]. Whereas fMRI studies have identified partially overlapping frontoparietal networks underlying endogenous (voluntary) and exogenous (involuntary) covert attention, these correlational meth...

Associations among response time inconsistency, attention switching, and cognitive status: A measurement burst approach.

 2026-03-05  1 min  227 words

NEUROPSYCHOLOGY

Summary: Objective: Trial-to-trial variability in response times (RT inconsistency; RTI) has emerged as an important dimension of performance for characterizing cognitive function and cognitive status. The present study explores whether (a) RT inconsistency is associated with attention switching performance ...

Trace-Aware Workflows for Co-Creating Branded Content with Generative AI

 Taehyun Yang, Eunhye Kim, Zhongzheng Xu, Fumeng Yang

 2026-04-14  1 min  202 words

ARXIV CS HC

Summary: arXiv:2604.09583v1 Announce Type: new Abstract: Generative AI tools have lowered barriers to producing branded social media images and captions, yet small-business owners (SBOs) still struggle to create on-brand posts without access to professional designers or marketing consultants. Although these...

Brain PDGFR β + cells exhibit diverse reactive phenotypes after stroke without requiring KLF4

Manrique-Castano, D., ElAli,
A.

2026-04-13

1
min

250
words

BIORXIV NEUROSCIENCE

Summary: Ischemic stroke triggers a cascade of molecular and cellular processes leading to fibrotic scar formation, entailing activation of brain platelet-derived growth factor receptor (PDGFR) β + cells. Kruppel-like factor (KLF)4 plays an important role in regulating the activation of peripheral PDGFR β ...

Simulated spaceflight disrupts the immune-gut-brain axis and drives sex-dependent neuroinflammation, axonal injury, and behavioral deficits.

 Burke, M., Kara, G., Holcomb, M., Mason, C., Villapol, S.

 2026-04-13  1 min  243 words

BIORXIV NEUROSCIENCE

Summary: Simulated spaceflight perturbs multiple organ systems, yet the integrated impact of spaceflight-relevant stressors on the immune-gut-brain axis remains poorly defined. We used a ground-based model combining hindlimb unloading (HU) with low-dose ionizing radiation (IR; 50 or 100cGy) to quantify neuro...

Development of a novel VHH intrabody targeting the N17 region of huntingtin exon 1 protein that prevents inclusion body formation.

 Wavreil, F. D. M., Pos, W., Spits, M., Sanz Sanz, A., Rietveld, K., van Dam, R., Böhne, M., van Deventer, S., Schipper-Krom, S., Reits, E. A. J.

 2026-04-13  1 min  239 words

BIORXIV NEUROSCIENCE

Summary: Huntington's disease (HD) is a progressive neurodegenerative disease caused by a mutation in the exon 1 of the huntingtin (HTT) gene, which leads to an extended polyglutamine (polyQ) tract in the mutant protein. As a result, mutant huntingtin (mHTT) exon 1 fragments aggregate in cells, which disrupt...

Age-dependent mitochondrial health decline in human induced neurons

 Legault, E. M., Drouin-Ouellet, J.

 2026-04-13  1 min  206 words

BIORXIV NEUROSCIENCE

Summary: In humans, aging is associated with an increased risk of developing neurodegenerative diseases such as Parkinson's disease and Alzheimer's disease. In neurons, the effect of aging on intrinsic molecular processes, and how they tie to age-related neurodegeneration remains unclear. Animal studies have...

The stability of thought: using experience sampling and brain imaging to determine the contextually bound nature of human cognition.

Chitiz, L., Hardikar, S., Goodall-Halliwel, I., Wallace, R. S., Mulholland, B., Ketcheson, S., Mckeown, B., Milham, M., Xu, T., Margulies, D. S., Ho, N. S.-P., Karapanagiotidis, T., Poerio, G. L., Leech, R., Jefferies, E., Smallwood, J.

 2026-04-12  1 min  210 words

BIORXIV NEUROSCIENCE

Summary: Human behavior is highly flexible, allowing efficient performance across a wide range of task contexts. A distributed set of frontal and parietal regions, commonly termed the multiple-demand network (MDN), is consistently engaged during diverse cognitively demanding tasks and is thought to support t...

Prevalence of sympathetic fibers within the rat cervical vagus, and functional consequence on physiological effects mediated by vagus nerve stimulation (VNS)

 Ashlesha Deshmukh, Rex Chin-Hao Chen, Justin Chin, Bruce Knudsen, James Trevathan, Andrew J Shoffstall and Kip Ludwig

 2026-04-01  1 min  390 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Electrical stimulation of the vagus nerve (VNS) is an Food and Drug Administration approved therapy for epilepsy, depression and rehabilitation after stroke, with recent clinical trials to treat heart failure and inflammation. VNS is often assumed to activate either parasympathetic effere...

Implicit learning of melodic structure: A role for pitch?

 2024-01-22  1 min  180 words

PSYCHOMUSICOLOGY

Summary: Growing evidence suggests that pitch influences musical processing, with melodic processing being enhanced in higher pitch ranges (e.g., Fujioka et al., 2005) and rhythmic processing being enhanced in lower pitches, and these effects may have a basis in elementary properties of the auditory system (...)

Memory reactivation during sleep promotes structure abstraction

Solomon, S. H., Krishnamurthy, S., Siefert, E. M., Gonciulea, C. M., Schapiro, A. C.

2026-04-11

1
min246
words

BIORXIV NEUROSCIENCE

Summary: We readily detect structure in our environments, which in turn guides future learning. Disentangling this structure from the superficial features of a specific learning environment provides an especially strong basis for future generalization, but it remains unclear when and how this kind of abstrac...

Neurocognitive Dynamics Underlying Penalty-induced Boosting of Proactive Metacontrol and Its Influence on Reactive Metacontrol

 2026-03-12  1 min  221 words

COGNITIVE NEUROSCIENCE

Summary: Metacontrol states involve adapting cognitive control to contextual demands—being more flexible in frequent task-switching environments or more stable in those with infrequent switching. While these metacontrol states can be engaged proactively in anticipation or reactively in response to specific c...

Tracking the Unconscious: Neural Evidence for the Retention of Unaware Information in Visual Working Memory

 2026-03-12  1 min  207 words

COGNITIVE NEUROSCIENCE

Summary: This study investigates the retention of visual information in visual working memory (VWM) when individuals are unaware of it, aiming to provide clear-cut evidence for an unconscious VWM effect. To explore the underlying neural mechanisms, we monitored a critical ERP component, specifically the cont...

Visual Working Memory Representations Selectively Drop in Contralateral Visual Cortex but Remain Decodable in Parietal Cortex after Eye Movements

 2026-03-12  1 min  207 words

COGNITIVE NEUROSCIENCE

Summary: It has been suggested that our visual system does not only process stimuli that are directly available to our eyes but also has a role in maintaining information in visual working memory (VWM) over seconds. However, two critical questions remain unresolved. First, are VWM representations spatially s...

Limb position effect in myoelectric control: strategies for optimisation and standardisation

Trevor Overton, Zubaidah Al-Mashhadani, Syed Yahya Raza, Jason Whitson and Mohsen Rakhshan

2026-03-31

1
min

283
words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Myoelectric control uses electromyography (EMG) signals for muscle-machine interfacing with applications in prostheses, augmented/virtual reality, and consumer electronics. However, factors such as changes in the limb's position during activities of daily living reduce the controller's re...

Cell-type-specific circadian and light-responsive transcriptional dynamics in adult *Drosophila* neurons

Berglund, G., Ojha, P., Ivanova, M., Perez-Torres, M., Rosbash, M.

17

2026-04-10

1

min

231

words

BIORXIV NEUROSCIENCE

Summary: The *Drosophila* adult central brain contains 240 circadian neurons, of which there are more than 25 different neuron subtypes based on connectomic data. Recent single cell RNA-seq (scRNAseq) characterization of these neurons "around the clock" also indicates a similar number of molecular subtypes of ...

ERP BOOT CAMP

Summary: The demand for the 2024 ERP Boot Camp was far beyond our expectations, and we reached our maximum registration of 30 people within one day. We already have a waiting list of over 30 people, so we have closed the registration site.

 1
min

 162
words

BIORXIV NEUROSCIENCE

Summary: Animals repeatedly traverse the same environment to pursue different goals, yet the hippocampus must preserve a stable spatial map while keeping individual episodes distinct. Here we show that, when animals navigate the same maze under different goal configurations, hippocampal CA1 segregates naviga...
