Auditory Profiles in Tinnitus are Age-Dependent: Electrophysiological and Behavioral Evidence

Devolder, P., Keppler, H., Dhooge, I., Verhulst, S.

2026-06-03

1
min

247
words

BIORXIV NEUROSCIENCE

Summary: Tinnitus is commonly associated with hearing loss, yet it can also occur in individuals with clinically normal audiometric thresholds. This dissociation has led to the hypothesis that hidden sensorineural hearing loss underlies tinnitus in audiometrically normal-hearing individuals. However, identif...

Distinct associations between multimodal brain measures and psychopathology domains predict adolescent functioning

Ramduny, J., Mulvey, A. G., Kohler, R., Riley, S., Yip, S. W., Baskin-Sommers, A.

2026-06-04

1
min

248
words

BIORXIV NEUROSCIENCE

Summary: Adolescent psychopathology is partly rooted in measurable disruptions across key neural networks, yet the field still lacks an integrated, multimodal understanding of these brain-behavior links. Here, we examined how structural, microstructural, and functional measures across corticostriatal, cortic...

Slow Oscillations Gate Interictal Spikes Across the Human Thalamocortical-Epileptogenic Network

Alipour, M., Drongelen, W. v., Nordli, D. R., Voss, J., Lee, K., Satzer, D.

2026-06-03

1
min

251
words

BIORXIV NEUROSCIENCE

Summary: Background: Slow oscillations (SOs; 0.5-1.5 Hz), a hallmark of non-rapid eye movement (NREM) sleep, are associated with a marked amplification of interictal epileptiform spike (IIS) activity in focal epilepsy. However, the network-level organization of this effect across the thalamocortical-epilepto...

Tau aggregate replication occurs at the pre-synapse of cultured human neurons and increases with application of TNFa

Kedia, S., Fertan, E., Paul, A., Davi, V., Nolan, G., Baranes, K., Wu, Y., Kim, J. E., Quaegebeur, A., Kotter, M. R. N., Avezov, E., Meisl, G., Klenerman, D.

2026-06-03 1 min 148 words

BIORXIV NEUROSCIENCE

Summary: Tau aggregation at synapses is a key process driving Alzheimer's disease but the mechanism(s) that cause this have not been established. We used a model system of forward-programming induced glutamatergic neurons (iNeurons) with three independent cell lines treated with TNFa. Using aggregate-specifi...

Lipidated ApoE is found in nanoscale proximity to A β aggregates in human Alzheimer brains.

Owusu Kwarteng, D., Jackson, R. J., Nakajima, T., Altig, K., Melloni, A., Oakley, D., Serrano-Pozo, A., Maesako, M., Hyman, B.

2026-06-03 1 min 175 words

BIORXIV NEUROSCIENCE

Summary: Apolipoprotein E (APOE) associates with amyloid plaques A β in Alzheimer disease (AD). The ϵ 4 allele of apolipoprotein E (APOE ϵ 4) is the strongest genetic risk factor for sporadic AD and exacerbates A β plaque burden relative to APOE ϵ 3 and APOE ϵ 2. The majority...

From eye anatomy to navigation: a biologically accurate model of bees polarisation vision

Kolyfetis, G., Gkaniyas, E., Aliyam Veetil Zynudheen, A. A., Jie, V. W., Galizia, C. G., Baird, E., Webb, B., Foster, J.

2026-06-03 1 min 258 words

BIORXIV NEUROSCIENCE

Summary: Skylight polarisation patterns provide a critical navigational cue for many insects. Bees perceive these patterns through specialised ommatidia in the dorsal rim area of their compound eyes, enabling them to estimate the sun's direction and navigate between food sources and the hive. Although polaris...

Repetition Selectively Reconfigures Offset-Defined Temporal Integration in Auditory Cortex

Bao, X., Song, P., Xu, H., Zhai, Y., Ye, H., Mehmood, I., Pandit, N. S., Tu, Z., Zhang, L., Zhao, X., Yu, X.

2026-06-02 1 min 178 words

BIORXIV NEUROSCIENCE

Summary: Auditory perception requires integrating sound over time, but whether cortical integration windows are fixed or adaptively shaped by recent sensory history remains unclear. Because auditory offset responses are shaped by the temporal structure preceding sound termination, they provide a readout of o...

A critical role for the murine anterior insula in male social avoidance after early life maltreatment.

Kearney, M., Beatty, Z., Mayeaux, M., Wang, Z., Folorunso, O., Middleton, C., Newman, E., Carlezon, W. A., McNally, J., Ressler, K. J., Hisey, E. E.

2026-06-02 1 min 209 words

BIORXIV NEUROSCIENCE

Summary: Maltreatment in children and adolescents poses a major public health crisis as a primary factor for the development of adult psychiatric disorders. However effective treatments for symptoms resulting from early life maltreatment are lacking, in part due to a lack of understanding of how neural circu...

Quantifying plasticity: a network-based framework linking structure to dynamical regimes

Igor
Branchi

2026-06-03

1
min

257
words

ARXIV QBIO NC

Summary: arXiv:2603.25180v2 Announce Type: replace Abstract: Plasticity is a fundamental property of complex systems, such as the brain or an organism. Yet it typically remains a descriptive concept inferred retrospectively from observed outcomes, such as modifications in activity or morphology. Here, the n...

A Factorized Low-Rank RNN Framework for Uncovering Independent Neural Latent Dynamics and Connectivity

Chengrui Li, Yunmiao Wang, Yule Wang, Weihan Li, Dieter Jaeger, Anqi
Wu

2026-06-03

1
min

155
words

ARXIV QBIO NC

Summary: arXiv:2511.13899v2 Announce Type: replace Abstract: Low-rank recurrent neural networks (lrRNNs) are a class of models that uncover low-dimensional latent dynamics underlying neural population activity. Although their functional connectivity is low-rank, it lacks independence interpretations, making...

Enhanced glymphatic CSF tracer influx during α 2-adrenergic agonist anesthesia is independent of tracer injection duration

Tong, T., Newbold, E., Wang, J., Waight, E., Caudell, A., Ladron-de-Guevara, A., Giannetto, M., Hablitz, L., Nedergaard, M.

2026-06-02 1 min 154 words

BIORXIV NEUROSCIENCE

Summary: The glymphatic system mediates brain-wide cerebrospinal fluid (CSF) transport and is highly sensitive to brain state. Experimental studies show that 2-adrenergic agonist based anesthesia enhances glymphatic CSF influx, whereas isoflurane markedly suppresses it. However, it has been suggested that th...

Closed-loop auditory stimulation during sleep shapes cortical responses and memory consolidation depending on spindle timing

Xia, T., Jin, X., Chen, D., Zuo, X., Yao, Y., Zhang, Y., Yuan, T., Zhang, Z., Li, X., Lai, C. S. W., Hu, X.

2026-06-02 1 min 220 words

BIORXIV NEUROSCIENCE

Summary: Sleep spindles contribute to memory consolidation, and acoustic stimulation during sleep can modulate spindle activity. However, it remains unclear whether these effects depend on the timing of stimulation relative to the spindle cycle. Using closed-loop spindle detection, we delivered four variants...

Examination of objective and subjective cognition and their association with functional outcomes: A cross-sectional study in a Canadian sample of homeless and precariously housed adults.

2026-02-16

1

min

261

words

NEUROPSYCHOLOGY

Summary: Objective: Using a cross-sectional design, our aim was to examine whether objective and subjective cognition differentially relate to everyday functioning and quality of life in homeless and precariously housed adults. As an exploratory aim, we examined whether associations between cognition and out...

Advances in mechanisms of neuroplasticity induced by multimodal closed-loop brain-computer interfaces after stroke

Jiahao
Cui

2026-06-02

1
min

185
words

FRONTIERS HUMAN NEUROSCIENCE

Summary: Post-stroke motor dysfunction is one of the leading causes of acquired disability worldwide. The induction and maintenance of neuroplasticity constitute the core mechanisms underlying motor function recovery. Conventional open-loop brain-computer interfaces (BCIs) lack real-time closed-loop feedback...

Assistive Trajectory Planning for Lower Limb Exoskeletons: Strategies From Laboratory-Optimized Gait to Environmentally-Adaptive Locomotion Through Multimodal Parameter Awareness

2025-12-30

1
min182
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Lower limb assistive exoskeletons (LLEs) show great potential to reduce metabolic cost, improve walking performance, and correct abnormal gait patterns. Among their core control architectures, assistive trajectory planning is key to determining system responsiveness and effectiveness under varying l...

Altered Brain Extracellular Matrix Structure and Sex-Specific Learning/Memory Dysfunction in Mice Lacking the Functional Amyloid Cystatin-Related Epididymal Spermatogenic (CRES)

Gomez, A., Logsdon, A. F., Bailoo, J. D., Cornwall, G. A.

2026-06-01

1
min

202
words

BIORXIV NEUROSCIENCE

Summary: Cystatin-related epididymal spermatogenic (CRES) is a member of a reproductive subgroup of family 2 cystatins and part of a functional amyloid-containing extracellular matrix (ECM) with host defense functions in the epididymal lumen. CRES and the endogenous epididymal amyloid matrix exhibit high pla...

Grooming as a window into the post-stress recuperative process

Mahmud, A. N., PierreLouis, A. K., Yamaguchi, N., Cai, D. J., Pennington, Z. T.

2026-06-01

1 min 217 words

BIORXIV NEUROSCIENCE

Summary: Alterations in rodent self-grooming have been used to model various facets of neuropsychiatric illness. In the context of affective behavior, increases in grooming have been proposed as a sign of stress. This is because grooming has been observed to increase in close temporal proximity to stressful ...

ARXIV QBIO NC

Summary: arXiv:2605.30372v1 Announce Type: cross Abstract: Reservoir computing, a type of recurrent neural network, is a promising approach for temporal learning as it separates dynamic processing from the trained readout layer. However, classical Echo State Networks (ESNs) often require task-specific tunin...

Adapting frozen foundation models for montage-agnostic high-resolution EEG event segmentation

Jun Ma and Tuukka Ruotsalo

2026-05-25 1 min 221 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Deploying brain–computer interfaces (BCIs) outside controlled laboratories requires detecting neural events in continuous electroencephalography (EEG) without relying on time-locked synchronization, while simultaneously generalizing across the diverse electrode montages encountered with d...

Across-speaker articulatory reconstruction from sensorimotor cortex for generalizable brain–computer interfaces

Ruoling Wu, Julia Berezutskaya, Zachary V Freudenburg and Nick F Ramsey

2026-05-25

1 min 267 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Accurate reconstruction of articulatory features from brain activity could facilitate the development of speech brain–computer interfaces (BCIs) for communication in people with vocal tract paralysis. However, until now the common approach has relied on paired neural-articulatory or neura...

The Neurodynamic Core of Meditation: Dissociating Meditation from Rest and Task in a Reliability-based EEG study

Chowdhury, P., Govindaraj, R., Sasidharan, A., Saoji, A. A., N, R. P., Kutty, B. M.

2026-05-30

1 min 248 words

BIORXIV NEUROSCIENCE

Summary: Background: Electroencephalographic (EEG) studies attempting to characterise the neural signature of meditation typically rely on contrasts with passive rest or comparisons among practitioners based on experience. However, these approaches rarely include active control states and seldom establish th...

DREAMING

Summary: Dreams are a succession of images, ideas, emotions, and sensations that occur during certain stages of sleep. The content of dreams, influenced by waking activities, reflects aspects of reality and personality traits. This study aims to ascertain the self-reported dream patterns across various demog...

BIORXIV NEUROSCIENCE

Summary: The human brain is spatially organized along functional gradients, but the temporal organization of these gradients remains poorly understood. In EEG and MEG, this question has been difficult to address because volume conduction obscures temporal precedence. Here, we introduce lag-specific orthogona...

BIORXIV NEUROSCIENCE

Summary: Proprioceptors, a specialized subset of mechanosensory neurons that relay sensory feedback from muscles and tendons, are required for precise, goal-directed movement. Like all neurons, proprioceptors rely on voltage-gated ion channels to generate and transmit electrical signals. Investigating ion ch...

Oscillatory activity in rostral middle frontal gyrus and subthalamic nucleus encode proactive inhibition in cortico-subcortical motor control network

Duong, V. T. K., Borgheai, S. B., Opri, E., Isbaine, F., Swann, N. C., Au Yong, N., Miocinovic, S.

2026-05-29 1 min 264 words

BIORXIV NEUROSCIENCE

Summary: The current model of the action inhibition network includes the prefrontal cortex and the subthalamic nucleus (STN) connected via the prefrontal hyperdirect pathway. Proactive inhibition refers to preparatory mechanisms that facilitate action inhibition (i.e. enables a person to act with restraint),...

High sensitivity imaging of intracellular Cl⁻ reveals the spatiotemporal evolution of GABAergic chloride fluxes in vitro and in vivo

Pasquini, G., Giubolini, S., Nardi, G., Brondi, M., Beyene, E., Balsi, C., Egidi, A., Tsushima Semini, H., Landi, S., Stancampiano, M., Beale, A. D., Watson, E. M., Edgar, R. S., O'Neill, J. S., Arosio, D., Santi, M., Fassio, A., Lodovichi, C., Ratto, G. M. M.

2026-05-29 1 min 237 words

BIORXIV NEUROSCIENCE

Summary: Fast inhibition in the brain is primarily mediated by chloride currents through the GABAA and glycine receptors. The driving force of these currents depends on the intracellular concentration of chloride ([Cl⁻]_i) that is an important determinant of inhibitory drive and neuronal processing. In physio...

Differential Vulnerability of Stimulus-Locked and Persistent Gamma Oscillations: Implications in Schizophrenia

Chung, D. W., Ermentrout, G.
B.

2026-05-29

1
min

287
words

BIORXIV NEUROSCIENCE

Summary: Working memory depends on gamma oscillations generated across sensory and prefrontal cortices. In sensory cortices such as primary visual cortex (V1), stimulus-locked gamma oscillations encode stimulus information, while in prefrontal cortex (PFC), persistent gamma oscillations maintain this informa...

Directed cortical connectivity inferred from neural energy metabolism

Belenya, R., Epp, S., Bose, A., Hechler, A., Fraticelli, L., Ashrafi, M., Ranft, A., Yakushev, I., Kurcyus, K., Castrillon, G., Riedl, V.

2026-05-29 1
min 224
words

BIORXIV NEUROSCIENCE

Summary: Functional connectivity (FC) from resting-state fMRI captures temporal correlations between brain regions but cannot reveal the direction of neural signalling. Determining effective connectivity, the influence of one neural system over another, is essential for understanding cortical hierarchy and i...

Autism associated Cntnap2 deletion disrupts vestibular sensory signaling and spatial cognition in mice

Shu, Y., Chen, Y., Zhou, D., Deng, X., Florea, L. D., Deemyad, T., Sadeghi, S. G.

2026-05-29

1 min
209 words

BIORXIV NEUROSCIENCE

Summary: Autism spectrum disorder (ASD) is frequently accompanied by sensory and motor abnormalities, including impaired balance, postural control, and spatial orientation, that are often attributed largely to altered central circuitry. Emerging evidence, however, suggests that peripheral sensory dysfunction...

Restoring hippocampal sharp-wave ripples under glutamate transporter dysfunction

Gao, Y., Zhou, Z., Wu, J.-y.

2026-05-29

1 min

206 words

BIORXIV NEUROSCIENCE

Summary: Disruption of glutamate homeostasis is believed to contribute to the early progression of Alzheimers disease (AD) and associated neurodegeneration. Soluble amyloid- β oligomers impair excitatory amino acid transporters (EAATs), reducing glutamate clearance, while also enhancing glutamate release...

Phase of transcranial alternating current stimulation modulates working memory processing speed

Dimmendaal, J., Wang, X., Dijkslag, B. J., Huizinga, L. E., Maalderink, S., Priest, M., van Dam, F. J. E., Span, M. M., Wischniewski, M.

2026-05-29 1 min 249 words

BIORXIV NEUROSCIENCE

Summary: Background: Theta-frequency transcranial alternating current stimulation (tACS) over prefrontal cortex has been proposed to modulate working memory (WM), yet behavioral effects are often inconsistent. One potential source of variability is the tACS phase during stimulus presentation. Objective: We t...

Neural activity drives directional subarachnoid cerebrospinal fluid flow in the human brain

Wang, F., Polimeni, J. R., Wald, L. L., Rosen, B. R., Lewis, L. D., Dong, Z.

2026-05-29 1 min

149 words

BIORXIV NEUROSCIENCE

Summary: Neural activity is a potential driver of cerebrospinal fluid (CSF) dynamics and brain waste clearance, yet how neural activity shapes localized CSF flow in the subarachnoid space remains poorly understood in humans. Here we introduce an MRI framework that enables concurrent mapping of ultra-slow sub...

Synaptic GABA dysfunction of thalamocortical neurons impairs sleep spindle morphology and recovery from fearful memories.

Katsuki, F., Bauer, M. C., Vaughn, M. J., Lombardi, V. A., Brown, R. E., Haas, J. S., Basheer, R., Uygun, D. S.

2026-05-29 1 min 279 words

BIORXIV NEUROSCIENCE

Summary: Sleep spindles are rhythmic electroencephalographic signatures of non-rapid-eye-movement sleep. Their dysregulation has been implicated in several neuropsychiatric illnesses. Spindles have a characteristic waxing and waning shape, but the cellular and circuit mechanisms controlling their shape are n...
