Emerging Noninvasive Approaches for the Suppression of Pathological Tremor

2025-12-16

1
min

215
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Pathological tremor affects over 40 million people worldwide, significantly impairing daily activities and quality of life. Pharmacological treatments show limited efficacy, with up to 30% discontinuation rates, while surgical interventions like deep brain stimulation achieve significant tremor redu...

Assistive Trajectory Planning for Lower Limb Exoskeletons: Strategies From Laboratory-Optimized Gait to Environmentally-Adaptive Locomotion Through Multimodal Parameter Awareness

2025-12-30

1
min182
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Lower limb assistive exoskeletons (LLEs) show great potential to reduce metabolic cost, improve walking performance, and correct abnormal gait patterns. Among their core control architectures, assistive trajectory planning is key to determining system responsiveness and effectiveness under varying l...

Neural synchrony between prefrontal and visual cortex supports visual working memory

Dake, M., Dandekar, S., Curtis, C.
E.

2026-06-07

1
min207
words

BIORXIV NEUROSCIENCE

Summary: Working memory appears to depend on neural mechanisms that are distributed across the brain. Specifically, neural activity persists in the prefrontal cortex while memories are maintained, and at the same time, the visual contents of memory can be precisely decoded from the patterns of activity in vi...

Neurophysiological Functional Connectivity Changes during Difficult Listening in Older and Younger Adults

Commuri, V., Fisher, C., Karunathilake, I. M. D., Das, P., Kuchinsky, S. E., Babadi, B., Simon, J. Z.

2026-06-07 1 min 273 words

BIORXIV NEUROSCIENCE

Summary: Older adults often report increased difficulty understanding speech in noisy listening environments. These difficulties are thought to arise from neurophysiological changes associated with aging, including at the level of cortex. Speech comprehension is believed to rely on coordinated activity across...

Cortical folding patterns are encoded in the geometry of the unfolded neocortex.

Toro, R., Heuer, K., Aflak, N., Borrell, V., Caporal, C., de Juan Romero, C., Larrat, B., Legouhy, A., Maikranz, E., Mangin, J.-F., Martinez Anhom, K., Meriaux, S., Reillo, I., Traut, N.

2026-06-07 1 min 186 words

BIORXIV NEUROSCIENCE

Summary: Cortical folding patterns are conserved across individuals of gyrencephalic species and are closely related to cytoarchitectural organisation, connectivity, and function. Early morphogen gradients have been proposed as the molecular source of positional information encoding these patterns - a gyral ...

Thalamic Nuclei Differentially Coordinate Propagation of Cortical Slow Oscillations

Alipour, M., Drongelen, W. v., Jacobs, J., Voss, J., Satzer, D.

2026-06-07

1
min

277
words

BIORXIV NEUROSCIENCE

Summary: Sleep slow oscillations (SOs) vary in the spatial extent of their cortical propagation, ranging from widespread Global events to spatially restricted Frontal events. These distinctions could have functional consequences for memory consolidation. It remains unknown whether individual thalamic nuclei ...

Hippocampal CA2 modulates trace fear conditioning through circuit-specific control of CA1

Bassett, T. E., Zhang, H., Petrovic, Z., Nakamoto, C., Cicvaric, A., Wood, E. M., Rudolph, S., Tanimura, A., Radulovic, J.

2026-06-07
1
min

150
words

BIORXIV NEUROSCIENCE

Summary: Forming associations between temporally separated events depends on pathways linking the CA1, the subiculum (SUB), and the entorhinal cortex. The degree to which this process requires the CA2, which shares extensive connectivity with these regions, remains unknown. Using trace fear conditioning (TFC...

Just one moment: Unifying theories of consciousness based on a phenomenological “now” and temporal hierarchy.

2024-04-04

1
min216
words

CLINICAL NEUROSCIENCE

Summary: A prevailing pessimism in the scientific study of consciousness is about it having too many theories. With theories of consciousness becoming increasingly isolated from each other, recently, several proposals have been put forth to cull the number of theories in contention. Here, building on a sugge...

Comparative analysis of lucid dream deepening techniques.

2024-02-08

1
min231
words

CLINICAL NEUROSCIENCE

Summary: Lucid dreams (LDs) can be characterized by the presence of metacognition during dreams. LDs may have initially low perception vividness. In this study, we compare the effectiveness of eight techniques for increasing perception vividness, or deepening techniques (DTs), in LDs and the effectiveness of...

Virtual reality and neuromodulation in the induction of out-of-body experience (VR-NIOBE): A proof-of-concept new paradigm for psychological and neuroscientific study of an altered state of consciousness.

2024-02-08

1
min277
words

CLINICAL NEUROSCIENCE

Summary: Virtual reality (VR) has been used to induce out-of-body experience (OBE), but the construct validity of prior methods has been criticized. The current research evaluated a new VR paradigm to induce OBE that included implementation of a brain–computer interface (BCI), affording a means of neuromodul...

NeuroCaptain v2 - Interactive Three-Dimensional fNIRS Optode and Probe Montage Design Platform Based on Blender

McCann, A., Fang,
Q.

2026-06-05

1
min

292
words

BIORXIV NEUROSCIENCE

Summary: Significance: Accurate and reproducible optode placement is crucial for obtaining high-quality fNIRS data in both individual and group-level neuroimaging studies. Conventional optode/probe montage design tools usually transform a probe layout defined in 2D Cartesian space onto a 3D head surface usin...

Brain dynamics supporting high cognitive performance reorganize after midlife

Chekin, Y., Decker, D., Dubois, J., Field, R. M., Gundran, A., Jewison, A., Koch, E. M., Lerner, G., M. Aghajan, Z., Miller, N., Perdue, K. L., Taylor, M.

2026-06-05

1
min

170
words

BIORXIV NEUROSCIENCE

Summary: Quantifying functional brain aging trajectories at scale remains a fundamental challenge due to the scanner-bound limitations of traditional neuroimaging. Here, we deploy whole-head Time-Domain functional Near-Infrared Spectroscopy (TD-fNIRS) to map task-evoked cortical dynamics during a 30-minute c...

Intrinsic Population Dynamics are a Neuronal Substrate for Visual Attention

Schmidt, F. H., Mlynarski, W., Georges, A., Sumser, A., Tkacik, G., Joesch, M.

2026-06-05

1
min 230
words

BIORXIV NEUROSCIENCE

Summary: Perception results from a dynamic interplay between the feedforward processing of sensory stimuli and intrinsic neural activity, which is often dismissed as noise. To tailor perceptual processes to the organism's current needs on a continuous, moment-to-moment basis, intrinsic dynamics - rather than...

Insight across contexts: Phenomenological differences and the role of meaning in belief change

Pogliani, A., Zachary, A., Hall, L., Tangen, J. M., Mond, J., Laukkonen, R. E.

2026-06-05

1
min

242
words

BIORXIV NEUROSCIENCE

Summary: Insight is commonly studied in laboratory paradigms as a sudden shift in understanding accompanied by characteristic "Aha!" experiences. However, such paradigms may not capture the full phenomenological range of insight as it occurs in naturalistic contexts. This study examined insight experiences a...

Depression Severity Modulates the Cognitive Process of Facial Affect Representation: Evidence from a Genetic-Algorithm Face Synthesis Task

Cui, B., Bex, P.
J.

2026-06-04

1
min

216
words

BIORXIV NEUROSCIENCE

Summary: Depression is associated with biased facial emotion processing, yet existing paradigms measure only the recognition of pre-selected stimuli, conflating the process of forming an internal representation with its endpoint product. Here, we used a genetic-algorithm (GA) face synthesis task to disentang...

Sleep immediately after noise overexposure worsens tinnitus in mice

Milinski, L., Nodal, F. R., King, A. J., Vyazovskiy, V. V., Bajo, V. M.

2026-06-04

1
min

248
words

BIORXIV NEUROSCIENCE

Summary: Subjective tinnitus is the most common auditory phantom perception in the absence of an acoustic stimulus yet there is no cure nor widely effective treatment to date. Previously, we suggested that sleep may contribute to tinnitus development after a triggering event, such as noise overexposure (NOE)...

Low-dimensional prefrontal representations of objects during working memory

Sakellidou, D. G., Brincat, S. L., Miller, E. K., Lundqvist, M.

2026-06-04

1
min

147
words

BIORXIV NEUROSCIENCE

Summary: There is an ongoing debate regarding the dimensionality of neural representations. Some accounts emphasize representation within low-dimensional subspaces or manifolds, while others suggest high-dimensional neural codes where neurons respond independently. Here, we investigate the dimensionality of ...

Serial dependence in duration perception reveals reliability-weighted updating of the prior

Otsuka, T., van Rijn, H., Kruijne, W., de Jong, J.

2026-06-04

1 min 187 words

BIORXIV NEUROSCIENCE

Summary: Bayesian theories of perception propose that perceptual estimates result from the integration of prior beliefs ("priors") with sensory input ("likelihood"), weighted by their reliability. While Bayesian theories assume that priors are continuously updated over time, empirical evidence for such relia...

Longitudinal versus Cross-sectional effects of Age on MEG Power Spectra Parameters: Implications for Normative Models and Brain Ageing

Crespo Garcia, M., Apsvalka, D., Demetriou, I., Attaheri, A., Emery, T., Aller, M., Henson, R.

2026-06-04 1 min 227 words

BIORXIV NEUROSCIENCE

Summary: Ageing produces changes in brain function. To map this process, researchers increasingly utilise Magnetoencephalography (MEG) to identify spectral shifts across large, age-diverse cohorts. However most such research has used cross-sectional designs, which may be confounded by generational difference...

One Circuit, Many Flow Fields: Mechanistic Models of Single-Trial Neural Dynamics

Kaminitz, S., Levin, M., Pereira-Obilinovic, U., Darshan, R.

2026-06-04 1 min 238 words

BIORXIV NEUROSCIENCE

Summary: A single neural circuit can exhibit qualitatively different dynamics across trials: one circuit, many flow fields. Standard models treat this trial-to-trial variability as noise around a fixed dynamical system or as discrete switches between regimes, yet neither captures how continuous internal-stat...

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Neuronal circuit formation is controlled by secreted guidance molecules and their receptors. However, the transcriptional mechanisms underlying neuronal circuit formation are not fully understood. In an unbiased genetic screen, we identified the Nuclear Factor-Y transcription factor (NF-Y) as a k...

ERP BOOT CAMP

Summary:

We are disappointed to announce that we will not be holding a regular 10-day ERP Boot Camp this summer.

We have held Boot Camps nearly every summer since 2007, supported by a series of generous grants from NIMH that allowed us to provide scholarships for all attendees. Unf...

Slow Oscillations Gate Interictal Spikes Across the Human Thalamocortical-Epileptogenic Network

Alipour, M., Drongelen, W. v., Nordli, D. R., Voss, J., Lee, K., Satzer, D.

2026-06-03

1
min

251
words

BIORXIV NEUROSCIENCE

Summary: Background: Slow oscillations (SOs; 0.5-1.5 Hz), a hallmark of non-rapid eye movement (NREM) sleep, are associated with a marked amplification of interictal epileptiform spike (IIS) activity in focal epilepsy. However, the network-level organization of this effect across the thalamocortical-epilepto...

BIORXIV NEUROSCIENCE

Summary: Acute COVID-19 outcomes are exacerbated by substance use, however, the impact of substance use on Long-COVID is unknown. Here, we investigated the impact of chronic cocaine administration on spike-induced Long-COVID-like outcomes in the rat. Rats received intermittent chronic cocaine administration ...

BIORXIV NEUROSCIENCE

Summary: Sleep spindles are hallmarks of non-rapid eye movement sleep and support memory consolidation, yet remain difficult to modulate non-invasively. Combining computational modeling and human sleep recordings, we show that thalamus-targeted temporal interference stimulation (TIS) with a 5Hz envelope incr...

Differential vulnerability of CA1 pyramidal neuron cell types in the 5xFAD Alzheimer's disease mouse model

Pachicano, M., Hurtado, A., Mehta, S., Breningstall, B., Zhou, Y., Bienkowski, M. S.

2026-06-02

1 min 192 words

BIORXIV NEUROSCIENCE

Summary: Selective neuronal vulnerability is a defining feature of Alzheimer's disease, yet how neurodegeneration unfolds across defined hippocampal CA1 pyramidal neuron populations remains unresolved. Previously, we showed that CA1 pyramidal neurons are organized into molecularly defined laminar cell types ...

Efficient ageing: Simulated lesion of the structural connectome reveals optimised decline in the healthy ageing brain

Kudriavtsev, N., Rosso, M., Fernandez-Rubio, G., Serra, E., Kringelbach, M. L., Vuust, P., Bonetti, L.

2026-06-02 1 min 209 words

BIORXIV NEUROSCIENCE

Summary: Healthy ageing is associated with widespread white-matter change and altered connectome organisation, yet the link between local microstructural decline and whole-brain network communication remains unclear. Here we combined tract-based spatial statistics (TBSS) with probabilistic tractography and g...

Information-dependent eye-hand coordination emerges from active vision

Zhao, J., VERDEL, D., Tan, Y., Burdet, E.

2026-06-02 1 min 180 words

BIORXIV NEUROSCIENCE

Summary: In daily activities, humans rely on visual information to plan hand movements, making the extraction of task-relevant information through eye gaze a key aspect of motor control. Behavioral studies have revealed characteristic saccade-pursuit patterns, likely governed by shared neural circuits, which...

A genetic tool targeting brain GPR75

Wheeler, E. C., Yang, R., Farmer, S. M., Zhang, S., Zhang, N., An, Z., Tong, Q.

2026-06-02

1
min

144
words

BIORXIV NEUROSCIENCE

Summary: G-protein-coupled receptor 75 (GPR75) has emerged as an important mediator in diet-induced obesity (DIO) and a promising therapeutic target for anti-obesity drugs. However, the anatomical location of GPR75 in the brain remains unclear, hindering the understanding of GPR75 biology in DIO. Here, we ge...

Closed-loop auditory stimulation during sleep shapes cortical responses and memory consolidation depending on spindle timing

Xia, T., Jin, X., Chen, D., Zuo, X., Yao, Y., Zhang, Y., Yuan, T., Zhang, Z., Li, X., Lai, C. S. W., Hu, X.

2026-06-02 1 min 220 words

BIORXIV NEUROSCIENCE

Summary: Sleep spindles contribute to memory consolidation, and acoustic stimulation during sleep can modulate spindle activity. However, it remains unclear whether these effects depend on the timing of stimulation relative to the spindle cycle. Using closed-loop spindle detection, we delivered four variants...

The Roles of Alpha Oscillations in Attentional Blink

2026-06-01

1
min198
words

COGNITIVE NEUROSCIENCE

Summary: The attentional blink (AB) refers to impaired processing of a second target (T2) when presented 200–500 msec after a first target (T1) in a rapid serial visual presentation stream. There is converging evidence that alpha oscillations (8–12 Hz) may be critical for AB performance, as they can regulate...

Competition for Limited Visual Capacity Follows Feedforward Processing of a Distractor

2026-06-01

1
min242
words

COGNITIVE NEUROSCIENCE

Summary: The present study tested central predictions of our conceptual framework “distraction under competition” (DUC), including the extent to which semantic processing of emotional cues triggers competitive interactions among multiple stimuli. In situations in which stimuli compete for attentional process...

Prestimulus Alpha Power Enhancement via Transcranial Alternating Current Stimulation Does Not Influence Visual Contrast Detection

2026-06-01

1
min231
words

COGNITIVE NEUROSCIENCE

Summary: Variability in visual contrast detection has been linked to prestimulus alpha oscillations, yet whether modulating alpha power can causally influence perception remains unclear. In this sham-controlled, single-blinded, within-participant study, we applied transcranial alternating current stimulation...

Perception, Memory, Simulation, and Consciousness: A Convergence of Theories

2026-06-01

1
min

193
words

COGNITIVE NEUROSCIENCE

Summary: Our theories stemming from perception, memory, and neurology came to similar and complementary conclusions regarding the mechanism of conscious brain processes. We suggest that consciousness is the explicit memory of past events or the general cognitive capacity to simulate events, whether used to c...

Sensorimotor Mechanisms of Decisions and Actions

2026-06-01

1
min

121
words

COGNITIVE NEUROSCIENCE

Summary: Decisions are often thought of as an intermediary between perception and action, but the degree to which this assumption is integrated into different parts of cognitive neuroscience theory and practice varies. After examining these variations on the causal relationship between decisions and actions,...

Uncovering phenotypic diversity and cell-type-specific prefrontal cortex calcium dynamics in rat fentanyl self-administration

Whitebirch, A. C., Panh, S. M., Tripathi, L., Garcia, A. F., Nasirova, N., Suess, D. J., Ferguson, S. M.

2026-06-01 1 min 336 words

BIORXIV NEUROSCIENCE

Summary: BACKGROUND: The proliferation of the potent synthetic opioid fentanyl has exacerbated the ongoing crisis of substance use disorder and associated overdose deaths, yet the neurobiological mechanisms that underlie individual vulnerability to addiction and relapse remain poorly understood, particularly...

A noradrenergic lh-dependent pacemaker system drives sniffing

Thadari, B., Lee, Y., Skach, J., Camba Almazan, M., Hwang, E. J., Kam, K.

2026-06-01

1
min141
words

BIORXIV NEUROSCIENCE

Summary: Sniffs are rapid breaths generated to clear nasal passages, actively sample air for smelling, and, in infants, rouse from sleep. Rapid shifts between breathing at rest (eupnea) and sniffing point to generation of both behaviors by the core brainstem inspiratory oscillator, the preBotzinger Complex (...)
