Sex-specific differences in endocannabinoid regulation of cocaine-evoked dopamine in the medial nucleus accumbens shell

 Gaulden, A. D., Chase, K., McReynolds, J. R.

 2026-03-28

 1 min

 224 words

BIORXIV NEUROSCIENCE

Summary: Endocannabinoid (eCB) signaling is a key regulator of reward-related dopaminergic signaling, particularly in response to drugs of abuse, such as cocaine. To date, our understanding of this mechanism has primarily been limited to male subjects. Prior work establishes that female cocaine users have mo...

min

196
words

BIORXIV NEUROSCIENCE

Summary: Language impairments in aphasia are characterized by various representational disruptions that may be reflected in discourse production. This research examines the capacity of transformer-based language models, particularly GPT-2, to serve as a computational framework for analyzing variations in aph...

'RMT-Finder': an automated procedure to determine the Resting Motor Threshold for Transcranial Magnetic Stimulation

 Boidequin, L. F., Moreno-Verdu, M., Waltzing, B. M., Lambert, J. J., Van Caenegem, E. E., Truong, C., Hardwick, R. M.

 2026-03-27  1 min  228 words

BIORXIV NEUROSCIENCE

Summary: Background: Transcranial Magnetic Stimulation (TMS) studies identify the Resting Motor Threshold (RMT) to calibrate stimulation intensity. However, this procedure is time-consuming and subject to variability. We developed an automated procedure to improve the efficiency and standardization of RMT de...

Cross-disease genetic and epigenetic architecture of the MOBP locus shows convergence in ALS-PSP

 Fodder, K., Murthy, M., de Silva, R., Raj, T., Farrell, K., Humphrey, J., Bettencourt, C.

 2026-03-27

 1 min  353 words

BIORXIV NEUROSCIENCE

Summary: Myelin oligodendrocyte basic protein (MOBP) is an abundant oligodendrocyte gene implicated in multiple neurodegenerative diseases. Genetic variation at the MOBP locus has been associated with risk for progressive supranuclear palsy (PSP), amyotrophic lateral sclerosis (ALS), frontotemporal lobar deg...

Cortical gray matter density at age five associated with preceding early longitudinal language profiles: A Voxel-based morphometry analysis of the FinnBrain Birth Cohort Study

Saloranta, E., Tuulari, J. J., Pulli, E. P., Audah, H. K., Barron, A., Jolly, A., Rosberg, A., Mariani Wigley, I. L. C., Kurila, K., Yada, A., Yli-Savola, A., Savo, S., Eskola, E., Fernandes, M., Korja, R., Merisaari, H., Saukko, E., Kumpulainen, V., Copeland, A., Silver, E., Karlsson, H., Karlsson, L., Mainela-Arnold, E.

 2026-03-27  1 min  304 words

BIORXIV NEUROSCIENCE

Summary: Previous studies exploring the connection between early language development and brain anatomy have shown that cortical areas relating to individual differences in language skills are diverse and vary depending on the age of child. However, due to lack of large longitudinal samples, current literatu...

Blindness reshapes mental time travel: From perceptual scenes to conceptual scaffolds

Abdel Kafi, N., Malinowski, M., Leelaarporn, P., Taube, J., Kindler, C., Crump, M., Essmann, A., Mattar, N., Gutenberg, E., Brunheim, S., Stoecker, T., Lange, S., Wall, K., Wabbels, B., Spottke, A., McCormick, C.

2026-03-27

1 min

141 words

BIORXIV NEUROSCIENCE

Summary: How can humans remember and imagine without vision? Mental time travel, the ability to re-experience past events and envision future ones, is widely assumed to rely on visual imagery and the construction of mental scenes. Blindness provides a critical test of this assumption. Across behavioral inter...

Distinct cortical regions support the coding of order across visual and auditory working memory

Vivion, M., Mathy, F., Guida, A., Mondot, L., Ramanoel, S.

2026-03-26

1 min

241 words

BIORXIV NEUROSCIENCE

Summary: Spatialization in working memory refers to the spatial coding of non-spatial information along a mental horizontal line when encoding verbal material. This phenomenon is thought to support working memory by facilitating order encoding. Although it has been observed for both visually and auditorily p...

A neurocomputational model of observation-based decision making with a focus on trust

Hassanejad Nazir, A., Hellgren Kotaleski, J., Liljenström, H.

2026-03-26

1 min

218 words

BIORXIV NEUROSCIENCE

Summary: As social beings, humans make decisions partly based on social interaction. Observing the behavior of others can lead to learning from and about them, potentially increasing trust and prompting trust-based behavioral changes. Observation-based decision making involves different neural structures. Th...

Age-related cerebellar genetic, neuronal and functional impairments are reversed by specific magnetic stimulation protocols

Fauquier, A., Dufor, T., Morellini, N., Doulazmi, M., Mariani, J., Lohof, A. M., Sherrard, R. M.

2026-03-26

1 min

161 words

BIORXIV NEUROSCIENCE

Summary: Age-related cognitive decline reflects progressive atrophic changes that advance through broad neural networks. There is no effective treatment. However, brain ageing is not homogenous, so treating the earliest-affected circuits may be successful in reversing and/or preventing ongoing neuronal atrop...

BIORXIV NEUROSCIENCE

Summary: Cajal-Retzius neurons (CRs) are a transient cell type that populates the postnatal hippocampus. To test how the persistence of CRs shapes the maturation of hippocampal function, we used a CRs-specific transgenic mouse line combined with targeted viral delivery to selectively ablate CRs in the postna...

Hearing sounds when the eyes move: A case study implicating the tensor tympani in eye movement-related peripheral auditory activity

 King, C. D., Zhu, T., Groh, J. M.

2026-03-25

1 min

284 words

BIORXIV NEUROSCIENCE

Summary: Information about eye movements is necessary for linking auditory and visual information across space. Recent work has suggested that such signals are incorporated into processing at the level of the ear itself (Gruters, Murphy et al. 2018). Here we report confirmation that the eye movement signals ...

Mueller glia-vasculature interactions in the developing retina

 Monshietehadi, S., Garcia, A. J., Smith, B. E., Tarchick, M., Conley, A., Abhayaratne, K., Feller, M.

 2026-03-25  1 min  250 words

BIORXIV NEUROSCIENCE

Summary: Coordinated signaling among neurons, glia, and the vasculature is essential for the formation of a functional nervous system, yet how these relationships emerge during development remains unclear. Here, we investigated the developmental interplay between neural activity, Mueller glia, and the retina...

BIORXIV NEUROSCIENCE

Summary: Neuron connectivity and signal processing rely on a complex, dynamic morphology regulated by the cytoskeleton. The membrane-associated periodic skeleton (MPS), a 185-nm periodic actin-spectrin lattice, is a conserved feature of neurons. Here, we show that the dendritic MPS is built from a dual {beta...

words

BIORXIV NEUROSCIENCE

Summary: The blood-brain barrier (BBB) poses a major obstacle to the delivery of therapeutics into the central nervous system (CNS) due to its highly restrictive permeability. Here, we introduce glycan-targeted delivery vehicles, or GlycoShuttles, that traverse the BBB by harnessing the cerebrovascular glyco...

Beyond Regional Activations: Structural Connectivity Message-Passing Shallow Neural Networks for Brain Decoding

 Ramos, M. B., Marques dos Santos, J. D., Direito, B., Reis, L. P., Marques dos Santos, J. P.

 2026-03-25  1 min  190 words

BIORXIV NEUROSCIENCE

Summary: Brain decoding from fMRI data using artificial neural networks traditionally operates at the regional level, identifying which brain areas activate during tasks but ignoring how these regions interact through structural networks. While Graph Neural Networks can capture connectivity, they require pro...

A sensory - preoptic circuit drives capsaicin-induced hypothermia

 Siemens, J., Bouaouda, H.

 2026-03-24  1 min  229 words

BIORXIV NEUROSCIENCE

Summary: Capsaicin, the principal agonist of the heat-sensitive transient receptor potential vanilloid 1 (TRPV1) channel, triggers profound hypothermia by suppressing thermogenesis and promoting heat loss. While TRPV1 has been extensively characterized as a molecular sensor of heat and inflammatory mediators...

Show HN: Gemini can now natively embed video, so I built sub-second video search

 sohamrj  2026-03-24  1 min  104 words

HACKER NEWS

Summary:

Gemini Embedding 2 can project raw video directly into a 768-dimensional vector space alongside text. No transcription, no frame captioning, no intermediate text. A query like "green car cutting me off" is directly comparable to a 30-second video clip at the vector level.

I used this to build a...

Janus kinase 2 regulates Nurr1 protein stability in dopaminergic neurons of the aging midbrain

 Jang, Y., Kim, Y. H., Jeon, J., Cha, Y., Lopes, C., Jung, J. H., Oh, E., Park, Y., Ko, C., Hyeon, B., Leblanc, P., Kim, K.-S.

 2026-03-23  1 min  258 words

BIORXIV NEUROSCIENCE

Summary: The nuclear receptor Nurr1 (NR4A2) is an essential transcription factor that governs the differentiation, maturation, and long-term maintenance of midbrain dopaminergic (mDA) neurons in the substantia nigra. Reduced Nurr1 expression has been closely linked to age-related dopaminergic neuronal loss a...

Explaining temporally clustered errors with an autocorrelated Drift Diffusion Model

Vloeberghs, R., Tuerlinckx, F., Urai, A. E., Desender, K.

2026-03-23

1
min

207
words

BIORXIV NEUROSCIENCE

Summary: A widely used framework for studying the computational mechanisms of decision making is the Drift Diffusion Model (DDM). To account for the presence of both fast and slow errors in empirical data, the DDM incorporates across-trial variability in parameters such as the drift rate and the starting poi...

Interpretable Hierarchical RNNs for rs-fMRI: Promise and Limits of Individualized Brain Dynamics

Barkhau, C. B. C., Mahjoory, K., Brenner, M., Weber, E., Leenings, R., Pellengahr, C., Winter, N. R., Konowski, M., Straeten, T., Meinert, S., Leeher, E. J., Flinkenfluegel, K., Borgers, T., Grotegerd, D.,  Meinert, H., Hubbert, J., Jurishka, C., Krieger, J., Ringels, W., Stein, F., Thomas-Odenthal, F., Usemann, P., Teutenberg, L., Nenadic, I., Straube, B., Alexander, N., Jansen, A., Jamalabadi, H., Kircher, T., Junghoefer, M., Dannlowski, U., Hahn, T.

2026-03-23

1
min232
words

BIORXIV NEUROSCIENCE

Summary: Modeling individual brain dynamics from resting-state fMRI (rs-fMRI) remains challenging due to substantial inter-subject variability, measurement noise, and limited data length per subject. Here, we systematically evaluate a hierarchical dynamical systems framework based on shallow piecewise-linear...

Scene memorability reflects representational distinctiveness within visual categories

Atzert, C., Dechterenko, F., Lukavsky, J., Busch, N.
A.

2026-03-23

1
min

149
words

BIORXIV NEUROSCIENCE

Summary: Some images are consistently remembered better than others, suggesting that memorability reflects intrinsic image properties. We tested whether within-category distinctiveness underlies this effect. Across three experiments (N=477), participants categorized indoor scenes previously rated for subject...

Gq-pathway activation in hippocampal CA1 astrocytes rescues ischemia-induced memory deficits and synaptic plasticity

 Chen, Y., Wang, L., Wang, J., Zhou, Y., Shen, H., Wang, Y., Qin, W., Liu, B., Chen, B., Huang, Y., Guo, W., Xu, H., Tian, Q., Zheng, C.

 2026-03-23  1 min  152 words

BIORXIV NEUROSCIENCE

Summary: More than 30% of stroke survivors develop post-stroke cognitive impairment (PSCI), for which current neuron-centric therapies not only lack cellular specificity but also carry risks of adverse effects such as epilepsy. Here, we explore the therapeutic potential of astrocytes by chemogenetically acti...

A mitochondrial tipping point couples early hyperexcitability to late-stage failure in patient-derived ALS motor neurons

Prerad, J., van Gorsel, M., Vanwelden, T., Vansteenkiste, S., Pipeleers, K., Libotton, T., Bastiaens, I., Reusen, M., Princen, K., Stam, F., Griffioen, G., Fivaz, M.

2026-03-23

1
min

215
words

BIORXIV NEUROSCIENCE

Summary: Amyotrophic lateral sclerosis (ALS) is a motor neuron (MN) disease characterized by profound alterations in energy metabolism and progressive degeneration of MNs. Evidence from patients and model systems point to MN hyperexcitability as an early hallmark of ALS. How altered electrical activity inter...
