The balance of local and distributed excitation shapes brain stability and reflects aging- and Alzheimer's disease-related alterations

 Park, Y., Kim, S., Park, H., Satterthwaite, T. D., Bernhardt, B., Park, B.-y.

 17 2026-09-24  1 min

 158 words

BIORXIV NEUROSCIENCE

Summary: Human brain function emerges from the interplay between recurrent local activity and distributed inter-regional interactions. However, a biologically interpretable framework for quantifying this balance between the two factors at the whole-brain level remains lacking. Here, we extended an establishe...

Sleep Health in Lennox-Gastaut Syndrome impacts both Individuals with LGS and their Caregivers

Dixon-Salazar, T., Leavens, K. J., Chen, H., Holick, T. J., Sweeney, J. A.

2026-09-24

1 min

150 words

BIORXIV NEUROSCIENCE

Summary: Sleep disturbances are a significant but underrecognized burden for individuals with Lennox-Gastaut Syndrome (LGS) and their caregivers. We conducted a large LGS caregiver survey to assess sleep quality, duration, specific sleep-related issues, and management strategies. Quantitative analysis reveal...

Hunger reconfigures a reward learning circuit into a memory competent mode

Park, A., Senapati, B., Mancini, N., Zhang, Y., Choi, J., Cone, I., Treiber, C. D., Costa, R. P., Fenk, L. M., Bidaye, S. S., Waddell, S.

2026-09-24

1 min

192 words

BIORXIV NEUROSCIENCE

Summary: Internal states such as hunger dynamically reshape activity across circuits to support resource seeking. Neuromodulation provides a means of controlling such physiological properties of neurons, but how this flexibility regulates memory networks remains unclear. Here, we describe how hunger reconfig...

A general method to develop excitation ratiometric neuropeptide sensors with enhanced sensitivity for in vivo applications

 Wang, H., Yan, Y., Zhao, Y., Wang, D., Huang, C., Li, Y.

 17 2026-09-23

 1
min

 164
words

BIORXIV NEUROSCIENCE

Summary: Neuropeptides regulate a wide range of physiological processes throughout the nervous and endocrine systems, yet their spatiotemporal dynamics in vivo remain poorly understood. While recently developed intensimetric sensors can detect neuropeptides, their use in vivo is often confounded by artifact...

BIORXIV NEUROSCIENCE

Summary: INTRODUCTION: Alzheimer's disease (AD) disproportionately affects women, but the underlying mechanisms are not fully understood. We compare sex-specific molecular changes across AD with and without dementia at single-cell resolution. METHODS: We performed sex-stratified single-nucleus transcriptomic...

Lasting aversive consequences of a single dose of 4-hydroxytamoxifen

Kyza, E. J., Setara, R., Eisengart, M., Virkar, S., Rogerson, L., Ramirez, A., Salzman, C. D.

2026-09-22

1 min

70 words

BIORXIV NEUROSCIENCE

Summary: 4-hydroxytamoxifen (4-OHT) is commonly used to facilitate activity-dependent recombination in neurons. Here we show that one dose of 4-OHT devalues alcohol, contexts, and tastants, indicating that experimental designs using 4-OHT should control for its aversiveness. Further, reactivation of 4-OHT-re...

Neural Dynamics of Self-Control: Pre-Choice EEG Signals Predict Yielding to Temptation

Leong, A. W., Stuphorn, V.

2026-09-22

1 min

239 words

BIORXIV NEUROSCIENCE

Summary: Self-control is the capacity to resist self-defeating behavior in favor of long-term goals. Such behavioral control is fundamental to adaptive human behavior, yet its neural mechanism remains unclear. A key limitation of prior research is that tasks often conflate self-control with cost-benefit eval...

Spatial organization of voltage-gated ion channel expression across molecularly defined neuronal populations in the mouse mammillary bodies

 Springer, K. S., Driver, F. C., Wang, X., Soh, H., Moulema, C. D., Flynn, W. F., Robson, P., Tzingounis, A. V., Jackson, A. C.

 2026-09-22  1 min  241 words

BIORXIV NEUROSCIENCE

Summary: The mammillary bodies (MB) are a hypothalamic component of the limbic Papez circuit that plays a critical role in spatial and episodic memory in mammals. Degeneration of the MB occurs in disorders associated with cognitive impairment, including Korsakoff's syndrome and Alzheimer's disease, yet the m...

Repeated cocaine reorganizes striatal ensembles along the ventral-dorsal axis

Leonard, M. Z., Reiley, H. B., Konomi Pilkati, A., Bjornson, K. J., Chevee, M. F., Calipari, E. S.

2026-09-22

1 min

218 words

BIORXIV NEUROSCIENCE

Summary: Drugs of abuse produce lasting adaptations in the striatum. A prominent theory holds that the early reinforcing effects of cocaine preferentially engage the ventral striatum, and repeated cocaine use recruits dorsal striatal systems associated with habitual drug-related behavior. However, this trans...

249
words

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Action-oriented decisions are shaped by a sense of urgency, a state that builds as the need to commit to an action increases. When poorly regulated, this urgency may bias decisions toward impulsive choices. Because this urgency state may be influenced by different factors, we aimed to dissociate ...

Human see, human do? Viewing tool pictures evokes tool-use action information in hand-selective occipitotemporal cortex

 Warman, A., Tonin, D., Smith, F., Rossit, S.

 2026-09-21

 1
min

 250
words

BIORXIV NEUROSCIENCE

Summary: Amongst all the objects we encounter, tools are unique because they are tightly linked to predictable actions. Neuroimaging studies have reported selective responses in occipitotemporal and parietal cortices when viewing pictures of tools or hands. Whether these responses contain information about s...

Number, order and time influence how the brain integrates distinct experiences

Thomas, A. B., Wong, F. S., Killcross, S., Westbrook, R. F., Holmes, N.

2026-09-21

1 min

199 words

BIORXIV NEUROSCIENCE

Summary: How does the brain integrate experiences that are separated in time? The present study addressed this question using sensory preconditioning protocols in rats. In these protocols, rats integrate an A-B association (e.g., tone-light) formed in stage 1 with a B-shock association (e.g., light-shock) fo...

Learning to play with spikes: characterizing, predicting, and engineering unsupervised plasticity rules for spiking reservoir computing

Kania, M., Confavreux, B., Vogels, T. P.

2026-09-21

1 min

236 words

BIORXIV NEUROSCIENCE

Summary: Spiking reservoir computing, and reservoir computing more generally, is a powerful and efficient framework for neuromorphic and biological applications, in which a fixed random reservoir drives a trained readout. Its performance depends critically on the reservoir initialization, so that enriching t...

Active sensing movements by antennae enhance neural processing and plasticity for odour processing in the CNS in the honey bee *Apis mellifera*

 Kulkarni, N., Lei, H. H., Leyko, J., Smith, B. H., Lei, H.

2026-09-21

1
min

249
words

BIORXIV NEUROSCIENCE

Summary: Animals frequently move their sensory organs relative to dynamic environmental stimuli to maximize information acquisition, a behaviour known as active sensing. Recent studies show that insects adjust antennal movements according to the temporal structure and salience of olfactory signals, suggestin...

Visual-affect-guided spatiotemporal graph modeling of disaster-image diffusion for embodied decision support

 Wei
Zhang

 2026-09-03

 1
min

 221
words

FRONTIERS NEUROROBOTICS

Summary: Introduction Disaster-response robots and other embodied agents can use social-media imagery as contextual evidence, but existing approaches typically analyze affect at the image level or model diffusion without isolating affect-specific information. Methods We encoded disaster images into 128-dimensio...

Hybrid EEG–EMG intention decoding for real-time triggering of a lower-limb exoskeleton

 Weijun
Gong

 2026-09-03

 1
min

 321
words

FRONTIERS NEUROROBOTICS

Summary: Background Wearable lower-limb exoskeletons have the potential to support intention-driven control of lower-limb exoskeletons, but existing control strategies often rely on mechanical or manual triggers that fail to capture user intent. Method Subjects were recruited from 23/9/2024 to 10/2/2025. A BiLS...

Neonatal AAV-SIL1 gene therapy prevents Marinesco-Sjögren syndrome in mice

 Pasini, C., Lavigna, G., Grasso, A., Restelli, E., Corbelli, A., Salio, M., Zentilin, L., Fiordaliso, F., Chiesa, R.

 2026-09-20  1 min  175 words

BIORXIV NEUROSCIENCE

Summary: Marinesco-Sjogren syndrome is a rare early-onset multisystem disorder characterized primarily by cerebellar ataxia and myopathy and caused by loss-of-function mutations in SIL1. No disease-modifying therapy is available. We investigated whether adeno-associated virus (AAV)-mediated gene therapy coul...
