Explainable ECG Analysis by Explicit Information Disentanglement With VAEs

2025-11-10

1
min

241
words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: The interpretation of electrocardiogram (ECG) signals is vital for diagnosis of cardiac conditions. Traditional methods rely on expert knowledge, which is time consuming, costly and potentially misses subtle features. AI has shown promise in ECG interpretation, but clinically desired mode...

Biophysical Circuit Modeling of Electro-Quasistatic Multi-Human Body Communication

2025-12-01

1
min183
words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Human body communication, particularly of the Electro-Quasistatic variety, has gained traction among low-power wireless circuit designers due to its benefits in terms of power and physical security compared to conventional electromagnetic or radio frequency communication. Yet, applying its theory an...

Analytical Ground Truth for Phase-Contrast MRI Experiments and Simulations: Open-Source Precision-Controlled Bidirectional Rotational Phantom

2026-01-15

1
min277
words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: We present a fully open-source, air-driven bidirectional, rotational MRI phantom. It enables an accurate and reproducible evaluation of displacement artefacts for any MRI sequence and velocity field and acceleration sensitivity for phase-contrast MRI (PC-MRI) sequences. Its unique feature of analyti...

Negative Emotional Context Reverses Charitable Framing Effect: Behavioral and Neural Evidence

2026-06-01

1
min200
words

COGNITIVE NEUROSCIENCE

Summary: Extensive research shows that charitable framing (gain vs. loss) shapes donation intentions. However, questions persist concerning how emotional context interacts with framing effects to impact both donation intentions and subsequent evaluations of outcomes. The present study combined electroencepha...

Learning Decouples Accuracy and Reaction Time for Rapid Decisions in a Transitive Inference Task

2026-06-01

1
min278
words

COGNITIVE NEUROSCIENCE

Summary: Transitive inference (TI) is a cognitive process in which decisions are guided by internal representations of abstract relationships. Although the mechanisms underlying transitive learning have been well studied, the dynamics of the decision-making process during learning and inference remain less c...

The Roles of Alpha Oscillations in Attentional Blink

2026-06-01

1
min198
words

COGNITIVE NEUROSCIENCE

Summary: The attentional blink (AB) refers to impaired processing of a second target (T2) when presented 200–500 msec after a first target (T1) in a rapid serial visual presentation stream. There is converging evidence that alpha oscillations (8–12 Hz) may be critical for AB performance, as they can regulate...

Machine-learning MRI stratification of genetic frontotemporal dementia for clinical trial enrichment

Soltaninejad, M., Iturria-Medina, Y., Bouzigues, A., Russell, L. L., Foster, P. H., Ferry-Bolder, E., van Swieten, J. C., Jiskoot, L. C., Seelaar, H., Sanchez-Valle, R., Laforce, R., Graff, C., Galimberti, D., Vandenberghe, R., de Mendonca, A., di Fede, G., Santana, I., Gerhard, A., Levin, J., Nacmias, B., Otto, M., Bertoux, M., Lebouvier, T., Butler, C. R., Le Ber, I., Finger, E., Tartaglia, M. C., Masellis, M., Rowe, J. B., Synofzik, M., Moreno, F., Borroni, B., Rohrer, J. D., Ducharme, S., GENFI

2026-07-23 1 313
min words

BIORXIV NEUROSCIENCE

Summary: BACKGROUND: Genetic frontotemporal dementia (FTD) shows large differences in symptom profiles, brain atrophy patterns, and progression rate, making clinical trials difficult to design and power. There is a need for biomarkers that can model disease progression, identify biologically distinct groups,...

Assessing the longevity of the Theta-induced Memory Effect (TIME)

Marcantoni, E., Wang, D., Shapiro, K. L., Hanslmayr, S.

2026-07-23

1
min

231
words

BIORXIV NEUROSCIENCE

Summary: Theta-phase synchronisation between visual and auditory rhythmically modulated sensory stimuli during encoding has been shown to enhance associative memory, an effect known as Theta-Induced Memory Effect (TIME). However, whether this advantage is short-lived or persists over time remains unknown. To...

Schwann Cell-Specific TDP-43 Rescue Improves Peripheral Nerve Myelin Pathology Without Altering Motor Behaviour in a Mouse Model of ALS

Lewis, K. N., Andres, A., Craig, G., Tosolini, A. P., McAllen, R., Ngo, S., Gonsalvez, D. G., Turner, B. J., Barton, S. K.

2026-07-23 1 min
247 words

BIORXIV NEUROSCIENCE

Summary: Amyotrophic lateral sclerosis (ALS) is a terminal disease caused by motor neuron loss. Schwann cells, the myelinating cells of the peripheral nervous system, metabolically and structurally support neurons. ALS patients exhibit Schwann cell pathology, such as TDP-43 proteinopathy, therefore Schwann c...

FRONTIERS NEUROINFORMATICS

Summary: Understanding the temporal organization of brain activity requires methods that capture scale-free dynamics while accounting for the high-dimensional, spatially correlated nature of the electroencephalogram (EEG) data. We propose a novel framework that integrates nonlinear manifold learning (Isometr...

Surprise gates two distinct mechanisms to support memorability in music

Pham Van Cang, M., Robert, P., Mercier, M., Trebuchon, A., Bartolomei, F., Morillon, B., Doelling, K., Arnal, L.

2026-07-22 1 min 226 words

BIORXIV NEUROSCIENCE

Summary: Music is a uniquely memorable human creation that, when skillfully composed, can persist in individual memory (as in e.g., earworms) and cultural transmission (e.g. global hits or anthems). While both acoustic and statistical properties are known to influence a song's memorability, the neural mechan...

Geometry-based dynamics of the postsynaptic density explain protein capture by an actin-spine-geometry-dependent synaptic tag

Thomas, M., Fauth,
M.

2026-07-21

1
min

190
words

BIORXIV NEUROSCIENCE

Summary: The synaptic tagging and capture (STC) hypothesis explains how early-phase plasticity is converted into its late phase through the coincidence of synaptic tagging and plasticity-related protein (PRP) availability. Yet the biophysical basis of this process remains poorly understood. Based on the hypo...

Intrinsic ignition-based propagation networks reveal hierarchical propagation pathways of spontaneous activity in the human brain

Liu, J., Chen, X., Liao,
X.

2026-07-21

1
min

242
words

BIORXIV NEUROSCIENCE

Summary: Directed communication across brain regions is fundamental to human brain function, yet how local spontaneous activity links to directed whole-brain propagation patterns remains elusive. Prior studies have characterized local propagation events and global wave-like dynamics, but a framework linking ...

Temporal structure of postural sway reveals altered cortical postural coupling in aging and stroke: insights from nonlinear dynamics and state-space analysis

Hakkak Moghadam Torbati, A., Cabaraux, P., Legrand, T., Mongold, S. J., Yanguma Munoz, N., Yildiran Carlak, E., Iannotta, A., Vander Ghinst, M., Naeije, G., Moumdjian, L., Bourguignon, M.

2026-07-21 1 min 396 words

BIORXIV NEUROSCIENCE

Summary: Background: Balance maintenance in humans is not only a mechanical process, but it also relies on continuous interactions between cortical activity and body dynamics. Alterations in postural sway are commonly observed in aging and stroke and are frequently used to assess balance impairment. However,...

Contribution of Wide Dynamic Range neuronal activation to somatosensory evoked potentials supports use as biomarker of spinal nociceptive processing

Steel, K. A. J., Pickering, A. E., Dunham, J. P., Ajay, E., Krajewski, J., Blockeel, A., Phillips, K. G.

2026-07-21 1 min 243 words

BIORXIV NEUROSCIENCE

Summary: Identifying objective translational biomarkers of spinal nociceptive processing is important to accelerate analgesic development. The primary negative component (N1) of spinal somatosensory evoked potentials (SEPs) has been proposed as such a biomarker. However, the cellular substrates of the N1 pot...

From Subconscious to Insight: Decoding the Incubation Process in Creative Problem Solving

Phunruangsakao, C., Chao, Z. C.

2026-07-21 1 min 239 words

BIORXIV NEUROSCIENCE

Summary: Creative problem-solving is a fundamental aspect of human cognition, yet its underlying neural mechanisms remain incompletely understood. The incubation period, during which individuals temporarily disengage from conscious problem-solving efforts, has been proposed to facilitate insight through ongoing...

Social agency buffers pain sensitivity during a critical window following spared nerve injury

Toddes, C. A., Bai, K. N., Halperin, I. E., Keeler, W. R., MacMillen, L. K., Heshmati, M., Golden, S.

2026-07-21

1
min

206
words

BIORXIV NEUROSCIENCE

Summary: Social buffering of pain, in which social contact blunts emotional or nociceptive intensity, is well established. However, the degree to which agency over social contact, rather than general reward receipt or social contact alone, modifies pain intensity or pain behaviors remains unclear. Using a so...

Epidermal and ECM Damage Following Pinch Injury Restricts Dendrite Regeneration in Drosophila

Brantley, M. A., Pandiyan, A., Danh, A. C., Prange, S. E., Rimicci, D. S., Thompson-Peer, K. L.

2026-07-21 1 min 243 words

BIORXIV NEUROSCIENCE

Summary: Neuronal dendrites can be injured by a number of insults, but the cellular mechanism by which dendrites respond to tissue injury and undergo repair is poorly understood. Much of the field's progress has evaluated dendrite regeneration following laser injury. While precise, laser injury does not accu...

GPR37 Modulates Remyelination Following Demyelinating Injury

Hajbi Karasik, R., Vainshtein, A., Aharoni, R., Eshed-Eisenbach, Y., Marazziti, D., Peles, E., Yang, H.-J.

2026-07-15 1 min 223 words

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>GPR37 has been recognized as a negative regulator of oligodendrocyte myelination. However, its role in demyelination recovery remains unclear. To examine the function of GPR37 in remyelination, we compared wild-type and GPR37-deficient mice of either sex after focal (lysolecithin) or global (cupr...

Neural correlates of performance and mental workload dynamics during learning of upper-limb body-powered and myoelectric prostheses

Christopher Gaskins, Kimberly L Kontson, Hyuk Oh, Xin He, Bradley D Hatfield and Rodolphe J Gentili

2026-07-14 1 min 252 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Despite the technological advancement of upper limb prostheses, it is unclear how device design affects the cognitive-motor processes and mental workload underlying the acquisition of dexterity skills. This study examined changes in performance and mental workload as individuals with inta...

The Physics Network is Distinct from the Multiple Demand System in the Human Brain

Pramod, R., Hutchinson, S., Kanwisher, N. G.

2026-07-20

1
min

160
words

BIORXIV NEUROSCIENCE

Summary: Recent studies implicate regions of the human bilateral fronto-parietal cortices in intuitive physical reasoning -- our ability to perceive, predict, and plan in the physical world. However, it remains unclear whether this "Physics Network" (PN) constitutes a distinct and domain-specific system, or ...

Enkephalin constrains fear learning via volume transmission to the lateral amygdala

Wang, R., Yau, J., Kalra, M., Gilschist, S., Livermore, A., Gregoriou, G., Schennink, M., Moreno, C., Santhakumar, R., Rafiei, N., Hao, Z., Estrella, J., Thomsen, T., Hartvig, E., Capertonova, M., Jensen, K., Landler, S., Tian, L., Neely, G., Berndt, A., Bruchas, M., McNally, G. E., Bagley, E. E.

2026-07-20

1
min

207
words

BIORXIV NEUROSCIENCE

Summary: Fear learning involves the formation of associations between cues and aversive outcomes, a process that must be tightly regulated to prevent excessive or generalised fear. Dopamine release in the lateral amygdala (LA) drives fear acquisition, whereas endogenous opioids constrain it. However, whether...

Spectral organization of individualized connectome harmonics across brain structure, function and cognition

Bolton, T., Schottner Sieler, M., Patel, J., Chan, C. H. M., Van De Ville, D., Hagmann, P.

2026-07-20

1 min 180 words

BIORXIV NEUROSCIENCE

Summary: Connectome harmonics provide a spectral representation of structural brain connectivity that has emerged as a powerful framework for studying structure-function relationships. However, two fundamental questions remain unresolved: how should inter-individual variability in structural connectivity be ...

REVIEWS BIOMEDICAL ENGINEERING

Summary: Backed by a century of research and development, Hill-type models of skeletal muscle, often including a muscle-tendon complex and neuromechanical interface, are widely used for countless applications. Lacking recent comprehensive reviews, the field of Hill-type modeling is, however, dense and hard-t...

BIORXIV NEUROSCIENCE

Summary: Prenatal cannabis use is on the rise, and observational studies suggest that such use results in neurodevelopmental deficits in the offspring. Because observational studies can be confounded by unaccounted factors, we studied the neurodevelopmental consequences, at the molecular level, of prenatal c...
