Hippocampus consolidates memory in the upstate of cortical sleep slow oscillations

Harkotte, M., Inostroza, M., Born, J., Niethard, N.

2026-04-17

1 min

139 words

BIORXIV NEUROSCIENCE

Summary: Cortical slow oscillations (SOs), a hallmark of non-rapid eye movement (NonREM) sleep, have been proposed to support systems memory consolidation by organizing hippocampal-cortical communication. However, whether consolidation requires hippocampal memory processing during SO-defined windows is unclear...

Rewiring the Human Brain: On the Fabric of Associative Thinking

Czappa, F., Kaster, M., Kaiser, M., Chen, X., Butz-Ostendorf, M., Wolf, F.

2026-04-17

1 min

241 words

BIORXIV NEUROSCIENCE

Summary: Concept cells are neurons in the medial temporal lobe that represent an abstract concept, such as a familiar person, in a context-independent way. They are activated by heterogeneous and potentially multi-modal sensory input related to the concept, such as viewing a photo of the person, reading the ...

Predicting children's literacy from task-based fMRI: Neural heterogeneity and task-dependent performance

Pamplona, G. S. P., Stettler, S., Hebling Vieira, B., Di Pietro, S. V., Frei, N., Lutz, C., Karipidis, I. I., Brem, S.

2026-04-17

1 min

303 words

BIORXIV NEUROSCIENCE

Summary: Reading is a complex skill with a well-characterized neural basis. Multivariate fMRI analyses have deepened our neuroscientific understanding of literacy by linking neural patterns to behavioral traits. Although task-based fMRI often outperforms resting-state fMRI in predicting cognitive traits, few...

Freud's contributions and impediments to dream science: Response to Erdelyi (2024).

 2026-04-02  1 min  256 words

DREAMING

Summary: Erdelyi (2024) recently selected a dozen of Freud's seminal ideas that have continuing relevance for contemporary dream science. While several can be endorsed as lasting contributions, this reply explains why most of these concepts are actual impediments to the advancement of dream science. Freud's ...

BIORXIV NEUROSCIENCE

Summary: Cerebrospinal and interstitial fluid transport play a central role in brain metabolic waste clearance, yet non-invasive quantification of deep-brain flow dynamics remains challenging. Magnetic Resonance Artificial Intelligence Velocimetry (MR-AIV) is a physics-informed neural network framework that ...

The exocyst is an insulin-sensitive regulator of amyloid precursor protein trafficking and amyloid-beta generation in neurons

 Balaan, C., Patwardhan, G. Y., Sachs, R. K., Kumasaka, H., Sadagopan, S., Aou, S., Lee, A. J., Nelson, L. T., Hew, B. E., Owens, J. B., Polgar, N., Ortega, M. A., Nichols, R. A., Fogelgren, B.

 2026-04-17  1 min  207 words

BIORXIV NEUROSCIENCE

Summary: Intracellular trafficking of amyloid precursor protein (APP) critically influences amyloidogenic processing, yet the mechanisms regulating this pathway remain incompletely defined. The exocyst is a highly conserved, insulin-responsive, eight-subunit tethering complex that directs vesicle targeting a...

Psilocybin reshapes cortical inhibition through selective interneuron recruitment

 Davoudian, P. A., Jiang, Q., Knox, C. A., Savalia, N. K., Shao, L.-X., Wilson, J., Weiner, A. M., Chong, C. W., Liao, C., Nothnagel, J. D., Sakurai, T., Kwan, A. C.

 2026-04-17  1 min  124 words

BIORXIV NEUROSCIENCE

Summary: Psychedelics show therapeutic potential for treating psychiatric disorders. While studies have emphasized the roles of cortical pyramidal cells, GABAergic neurons also express serotonin receptors and are therefore likely targets of psychedelics. In this study, we determine the effect of psilocybin o...

Causal modulation of cortical amplitude coupling through dual-site amplitude-modulated tACS

Fiene, M., Siems, M., Kammerer, T., Schneider, T. R., Engel, A. K.

2026-04-16

1 min

254 words

BIORXIV NEUROSCIENCE

Summary: Background: Intrinsic functional coupling at multiple temporal scales is a hallmark of human brain dynamics. Among these coupling modes, slow co-fluctuations of oscillatory amplitudes, termed amplitude coupling, are thought to represent a key organizing principle of the large-scale functional archit...

From pixels to pleasure: visual features explain dynamic aesthetic experiences across distinct movie content

 Ekinci, M. A., Buhlmann, N., Kaiser, D.

 2026-04-16  1 min  203 words

BIORXIV NEUROSCIENCE

Summary: Aesthetic experiences in everyday life unfold under continuously changing visual input. Although these experiences clearly depend on the observer and context, they are partly explained by the visual features of the input. Here, we investigated how well a combination of visual features predicts dynam...

Shared and Unique Connectivity Signatures of Reading and Language Deficits

 2026-03-12  1 min  253 words

COGNITIVE NEUROSCIENCE

Summary: Reading ability depends on multiple cognitive skills, including decoding and language comprehension, which can vary widely across individuals—even among those with similarly low reading performance. To better understand the brain basis of this variability, we used connectome-based predictive modelin...

When a Man Says He Is Pregnant: Event-related Potential Evidence for a Rational Account of Speaker-contextualized Language Comprehension

 2026-03-12  1 min  296 words

COGNITIVE NEUROSCIENCE

Summary: Spoken language is often, if not always, understood in a context formed by the identity of the speaker. For example, we can easily make sense of an utterance such as "I'm going to have a manicure this weekend" or "The first time I got pregnant I had a hard time" when spoken by a woman, but it would ...

Does flavor-nutrient learning promote or protect against diet-induced obesity? Individual differences in conditionability predict resistance to weight gain in rats.

 Myers, K. P.  2026-04-15  1 min  248 words

BIORXIV NEUROSCIENCE

Summary: Flavor-nutrient learning (FNL) refers to learning associations between a food's flavor and the rewarding appetite signals that arise from post-oral nutrient sensing during or after a meal. In rodent models FNL reliably produces strong flavor preferences and increased intake of nutrient-paired flav...

Loss of ABCA4 from photoreceptor discs triggers changes in glial cell homeostasis

Valenzano, R., McDonald, A., Gallego, C., Andriessen, C. A., Moustakas, I., Mulder, A. A., Mikkers, H. M. M., Koning, R. I., Mei, H., Wijnholds, J.

2026-04-15

1 min

146 words

BIORXIV NEUROSCIENCE

Summary: Loss-of-function mutations in the ABCA4 gene cause Stargardt disease (STGD1), the most common inherited macular dystrophy leading to progressive central vision loss. Here, we generated hiPSC-derived retinal organoids harboring a premature stop codon in exon-24 of ABCA4 to evaluate the impact of this...

BIORXIV NEUROSCIENCE

Summary: Gastrointestinal (GI) dysmotility is a highly prevalent and clinically significant feature of Rett syndrome (RTT), yet its underlying mechanisms remain poorly defined. Here, we investigated these mechanisms of GI dysmotility in a Mecp2null mouse model of RTT. First, we observed that MeCP2 was expres...

Photon-Resolved Excitation-Denoised (PRED) Three-Photon Imaging Improves Detection of Neuronal Activity in Awake and Behaving Mice

 Losonczy, A., Mihaila, T. S., Kong, E., Negrean, A., Geiller, T., Peterka, D. S.

 2026-04-14  1 min

 186 words

BIORXIV NEUROSCIENCE

Summary: Three-photon microscopy (3PM) has enabled the optical access of neurons~500-1500 micrometer below the brain surface but has been limited to slow imaging frame rates or small imaged area due to the combination of a nonlinear peak power requirement and the need to limit average power below the thermal...

Decoding Spikes From Multiunit Data

 2026-01-22  1 min  250 words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Communication and control in biological systems is mediated by the timing of discharges –spikes– from excitable cells such as neurons and muscle fibers. Each spike is associated to a characteristic waveform that can be captured by sensors. The waveform's characteristics depend on the cell's biophysi...

Modulation of Automatic Alcohol Approach Tendencies using Single-Session 10 Hz rTMS over the Right dLPFC

 Verma, A. K., Kumar, A. D., Chivukula, U., Kumar, N.  2026-04-13  1 min  214 words

BIORXIV NEUROSCIENCE

Summary: Background: Maladaptive drinking is often sustained by automatic approach tendencies toward alcohol cues that override conscious self-control. While cognitive and behavioral modification techniques show some promise, their effects remain limited, highlighting the need for alternative neuromodulatory...

Interactions between age and sex in multiscale entropy and spectral power changes across the lifespan

Solomon, J. P., Dobri, S. G. J., Shen, K., Vakorin, V. A., Moreno, S., McIntosh, R.

2026-04-13

1
min

237
words

BIORXIV NEUROSCIENCE

Summary: Multiscale entropy (MSE) changes in relation to age, whereby aging is associated with an increasing bias towards fine scale entropy. This change is thought to represent a shift toward localized information processing in the brain as we age. However, this relationship has not been tested in large sam...

BIORXIV NEUROSCIENCE

Summary: Electroencephalography (EEG) and electrophysiology methods provide millisecond resolution biomarkers for central nervous system disorders and are used to assess treatment-related effects. However, lack of understanding about the neural mechanisms generating such biomarkers impedes the development of...

Multidomain Analysis of Clinical Cognitive Assessments and Imaging Data in Alzheimer's Disease Accurately Predicts Disease Stage and Grade Independent of Amyloid and Tau

 Chong Chie, J. A. K. H., Persohn, S. A., Simcox, O. R., Salama, P., Territo, P. R., for the Alzheimer's Disease Neuroimaging Initiative

 2026-04-13  1 min  324 words

BIORXIV NEUROSCIENCE

Summary: Background Individual clinical cognitive assessments (CCA) for Alzheimer's disease (AD) provide broad disease stratification but are limited in sensitivity and specificity, requiring integration of multiple CCA for optimal disease staging. Recent work from our lab suggests that neuro-metabolic and v...

Oscillating Hypercapnia Induces Neural Abundant Protein Efflux and Potential Depletion in Health and Chronic Traumatic Brain Injury

 Mayer, A. R., Wick, T., Nathaniel, U., Ryman, S. G., Sasi Kumar, D., Mannix, R., Miller, S., Ling, J. M., Meier, T. B., Warren, K., van der Horn, H. J., Zotev, V., Wu, J., Chauhan, P.

 2026-04-13  1 min  197 words

BIORXIV NEUROSCIENCE

Summary: Emerging preclinical and clinical evidence suggests that low frequency hemodynamic oscillations drive CSF flow, which in turn mediates glymphatic clearance. The current study investigated whether CO₂-induced low frequency hemodynamic oscillations during magnetic resonance imaging would increase clea...

Using Virtual Patients to Predict Perceptual Outcomes for Optogenetic Sight Recovery Technologies

 Mohan, V. B., Yucel, E. I., Fine, I., Boynton, G. M.

 2026-04-13  1 min  197 words

BIORXIV NEUROSCIENCE

Summary: Optogenetics is emerging as a powerful approach for partial vision restoration, with at least three ongoing clinical trials in humans testing novel light-sensitive proteins (opsins) in patients with inherited retinal degenerative disorders. These therapies aim to restore light responsiveness by intr...

SynSpine: an automated workflow for the generation of longitudinal spinal cord synthetic MRI data

 Licinio
Craveiro  2025-12-17  1 min  273 words

FRONTIERS NEUROINFORMATICS

Summary: BackgroundSpinal cord atrophy is a key biomarker for tracking disease progression in neurological disorders, including multiple sclerosis, amyotrophic lateral sclerosis, and spinal cord injury. Recent MRI advancements have improved atrophy detection, particularly in the cervical region, facilitating...
