Network analyses of cognitive performance in psychiatric disorders: A scoping review.

 2025-12-11  1 min  270 words

NEUROPSYCHOLOGY

Summary: Objective: Cognitive dysfunction is a transdiagnostic feature of psychiatric disorders and a major contributor to functional and psychosocial disability. Despite its clinical importance, the structure and dynamics of cognitive dysfunction across psychiatric conditions remain unclear. Network analysi...

Detecting Beta-Amyloid Plaque via Low Rank Based Orthogonal Projection and Spatial-Spectrum Detector Using High-Resolution Quantitative Susceptibility Mapping for Preclinical Studies

 2025-09-24  1 min  203 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Detecting beta-amyloid ($A\beta$) plaques at different stages is crucial for accurate assessment and effective intervention in Alzheimer's disease (AD). In this study, we developed a novel method for reliably identifying $A\beta$ plaques, characterized by sparse negative susceptibility values, in pr...

A predictive map learned from diverse entorhinal inputs explains the role of context-dependent reorganization of hippocampal place cells

 Tadashi Yamazaki  2026-05-11  1 min  180 words

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: The hippocampus is thought to support spatial memory and navigation by constructing predictive representations of the environment. Predictive map theory formalizes this function as a successor representation (SR). However, existing models assume a fixed and uniform distribution of place fields, desp...

Network Models of Neurodegeneration: Bridging Neuronal Dynamics and Disease Progression

 2026-01-16  1 min  196 words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Neurodegenerative diseases are characterized by the accumulation of misfolded proteins and widespread disruptions in brain function. Computational modeling has advanced our understanding of these processes, but efforts have traditionally focused on either neuronal dynamics or the biological processes...

Monosynaptic connections link functionally similar regions in human cortex

Xu, R., Bush, A., Takahashi, A., Sisterson, N., Walton, A., Hutchinson, S., Kammen, A., Neudorfer, C.,
 Kokkinos, V., Nanda, P., Jhingan, N., Marvi, A., Fung, A., Duraivel, S., Hosseini, E., Casto, C.,
 Valenzuela, C., Yee, S., Kirsch, J., Fedorenko, E., Kanwisher, N. G., Desimone, R., Richardson, R. M.

 2026-05-20  1 min  237 words

BIORXIV NEUROSCIENCE

Summary: The functional organization of human cortex has been mapped in considerable detail¹⁻⁵, yet the axonal connections linking these areas remain largely unknown. This gap precludes inferring either the computational pathways through cortical networks or the principles governing why each area connects to...

Input-dependent directionality of interactions between cortical areas

Mastrogiuseppe, F., Carmona, J., Yu, B. M., Kohn, A., Machens, C. K.

2026-05-19

1 min

172 words

BIORXIV NEUROSCIENCE

Summary: Tracking signal flow across areas is essential for understanding brain function. Recent studies using cross-covariances show that activity directionality can shift rapidly with behavioral or task demands; yet, the circuit mechanisms underlying these changes remain unclear. Here, we use recurrent net...

Optogenetic cochlear stimulation evokes midbrain activity with near-physiological temporal fidelity

Koert, E., Götz, J., Albrecht, N., Vavakou, A., Wolf, B. J., Moser, T.

2026-05-19

1 min

174 words

BIORXIV NEUROSCIENCE

Summary: When hearing fails, stimulation of the auditory nerve by electrical cochlear implants (eCIs) partially restores hearing, with most eCI users achieving open speech understanding. However, the broad current spread from each electrode limits frequency coding and speech understanding in daily situations...

Dreaming of death: An exploration of the relationship between death anxiety and nightmare severity in Australian adults.

 2025-06-30  1 min  266 words

DREAMING

Summary: Throughout history and across cultures, humans have been interested in the relationship between dreams, nightmares and death. Research examining this relationship is scarce, and findings have been mixed. This study aimed to (a) quantify the potential prevalence of nightmare severity and death anxiet...

Dopamine Depletion Drives Whole-Brain Oscillatory Disruptions via Cortico-Subcortical Resonance: A Multiscale Model of Parkinson's Disease in Mice

 Gambosi, B., Perdakis, D., Meier, J., Geminiani, A., Antonietti, A., Mazzoni, A., Ferrigno, G., Ritter, P., Pedrocchi, A.

 2026-05-18  1 min  146 words

BIORXIV NEUROSCIENCE

Summary: Parkinson's disease is defined by dopaminergic neuron loss in the substantia nigra, yet its hallmark, exaggerated beta-band synchrony, pervades motor cortex, thalamus, and cerebellum, implicating network dynamics far beyond any single circuit. How focal subcortical dopamine depletion translates into...

Novel tool use does not depend on mechanical reasoning: evidence from apraxia

Du, Y., Thibault, S., Yates, J., Buxbaum, L. J., Krakauer, J. W., Wong, A.

2026-05-18

1 min

247 words

BIORXIV NEUROSCIENCE

Summary: A hallmark of human intelligence is the ability to use tools. Yet the cognitive processes supporting this ability remain debated. One contemporary view holds that mechanical reasoning is central for tool use, especially in the case of tools with which we have no prior experience. However, previous s...
