min

295
words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Closed-loop auditory stimulation (CLAS) can enhance slow oscillations during non-rapid eye movement sleep; however, its broader use has been limited by technical and temporal constraints. We introduce and validate CLAS-hdEEG, a high-density electroencephalographic (hd-EEG) software platfo...

Fuzzing the brain: automated stress testing for the safety of ML-driven neurostimulation

Mara Downing, Matthew Peng, Jacob Granley, Michael Beyeler and Tevfik

Bultan

2026-03-05

1
min218
words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Machine learning (ML) models are increasingly used to generate electrical stimulation patterns in neuroprosthetic devices such as visual prostheses. While these models promise precise and personalized control, they also introduce new safety risks when model outputs are delivered directly ...

The Brain Age Gap as a Predictor of Alcohol Initiation in Adolescence

Byrne, H., Visontay, R., Devine, E. K., Wade, N. E., Jacobus, J., Moore, A. J., Squeglia, L. M., Mewton, L.

 2026-03-13  1
min

 252
words

BIORXIV NEUROSCIENCE

Summary: Background: Growing evidence suggests regional and network-level brain imaging features in late childhood are predictive of alcohol use in adolescence. However, the directionality of these effects (i.e. whether they reflect accelerated or delayed neuromaturation) are mixed. We applied a Brain Age Ga...

Shared and Unique Connectivity Signatures of Reading and Language Deficits

 2026-03-12  1 min  253 words

COGNITIVE NEUROSCIENCE

Summary: Reading ability depends on multiple cognitive skills, including decoding and language comprehension, which can vary widely across individuals—even among those with similarly low reading performance. To better understand the brain basis of this variability, we used connectome-based predictive modelin...

Show HN: Aurion OS – A 32-bit GUI operating system written from scratch in C

Luka12-
dev

2026-03-12

1
min165
words

HACKER NEWS

Summary:

Hi HN! I'm 13 and I built Aurion OS as a solo learning project over 14 days (~12 hours/day).

It's a 32-bit x86 operating system written entirely in C and x86 Assembly with no external libraries.

What it has: Custom bootloader and kernel VESA framebuffer graphics (1920x1080, double-buffere...

Instantaneous Beta Frequency Regulates Self-Generated Timing in Humans

 Zeng, Y., Hu, X., Hu, Z., Li, J., Wu, Q., Shen, L., Han, B.

 2026-03-12

 1 min

 143 words

BIORXIV NEUROSCIENCE

Summary: Self-generated timing requires the brain to determine when to terminate an ongoing action without reference to external cues. Although beta-band oscillations have been implicated in temporal control, how their intrinsic dynamics shape moment-to-moment variability in internally generated time remains...

Hypothalamic Orexin Input to the Medial Amygdala Links Vigilance to Arousal

Xiang, X., Chen, C., Zhou, W.

2026-03-12

1 min

147 words

BIORXIV NEUROSCIENCE

Summary: Arousal circuits govern anesthetic state transitions, but emergence is often complicated by agitation, and the neural circuits linking anesthetic arousal to vigilance remain unclear. Here, we identify a lateral hypothalamic orexin-to-medial amygdala pathway (LHAOx[->]MeA) that links anesthetic st...
