Social Isolation Alters Hippocampal miR-30e-5p Expression and Impairs Pattern Separation-Related Behaviour in Adult Mice

McDiarmid, A. H., Kiemes, A., Mandal, G., Thuret, S., Fernandes, C.

2026-06-29

1
min

195
words

BIORXIV NEUROSCIENCE

Summary: Social isolation is commonly used to model social stress and is a known risk factor for depression, with impacts on hippocampal function and postnatal neurogenesis. However, most studies focus on social isolation in juvenile mice isolation during adolescence, leaving the effects of prolonged adult i...

Stimulus Motion Perception Studies Imply Specific Neural Computations in Human Visual Stabilization

David W Arathorn, Josephine C. D'Angelo, Austin Roorda

2026-06-30

1
min

185
words

ARXIV QBIO NC

Summary: arXiv:2506.13506v3 Announce Type: replace-cross Abstract: Even during fixation the human eye is constantly in low amplitude motion, jittering over small angles in random directions at up to 100Hz. This motion results in all features of the image on the retina constantly traversing a number of cones...

Anti-amyloid immunotherapy drives APOE4 specific increases in glial reactivity, perivascular immune activation, and ARIA-like events

Pallerla, A. V., Lucido, C. C., Saito, K., Nolt, G. L., Arbones-Mainar, J. M., Funnell, J. L., Satish, D., Smith, L. M., Stephens, I. O., Goulding, D., MacLean, S. M., Olmsted, S. M., Adreon, D., Hernandez, G., Golden, L. R., Persohn, S., Macauley, S. L., Territo, P. R., Morganti, J., Johnson, L. A.

2026-06-29 1 235
min words

BIORXIV NEUROSCIENCE

Summary: Anti-amyloid antibodies represent the first disease modifying therapeutics for Alzheimers disease (AD). Adoption of these novel treatments has been slowed by the occurrence of amyloid related imaging abnormalities (ARIA) - treatment-associated edema (ARIA-E) or microhemorrhages (ARIA-H) that disprop...

The CHIP-LMO7-BAG5 complex controls tau clearance and yields repurposed and newly designed therapeutic candidates for Alzheimer's disease

Kim, J.-Y., Tadros, B., Vaidya, B., Liang, Y. H., Jung, S. Y., Deng, X., Xu, J., Zoghbi, H. Y.

2026-06-29

1
min

123
words

BIORXIV NEUROSCIENCE

Summary: Through cross-species genetic screens, we identified LMO7 as a regulator of tau levels in vivo. LMO7 bridges the E3 ligase CHIP and its inhibitory cochaperone BAG5, suppressing CHIP's ligase activity and limiting tau ubiquitination and degradation. Adult LMO7 knockdown enhances CHIP activity, reduce...

Cortico-muscular control of postural balance in older adults - effects of training on functional connectivity

Koster, R., Alizadehsaravi, L., van Dieen, J. H., Bruijn, S., Dominici, N., Daffertshofer, A.

2026-06-29 1 min 225 words

BIORXIV NEUROSCIENCE

Summary: Background. Balance training in older adults can lead to reduced centre of mass accelerations and reduced angular momenta after perturbations of unipedal stance, reflecting an enhanced ability to recover balance. It has been suggested that the co-occurring changes in muscle synergies indicated strat...

5-HT4 receptor ligand RS67333 modulates striatal acetylcholine and dopamine release via inhibition of acetylcholinesterase

Qiao, Q., Wu, W., Cragg, S. J.

2026-06-29

1 min

242 words

BIORXIV NEUROSCIENCE

Summary: Serotonin 5-HT4 receptors (5-HT4Rs) have emerged as potential therapeutic targets in neuropsychiatric and neurodegenerative disorders by modulating circuits that shape mood, cognition, and motor function. Ligands for 5-HT4Rs can modify dopamine (DA) and acetylcholine (ACh) transmission but mechanism...

Graph-theoretic comparisons of structural covariance networks: quantifying the false discovery rate

Read-Tannock, J., Reid, A. T., Farcot, E., Schürmann, M., Madan, C. R.

2026-06-29

1
min

280
words

BIORXIV NEUROSCIENCE

Summary: Structural covariance networks (SCNs) represent spatial patterns of covariation in brain morphology, often as a network of connections between nodes representing correlations in grey matter volume or cortical thickness measured by magnetic resonance imaging (MRI). SCNs have been suggested to reveal...

Perinatal ischemic stroke impairs motor and cognitive development, muscle structure, and gut microbiota composition, with functional improvement following fecal microbiota transplantation in a mouse model

Cuboni, G., Campuzano, C., Vignozzi, L., Liotta, R., Pinzauti, D., Vitale, G., Tonellato, M., di Gesu, R., Biazzo, M., Rigoni, M., Allegra, M., Deidda, G.

2026-06-29 1 min 163 words

BIORXIV NEUROSCIENCE

Summary: Perinatal ischemic stroke is an early developmental brain injury caused by obstruction of cerebral blood vessels and is a leading cause of cerebral palsy and cognitive disability in survivors. However, progress in understanding its impact on the brain and other organ systems, as well as in developin...

Therapeutic restoration of synaptic architecture, retinal and visual function, and prevention of retinal degeneration in a mouse model of retinal dystrophy

Hasan, N., Di Paolo, M., McCall, M. A. A., Gregg, R. G.

2026-06-29

1
min

226
words

BIORXIV NEUROSCIENCE

Summary: Vision depends on the transfer of photoreceptor signals through the retina and then to many CNS visual nuclei. While the most common inherited retinal diseases (IRDs) involve defects in rod and/or cone function, another group (referred to as congenital stationary night blindness (CSNB)) results from...

Apparent Anatomical Variability Through Rigid Augmentation Enables Reliable Corpus Callosum Segmentation

Guimaraes, D. M., Szczupak, D., Campos, V. P., Bramati, I. E., Silva, A. C., Tovar-Moll, F.

2026-06-29 1 min 259 words

BIORXIV NEUROSCIENCE

Summary: The corpus callosum is a major white matter bundle responsible for connecting both hemispheres. In mammals, due to a variety of causes, the development of the corpus callosum can be impaired - this brain malformation is known as corpus callosum dysgenesis (CCD). The clinical presentation of CCD vari...

Global Nernstian astrocytic depolarization breaks down during local synaptic input

Nakatani, R. J., De Schutter, E.

2026-06-29

1 min

196 words

BIORXIV NEUROSCIENCE

Summary: Substantial progress in glial electrophysiology has revealed that astrocytes, which account for half of the cells in the human brain, exhibit membrane potentials that often reflect changes in the extracellular environment. Such responses are mediated by a variety of biochemicals, including potassium...

1 min 252 words

BIORXIV NEUROSCIENCE

Summary: Glaucoma is a group of eye diseases that affects 4 million people in the US and is one of the leading causes of vision loss due to damage to the optic nerve (ON) which is composed of axons from retinal ganglion cells (RGCs) that transmit visual information to the brain. Injury to the ON often trigge...

Activity-dependent lipid droplet biogenesis and turnover regulate synaptic integrity

Katafygiotou, E., Squires, A., Liang, A., Hadfield, H., Paulo, J. A., Idi, W., Gygi, S. A., Park, J., Chung, J.

2026-06-29 1 min 135 words

BIORXIV NEUROSCIENCE

Summary: Lipid droplets (LDs) are conserved organelles that buffer lipid storage and stress, yet their dynamics and functions in neurons remain largely unknown. Here, we report activity-dependent dynamics of neuronal LDs, visualized by a novel, genetically encoded LD reporter (termed LipiDew), in both cultur...

An Empirical Study to Understand How Students Use ChatGPT for Writing Essays

Andrew Jelson, Daniel Manesh, Alice Jang, Daniel Dunlap, Young-Ho Kim, Sang Won Lee

2026-06-29

1
min

218
words

ARXIV CS HC

Summary: arXiv:2501.10551v5 Announce Type: replace Abstract: As large language models (LLMs) advance and become widespread, students increasingly turn to systems like ChatGPT for assistance with writing tasks. Educators are concerned with students' usage of ChatGPT beyond cheating; using ChatGPT may reduce ...

Recalibration of implantable brain–computer interfaces to enable long-term independent use—a systematic review

Eleanor Swanson, Esmee Dohle, Luke Bashford, Hugo Layard Horsfall, Luka Jovanovic, William R Muirhead and Jamie F M Brannigan

2026-06-22
1 min
300 words

JOURNAL NEURAL ENGINEERING

Summary: Background. Implantable brain–computer interfaces (iBCIs) decode neural signals to generate command signals for effector devices to restore lost functions, such as movement or speech. However, maintaining device performance over time requires recalibration of decoding algorithms due to inherent inst...

BIORXIV NEUROSCIENCE

Summary: The human sensorimotor system is remarkably effective at automatically parsing total movement error into its constituent parts, the error component due to a perturbation, or externally-generated error (EGE), versus the error component due to motor noise, or internally-generated error (IGE). Particip...

words

BIORXIV NEUROSCIENCE

Summary: Lysosomes are critical for neuronal physiology and synaptic function, but their organization and roles within astrocytes, an integral component of the tripartite synapse, remain unknown. Here, we use a neuron-astrocyte coculture system that promotes stellate astrocyte morphology to investigate the t...

Preserved geometry during representational drift enables stable perception and memory

Zaid, H., Schaffer, E.
S.

2026-06-28

1
min

245
words

BIORXIV NEUROSCIENCE

Summary: In many brain regions, the stimulus tuning of neurons is stable on a timescale of hours but not on a timescale of weeks, a phenomenon often called 'representational drift'. This would seem to imply that these brain regions cannot be used for stable recognition of sensory stimuli or the retrieval of ...

Opportunities and pitfalls in preclinical cerebral blood flow mapping using arterial spin labelling MRI: insights from multicentre data

Pires Monteiro, S., Dunkwu, D., Reynolds, S., Figueiredo, P., Shemesh, N. N., Ohene, Y., Christie, I. N.

2026-06-26

1
min199
words

BIORXIV NEUROSCIENCE

Summary: Cerebral blood flow (CBF) is a quantitative metric for mapping perfusion. While the prototypical MRI approach arterial spin labelling (ASL) is well-validated in humans, the reproducibility of rodent ASL mapping remains poor, limiting translational impact. To address this gap, we used both newly acqu...

Persistent sensory processing and behavioral atypicalities in a mouse model of neonatal encephalopathy

Narwekar, S., Khalifa, M., Mulhern, H., Simonds, N. K., Burnsed, J. C., Ribic, A.

2026-06-26

1 min 177 words

BIORXIV NEUROSCIENCE

Summary: Neonatal hypoxia-ischemia (HI) injury is a major risk factor for lifelong cognitive impairments. Given its systemic impact, the neural mechanisms of impairments associated with HI injury remain unclear. In this study, we used a mouse model of neonatal HI injury to study its impact on goal-directed b...

A p53-ΔNp73 signaling axis drives selective motor neuron degeneration in spinal muscular atrophy

Carlini, M. J., Hu, X., Sowoidnich, L., Yadav, A., Garcia, J., Savin, M., Sumner, C. J., Menon, V., Simon, C. M., Pellizzoni, L.

2026-06-25

1
min216
words

BIORXIV NEUROSCIENCE

Summary: Selective neuronal vulnerability is a hallmark of many neurodegenerative diseases, yet how ubiquitous genetic insults cause highly selective neuronal loss remains poorly understood. In spinal muscular atrophy (SMA), reduced SMN levels trigger degeneration of specific motor neuron pools. Although non...

Tachykinin neuropeptides are involved in axonal and synaptic differentiation of the pioneer motor axon in zebrafish

Ushakova, S., Zoeller, D., Bretschneider, A., Becker, T., Becker, C. G., Oprisoreanu, A.-M.

2026-06-25 1 min 169 words

BIORXIV NEUROSCIENCE

Summary: In contrast to many other developing systems, in which axon pathfinding and synaptogenesis are separated in time, the pioneering axon of the individually identifiable caudal primary motor neuron in embryonic zebrafish forms en passant synapses during its stereotypical ventral growth. How simultaneou...

FRONTIERS HUMAN NEUROSCIENCE

Summary: In this work, a theoretical framework addressing the role of motivation in brain–computer interface (BCI) was developed. The aim was to present theory-based versions of motivation models for BCI use that can serve as a foundation for hypothesis generation and experimental testing. As a synthesis of ...

JOURNAL NEURAL ENGINEERING

Summary: Objective. To develop and validate an interpretable multi-centre interictal EEG biomarker for distinguishing epilepsy from mimickers, addressing the critical gap of single-centre studies with limited sample sizes in prior literature. Methods. We analysed routine interictal EEG from 448 subjects across...

Uncertainty-aware multi-path framework with dynamic arbitration for Alzheimer's disease MRI classification

Shichao Du, Bing Zhu, Miao Yu and Junhu Liu

2026-06-18 1 min 180 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. As a progressive neurodegenerative disorder, Alzheimer's disease (AD) requires early and accurate diagnosis to delay pathological progression and improve clinical outcomes. Recently, Deep-learning methods based on structural MRI (sMRI) have been widely used for computer-aided AD diagnosis...

Single-site non-invasive peripheral nerve stimulation with multidimensional encoding enables object differentiation using a myoelectric prosthetic hand

T Benigni, A E Pena, A Shell, J M Asbee, S S Kuntaegowdanahalli, J J Abbas and R Jung

2026-06-18 1 min 264 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. The goal of this study was to evaluate the efficacy of a multidimensional encoding approach, delivered through a single site of noninvasive peripheral nerve stimulation (PNS), in facilitating object discrimination with a sensorized myoelectric prosthetic hand. Approach. Ten participants w...

An examination of the relationship between body awareness, dream themes, and somatization in adult women.

2026-04-09 1 min 216 words

DREAMING

Summary: The aim of this study was to evaluate the relationship between body awareness, dream themes, and somatization symptoms in adult women. A total of 213 adult women aged 18–65 years participated in the study via online questionnaire. Body awareness was assessed using the Body Awareness Questionnaire, s...

Subjectively estimated effects of nightmares on sleep onset latency and sleep quality: A cross-sectional study.

2026-03-19

1
min170
words

DREAMING

Summary: Cross-sectional studies have established consistent associations between nightmare frequency, waking anxiety, and sleep disturbances. Yet, little is known about the extent to which individuals explicitly attribute sleep impairments to nightmares. This study examines subjectively estimated effects of...

Dream work in the United States and Korea: Self-oriented and relationship-oriented themes of female college students.

2026-05-11

1
min176
words

DREAMING

Summary: We compared the self and relationship themes in dream sessions of 10 U.S. and 10 Korean female college students. Preliminary analyses showed that the two samples were similar in terms of dream salience, but the U.S. sample scored higher in terms of session outcome (session evaluation, gains in dream...

DREAMING

Summary: This study examined the application of expressive art in the cognitive-experiential model of dreamwork originally developed by Hill (1996), focusing on its use with child participants. The study addressed three primary research questions: (a) whether a dreamwork workbook based on Hill's model would ...
