Shared Fine-Scale Functional Organization in the Human Subcortex Revealed by Connectivity Hyperalignment

Tu, J. C., Feilong, M., Zhang, Y., Gobbini, M. I., Haxby, J. V.

2026-10-05

1 min

248 words

BIORXIV NEUROSCIENCE

Summary: Subcortical structures are central to cognition, emotion, and social processing, and their dysfunction underlies a wide range of neurological and psychiatric conditions. Yet subcortical fine-scale functional organization has remained largely inaccessible to group-level fMRI analysis: nuclei are smal...

Clustered and diffuse sensory corticostriatal wirings define complementary interneuron circuits

Contadini, J., Fino, E., Bureau,
I.

2026-10-06

1
min

251
words

BIORXIV NEUROSCIENCE

Summary: In the striatum, interneurons tightly control the activity of output neurons, the striatal projection neurons (SPN). Among these striatal interneurons, parvalbumin-expressing (PV) and somatostatin-expressing (SOM) cells exhibit markedly distinct electrophysiological and anatomical properties, sugges...

SW-VEI-Net: A Physics-Informed Deep Neural Network for Shear Wave Viscoelasticity Imaging

 2026-01-12  1 min  226 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Quantitative viscoelasticity imaging via shear wave elastography (SWE) remains challenging due to complex wave physics and limitations of conventional reconstruction methods. To address this, we present SW-VEI-Net, a physics-informed neural network (PINN) that simultaneously reconstructs the shear e...

Feasibility of Dual Probe Pulse Wave Imaging of the Abdominal Aorta

 2026-01-12  1 min  233 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Pulse wave velocity (PWV) is an indirect measure of vessel stiffness, that has the potential to serve as a meaningful parameter for risk stratification of vascular diseases, such as abdominal aortic aneurysms (AAAs). However, assessing the PWV and pulse wave patterns in the complete abdominal aorta ...

ARXIV QBIO NC

Summary: arXiv:2610.02220v1 Announce Type: new Abstract: Microstate analysis starts with clustering and the meta-criterion is a heuristic to find an optimum cluster number. We address the following questions: (i) what number is found for non-cluster-forming dynamical systems, (ii) do centroids fall in rando...

Cross-source proteogenomic profiling of human microglia reveals a conserved core membrane protein and HERV signature

 Wong, H. T., Gleason, C., Boylan, A., Adler, M., Kosoy, R., Fullard, J. F., Levendosky, E., Hoffman, G. L., Molina, H., Roussos, P., Bogunovic, D., Simon, V., Mulder, L. C. F.

 2026-10-01  1 min  262 words

BIORXIV NEUROSCIENCE

Summary: Microglia are essential immune cells of the brain parenchyma which are responsible for maintaining homeostasis and responding to brain injury. When activated, they induce immune signaling and become phagocytic. In the context of neurodegenerative diseases, they exhibit both pro- and anti-inflammatory...

A synaptic wiring diagram underlying modality-specific ascending pathways of the superficial spinal dorsal horn

Xiang, W., Khajeh, R., Delgado, K., Liu, J., Holtrup, A., Zhang, Q., Cameron, S., Nguyen, T., Bae, J. A., Halageri, A., Kemnitz, N., Macrina, T., Moya Llamas, B., Schildkamp, A., Mazri, M. F., Ni, J., Roberts, R., Serratos Capdevila, L., Wang, R., Dsouza, A., Norton, A., Wang, S., Zhang, D., Tang, P. L., Choi, S., Lee, W.-C. A., Ginty, D. D.

2026-10-01

1
min188
words

BIORXIV NEUROSCIENCE

Summary: The spinal cord dorsal horn transforms tactile, thermal, pruritic, and nociceptive signals from peripheral somatosensory neurons into outputs to the brain, but how dorsal horn circuits organize diverse inputs into modality-selective ascending pathways is poorly understood. Using dSC1, a large-scale ...

Topiramate and anterior cingulate cortex high-frequency stimulation mitigate aggression and promote sociability in socially isolated male mice.

 2026-08-10  1 min  230 words

BEHAVIORAL NEUROSCIENCE

Summary: Excessive aggression induced by social isolation (SI) has been closely linked to dysfunction in prefrontal circuits, particularly the anterior cingulate cortex (ACC). Topiramate, an antiepileptic drug known to enhance GABAergic and inhibit glutamatergic transmission, has demonstrated antiaggressive ...

Is memory spared in monkeys with selective lesions of the hippocampus?

 2026-08-03  1 min  239 words

BEHAVIORAL NEUROSCIENCE

Summary: Normal explicit/declarative memory requires a system of anatomically related structures in the medial temporal lobe that includes the hippocampus and the entorhinal, perirhinal, and parahippocampal cortex. Although extensive medial temporal lobe damage in primates causes robust anterograde amnesia, ...

Functional validation and characterization of Slc39a8 genotype effects on ethanol consumption and related phenotypes

 Silva-Borges, A. L., Paredes, D.-J. G., Sultana, R., Pareja, C. G., Barkley-Levenson, A. M.

 2026-09-30  1 min  283 words

BIORXIV NEUROSCIENCE

Summary: Alcohol use disorders are heritable, and large-scale genome-wide association studies have recently identified novel genetic loci that are correlated with alcohol consumption and problematic alcohol use. One such gene is Slc39a8, which encodes the ion transporter ZIP8, responsible for cellular import...

Acute ClC-2 blockade increases neuronal intracellular chloride and depolarizes EGABA

 Shiu, F. H., Dzhala, V. I., Lillis, K., Staley, K. J.

 2026-09-30  1 min  219 words

BIORXIV NEUROSCIENCE

Summary: Neuronal intracellular chloride concentration shapes the polarity and strength of GABAA receptor-mediated inhibition. ClC-2 is a hyperpolarization-activated chloride channel proposed to support chloride extrusion, but its acute contribution to EGABA and neuronal chloride homeostasis remains incomple...

Multisensory interplay and theories of consciousness.

 2024-11-25  1 min  174 words

CLINICAL NEUROSCIENCE

Summary: Sensory interplay typically refers to cases where the content of one sensory modality affects the content of another sensory modality. Although there is much evidence today of such interplay, it is unknown how to interpret them. Is it a one-way causal function between two separate states (e.g., a vi...

Gait kinematics dynamically tune optic flow motion-in-depth perception during human locomotion

Horrocks, E. A. B., To, J. Y. L., Mareschal, I., Saleem, A. B.

2026-09-30

1 min

158 words

BIORXIV NEUROSCIENCE

Summary: Behavior generates continuous sensorimotor contingencies that the brain must process. In particular, locomotion produces optic flow, which is frequently noisy and ambiguous during navigation. Integrating non-visual self-motion signals can therefore provide a computational advantage to resolve this s...

BIORXIV NEUROSCIENCE

Summary: Altered white matter microstructure, commonly indexed by fractional anisotropy (FA), has been reported in individuals at clinical high-risk of psychosis (CHR-P) across multiple white matter tracts. However, the relationship between these alterations and later transition to psychosis remains unclear....

Adaptive spatiotemporal filtering of social electrosensory signals by cerebellar feedback

Miller, D. R., Shinn, E. K., Harrison, B., Marsat, G.

2026-09-30

1 min

236 words

BIORXIV NEUROSCIENCE

Summary: Sensory feedback can suppress predictable input, yet most research on this mechanism used simplified stimuli that do not capture the spatial and temporal structure of natural signals. We examined how cerebellum-like feedback, in brown ghost knifefish, shapes the encoding of realistic social electros...

SPECTRA: On-Device Cognitive Perturbation and Trajectory Analysis for Autonomous Edge-Cloud GUI Grounding

Zhan Qu, Hui Zang, Ran Chen, Tao Wang, Shengyu Zhang

2026-09-30

1
min

166
words

ARXIV CS HC

Summary: arXiv:2609.35775v1 Announce Type: new Abstract: The effectiveness of edge-cloud collaboration for GUI grounding depends on autonomous requesting, where the edge agent selectively offloads complex tasks to the powerful cloud. However, in visually dense scenarios, lightweight edge agents often exhibi...

Neuroimaging of intimate partner violence can underrepresent the most affected survivors

McFarland, C. W., Kucyi, A., Valera, E.
M.

2026-09-29

1
min

237
words

BIORXIV NEUROSCIENCE

Summary: Neuroimaging is becoming an increasingly prominent tool to understand intimate partner violence (IPV) and partner-inflicted brain injury (BI). Yet, by nature of IPV and partner-inflicted BI, those most affected may be the least likely to be eligible, participate, and produce usable data in neuroimag...

FRONTIERS NEUROBOTICS

Summary: Current cognitive architectures for social robots, even when conceived as autonomous and adaptable, remain largely grounded in fully digital, von Neumann-style paradigms, where acquired knowledge is detached from individual experience. This contrasts with biological cognition, in which learning emer...

268
words

FRONTIERS NEUROSCIENCE

Summary: Connectomics aims to generate complete neural wiring diagrams and leverage them to explain brain function at a systems level. Traditional neuroscience has relied on sparse recordings and partial circuit reconstructions, limiting mechanistic insight into how distributed neural activity produces behav...

 308 words

FRONTIERS NEUROSCIENCE

Summary: Background Nootropics enhance cognitive functions, including memory, attention, alertness, mood, and reaction time, through diverse neurobiological mechanisms. Caffeine, one of the most widely consumed nootropics, improves cognitive performance primarily by promoting wakefulness and alertness; however...
