BIORXIV NEUROSCIENCE

Summary: Intracortical microstimulation is a powerful tool to perturb neural circuits, yet how circuit changes post-stimulation remains poorly understood. Using two-photon imaging in the awake mouse visual cortex, we tracked genetically identified neurons before, during, and after microstimulation. Even after...

Deep brain stimulation reduces subthalamic nucleus pathological dynamics and rescues gait deficits associated with dopamine loss

 Steiner, L., Darie, R., Lindsay, A., Tseng, H.-a., van Welie, I., Han, X.

 2026-03-18  1 min

 196 words

BIORXIV NEUROSCIENCE

Summary: The Subthalamic Nucleus (STN) regulates movement and is an important clinical target for deep brain stimulation (DBS) in Parkinson's Disease (PD). However, it remains unclear how dopamine loss and DBS influence STN gait encoding. We performed simultaneous recordings from multiple neurons and intermi...

Investigating Neurochemistry, Connectivity, and Audio Stimuli Relationship Among Surface and Depth Cortical Neurons

 Vahidi, N. W., kassegne, S.

 2026-03-18  1 min  80 words

BIORXIV NEUROSCIENCE

Summary: In this study, we investigate the simultaneous recording of electrical and chemical signals within both the cortical surface and deep regions of the brain. This is made possible through the utilization of an innovative carbon based three-dimensional multi-functional neural probe. Our primary objecti...

Disease-causing mutations in Synaptotagmin can act via dominant-negative, gain-of-function or haploinsufficient mechanisms

 Guan, Z., Bykhovskaia, M., Littleton, J. T.

 17

2026-03-18

1

min

242

words

BIORXIV NEUROSCIENCE

Summary: Members of the Synaptotagmin (SYT) family of synaptic vesicle (SV) proteins contain two Ca^{2+} binding C2 domains (C2A and C2B) that regulate the timing and probability of SV fusion. Recently, dominant mutations in SYT1, present at most CNS synapses, and SYT2, abundant in the PNS, have been found to c...

Shared and Unique Connectivity Signatures of Reading and Language Deficits

 2026-03-12
  1 min
  253 words
 COGNITIVE NEUROSCIENCE

Summary: Reading ability depends on multiple cognitive skills, including decoding and language comprehension, which can vary widely across individuals—even among those with similarly low reading performance. To better understand the brain basis of this variability, we used connectome-based predictive modelin...

When a Man Says He Is Pregnant: Event-related Potential Evidence for a Rational Account of Speaker-contextualized Language Comprehension

 2026-03-12  1 min  296 words

COGNITIVE NEUROSCIENCE

Summary: Spoken language is often, if not always, understood in a context formed by the identity of the speaker. For example, we can easily make sense of an utterance such as "I'm going to have a manicure this weekend" or "The first time I got pregnant I had a hard time" when spoken by a woman, but it would ...

Rescuing unseen stimuli through alerting retro-cues

 Rodriguez-San Esteban, P., Capizzi, M., Gonzalez-Lopez, J. A., Chica, A. B.

 2026-03-17  1 min

 271 words

BIORXIV NEUROSCIENCE

Summary: Can we rescue a percept that would otherwise be processed non-consciously? While pre-stimulus alerting is known to facilitate conscious access, the effects of retro-cues remain ambiguous due to methodological confounds in existing literature. Specifically, most studies finding retro-cue benefits hav...

From default to creativity: prefrontal and cerebellar contributions of the default mode network to goal-directed remote thinking

 ALTMAIER, V., Moreno-Rodriguez, S., Ovando-Tellez, M., Beranger, B., Lopez-Persem, A., Volle, E.

 2026-03-17  1 min  262 words

BIORXIV NEUROSCIENCE

Summary: Creativity is a hallmark of human cognition, characterized by the ability to connect seemingly distant concepts or ideas. Existing theories suggest that remote thinking can be achieved either spontaneously (constrained by the structure of semantic memory) or in a goal-directed manner (constrained by...

Dynamical Mechanisms for Coordinating Long-term Working Memory Based on the Precision of Spike-timing in Cortical Neurons

 Terrence J. Sejnowski

 2026-03-17  1 min

 246 words

ARXIV QBIO NC

Summary: arXiv:2512.15891v5 Announce Type: replace Abstract: In the last century, most sensorimotor studies of cortical neurons relied on average firing rates. Rate coding is efficient for fast sensorimotor processing that occurs within a few seconds. Much less is known about the neural mechanisms underlyin...

A systematic analysis of brain tissue response to microelectrode material and size with single-cell spatial transcriptomics

 Thompson, C., Chakraborty, A., Wade-Kleyn, L., Reimers, M., Purcell, E.

 2026-03-16  1 min

 223 words

BIORXIV NEUROSCIENCE

Summary: Implantable microelectrode arrays can interface with the central nervous system to record from and/or stimulate neural tissues to treat neurological disease and injury. The chronic tissue response to implanted electrodes is believed to be a driving factor behind microelectrode failure. Next-generati...

Policy precision reveals action-phase impulsivity in women with premenstrual syndrome during risk-taking

 Jeong, B., Yoon, D.

 2026-03-16  1 min

 187 words

BIORXIV NEUROSCIENCE

Summary: The Balloon Analogue Risk Task (BART) is widely used to assess risk-taking and impulsivity, yet existing computational models struggle to unify sequential and prior evaluation strategies or fully capture uncertainty-driven information-seeking behavior. To address this, we introduce a novel computati...

Parallel analysis of voltage-gated sodium channel subunits reveals preferential colocalizations of beta-1/Nav1.1 and beta-2/Nav1.2

Yamagata, T., Suzuki, T., Yamakawa,
K.

2026-03-16

1
min

208
words

BIORXIV NEUROSCIENCE

Summary: Voltage-gated sodium channels (VGSCs) are conventionally described as heterotrimers composed of one alpha and two beta subunits. However, the patterns of co-expression of alpha- and beta-subunits in neurons remain unclear. In the present study, we report that alpha- (Nav1.1, Nav1.2, and Nav1.6) and ...

BIORXIV NEUROSCIENCE

Summary: Inferring computational mechanisms from neural recordings is a central goal in systems neuroscience. Recent developments have identified low-rank recurrent neural networks (RNNs) as an effective tool for fitting observed neural activity and extracting neural dynamics. However, we show that accurate ...

BIORXIV NEUROSCIENCE

Summary: The failure of adult central nervous system neurons to regenerate after injury has been attributed to transcriptional and epigenetic barriers, but whether three-dimensional genome organization constitutes an independent regulatory layer encoding regenerative potential remains unknown. Here we presen...

ARXIV QBIO NC

Summary: arXiv:2603.12628v1 Announce Type: new Abstract: Speech production and perception are the main ways humans communicate daily. Prior brain-to-text decoding studies have largely focused on a single modality and alphabetic languages. Here, we present a unified brain-to-sentence decoding framework for b...

ARXIV QBIO NC

Summary: arXiv:2603.12416v1 Announce Type: new Abstract: As proposed by Hebb's theory, neural assemblies are groups of excitatory neurons that fire synchronously and exhibit high synaptic density, representing external stimuli and supporting cognitive functions such as language and decision-making. Recently...

Hill-Type Models of Skeletal Muscle and Neuromuscular Actuators: A Systematic Review

 2025-09-12  1 min  200 words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Backed by a century of research and development, Hill-type models of skeletal muscle, often including a muscle-tendon complex and neuromechanical interface, are widely used for countless applications. Lacking recent comprehensive reviews, the field of Hill-type modeling is, however, dense and hard-t...

words

HACKER NEWS

Summary:

I've been talking to founders building AI agents across fintech, devtools, and productivity – and almost none of them have any real security layer. Their agents read emails, call APIs, execute code, and write to databases with essentially no guardrails beyond "we trust the LLM."

So I built A...
