Sensory Feedback for Upper-Limb Amputees by Noninvasive Electrical Stimulation and Its Performance Assessment

2026-03-20

1
min253
words

TRANSACTIONS HAPTICS

Summary: Most commercial prostheses lack a function of natural and intuitive sensory feedback, which is one of the reasons for their high rate of abandonment. Transcutaneous Electrical Nerve Stimulation (TENS) has been proved as an effective approach to evoke sensations for limb amputees. This paper aims to ...

A Direction-Dependent Mechanotransduction Model to Convert Fingertip Forces Into Neural Spike Trains for Tactile Feedback

2026-03-20

1
min235
words

TRANSACTIONS HAPTICS

Summary: Microneurography studies have shown that human mechanoreceptor (MR) activity is directionally sensitive to shear forces, enabling fine tactile perception and object manipulation. However, existing computational mechanotransduction models largely neglect this directional tuning, limiting their biolog...

Psychophysical Effects of Grasping Conditions of a Handheld Device on Vibrotactile Perceptions

2026-03-19

1
min180
words

TRANSACTIONS HAPTICS

Summary: Tactile perception varies between individuals and the state of the grasp. To investigate the psychophysical effects on vibrotactile perceptions influenced by grasp type and strength of a handheld device, perceived intensities were tested against various grasp strengths and stimulus levels using 40 a...

Criterion for Quantifying Skin Mechanical Stimuli During Tactile Assessment of Ultra-Soft Materials Such as Towels

2026-03-10

1
min195
words

TRANSACTIONS HAPTICS

Summary: The tactile sensation of towel fabrics, which originates from their pile structure, is strongly affected by the mechanical response under the low loads applied at the instant of contact. The pile structures formed from spun yarns create a graded surface with extremely low elasticity at the outermost...

Perceptual, metacognitive, and computational signatures of temporal landmark uncertainty in tactile motion perception

Adibi,
M.

2026-07-03

1
min

262
words

BIORXIV NEUROSCIENCE

Summary: Motion perception depends on estimating the relative timing of sensory events under internal uncertainty. Although perceptual uncertainty is commonly represented by a single internal noise parameter, its structure, sources, and temporal organisation remain poorly understood. Here, I investigated the...

Identification and quantification of neurological responses in patients with dentine hypersensitivity

Wong, N., Barnes, H. I., Parkinson, C. R., Barber, M. W., Arvaneh, M., Boissonade, F. M.

2026-07-02
1
min

275
words

BIORXIV NEUROSCIENCE

Summary: Evaluation of the effectiveness of therapeutic interventions for dentine hypersensitivity is limited by a lack of standardisation and objectivity in measuring the associated pain. To address this, we investigated whether electroencephalography (EEG) can provide an objective, quantitative measure of ...

ARXIV QBIO NC

Summary: arXiv:2511.05536v2 Announce Type: replace Abstract: Earth's gravity fundamentally shapes human behaviour. The brain encodes this force as an internal model of gravity, enabling the prediction and interpretation of gravitational effects during perception and action. Understanding how this model adapts...

Network and hierarchical organization of intrinsic timescales in the human brain

Krause, B. M., Bublitz, E. F., Dappen, E. R., Kawasaki, H., Nourski, K. V., Banks, M. I.

2026-07-02

1

min

265

words

BIORXIV NEUROSCIENCE

Summary: Intrinsic neural timescales represent the characteristic duration over which information is maintained in neuronal circuits. Evidence suggests that neural timescales vary systematically across the cortical hierarchy, with shorter timescales in primary sensory areas and longer timescales in higher-or...

words

BIORXIV NEUROSCIENCE

Summary: Background: Dopamine (DA) is a neurotransmitter critically involved in food-related reinforcement learning. While mesolimbic DA reward-associated signaling in the nucleus accumbens has been widely investigated, far less is known about DA function in the hippocampus (HPC), a brain region traditionall...

Toward Optimizing Thalamic Deep Brain Stimulation for Cortical Modulation: A Surrogate Brain Approach

Ahmed, R., Feng, Y., Roe, A. W., Chen, Z.
S.

2026-07-01

1
min

258
words

BIORXIV NEUROSCIENCE

Summary: The thalamus is a central hub that interfaces with widespread cortical and subcortical nodes. Thalamic deep brain stimulation (DBS) offers a principled strategy for distributed cortical modulation: since distinct thalamic nuclei project to spatially segregated cortical territories, stimulation at a ...

Structural determinants of dynamical state transitions in disorders of consciousness: a whole-brain modeling approach

Lehue, F., Mindlin, I., Coronel-Oliveros, C., Sitt, J., Orio, P.

2026-07-01

1
min

193
words

BIORXIV NEUROSCIENCE

Summary: Disorders of consciousness (DoC) are associated with large scale alterations in brain dynamics, yet the structural factors that constrain these changes remain unclear. Here, we investigate how the topology of the structural connectome shapes the sensitivity of brain dynamics to perturbation using a ...

ERP BOOT CAMP

Summary: We are excited to announce the release of a new EEG/ERP analysis package, [ERPLAB Studio](https://github.com/ucdavis/erplab/releases). We think it's a huge improvement over the classic EEGLAB user interface. See our cheesy [video](https://www.youtube.com/watch?v=llaKVQ9DD6E)...

Context-Aware Evidence-Gated Plasticity for Multi-Goal Learning in Spiking Neural Networks

Neymotin, S. A., Hazan, H., Unal, G., Earl, C., Anwar, H., Franaszczuk, P., Boothe, D.

2026-06-30

1
min

249
words

BIORXIV NEUROSCIENCE

Summary: Background / Introduction: Biologically inspired spiking neural networks can model adaptive behavior, but learning multiple goals is difficult because synaptic updates for different targets can interfere. We tested whether multi-timescale plasticity and context-specific credit assignment could impro...

Berberine improves motor deficits in the spastic paraplegia SPG7 mutant mice

Paulikova, K., Sorgente, A., Franchini, E., Pattini, L., Sambri, I., Casari, G.

2026-06-30

1
min196
words

BIORXIV NEUROSCIENCE

Summary: Hereditary spastic paraplegia type 7 (SPG7) is a neurodegenerative disorder characterized by progressive motor impairment and cerebellar dysfunction. Mutations in the SPG7 gene, encoding the mitochondrial metalloprotease paraplegin, disrupt mitochondrial homeostasis and lead to neuronal vulnerabilit...

Aberrant neuronal differentiation and splicing defects in Congenital Myotonic Dystrophy (DM1) iPSC models

Thumu, S. C. R., Gonzales, J. P., Munir, S., Tuck, C., Dominguez, O., Singh, S.

2026-06-30

1 min 280 words

BIORXIV NEUROSCIENCE

Summary: Myotonic Dystrophy type 1 (DM1) is an autosomal multisystem disorder manifested due to unstable CTG nucleotide repeat expansion within the 3'-untranslated region of the dystrophin myotonia protein kinase (DMPK) gene. Although progress towards understanding of molecular pathogenesis in muscle and he...

APP-CTF β /C99 oligomers drive synaptic vesicle tethering through C-terminal interactions

Kapadia, A. B., Cijffers, E., Van, S., Hafner, A.-S.

2026-06-30

1 min 161 words

BIORXIV NEUROSCIENCE

Summary: Proteolytic processing of the amyloid precursor protein (APP) generates a 99-amino acid precursor, {beta}-carboxyl-terminal fragments (APP-CTF{beta} or C99). Upon {gamma}-secretase inhibition, APP-CTF{beta} accumulates and induces synaptic defects, resulting in neuronal hyperactivity. However, mecha...

Spinal injury induces a stem cell-like progenitor state that promotes regenerative neurogenesis via *clcf1* in zebrafish.

Westphal, M., Branch, R., Docampo-Seara, A., Cosacak, M. I., Logvinova, E., Bellia, M., Cheng, S., Tsarouchas, T. M., Bretschneider, A., Zoeller, D., Shen, R., Scucces, L., Baerhold, D., Becker, T., Becker, C. G.

2026-06-30
1
min

224
words

BIORXIV NEUROSCIENCE

Summary: After spinal injury, zebrafish, in contrast to mammals, show regenerative neurogenesis, characterized by enhanced injury-induced proliferation of ependymo-radial glial cells (ERGs) and an increase in injury-induced generation of neurons from these progenitors. It is unclear whether regenerative neur...

Diverse origins and transcriptional profiles of macrophages in a spinal lesion in zebrafish

Heilemann, K., Jidav, E. V., Cark, O., Enos, S. J., Wolf, B., Becker, C. G., Becker, T., Docampo Seara, A.

2026-06-30 1 min 191 words

BIORXIV NEUROSCIENCE

Summary: The injury responses of tissue-resident macrophages in the CNS (microglia) and blood-derived macrophages (BDMs) play key roles in successful regeneration of the zebrafish spinal cord, but the origins and dynamic behaviours of these immune cells are not well characterized. Here, we find that microgli...

PSYCHOMUSICOLOGY

Summary: Sixty-nine participants made continuous response judgments of perceived arousal and valence while listening to 30-s extracts of 100 unfamiliar pieces within a novel recommender system. Our purpose was to take advantage of the relatively large number of participants and pieces studied (compared with ...)

Social Isolation Alters Hippocampal miR-30e-5p Expression and Impairs Pattern Separation-Related Behaviour in Adult Mice

McDiarmid, A. H., Kiemes, A., Mandal, G., Thuret, S., Fernandes, C.

2026-06-29

1
min

195
words

BIORXIV NEUROSCIENCE

Summary: Social isolation is commonly used to model social stress and is a known risk factor for depression, with impacts on hippocampal function and postnatal neurogenesis. However, most studies focus on social isolation in juvenile mice isolation during adolescence, leaving the effects of prolonged adult i...

The CHIP-LMO7-BAG5 complex controls tau clearance and yields repurposed and newly designed therapeutic candidates for Alzheimer's disease

Kim, J.-Y., Tadros, B., Vaidya, B., Liang, Y. H., Jung, S. Y., Deng, X., Xu, J., Zoghbi, H. Y.

2026-06-29

1
min

123
words

BIORXIV NEUROSCIENCE

Summary: Through cross-species genetic screens, we identified LMO7 as a regulator of tau levels in vivo. LMO7 bridges the E3 ligase CHIP and its inhibitory cochaperone BAG5, suppressing CHIP's ligase activity and limiting tau ubiquitination and degradation. Adult LMO7 knockdown enhances CHIP activity, reduce...

Cortico-muscular control of postural balance in older adults - effects of training on functional connectivity

Koster, R., Alizadehsaravi, L., van Dieen, J. H., Bruijn, S., Dominici, N., Daffertshofer, A.

2026-06-29 1 min 225 words

BIORXIV NEUROSCIENCE

Summary: Background. Balance training in older adults can lead to reduced centre of mass accelerations and reduced angular momenta after perturbations of unipedal stance, reflecting an enhanced ability to recover balance. It has been suggested that the co-occurring changes in muscle synergies indicated strat...

5-HT4 receptor ligand RS67333 modulates striatal acetylcholine and dopamine release via inhibition of acetylcholinesterase

Qiao, Q., Wu, W., Cragg, S. J.

2026-06-29

1 min

242 words

BIORXIV NEUROSCIENCE

Summary: Serotonin 5-HT4 receptors (5-HT4Rs) have emerged as potential therapeutic targets in neuropsychiatric and neurodegenerative disorders by modulating circuits that shape mood, cognition, and motor function. Ligands for 5-HT4Rs can modify dopamine (DA) and acetylcholine (ACh) transmission but mechanism...

Therapeutic restoration of synaptic architecture, retinal and visual function, and prevention of retinal degeneration in a mouse model of retinal dystrophy

Hasan, N., Di Paolo, M., McCall, M. A. A., Gregg, R. G.

2026-06-29

1
min

226
words

BIORXIV NEUROSCIENCE

Summary: Vision depends on the transfer of photoreceptor signals through the retina and then to many CNS visual nuclei. While the most common inherited retinal diseases (IRDs) involve defects in rod and/or cone function, another group (referred to as congenital stationary night blindness (CSNB)) results from...

Computational Insights into the tACS Modulation in Healthy and Epileptic Brain Networks

Al Harrach, M., Yochum, M., Gaugain, G., Modolo, J., Wendling, F.

2026-06-29

1
min

198
words

BIORXIV NEUROSCIENCE

Summary: Transcranial Electric stimulation (tES) is a safe and noninvasive technique increasingly used in treating brain disorders. Despite many studies on tES, there is still a lack of understanding of its mechanisms at the microscale network level. This is crucial for optimized parameter selection in thera...

Apparent Anatomical Variability Through Rigid Augmentation Enables Reliable Corpus Callosum Segmentation

Guimaraes, D. M., Szczupak, D., Campos, V. P., Bramati, I. E., Silva, A. C., Tovar-Moll, F.

2026-06-29 1 min 259 words

BIORXIV NEUROSCIENCE

Summary: The corpus callosum is a major white matter bundle responsible for connecting both hemispheres. In mammals, due to a variety of causes, the development of the corpus callosum can be impaired - this brain malformation is known as corpus callosum dysgenesis (CCD). The clinical presentation of CCD vari...

Compensation of the effects of temperature on a motor system in the crab, *Cancer borealis*

Jacquerie, K., DiMartino, J. M., Dalal, A., Zeng, J., Marder, E.

2026-06-29 1 min 141 words

BIORXIV NEUROSCIENCE

Summary: Rising ocean temperatures challenge ectothermic animals to maintain essential behaviors such as movement and feeding. We asked how a complete neuromuscular pathway preserves function when every component process responds differently to warming. In the pyloric system of the crab *Cancer borealis*, we s...

Much stronger coarse-to-fine visual processing in primate superior colliculus than primary visual cortex neurons

Yu, Y., Bogadhi, A. R., Baumann, M. P., Malevich, T., Zhang, T., Trottenberg, C., Hafed, Z. M.

2026-06-29 1 min 248 words

BIORXIV NEUROSCIENCE

Summary: The visual system optimizes its signal processing properties to efficiently encode natural scenes. The superior colliculus (SC) and primary visual cortex (V1) both play important roles in visual-motor processing, and they both exhibit qualitatively similar visual responses. However, it is not clear ...

STAG: Spatio-temporal Evolving Structural Representation of Action Units for Micro-expression Recognition

Nandani Sharma, Varun Sharma, Dinesh Singh

2026-06-29

1 min

186 words

ARXIV CS HC

Summary: arXiv:2606.28083v1 Announce Type: cross Abstract: Micro-expression recognition is challenging due to subtle and short-lived facial muscle movements. Existing methods rely heavily on apex-onset frames, overlook fine-grained inter-frame dynamics, and separately model spatial and temporal information,...
