min

186
words

BIORXIV NEUROSCIENCE

Summary: Nigrosomes are formed by clusters of pigmented dopaminergic cells in the substantia nigra that critically contribute to dopaminergic function. The ever-increasing resolution of ultra-high-field MRI brings clinical imaging of these clusters into reach, promising unprecedented insight into the functio...

Shared and Unique Connectivity Signatures of Reading and Language Deficits

 2026-03-12  1 min  253 words

COGNITIVE NEUROSCIENCE

Summary: Reading ability depends on multiple cognitive skills, including decoding and language comprehension, which can vary widely across individuals—even among those with similarly low reading performance. To better understand the brain basis of this variability, we used connectome-based predictive modelin...

Resting State Somatomotor Functional Brain Networks using Empirical Mode Decomposition and Hilbert Transformation

Kaur, T., Yadav, S., Jain, N.

2026-04-27

1

min

173

words

BIORXIV NEUROSCIENCE

Summary: The goal of the resting-state functional connectivity studies is to determine the inherent dynamics of the brain networks while the body is at rest. These networks get differentially activated when the brain is involved in various tasks such as processing of sensory inputs, initiating motor activiti...

DMN Connectivity Predicts Location-Learning-Related Attentional Capture Vulnerability

 Chen, S., Mueller, H. J., Shi, Z.

 2026-04-27

 1 min

 141 words

BIORXIV NEUROSCIENCE

Summary: Individual differences in susceptibility to attentional capture may reflect stable differences in large-scale brain organization. Using task-based fMRI (N = 33), we tested whether default mode network (DMN) connectivity predicts distractor interference after spatial probability learning. Participant...

Reciprocal repulsions enforce heterotypic dendrite segregation in an olfactory circuit

 Ji, H., Li, J., Xu, Y., Wong, K. K. L., Wu, Y., Luginbuhl, D. J., Zhang, Y., Li, Z., Lee, J., Jones, R. C., Quake, S. R., Arac, D., Özkan, E., Luo, L.

 2026-04-27

 1 min

 134 words

BIORXIV NEUROSCIENCE

Summary: How dendrites of different neurons segregate into discrete spatial domains during neural circuit assembly is poorly understood. Here, using the *Drosophila* olfactory system, we found that heterophilic interactions between two cell-surface proteins Teneurin-m (Ten-m) and Capricious (Caps) drive dendri...

Subthreshold Asynchronous States and Computations in Biophysically Detailed Populations of Neurons

Nicola, W., Turner, R. W., Zamponi, G.

2026-04-27

1 min

122 words

BIORXIV NEUROSCIENCE

Summary: Spikes are metabolically costly to generate and transmit, and spiking rates should be kept to a minimum for efficient coding. How low can the spike rate go? We show that computations and asynchronous states based on excitatory/inhibitory balance can exist without firing any spikes through self-susta...

Transdiagnostic Neurobiological Biotypes of Trauma Timing: Data-driven approach of Childhood and Adulthood-Onset Trauma

Haim-Nachum, S., Zhang, C., Peng, K., Neria, Y., Zilcha-Mano, S., Zhu, X.

2026-04-27

1 min

248 words

BIORXIV NEUROSCIENCE

Summary: Background: The developmental timing of trauma exposure may critically shape neurobiological outcomes, yet distinctions between childhood-onset trauma (CT) and adulthood-onset trauma (AT) remain poorly understood. Aim: This study explores whether trauma onset timing is associated with distinct resti...

Forward-Looking Intravascular Ultrasound Imaging in Coronary Rotational Atherectomy: Development and Performance Assessment

 2025-09-02  1 min  242 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: coronary rotational atherectomy (CRA) is a vital method for the treatment of cardiovascular calcified blockages, but the lack of intravascular information may lead to improper setting of rotary parameters, posing risks of surgical complications. Forward-looking intravascular ultrasound (F...

Comparative Mapping of Functional and Structural Homologies in the Pig and Human Brain

 Li, Q., Ahmed, I., Taber, M. F., Laballe, M. H., Sneed, S. E., Kaiser, E. E., West, F. D., Zhao, Q., Calhoun, V.

 2026-04-25
  1 min
  265 words

BIORXIV NEUROSCIENCE

Summary: Comparative mapping of functional and structural homologies across humans, small animals, and nonhuman primates has been extensively pursued due to its strong translational relevance. However, these experimental models possess inherent limitations in fully recapitulating the complexity of human cort...

Influence of testing language and aging on verbal list memory in deaf American Sign Language–English bilinguals.

2026-02-05

1

min

261

words

NEUROPSYCHOLOGY

Summary: Objective: The present study examined aging and testing-language effects on verbal list learning in young adult and older deaf bilinguals of American Sign Language (ASL) and written English. It is not known which language maximizes free recall, and no list learning task has been widely adopted for t...

A novel neurophysiological approach to evaluate the impact of virtual training on skills acquisition

Vincenzo Ronca, Rossella Capotorto, Sara Buonocore, Francesca Massa, Giuseppe Di Gironimo, Raffaele De Amicis, Stefano Papa, Luca Mattioli, Eduardo Palermo, Luciano Di Donato, Daniela Freda, Marco Pirozzi, Alessandra Ferraro, Gianluca Di Flumeri, Andrea Giorgi, Gianluca Borghini and Pietro Aricò

 2026-04-14  1 min  382 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Objective evaluation of operational training remains challenging, particularly when comparing physical training with virtual reality (VR) training. Behavioral and subjective measures capture performance and perceived workload but provide limited insight into the underlying neurocognitive ...

201 words

BIORXIV NEUROSCIENCE

Summary: Stress can cause or exacerbate psychiatric illness, and effects on the transcription factor CREB within the nucleus accumbens (NAc) are critically involved. In rodents, stress-induced activation of NAc CREB produces elevations in dynorphin (DYN), an endogenous opioid expressed in dopamine D1-recepto...

Image-grounded encoding models reveal distinct temporal profiles of naturalistic object and scene processing in the human brain

 Mueller, N., Scholte, H. S., Groen, I. I. A.

2026-04-24

1 min

280 words

BIORXIV NEUROSCIENCE

Summary: The human brain processes large amounts of complex visual information in order to effectively interact with its environment. It is well established that our visual system has specialized regions to process incoming information efficiently, such as scene-, face-, and object-selective areas, which can...

Presynaptic CaV2.1 calcium dependent facilitation is essential for faithful auditory information transfer

Al-Yaari, M., Li, J., Keine, C., Hunger, B., Hansen, M. R., Young, S. M.

2026-04-24

1 min

147 words

BIORXIV NEUROSCIENCE

Summary: Activity-dependent modulation of presynaptic voltage-gated Ca²⁺ channels (CaV2) regulates Ca²⁺ influx to control neuronal circuit output. Although CaV2.1 can undergo robust Ca²⁺ dependent facilitation (CDF), whether it occurs in native central nervous system neuronal circuits is disputed. Accurate a...

HSF1-mediated Proteostasis Decline Links Aging and Sleep Disruption

Yamazaki, S., Reddy, A. B.

2026-04-24

1
min

277
words

BIORXIV NEUROSCIENCE

Summary: Sleep disruption increases with age and is associated with adverse age related outcomes, yet the molecular mechanisms linking these phenomena remain unclear. Here, through integrative analysis of human and mouse transcriptomic and proteomic datasets, we identify proteostasis related pathways whose a...

Beyond gait speed: a multidimensional motor signature of Motoric Cognitive Risk syndrome identified through domain-specific anomaly detection

 Perthuy, B., Vinzant, H., Brifault, C., Cabibel, V., Laillier, R., Denise, P., Lefevre, N., Dalibot, A., Stergiou, N., Cignetti, F., Decker, L. M.

 2026-04-24  1 min  278 words

BIORXIV NEUROSCIENCE

Summary: Motoric Cognitive Risk (MCR) syndrome, defined by subjective cognitive complaints and slow gait speed, identifies older adults at increased risk of major neurocognitive disorders (NCDs). Yet, gait speed reflects a composite output shaped by heterogeneous neuromusculoskeletal and cognitive processes,...

EFFECTS OF TOLL-LIKE RECEPTOR 3 - DEPENDENT IMMUNE ACTIVATION IN MICE ARE SEX- AND TISSUE - SPECIFIC: IMPLICATIONS FOR ALCOHOL USE DISORDER

 Antwi-Adjei, P. S., Kisby, B. R., Shanmugam, S., Ponomarev, I.

 2026-04-24  2 min

 410 words

BIORXIV NEUROSCIENCE

Summary: ABSTRACT Background: Alcohol use disorder (AUD) is linked to increased neuroinflammation. Alcohol (ethanol) may activate toll-like receptors, which leads to the release of inflammatory molecules that could influence AUD-related behaviors, such as increased alcohol intake. Activation of toll-like rec...

Assistive Trajectory Planning for Lower Limb Exoskeletons: Strategies From Laboratory-Optimized Gait to Environmentally-Adaptive Locomotion Through Multimodal Parameter Awareness

 2025-12-30  1 min  182 words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Lower limb assistive exoskeletons (LLEs) show great potential to reduce metabolic cost, improve walking performance, and correct abnormal gait patterns. Among their core control architectures, assistive trajectory planning is key to determining system responsiveness and effectiveness under varying l...
