Division-Specific Organization of a Shared Functional Scaffold in the Early-Life Human Brain

 Hu, D., Cheng, J., Han, K., Wu, Z., Yin, W., Sun, Y., Liu, J., Hung, S.-C., Wang, L., Cohen, J. R., Lin, W., Li, G.

 2026-09-16  1
min

 186
words

BIORXIV NEUROSCIENCE

Summary: Early cognition and behavior emerge from coordinated maturation of functional systems spanning the brain, making cross-division integration essential for defining whole-brain architecture and understanding its role in neurodevelopment. Yet early human functional development is still largely investig...

Distinct protein synthesis requirements for coupled excitatory and inhibitory long-term co-plasticity in mouse hippocampus

 Jablonska, J., Orzol, D., Ciuurko, D., Wiera, G., Mozrzymas, J. W.

 2026-09-16  1 min

 249 words

BIORXIV NEUROSCIENCE

Summary: The functioning of neuronal networks critically depends on the coordinated interaction between excitation and inhibition. The properties of glutamatergic and GABAergic synapses are finely tuned by network activity, and the heterosynaptic nature of inhibitory plasticity further emphasizes their funct...

Physiological landmarks reveal the laminar organization of the primate hippocampus

 Landi, S. M., Jutras, M. J., Bakotich, E. C. S., Buffalo, E. A.

 2026-09-16  1 min  196 words

BIORXIV NEUROSCIENCE

Summary: The laminar anatomy of the hippocampal microcircuit is conserved across mammals, and its physiology has been characterized extensively in rodents, yet how this circuitry is organized physiologically in the primate brain remains poorly understood. Here we used high-density Neuropixels probes to recor...

Transcutaneous auricular vagus nerve stimulation targets the brain-gut axis to treat functional dyspepsia: a scoping review of clinical evidence and mechanistic research

Yutang
Ren

2026-09-16

1
min

251
words

FRONTIERS NEUROSCIENCE

Summary: BackgroundFunctional dyspepsia (FD) is a common gut–brain interaction disorder with suboptimal response to pharmacotherapy. Transcutaneous auricular vagus nerve stimulation (taVNS), a non-invasive neuromodulation targeting the vagus nerve, has emerged as a promising brain–gut axis therapy. This scop...

Network Models of Neurodegeneration: Bridging Neuronal Dynamics and Disease Progression

2026-01-16

1
min

196
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Neurodegenerative diseases are characterized by the accumulation of misfolded proteins and widespread disruptions in brain function. Computational modeling has advanced our understanding of these processes, but efforts have traditionally focused on either neuronal dynamics or the biological processes...

Assistive Trajectory Planning for Lower Limb Exoskeletons: Strategies From Laboratory-Optimized Gait to Environmentally-Adaptive Locomotion Through Multimodal Parameter Awareness

 2025-12-30  1 min  182 words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Lower limb assistive exoskeletons (LLEs) show great potential to reduce metabolic cost, improve walking performance, and correct abnormal gait patterns. Among their core control architectures, assistive trajectory planning is key to determining system responsiveness and effectiveness under varying l...

BIORXIV NEUROSCIENCE

Summary: Human decision-makers differ in how they value and trade off reward, risk, and information when evaluating future gains and losses, and these preferences are central to well-being. However, how multi-attribute economic valuation relates to psychopathology remains unclear. Here, 1,954 individuals com...

Spared corticospinal neurons activate an endogenous plasticity program after partial CNS injury

 Murillo, M., O'Brien, C. F., Golan, N., Yin, E. X., Brennand, K., Cafferty, W.
 B.

 2026-09-14  1 min

 138 words

BIORXIV NEUROSCIENCE

Summary: Functional recovery after incomplete spinal cord injury depends substantially on the capacity of anatomically spared neurons to remodel their connections, yet the molecular programs underlying this endogenous plasticity remain poorly understood. To identify and validate these mechanisms, we combined...

Atypical Chemokine Receptor DARC/ACKR1 Is Expressed Selectively by Neurons with Regional Heterogeneity and Protects against Neuroinflammation and Cognitive Impairment

 Kanumuri, V. N. S., Guo, M., Nougaisse, J., Ma, X., Du, Q., Weintraub, N. L., Lei, Y., Lu, X.-Y.

 2026-09-14  1 min  142 words

BIORXIV NEUROSCIENCE

Summary: Atypical chemokine receptors (ACKRs) regulate inflammatory responses by scavenging and sequestering chemokines. The Duffy antigen receptor for chemokines (DARC), also known as ACKR1, binds multiple inflammatory chemokines and regulates inflammation in peripheral tissues. However, the distribution an...

Peripersonal space and interpersonal distance as windows onto multisensory body representation in adolescents with overgrowth syndromes

 Cosimo Urgesi

 2026-09-08

 1 min

 282 words

FRONTIERS HUMAN NEUROSCIENCE

Summary: IntroductionPeripersonal space (PPS) and interpersonal distance (IPD) reflect related but dissociable representations of the space around the body, both relevant to multisensory and social development. However, whether physical overgrowth is associated with an altered regulation of body-related spac...

words

BIORXIV NEUROSCIENCE

Summary: High gamma and ripple frequency oscillations are engaged in encoding and recall of memory traces. Tracking specific traces with their signature neural activities across time and various tasks remains a major challenge. Using intracranial electrode recordings from epilepsy patients, we detected burst...

USP15 REGULATES NEUROINFLAMMATION AND DRIVES PATHOGENESIS IN SYNUCLEINOPATHIES

 Fodil, N., Del Cid-Pellitero, E., Piscopo, V. E.-C., Xiao Xuan Luo, J., Wong, M., Olivier, J. F., Alluli, A., Shlaifer, I., You, Z., Chen, C. X.-Q., Aprahamian, N., Cha, Y., Colette, E., Mayo, J., Annett, A., Jabado, N., Kleinman, C. L., Kagalwala, M. N., Ross, J., Lathrop, M., Langlais, D., Durcan, T. M., Fon, E. A., Gros, P.

 2026-09-11  1 min  145 words

BIORXIV NEUROSCIENCE

Summary: Neuroinflammation strongly contributes to the pathogenesis of neurological and neurodegenerative diseases, including Parkinson's disease. We show that ablation of Usp15 in astrocytes and in microglia protects against lethal neuroinflammation in vivo. In a mouse model of synucleinopathy, Usp15 deleti...

Miniscope Zero: a fully wireless, single-cell-resolution miniature microscope for imaging neural dynamics in freely behaving animals

Sasatani, T., Brosch, M., Dong, Z., Saunders, J., Zhao, P., Sehgal, M., Oesch, L. T., Sangiuliano Jimka, F., Semwal, H., Guha, A., Chorsi, H., Keus, K., Madruga, B. A., Silva, A. J., Churchland, A. K., Golshani, P., Aharoni, D.

 2026-09-11  1 min  144 words

BIORXIV NEUROSCIENCE

Summary: Imaging neural fluorescence dynamics during unconstrained behavior remains a major challenge in neuroscience. Head-mounted miniature one-photon microscopes enable in vivo recordings from freely behaving animals. Still, their power and data requirements typically necessitate tethers or heavy batterie...

MFF SUMOylation regulates neuronal mitochondrial morphology and facilitates AMPK-induced mitochondrial fragmentation

 Seager, R., Franchini, D., Henley, J., Wilkinson, K.

 2026-09-11  1 min

 133 words

BIORXIV NEUROSCIENCE

Summary: Mitochondrial dysfunction and fragmentation in neurons are characteristics of many neurodegenerative conditions. AMP-activated protein kinase (AMPK) is a cellular energy sensor which is hyperactivated in Alzheimers disease. Under stress conditions, AMPK-mediates phosphorylation of the outer mitochon...

HACKER NEWS

Summary:

How should agents interact with other agents? What happens when they rap or fight against each other with the pressure of human spectators? Clawfight.ai is an experiment to explore this space.

This is my first post about it. The journey began on a beefed up machine I purchased with a decent GPU...

Complementary prefrontal and thalamic representational dynamics during response planning

Hähnke, D., Ranganath, A., Wang, X., Ayasreh Fierro, S., Bernklau, T. W., Jacob, S. N.

2026-09-11

1
min

150
words

BIORXIV NEUROSCIENCE

Summary: Advance contextual information can guide behavioral responses, but how prospective action representations unfold across prefrontal and thalamic neuronal populations of the cognitive control network remains unclear. Here, we trained mice on a contextual response-planning task in which auditory cues e...

Important Changes to the 2024 ERP Boot Camp

 Steve Luck  2024-03-05  2 min  444 words

ERP BOOT CAMP

Summary:

We are disappointed to announce that we will not be holding a regular 10-day ERP Boot Camp this summer.

We have held Boot Camps nearly every summer since 2007, supported by a series of generous grants from NIMH that allowed us to provide scholarships for all attendees. Unf...

1
min

244
words

BIORXIV NEUROSCIENCE

Summary: A century ago, Brodmann suggested that local cortical microarchitecture dictates function, yet modern structure-function mapping overwhelmingly focuses on white matter macroarchitecture. Here, we reframe structure-function coupling by linking gray matter microarchitecture and macroscale connectomics...

Anticipatory Gaze Reveals Individual Differences in Implicit Sequence Learning Before Motor Performance

Sinha, O., Crews, L. G., Pleasant, W. A., Borich, M. R., Wheaton, L. A.

2026-09-10

1
min

158
words

BIORXIV NEUROSCIENCE

Summary: Implicit sequence learning is commonly inferred from changes in motor performance, although anticipatory gaze behavior may provide complementary information about emerging perceptual sequence knowledge. We tracked anticipatory gaze and response time on every trial of a reach-grasp-and-move sequence...

BIORXIV NEUROSCIENCE

Summary: The complement system, a proteolytic cascade crucial for innate immune system function, is dysregulated in brain aging and neurodegenerative diseases, including Alzheimer Disease (AD). In models of AD, complement proteins, including C1q and C3, are upregulated and mediate microglial clearance of amy...

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: Recurrent Neural Networks (RNNs) are widely used to model neural activity in Computational Neuroscience. Here, we explore the mathematical foundations of three fundamental procedures that can be implemented: temporal rescaling, discretization, and linearization. These techniques provide crucial tool...

Cortical and Hippocampal Pathways to Mental Continuity

 Li, X., Lee, H., Honey, C.

 17 2026-09-10

 1
min

 125
words

BIORXIV NEUROSCIENCE

Summary: How do people preserve mental continuity when tasks are interrupted? One established pathway runs through the hippocampus, which stores snapshots of our mental context for later reinstatement. We propose a second pathway: the brain's default network sustains the interrupted situation as a background...
