Explainable ECG Analysis by Explicit Information Disentanglement With VAEs

2025-11-10

1
min

241
words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: The interpretation of electrocardiogram (ECG) signals is vital for diagnosis of cardiac conditions. Traditional methods rely on expert knowledge, which is time consuming, costly and potentially misses subtle features. AI has shown promise in ECG interpretation, but clinically desired mode...

Biophysical Circuit Modeling of Electro-Quasistatic Multi-Human Body Communication

2025-12-01

1
min183
words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Human body communication, particularly of the Electro-Quasistatic variety, has gained traction among low-power wireless circuit designers due to its benefits in terms of power and physical security compared to conventional electromagnetic or radio frequency communication. Yet, applying its theory an...

The Roles of Alpha Oscillations in Attentional Blink

2026-06-01

1
min198
words

COGNITIVE NEUROSCIENCE

Summary: The attentional blink (AB) refers to impaired processing of a second target (T2) when presented 200–500 msec after a first target (T1) in a rapid serial visual presentation stream. There is converging evidence that alpha oscillations (8–12 Hz) may be critical for AB performance, as they can regulate...

BIORXIV NEUROSCIENCE

Summary: We have studied the emergence of slow relaxation oscillations in next generation neural mass models with spike frequency adaptation. Relaxation oscillations connect low firing state (Down state) to high firing state (Up state) via the slow adaptation. In the examined cases, the orbit relaxes towards...

Beyond Temporary Scaffolding: Persistent Hippocampal Engagement and Brain-Wide Network Reorganization in Remote Memory Consolidation

Wang, R., Keerativittayayut, R., Morioka, S., Takeda, M., Jimura, K., Hasegawa, I., Nakahara, K.

2026-07-28 1 min 147 words

BIORXIV NEUROSCIENCE

Summary: The standard model of memory consolidation posits a temporary role for the hippocampus. We challenge this view by combining a novel face-name associative memory task with cross-modal decoding of fMRI data. We demonstrate that the hippocampus remains persistently engaged in representing both recent a...

Goal-directed action selection relies on conjunctive representations that bind goals, actions and expected sensory outcomes

Lageman, J., Kikumoto, A., Badre, D., Fahrenfort, J. J., Slagter, H. A.

2026-07-28

1
min

155
words

BIORXIV NEUROSCIENCE

Summary: Goal directed actions are performed to obtain specific sensory outcomes. However, theories of action control diverge on whether anticipated outcomes are only consequences of motor command specification or serve as instrumental determinants of action selection. Here, we directly tested whether predic...

Exploring the beta burst dynamics of cued voluntary movements in Tourette Syndrome

Houlgreave, M., Gialopsou, A., Boto, E., Brookes, M. J., Jackson, S. R.

2026-07-28

1
min

184
words

BIORXIV NEUROSCIENCE

Summary: Tourette Syndrome (TS) is a neurodevelopmental hyperkinetic disorder characterised by involuntary tics. These tics are thought to arise due to hyperexcitability of the motor cortex due to disinhibition within the cortico-striato-thalamo-cortical pathway. Given the involvement of motor circuits in th...

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>In humans and nonhuman primates, the anterior cingulate cortex (ACC) is an interface between "interoceptive" and "exteroceptive" domains. The ACC contains discrete subdivisions that are distinct in cytoarchitecture, connectivity, and function. The subgenual ACC (sgACC) is a key area for arousal s...

TRPML1 loss drives lysosomal calcium failure and astrocyte dysfunction across Alzheimer's Disease progression

Shah, D., Desai, P., Chertavian, C., Thackray, M., Demoulin, M., Mitchener, V., Strom, M., De Strooper, B., Arancibia Carcamo, L.

2026-07-27

1
min234
words

BIORXIV NEUROSCIENCE

Summary: Astrocytes are among the earliest cells to exhibit dysfunction in Alzheimer's disease (AD), developing profound calcium signalling deficits before amyloid plaques have formed, yet the underlying mechanisms remain unknown. Lysosomal dysfunction is a hallmark of AD, but whether it initiates this early...

Transcranial Focused Ultrasound: A Transformative Tool for Intracranial Ablation, Drug Delivery, and Neuromodulation

2025-11-11

1
min136
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Transcranial focused ultrasound (tFUS) is an emerging neuromodulation and therapeutic technology offering noninvasive, submillimeter precision for targeting deep brain structures. Unlike transcranial magnetic stimulation (TMS) and transcranial electric stimulation (tES), which are limited by depth-f...

Defensive antinociception and antipredatory responses in prey threatened by distinct odoriferous cues from *Felis silvestris catus*.

2026-06-15

1
min191
words

BEHAVIORAL NEUROSCIENCE

Summary: Fear, an adaptive response to danger situation, is vital for the survival of both human beings and rodents. Predator odor-related cues and contextual fear work as valuable models for studying neurobiological circuits, providing insights into unconditioned and conditioned fear-related behavioral and ...

Biological sex and normative cognitive aging across spatial learning, flexibility, and working memory in Fischer 344 rats.

2026-06-15

1
min257
words

BEHAVIORAL NEUROSCIENCE

Summary: Aging is associated with decline in spatial learning, cognitive flexibility, and working memory, yet the extent to which biological sex modulates changes in cognitive function remains unresolved. While sex differences are evident in pathological brain aging, sparse insights from healthy aging popula...

Oxytocin prevents cocaine-induced high-affect 50-kHz vocalizations in female rats.

2026-05-04

1
min255
words

BEHAVIORAL NEUROSCIENCE

Summary: Cocaine's reinforcing properties are a key factor underlying the broad prevalence of cocaine use disorder. Few behavioral measures are capable of assessing cocaine-induced euphoria in murine models, limiting effective treatment options. However, positive affective states can be measured in rats by a...

Implicit learning of melodic structure: A role for pitch?

2024-01-22

1
min

180
words

PSYCHOMUSICOLOGY

Summary: Growing evidence suggests that pitch influences musical processing, with melodic processing being enhanced in higher pitch ranges (e.g., Fujioka et al., 2005) and rhythmic processing being enhanced in lower pitches, and these effects may have a basis in elementary properties of the auditory system (...)

444 words

ERP BOOT CAMP

Summary:

We are disappointed to announce that we will not be holding a regular 10-day ERP Boot Camp this summer.

We have held Boot Camps nearly every summer since 2007, supported by a series of generous grants from NIMH that allowed us to provide scholarships for all attendees. Unf...

BIORXIV NEUROSCIENCE

Summary: The human brain undergoes rapid developmental changes through early life, underpinning the emergence of function but also marking a period of vulnerability to a range of neurodevelopmental disorders. With dynamic changes to brain size, morphology, and imaging contrast, consistent and accurate comput...

Multi-area single-cell calcium imaging dataset of the mouse cortex across wakefulness, sleep, and anesthesia

Oomoto, I., Kiyooka, D., Oizumi, M., Murayama, M. 2026-07-24 1 min 140 words

BIORXIV NEUROSCIENCE

Summary: We present a reusable dataset of neuronal population activity from multiple cortical areas, recorded from layers 2/3 of the mouse cortex at single-cell resolution during wakefulness, natural sleep (including NREM and REM sleep), and isoflurane anesthesia. Using wide-field two-photon microscopy, we r...

REVIEWS BIOMEDICAL ENGINEERING

Summary: Backed by a century of research and development, Hill-type models of skeletal muscle, often including a muscle-tendon complex and neuromechanical interface, are widely used for countless applications. Lacking recent comprehensive reviews, the field of Hill-type modeling is, however, dense and hard-t...

Network topology determines neuronal phase-of-firing codes

Pratyush, M. R., Assisi, C.

2026-07-24

1 min

306 words

BIORXIV NEUROSCIENCE

Summary: Brain rhythms organize neural activity in time. When a shared oscillation is broadcast across a population of neurons, the phase at which the neurons fire with respect to the oscillation can itself carry information, a strategy the brain appears to use for navigation, memory, and sensory perception....
