Spatiotemporal proteomics elucidates trafficking and localization of Neuroligins to the axon initial segment plasma membrane

Kersten, N., Li, C. H., al Naqib, V., de Haas, L., Vataka, V., van der Meer, E., Uljee, P. J., Levenswaard, G., Altelaar, M., Freal, A., Kole, M. H. P., Farias, G. G.

2026-06-19 1 min 148 words

BIORXIV NEUROSCIENCE

Summary: Neuronal development and function rely on precise sorting of membrane proteins to distinct neuronal domains, yet the underlying mechanisms remain incompletely understood. Here, we investigated the trafficking of two highly homologous NLGNs (NLGN1 and 2) which distinctly localize and function at exci...

Cell-specific transcription dysregulation in human Huntington's disease-positive developing striatum

Precious, S. V., Bartley, O. J., Linehan, P., Aston, A. N., Hills, R., McCorrigan, A.-M., Dion, V., Rosser, A. E.

2026-06-19 1 min 190 words

BIORXIV NEUROSCIENCE

Summary: Huntington's disease (HD) is an autosomal dominant neurodegenerative disorder caused by a CAG-repeat expansion in the HTT gene. Progressive loss of striatal projection neurons leads to cognitive, psychiatric, and motor impairments that typically manifest in midlife, despite the presence of the expan...

A computational framework with voltage-dependent synaptic function explains LTP-dominant plasticity during functional electrical stimulation therapy

Howard, M. C., Masani, K., Lankarany, M.

2026-06-19

1
min

249
words

BIORXIV NEUROSCIENCE

Summary: Functional Electrical Stimulation (FES) therapy is a widely used neurorehabilitation technique that restores motor function by delivering electrical stimulation to target muscles during voluntary contraction. Despite its clinical effectiveness, the mechanisms by which FES therapy induces neuroplasti...

Identification of srh-30 as a 2-nonanone receptor in *C. elegans*

Jin, Y., Groaz, A., Park, H., Sternberg, P.
W.

2026-06-19

1
min

191
words

BIORXIV NEUROSCIENCE

Summary: *C. elegans* detects food, mates, and danger through a large repertoire of chemosensory receptors. The volatile odorant 2 nonanone is a well-established aversive stimulus that reliably elicits avoidance chemotaxis. However, the receptor(s) responsible for its detection have not been identified. Here, ...

Terminal Schwann Cells Regulate Presynaptic Vesicle Homeostasis but Not Neuromuscular Junction Integrity in Mice

Kim, H., Kim, S.-Y., Yoo, K., Choi, S.-Y., Kong, Y.-Y.

2026-06-19

1
min

184
words

BIORXIV NEUROSCIENCE

Summary: Terminal Schwann cells (tSCs) are specialized glial cells persistently residing at the neuromuscular junction (NMJ), where they are widely postulated to participate in synaptic transmission and maintenance. However, elucidating their precise in vivo roles has been hindered by a lack of tSC-specific ...

BEHAVIORAL NEUROSCIENCE

Summary: Hospitalizations and deaths related to mental health disorders have increased in recent decades, highlighting the need for improved understanding of the neurocircuitry underlying cognitive dysfunction. Dysfunction in neural coordination between the hippocampus (HPC) and prefrontal cortex (PFC) is wi...

Taste exposure during different developmental phases impacts aversion learning in adult rats.

2026-05-21

1
min253
words

BEHAVIORAL NEUROSCIENCE

Summary: Associating a taste with a positive or negative consequence is a robust form of learning that benefits survival by shaping future taste decisions. A robust example is conditioned taste aversion (CTA), wherein tastes associated with malaise are later avoided (Garcia et al., 1955; Lubow, 2009; Reilly ...

Editorial Alignment: A Participatory Approach to Engaging Editorial Expertise in LLM-mediated Knowledge Dissemination

Simon Aagaard Enni, Malthe Stavning Erslev, Karl-Emil Kj{ae}r Bilstrup, Kristoffer Laigaard Nielbo

2026-06-19 1 min 155 words

ARXIV CS HC

Summary: arXiv:2606.20258v1 Announce Type: new Abstract: The emergence of LLM-driven information services is reshaping the conditions under which public knowledge institutions operate, threatening to absorb the editorial function these institutions exist to exercise. While LLMs offer powerful new affordance...

Negative Emotional Context Reverses Charitable Framing Effect: Behavioral and Neural Evidence

2026-06-01

1
min

200
words

COGNITIVE NEUROSCIENCE

Summary: Extensive research shows that charitable framing (gain vs. loss) shapes donation intentions. However, questions persist concerning how emotional context interacts with framing effects to impact both donation intentions and subsequent evaluations of outcomes. The present study combined electroencepha...

The Roles of Alpha Oscillations in Attentional Blink

2026-06-01

1
min198
words

COGNITIVE NEUROSCIENCE

Summary: The attentional blink (AB) refers to impaired processing of a second target (T2) when presented 200–500 msec after a first target (T1) in a rapid serial visual presentation stream. There is converging evidence that alpha oscillations (8–12 Hz) may be critical for AB performance, as they can regulate...

TNF- α Deficiency Reduces Parvalbumin Neuron Density, Impairs Homeostatic Plasticity, Disrupts Synaptic Excitation-Inhibition Balance, and Prevents Critical Period Closure in the Auditory Cortex

Schwartz, B. A., Wang, W., Jia, G., Bao,
S.

2026-06-17

1
min

228
words

JOURNAL NEUROSCIENCE CURRENT

Summary: Tumor necrosis factor- α (TNF- α), a pleiotropic cytokine, modulates neuronal functions under both physiological and pathological conditions. In the auditory system, it is required for refinement of the cortical frequency map during early development. In adulthood, TNF- α upregulation...

Regulation of Schwann Cell-Axon Interactions in Nerve Development: The Role of Slit2 in Axonal Sorting

Porrello, E., Hoerner, M., Gioia, A., Del Carro, U., Farina, C., Srinivasan, S., Bolino, A., Pini, V., Sicardi, S., Podini, P., Quattrini, A., Geng, J.-G., Previtali, S. C.

2026-06-17 1 min 246 words

JOURNAL NEUROSCIENCE CURRENT

Summary: Radial sorting of axons is a critical process in nerve development, ensuring proper segregation of axons to form myelinated and unmyelinated Schwann cell–axon units. This process is regulated by signals mediating communication between Schwann cells and the extracellular matrix, with laminin...

Just one moment: Unifying theories of consciousness based on a phenomenological “now” and temporal hierarchy.

2024-04-04

1
min

216
words

CLINICAL NEUROSCIENCE

Summary: A prevailing pessimism in the scientific study of consciousness is about it having too many theories. With theories of consciousness becoming increasingly isolated from each other, recently, several proposals have been put forth to cull the number of theories in contention. Here, building on a sugge...

Sleep enhances spatial schema memory formation in humans

Bastian, L., Hamann, H., Naeher, T., Rauss, K., Born, J.

2026-06-17

1
min

148
words

BIORXIV NEUROSCIENCE

Summary: Schema memory, a generalized representation formed across episodes sharing regularities, is thought to arise through sleep-dependent systems consolidation. Yet, direct evidence in humans remains sparse. Here, sixty young adults navigated a virtual-reality arena and learned a spatial distribution of ...

The genetic architecture of dementia risk: how Alzheimer's disease vulnerability converges on lipid metabolism and immune cell networks

Husen, E., Cai, Z., Gerrits, E., Sjöstedt, E., Mitsios, N., Zheng, T., Skarwan, E., Uhlen, M., Sivertsson, A., Mulder, J.

2026-06-16 1 min 137 words

BIORXIV NEUROSCIENCE

Summary: Although genome-wide association studies (GWAS) have identified numerous dementia risk loci, their cell-type and tissue-specific contexts remain largely unresolved. We introduced HPA GeneSet Explorer, a statistical pipeline designed to systemically map Genome wide association study (GWAS) disease ri...

Subregion-Specific Input Organization of Prefrontal-Projecting Basal Forebrain Cholinergic Neurons and Weakened Striatum-to-NBM Inhibitory Transmission in 5xFAD mice

Huang, Y., Xie, X., Fernaine, M., Li, Z., Wang, X., Wang, J.

2026-06-16

1
min

159
words

BIORXIV NEUROSCIENCE

Summary: Basal forebrain cholinergic neurons regulate cortical activity and cognition and are vulnerable in Alzheimer's disease (AD). However, the upstream circuits controlling projection-defined basal forebrain cholinergic populations remain incompletely understood. Here, we used projection-specific rabies-...

Odor preference maps to cohesive transcriptional domains in the olfactory bulb

Mayseless, O., Navajas Acedo, J., Wan, Y., Hahaut, V., Picelli, S., Friedrich, R. W., Schier, A. F.

2026-06-16 1 min 154 words

BIORXIV NEUROSCIENCE

Summary: Animals classify odors along behaviorally relevant dimensions, yet how the olfactory bulb, the first stage of olfactory processing, is organized and how this organization relates to odor classification remains unclear. Here, we identify cohesive transcriptional domains within the larval zebrafish ol...

A glial source of noradrenaline shapes synaptic integration and motor adaptation

Mach, S., Royer, J., Niu, W., Li, X., Galante, M., Dallerac, G.

2026-06-16 1 min 125 words

BIORXIV NEUROSCIENCE

Summary: Noradrenaline is a major neuromodulator that shapes neural circuit dynamics and behavior. Prevailing models attribute noradrenergic supply exclusively to long-range inputs from distant nuclei. Yet noradrenergic input can be weak in regions that nonetheless show marked noradrenergic modulation, sugge...

Evaluating the Physics and Repeatability of Human Brushers in Delivering Affective Touch

2025-12-22

1
min198
words

TRANSACTIONS HAPTICS

Summary: Research in affective touch often utilizes a pleasant stroking paradigm, with touch typically delivered at velocities between 0.3–30 cm/s and forces about 0.4 N. These values are derived from perceptual and physiological responses of touch receivers rather than natural behaviors of touchers. Herein,...

Effect of Virtual Mass and Time Delay on the Stability of Haptic Rendering

2025-12-12

1
min257
words

TRANSACTIONS HAPTICS

Summary: Virtual mass simulation is one of the recent topics in the field of haptic devices (HDs), which can alter the apparent mass of the HD. Simulating negative values of virtual mass leads to a decrease in the apparent effective mass, improving transparency but weakening stability. Positive virtual mass ...

The frequency dependence of EEG-speech envelope tracking does not reflect the rates of speech units or pitch

Thornton, M. D., Reichenbach, T.

2026-06-16

1 min

235 words

BIORXIV NEUROSCIENCE

Summary: During speech listening, neural activity partly synchronises to fluctuations in the acoustic amplitude envelope of the stimulus. This neural tracking of the speech envelope has frequently been linked to the processing of acoustic features such as syllabic rhythmicity and pitch periodicity. However, ...

Scaling up polarization-sensitive optical coherence tomography to image the whole macaque brain

Yeatts, M., Chinthalapati, N., Baradaran, B., Heinks, H., Liao, E., Huxford, R., Karlaftis, V., Grafft, T., Casta, T. K., Hellevik, A., Pisharady, P. K., Howard, A. F., Zimmermann, J., Pengo, T., Baker, J. L., Purpura, K. P., Johnson, M., Reid, R. C., Pestilli, F., Jbabdi, S., Heilbronner, S. R., Akkin, T.

2026-06-15

1
min196
words

BIORXIV NEUROSCIENCE

Summary: Polarization-sensitive optical coherence tomography (PS-OCT) is a label-free imaging technique that exploits birefringence to visualize myelinated axons at micrometer resolution. However, serial PS-OCT imaging has been limited to small volumes, including tissue blocks from larger species, owing to c...

Scout-based Multi-Echo NAvigator (SMENA) for high temporal resolution motion and B0 estimation and correction: applications to multi-echo GRE and EPTI

Wang, N., Lin, Y., Brackenier, Y., Nurdinova, A., Zhou, Z., Abraham, D., Cao, X., Liao, C., Setsompop, K.

2026-06-15 1 min 242 words

BIORXIV NEUROSCIENCE

Summary: Purpose: To develop a data-driven technique, Scout-based Multi-Echo NAvigator (SMENA), for joint estimation of motion and B0 inhomogeneity (ΔB_0) at a temporal resolution of ~ 200 ms with minimal additional scan time for gradient-echo acquisition. Methods: SMENA consists of two key acquisition c...

How to Catch a Blank Mind? Brain Similarities and Differences between Self- and Probe-Caught Mind Blanking

Aragon-Daud, A., Boulakis, P. A., Mortaheb, S., Vandewalle, G., Collette, F., Patil, K. R., Demertzi, A., Raimondo, F.

2026-06-15 1 min 297 words

BIORXIV NEUROSCIENCE

Summary: Mind Blanking (MB) is a mental state characterized by the experience of a seemingly empty mind. This apparent emptiness challenges the theoretical view of a continuous and content-full stream of thought, leading to the question of how it is possible to capture MB events in the first place. MB resear...

Prenatal Alcohol Exposure Disrupts γ -Secretase Activity and Impairs Learning and Memory in Wild-Type and 3xTg-AD Mice

Montenegro, P. C., Kim, R., Zedek, M., Chicas, M., Yeh, P. W. L., Yeh, H. H.

2026-06-15 1 min

149 words

BIORXIV NEUROSCIENCE

Summary: Although prenatal alcohol exposure (PAE) has been proposed as an early-life risk factor for Alzheimers disease and related dementias (AD/ADRD), the mechanistic underpinnings are underexplored. Mutations in the Presenilin genes contribute to AD/ADRD, with Presenilin 1 acting as the catalytic subunit ...

Climbing-fiber-like online readout adaptation in frozen continuous-time networks reproduces force-field adaptation and after-effects

Kobayashi,
J.

2026-06-15

1
min

228
words

BIORXIV NEUROSCIENCE

Summary: Robotic motor control built on liquid neural networks and related continuous-time models, such as LTC and CfC, is typically trained offline via backpropagation through time and lacks an explicit mechanism for recalibrating online as plant dynamics change. We ask whether a frozen CfC core, whose liqu...

Prediction of fMRI activity using vector autoregressive models: a comparison of sparse and low-rank approaches

Tian, X., Gibberd, A., Roy, S., Nunes, M.

2026-06-15

1
min

167
words

BIORXIV NEUROSCIENCE

Summary: Vector autoregressive (VAR) models have a history of being used to examine functional connectivity in the brain, as captured by functional MRI studies. Such models allow for an estimation of Granger-causal relationships between regions of interest across the brain. Unfortunately, since the number of...

ARXIV QBIO NC

Summary: arXiv:2602.13421v2 Announce Type: replace-cross Abstract: Computation in biological systems is fundamentally energy-constrained, yet standard theories of computation treat energy as freely available. Here, we argue that variational free energy minimization under a Poisson assumption offers a princi...

2026-06-15

1
min

177
words

ARXIV QBIO NC

Summary: arXiv:2606.13801v1 Announce Type: cross Abstract: Neural responses in cortex exhibit substantial trial-to-trial variability in response to repeated stimuli, while peripheral sensory neurons respond far more consistently, leading many to wonder whether stochasticity may carry meaning. Existing work ...

BIORXIV NEUROSCIENCE

Summary: The circadian clock orchestrates tissue homeostasis and repair, yet its role in central nervous system (CNS) regeneration remains largely unexplored. Here, we identify the circadian clock as an essential regulator of adult zebrafish retinal regeneration, a CNS model. Retinal injuries induced at dist...
