Plasma membrane PI4P recruits SNAP47 to mediate SNARE-dependent AMPAR exocytosis during synaptic potentiation

Liu, J.-J., Xi, J., Wang, S., Pan, D., Yang, Y., Mao, R., Lam, S. M., He, W., Shui, G., Niu, Y., Chen, L., Ma, C.

2026-08-13 1 min 142 words

BIORXIV NEUROSCIENCE

Summary: The synaptic delivery of the AMPA-type glutamate receptors (AMPA-Rs) is crucial for long-term potentiation (LTP) of excitatory synapses, yet the mechanisms underlying neuronal activity-dependent AMPAR exocytosis at the plasma membrane (PM) remain unclear. We previously demonstrated that the PM synthe...

min222
words

BIORXIV NEUROSCIENCE

Summary: Post-traumatic stress disorder (PTSD) is a highly prevalent, debilitating psychiatric condition. Existing treatments are ineffective for many patients. 3,4-methylenedioxymethamphetamine (MDMA)-assisted psychotherapy has demonstrated substantial clinical efficacy but relies on prolonged, resource-int...

Combination spinal cord stimulation at different frequencies produces sustained pain relief with immune activation

Huh, Y., Song, S., Chen, T., Zhang, T., Hershey, B., Esteller, R., Ji, R.-R.

2026-08-12

1
min

159
words

BIORXIV NEUROSCIENCE

Summary: Spinal cord stimulation (SCS) is an established therapy for neuropathic pain, typically delivered at either low (60 Hz) or high (1 kHz) frequencies, with analgesic effects largely dependent on active stimulation. Here, we investigated whether combined-frequency SCS produces sustained analgesia beyon...

Activity-dependent homeostatic synaptic plasticity widens the temperature range of synaptic transmission

Filogonio, R., Cannon, D. J., Bueschke, N., Santin, J. M.

2026-08-12

1
min175
words

BIORXIV NEUROSCIENCE

Summary: The framework of homeostatic plasticity posits that neurons regulate cellular properties through feedback homeostasis to maintain activity during changes in the environment. However, when disturbances occur in wild animals they are often caused by environmental variables that induce their own acclim...

A framework for quality assurance in human intracranial electrophysiology

Herz, N., Cao, R., Qiu, S.

2026-08-12

1
min

230
words

BIORXIV NEUROSCIENCE

Summary: Intracranial electroencephalography (iEEG) provides an unprecedented opportunity to directly record neural activity and causally perturb the human brain through electrical stimulation. Yet, the increasingly collaborative nature and complexity of modern iEEG studies pose substantial challenges for ex...

Temporal regulation of a spatial patterning factor in *Drosophila* neurogenesis

Coyne, R., Kamulegeya, F., Lake, C., Rajesh, R., Treese, M., Chen, Y.-C., Troutwine, B., Zeitlinger, J., Ozel, M. N.

2026-08-12
min

258
words

BIORXIV NEUROSCIENCE

Summary: A central question in neurobiology is how the transient programs that pattern neural progenitors are translated into the enormous, stable diversity of neuronal types. Spatial and temporal cues act only briefly, yet each neuron's identity is defined and maintained for life by terminal selector transc...

Selective GRAB sensors reveal distinct endocannabinoid dynamics in vivo

Cai, R., Yang, Y., Cai, S., Silva de Sousa, A. I., Todd, K., Wang, L., Teo, W., Dong, A., Chen, S., Dong, H., Wang, H., Wu, Z., Qiao, Y., Xu, P., Song, C., Cragg, S. J., Li, Y.

2026-08-12 1 min 156 words

BIORXIV NEUROSCIENCE

Summary: The endocannabinoid system modulates diverse physiological processes via two endogenous lipid ligands, 2-arachidonoylglycerol (2-AG) and anandamide (AEA); however, their specific spatiotemporal dynamics remain poorly understood owing to the lack of selective probes. Here, we developed GRAB2-AG2.0 an...

What makes an angry face uncomfortable? Distinct contributions of facial expression, interpersonal distance, facial stimulus type, and gaze in virtual reality

Dahech, H., Minami, T., Nakauchi, S., Tamura, H.

2026-08-12

1
min

234
words

BIORXIV NEUROSCIENCE

Summary: Why does an angry face feel uncomfortable? The answer is that it signals a threat. However, a face is only part of an encounter, and distance, facial stimulus type, and gaze may shape discomfort regardless of perceived anger. To separate these cues, we conducted three within-subjects virtual reality...

words

BIORXIV NEUROSCIENCE

Summary: Mu opioids, such as morphine, are effective analgesics, but their reward and tolerance drive opioid use disorder. A major goal is to achieve analgesia without these harmful effects. Here we show that morphine reward and tolerance require the RNA demethylase FTO. Genetic depletion and pharmacologic i...

Sensory Feedback for Upper-Limb Amputees by Noninvasive Electrical Stimulation and Its Performance Assessment

2026-03-20

1
min253
words

TRANSACTIONS HAPTICS

Summary: Most commercial prostheses lack a function of natural and intuitive sensory feedback, which is one of the reasons for their high rate of abandonment. Transcutaneous Electrical Nerve Stimulation (TENS) has been proved as an effective approach to evoke sensations for limb amputees. This paper aims to ...

A Direction-Dependent Mechanotransduction Model to Convert Fingertip Forces Into Neural Spike Trains for Tactile Feedback

2026-03-20

1
min235
words

TRANSACTIONS HAPTICS

Summary: Microneurography studies have shown that human mechanoreceptor (MR) activity is directionally sensitive to shear forces, enabling fine tactile perception and object manipulation. However, existing computational mechanotransduction models largely neglect this directional tuning, limiting their biolog...

BIORXIV NEUROSCIENCE

Summary: Purpose: Pupil diameter in daily life depends on both the light reaching the eye and the observer's age, but established prediction formulas require laboratory quantities that are rarely measured in natural environments. We developed a compact age-corrected model that predicts pupil diameter from me...

ARXIV QBIO NC

Summary: arXiv:2608.08206v1 Announce Type: new Abstract: In computational psychiatry, task-irrelevant factors such as a task's perceptual and motor features are typically assumed not to bias decision behavior, but at most to add noise. Yet growing evidence links sensorimotor processing to decision-making th...

A Context-Conditional Audit of Trial-Pairing-Dependent Neural Gain in Motor-Cortex Decoding

Du, Z., Lai, Z. Y., Hu, L., Ye, T.

2026-08-10

1
min

262
words

BIORXIV NEUROSCIENCE

Summary: Objective. Neural-only decoding performance does not identify how much prediction neural history adds beyond task structure or recent output. We tested how this increment changes when context and temporal information boundaries are made explicit. Approach. We defined context-conditional neural gain ...

words

BIORXIV NEUROSCIENCE

Summary: Idiosyncratic brain functional organization shapes intricate cardiac dynamics through central-peripheral autonomic interactions, yet a comprehensive mapping between multi-scale heart rate dynamics and whole-brain functional architecture remains lacking. Here, combining highly comparative time-series...

Continuous and discrete brain dynamics to study behavioral adaptation during cognitive motor dual-tasking in younger and older adults

Deng, Y., Kristanto,
D.

2026-08-10

1
min

355
words

BIORXIV NEUROSCIENCE

Summary: Dual-task paradigms are widely used to detect age-related cognitive and motor decline. Conventional evaluations typically average performance across an entire dual-task condition and compare it with a single-task baseline, implicitly treating performance as stable throughout testing. We challenged t...

Regional and tissue-specific metabolic differences in human neural retina and RPE/choroid

Zhang, T., Xiang, Y., Gillies, M. C., Zhu, L., Du, J.

2026-08-10

1
min

203
words

BIORXIV NEUROSCIENCE

Summary: It is clear that the human retina and its underlying retinal pigment epithelium and choroid (RPE/choroid) form an interdependent metabolic ecosystem, but how metabolism differs between the cone-rich macula and rod-rich periphery remains unclear. Using targeted metabolomics, we quantified 133 metabol...

Summary: Aversion can arise from a combination of unconditioned stimuli that induce physical discomfort, such as pain and nausea. Chemotherapy-induced side effects, including taste and olfactory aversion, can persist even after treatment has ended, thereby reducing the quality of life. Currently, however, no...

min

258
words

BEHAVIORAL NEUROSCIENCE

Summary: Fear and anxiety are related but distinct responses to imminent versus uncertain threat. Suppression of eating under novelty is an evolutionarily conserved, cross-species model of anxiety, and it is beneficial to determine if this behavior can predict individual differences in fear learning and memo...

Hippocampal communication with the anterior olfactory nucleus is necessary for context-dependent odor memory.

2026-06-15

1
min

166
words

BEHAVIORAL NEUROSCIENCE

Summary: The hippocampus plays a critical role in contextual learning and memory processes. The ability to associate memories and behaviors with the learning context likely involves interactions between the hippocampus and other brain regions where the basic elements of the memory may be encoded. Here, we ex...
