MERIT: A No-Code Platform for Unifying High-Precision Cognitive Assessment Across Laboratory and Real-World Settings

 Colcombe, S. J., Milham, M., Brookover, J., Ay, C. T., Xiao, M., Palmatier, C., Salum, G., Klein, A.

 2026-09-18  1 min  301 words

BIORXIV NEUROSCIENCE

Summary: Cognitive tasks are moving from the laboratory onto participants' own devices. Browser runtimes make that move easy. Their stimulus timing, however, can vary by tens of milliseconds across devices. We asked how much timing error cognitive and neural measures can tolerate. We injected per-trial stimu...

Emotional Modulation of Face Working Memory Precision in Specific Learning Disorders: Valence Flattening and Mnemonic Distortions

 Makhsous, M., Honar, M., Akbari, S., Rezayat, E.

 2026-09-18  1 min

 196 words

BIORXIV NEUROSCIENCE

Summary: This study examined whether emotional valence modulates face working memory precision in adolescents with specific learning disorders (SLD) and whether mnemonic distortions differ across subtypes. Fifty-four adolescents with SLD (dyslexia: n = 19; dysgraphia: n = 18; dyscalculia: n = 17) and 42 typi...

Sleep spindles stabilize human thalamocortical networks, inhibiting pathological disruptions

Jaber, K., Ho, A., Ye, H., Bosque-Varela, P., Aiello, G., Avigdor, T., Shenoy, K., Ramani, P., Wadi, L.,
 Thomas, J., Klimes, P., Richardson, R. M., Southwell, D. G., Hadar, P. N., Cash, S. S., Salami, P.,
 Carlson, D., Zermann, R., Frauscher, B.

 2026-09-19  1 min  150 words

BIORXIV NEUROSCIENCE

Summary: The thalamus coordinates sleep-dependent brain function including memory consolidation, sensory gating, and network stability through spindle oscillations. Thalamocortical circuits are also affected in many neurological and neuropsychiatric disorders. Yet how human thalamocortical circuits respond t...

Learning Environmental Dynamics: Building Internal Models of a Simulated External Force

 Boulrice, J. J., 't Hart, B. M., Henriques, D. Y.
 P.

 2026-09-18  1 min  148 words

BIORXIV NEUROSCIENCE

Summary: Motor adaptation is typically studied using limb-based perturbations in highly constrained tasks. However, everyday actions require compensating for uncertain environmental dynamics impacting manipulated objects within redundant execution spaces, where multiple combinations of variables can achieve ...

Spatiotemporal dynamics of lexical and morphosyntactic planning during language production revealed by magnetoencephalography

 Wei, Y., Slevc, L. R., Brodbeck, C., Faroqi-Shah, Y.

 2026-09-19  1 min

 315 words

BIORXIV NEUROSCIENCE

Summary: Fluent sentence production relies on the precise and timely coordination of lexical retrieval, morphosyntactic planning, and motor execution. While a left-dominant fronto-parieto-temporal network has been identified for these subcomponents of sentence production, less is known about the time course ...

A comparative framework for neocortical sulcal anatomy in pinnipeds

 Boch, M., Avelino-de-Souza, K., Binder, S., Patzke, N., Benn, R. A., Mynssen, H., Tha, K. K., Taverna Chaim, K., Wicinski, B., Tang, C. Y., Manger, P. R., Rouse, A. A., Hof, P. R., Cook, P. F., Mars, R. B.

 2026-09-19  1 min  157 words

BIORXIV NEUROSCIENCE

Summary: The transition of pinnipeds from terrestrial ancestors into marine environments provides a unique opportunity to examine how cortical organisation has changed with adaptation to life in water. Here, we examined neocortical sulcal anatomy in nine species representing all three extant pinniped familie...

Parvalbumin interneurons and dentate gyrus homeostatic dysregulation shape epileptogenesis in Angelman syndrome model mice

 Ringelberg, N. W., Kipp, D. W., Mayfield, R. E., James, L. M., Smith, A. L., Manis, P. B., Burette, A. C., Kasten, M. R., Philpot, B. D.

 2026-09-19  1 min  142 words

BIORXIV NEUROSCIENCE

Summary: Understanding how neural circuits transition from seizure-resistant to seizure-prone is essential for developing improved epilepsy therapies. Here, we study this process by leveraging the heightened susceptibility to seizure kindling of Angelman syndrome (AS) model mice, which lack the maternal Ube3...

BIORXIV NEUROSCIENCE

Summary: Inhibitory neurotransmission, essential for neural circuit homeostasis and proper neurological function, depends on the efficient sequestration of {gamma}-aminobutyric acid (GABA) and glycine into synaptic vesicles. This critical process is mediated exclusively by the vesicular inhibitory amino acid...

The conscious experience of thinking aloud: Are positive feelings associated with better think-aloud performance?

 2024-12-30  1 min  216 words

CLINICAL NEUROSCIENCE

Summary: The think-aloud interview is a psychological procedure used to measure an individual's cognition in solving a task. However, very little is known about how an individual's conscious experience of the interview might be associated with their performance during the interview. This is consequential as ...

Differentiable Forward and Back-Projector for Rigid Motion Estimation in X-Ray Imaging

 2025-12-12  1 min  213 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: In this work, we propose a framework for differentiable forward and back-projector that enables scalable, accurate, and memory-efficient gradient computation for rigid motion estimation tasks. Methods: Unlike existing approaches that rely on auto-differentiation or that are restricted to ...

A Sparse Constrained Optimization Method for Resolving Coincident Single-Cell Events in Microfluidic-Based Impedance Sensing

 2025-12-12  1 min  219 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: Label-free electrical impedance-based single-cell detection has been widely applied in cell sorting, electrical phenotyping, and monitoring of cell growth status. However, when high-concentration cell suspensions pass through the sensing region simultaneously, coincident events frequently...

Interleaved Imaging and Actuation for Real-Time MRI During Active Control of a Magnetically-Actuated Robotic Catheter

 2025-12-10  1 min  232 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: Magnetic Resonance Imaging (MRI)-guided robotic catheter interventions offer improved safety, visualization and control. Catheter actuation with current-carrying microcoils offers fast and responsive actuation without friction and backlash. However, actuation of this type of catheter lead...

A Deep Learning Model for Heart Sound Classification Fusing Time-Frequency Features

 2025-12-10  1 min  237 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: Cardiovascular diseases (CVDs) are a leading global health threat. The automatic classification of phonocardiogram (PCG) signals is crucial for their early diagnosis, yet existing models are often limited by analyzing features from only a single domain (time or frequency), failing to fuse...

BIORXIV NEUROSCIENCE

Summary: Cortical glutamatergic neurons are generated through temporally ordered developmental programs that link neuronal birthdate to laminar position and identity. Yet, because differentiation continues after cell-cycle exit, it remains unclear how far post-mitotic identity can be reshaped by the environm...

Intention-driven ankle exoskeleton training acutely alters swing foot clearance distribution: a preliminary study

 Hiroaki
Kawamoto

 2026-08-05  1 min  216 words

FRONTIERS NEUROBOTICS

Summary: Introduction Tripping is a leading cause of falls, and Minimum Foot Clearance (MFC)—the lowest vertical swing-foot displacement during mid-swing—is a key gait event associated with tripping risk. Preventing tripping requires not only sufficiently high MFC but also consistent control across steps, whi...

Mitochondrial Calcium: A Potential Sensor for Homeostatic Synaptic Plasticity

Pekala, D., Safar, M., Lampert, M., Doung, D., Zlatic, S., Faundez, V., Wenner, P.

2026-09-16

1
min

250
words

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Neural function is maintained through homeostatic mechanisms that are engaged following perturbations to the nervous system. Homeostatic plasticity is thought to be critical for establishing and stabilizing appropriate levels of network function. Neurons are proposed to detect deviations in activ...

Cholecystokinin Released Somatodendritically from Dopamine Neurons Broadly Alters Synaptic Strength across the Ventral Tegmental Area

Sianati, S., Ma, Y., Kauer, J. A.

2026-09-16

1
min

228
words

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Neuropeptides are found in nearly every brain neuron and can modulate behaviors by regulating neuronal excitability, synaptic transmission, and plasticity. In contrast to the canonical view of neuropeptide release from nerve terminals, we previously reported the somatodendritic release of cholecy...

Characterization of the Grin1Q536R/+ mouse: a preclinical model for GRIN1-related neurodevelopmental disorder

Sullivan, M. T., Yan, Y., Vania, L., Tidball, P., Pauli, Q., Lipina, T. V., Venkatesan, S., Finnie, P. B.,
 Fujiwara, E., Horsfall, W., Georgiou, J., McCullumsmith, R. E., Lambe, E. K., Bonin, R. E., Salahpour, A., Collingridge, G. L., Ramsey, A. J.

 2026-09-15  1 min  250 words

BIORXIV NEUROSCIENCE

Summary: N-methyl-D-aspartate receptors (NMDARs) are ionotropic glutamate receptors playing critical roles in brain development, synaptic plasticity, and cognition. GRIN1-Related Neurodevelopmental Disorder (GRIN1-NDD) is a rare genetic condition caused by pathogenic variations in the GRIN1 gene, which encod...

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Schizophrenia is associated with prefrontal cortex dysfunction, including neural disinhibition (reduced GABAergic inhibition) and hypoactivation ("hypofrontality"), alongside impaired reversal learning. However, evidence implicating prefrontal regions, including the rodent medial PFC (mPFC), in r...

Matrix Viscoelasticity Regulates the Stemness and Multilineage differentiation of Primary Neural Progenitor-Stem Cells in 3D

 Ding, S., Kim, J. H., Wang, M., Gu, L.  2026-09-15  1 min  183 words

BIORXIV NEUROSCIENCE

Summary: Neural progenitor-stem cells (NPSCs) reside in mechanically dynamic brain microenvironments and give rise to neurons, astrocytes, and oligodendrocytes. Although recent studies have shown that matrix viscoelasticity can influence neural maturation and neurogenic differentiation, its role in primary N...

Compelling People to Move: Recent Progress in Haptic Technologies for Human Motion Induction in IEEE Transactions on Haptics

 2026-05-18  1 min  164 words

TRANSACTIONS HAPTICS

Summary: Inducing human motion through haptic feedback is a long-standing objective in haptics research. Traditionally, such interaction has relied on mechanical systems that physically apply forces to the body using motors, linkages, or grounded devices. However, recent studies published in IEEE Transaction...

Cellular source and circuit context organize functional specificity in the Drosophila NPF system

 Endres, M. N., Dadyala, T. S., Christie, K. W., Sinakevitch, I. T., Shao, L.  17 2026-09-14  1 min

 143 words

BIORXIV NEUROSCIENCE

Summary: Neuropeptides regulate diverse and sometimes opposing functions, yet how a single peptide achieves functional specificity remains unclear. Receptor diversity can provide specificity, but not in systems with only one receptor. Drosophila neuropeptide F (NPF) acts through a single receptor, providing ...

Paired RNA profiling of circulating small extracellular vesicles links survival in ALS to reactive glial - vascular programs

 Weerakkody, J. S., Bokstaller, F., Sthanu, U., Pitt, D. S.

 2026-09-14

 1 min

 167 words

BIORXIV NEUROSCIENCE

Summary: Circulating RNA can capture molecular variation associated with amyotrophic lateral sclerosis (ALS) progression, but biofluid heterogeneity makes biologically organized signals difficult to recover. Here, we paired microRNA (miRNA) and messenger RNA (mRNA) profiles from glutamate-aspartate transport...

Cross-platform multi-laboratory screening identifies HUWE1, USP33 and USP20 as negative-regulators of autophagy or mitophagy with relevance to neurodegeneration

 Giudici, M. L., Coode, E., Au, W. H., Rey, C., Manifava, M., Capatina, O.-G., Aldred, G., Milde, S., Zyka, V., Kuan, W.-L., Duce, J., Clarke, J. H., Whitworth, A. J., Ktistakis, N. T., Skidmore, J.

 2026-09-14  1 min  220 words

BIORXIV NEUROSCIENCE

Summary: Autophagy and mitophagy are essential cellular processes implicated in neurodegenerative diseases, yet few tractable targets have been robustly validated for therapeutic modulation of these pathways. In an industry-academia consortium we carried out an extensive literature review and expert curation...

Why User Studies and Participant Experience Reporting Matter for VR Motion Privacy?

Azim Ibragimov, Eric D.
Ragan

2026-09-14

1
min

154
words

ARXIV CS HC

Summary: arXiv:2609.12415v1 Announce Type: new Abstract: Public VR game leaderboards contain tracked motion recordings uploaded by hundreds of thousands of users. Once uploaded, these recordings are accessible to anyone and create privacy risks (i.e., identification and profiling). Prior work has proposed m...
