BRAIN

Summary: The IEEE Brain Workshop on AI for Neurotechnology was held on June 30, 2024, at the Pacifico Yokohama Conference Center in Japan. This event was part of the World Congress on Computational Intelligence (WCCI 2024) and was conducted in association with the International Joint Conference on Neural Net...

JOURNAL NEURAL ENGINEERING

Summary: Objective. Astrocytes are increasingly recognized as active modulators of neuronal synaptic transmission. Intracortical microstimulation (ICMS) is widely used to manipulate neuronal activity, yet the accompanying astrocytic responses remain poorly characterized. This study aims to systematically cha...

DREAMING

Summary: The continuity hypothesis of dreaming states that our daily activities are reflected in our dreams. The question of whether there are factors, for example, personality, that modulate continuity is still unanswered. The majority of participants of the U.K. library study ($N = 1,375$) stated th...

Hippocampal CA3 forms a two-layer network of molecularly distinct cell types in mice and humans

Morse-Mora, R. J., Ben-Simon, Y., Arcot Jayaram, S., Rössler, K., Jonas, P., Watson, J. F.

2026-07-09

1
min

191
words

BIORXIV NEUROSCIENCE

Summary: Associational memory is critically dependent on the CA3 recurrent circuit, at the centre of the hippocampal system. While diversity amongst CA3 pyramidal neurons (PNs) has been long reported, the principles organising cell type identity and their consequences for circuit function remain unclear. Her...

ARXIV QBIO NC

Summary: arXiv:2607.07429v1 Announce Type: cross Abstract: In this work, we reviewed different approaches in mathematical modeling of biologically plausible neural systems. Models are characterized and classified based on their common features and special use cases. In addition to spiking models, different ...

Overnight Th1 immune activation predicts the cortisol awakening response

Seizer, L., Matuskov, M. G., Gostner, J., Schubert, C.

2026-07-09

1
min

218
words

BIORXIV NEUROSCIENCE

Summary: The cortisol awakening response (CAR) marks the transition from rest to wake phase by a sharp increase in cortisol levels upon awakening in the morning. This increase may assist in cognitive and behavioral awakening, but its function is not fully understood yet. In this pilot study we aimed to provi...

Decoupling Choice from Motor Response Reduces Choice-History Effects

Thothathri, S., Talluri, B. C., Shushruth, S., Shadlen, M. N., Nienborg, H.

2026-07-08

1
min

187
words

BIORXIV NEUROSCIENCE

Summary: Perception and action form a loop as an organism interacts with its environment. Here, we probe the interdependence between the two in the context of choice-history effects, the tendency of past choices and their outcomes to bias current choices. We investigated if the modulation by previous choices...

The SEA-AD DREAM Challenge: Community benchmarking human and AI agent solutions for Alzheimer's disease neuropathology prediction from single-nucleus transcriptomics

Lai, H.-Y., Kalavros, N., Chung, V., Kaplan, E. S., Anastassiou, D., Cai, L., Chen, E., Garach Velez, I., Gursoy, G., Herrera, L. J., Li, X., Londin, E., Loher, P., Nazeraaj, I., Ortuno, F., Ou Yang, T.-H., Rigoutsos, I., Rojas, I., Andreoletti, G., Foschini, L., Heath, L., Oskotsky, T., Sirota, M., Stolovitzky, G., Travaglini, K. J., Zou, J., Gabitto, M. I.

2026-07-08 1 274
min words

BIORXIV NEUROSCIENCE

Summary: Single-nucleus transcriptomic atlases offer an unprecedented opportunity to connect cellular molecular states with Alzheimer's disease (AD) neuropathology, but whether these profiles encode reproducible, predictive information about pathological burden remains unclear. We present the SEA-AD DREAM Ch...

Mating imperatives drive plasticity of the daily temporal niche via dopamine signaling.

Ghosh, S., Zhong, P., Suray, C., Mir, J., Chen, T., Palazzo, A., Rincheval, V., Rouyer, F., Chatterjee, A.

2026-07-08 1 min 203 words

BIORXIV NEUROSCIENCE

Summary: Temporal niche partitioning is a strategy for reducing interspecies competition and strengthening reproductive isolation. It relies on animals confining their daily activity to distinct diurnal, crepuscular, or nocturnal windows. However, a hardwired temporal niche is only advantageous under stable,...

The gut microbiota-derived metabolite queuosine regulates neuronal development and network function through tRNA modification

Yang, N., Sun, Y., Mallis, L., Boutonnet, M., Bär, J., Ehrenhofer-Murray, A. E., Mikhaylova, M.

2026-07-08 1 min 170 words

BIORXIV NEUROSCIENCE

Summary: Queuosine (Q) modification is a hypermodified nucleoside derived from guanine on tRNAs that enhances the decoding of codons and equilibrates translational speed. Q is biosynthesized in bacteria, and eukaryotes salvage Q and the nucleobase queuine from the diet and the gut microbiome. In animals, Q d...

BIORXIV NEUROSCIENCE

Summary: Canagliflozin (Cana), an SGLT2 inhibitor prescribed for type 2 diabetes, extends median lifespan by 14% in male but not female UM-HET3 mice at 180 ppm, with male-specific neuroprotective effects, despite females accumulating higher drug concentrations in blood and brain. Here, we tested whether redu...

Spikes as perturbations of resonant neural circuits: an RLC framework with testable predictions

Yi-Ping Phoebe
Chen

2026-07-08

1
min

275
words

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: Computational neuron models commonly reduce subthreshold membrane dynamics to a leaky RC integrator, confining computation to the spike and treating the inter-spike trajectory as passive decay. Yet impedance measurements and channel-specific analyses show that many excitable membranes have band-pass...

1
min

211
words

BIORXIV NEUROSCIENCE

Summary: Human brain magnetic resonance imaging (MRI) revolutionized our ability to non-invasively probe individual differences in neuroanatomy. These anatomical scans, in turn, also allow us to accurately localize functional MRI (fMRI) activity. However, extracting anatomical labels and structural character...

BIORXIV NEUROSCIENCE

Summary: Dendritic spines are ubiquitous morpho-functional elements of excitatory synaptic transmission and plasticity. Whether axo-spinous communication exists in the thalamus is presently unclear. Here we find that layer 5 (L5) corticothalamic terminals arising from frontal cortices selectively target thal...

Trisomy 21 cerebral organoids exhibit Alzheimer's disease amyloid and apolipoprotein E co-pathologies

Dooling, B. R., Vielle, A., Lucero, E. M., Rydland, C., Quang, D., Summers, R., Esquer, H., Coughlan, C., Galbraith, M. D., Espinosa, J. M., LaBarbera, D. V., Chial, H. J., Potter, H., Ledreux, A., Johnson, N. R.

2026-07-07 1 min 252 words

BIORXIV NEUROSCIENCE

Summary: Adults with Down syndrome (DS) develop Alzheimer's disease (AD) brain pathology by age 40 due to triplication of the Amyloid Precursor Protein (APP) gene on chromosome 21. Inheritance of the apolipoprotein E- ϵ 4 (APOE4) allele of the APOE gene on chromosome 19 remains the greatest genetic ris...

Defensive antinociception and antipredatory responses in prey threatened by distinct odoriferous cues from *Felis silvestris catus*.

2026-06-15

1
min

191
words

BEHAVIORAL NEUROSCIENCE

Summary: Fear, an adaptive response to danger situation, is vital for the survival of both human beings and rodents. Predator odor-related cues and contextual fear work as valuable models for studying neurobiological circuits, providing insights into unconditioned and conditioned fear-related behavioral and ...

Kappa opioid receptors in excitatory spinal neurons gate acute pain: evidence from mouse and human

Kooij, N. A., Wills, B. M., Waydick, L. G., Fanien, L. G., Manalo, A. P., Sheahan, T. D.

2026-07-06

1
min

121
words

BIORXIV NEUROSCIENCE

Summary: The kappa opioid receptor (KOR) has emerged as a promising, nonaddictive analgesic target, yet the neural mechanisms underlying KOR inhibition of pain are not entirely understood. Here, we provide converging evidence that KOR expressed on spinal neurons inhibits acute pain. We demonstrate that pharm...

Glia mediate brain-wide activity and sleep behavior during sickness through an adrenergic-glutamatergic axis

Bernardez Noya, S., YANG, J., YUE, Z., NGUYEN, A., GUEVARA, C., GIANANI, S. R., XU, V., PIVARSHEV, P., WILLIAMS, J., LU, K., SEHGAL, A.

2026-07-06 1 min 136 words **BIORXIV NEUROSCIENCE**

Summary: Sickness induces coordinated changes in physiology and behavior, but despite the identification of circuits that underlie specific aspects of sickness, how the brain orchestrates this global state shift remains unclear. Whole-brain-single-cell RNA sequencing in a *Drosophila* model of sickness reveals...

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: Healthy aging is accompanied by subtle difficulties in language production. While behavioral and neuroimaging studies suggest that older adults rely on acute semantic access to maintain language abilities, the underlying neurophysiological mechanisms remain poorly understood. In particular, it is st...

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: This study aims to better understand the functional geometry of the motor cortex, starting from different sources of experimental evidence. Recent studies have proved that cells of the primary motor cortex (M1) are sensitive to short hand trajectories called fragments. Here, we propose a sub-Riemann...

Increased perceived effort during contralateral thermal heat pain is not explained by increased intracortical and corticospinal inhibition.

Monti, I., Bergevin, M., Murugavel Sangeetha, M., Thomas, M., Neva, J., Roy, M., Rainville, P., Pageaux, B.

2026-07-05 1 min 248 words

BIORXIV NEUROSCIENCE

Summary: Background. Pain influences motor function and has been proposed to reduce corticospinal and intracortical excitability. At the same time, performance can be maintained during pain, at the cost of increased perceived effort, a centrally generated signal reflecting resource engagement. Here, we teste...

Proteomic and Transcriptomic Differences in Ischemic Stroke Patients with Atrial Fibrillation Versus Carotid Atherosclerosis

Renedo, D., Rivier, C. A., Huo, S., Sujijantararat, N., Koo, A. B., Hebert, R., Sharma, R., Sheth, K. N., Navaratnam, D., Sansing, L. H., Falcone, G. J., Matouk, C. C.

2026-07-05 1 min 334 words

BIORXIV NEUROSCIENCE

Summary: Background: Ischemic stroke occurring in the setting of atrial fibrillation (AF) or carotid atherosclerosis (CA) may reflect distinct underlying biological processes. We integrated proteomic, transcriptomic, and genetic data from different sources to identify circulating proteins and molecular pathw...
