BIORXIV NEUROSCIENCE

Summary: Objective: To examine changes in the neural valuation of high- versus low-calorie stimuli following bariatric surgery and determine whether these changes relate to weight loss at 24 months. Methods: Adults undergoing bariatric surgery completed fMRI scans before surgery and at 4, 12 and 24 months po...

Social behaviours predict vocal turn-taking in common marmosets

Tamai, Y., Matsumoto, J., Löschner, J., König, L., Kaneko, T., Inoue, K.-i., Toda, K., Hage, S.

2026-08-20

1
min

148
words

BIORXIV NEUROSCIENCE

Summary: Human conversation depends on the continuous integration of vocal exchanges with visual and spatial cues, yet the evolutionary origins of this multimodal coordination remain poorly understood. Although vocal turn-taking has been documented across many animal species, studies have largely examined vo...

A Comprehensive Benchmark of EEG-Based BCI Deep Learning Models for MCI and Dementia Classification

Zaitsev, V., Wei, C.-
S.

2026-08-20

1
min

138
words

BIORXIV NEUROSCIENCE

Summary: AO_SCFLOWBSTRACTC_SCFLOWElectroencephalography (EEG) is a promising tool for automated detection of mild cognitive impairment (MCI) and dementia, but comparisons across studies are limited by inconsistent datasets and evaluation protocols. This study benchmarks ten deep learning models across four r...

Astrocytic chordin-like 1 (Chrdl1) is re-engaged early after ischemic stroke to regulate region-dependent GluA2 levels and neuronal vulnerability

Boyle, B. R., Hastings, R. B., Patel, A., Gleichman, A. J., Carmichael, S. T., Blanco-Suarez, E.

2026-08-23

1
min

135
words

BIORXIV NEUROSCIENCE

Summary: Neuronal vulnerability to ischemic stroke varies markedly across brain regions, yet the mechanisms underlying this selective susceptibility remain poorly understood. Here, we show that the developmental astrocytic protein Chordin-like 1 (Chrdl1) is repurposed after ischemic injury to regulate neuron...

Bias-aware versus bias-blind confidence in humans and machines

Song, B., Rahnev,
D.

2026-08-19

1
min

204
words

BIORXIV NEUROSCIENCE

Summary: Confidence evaluates the likely accuracy of a current decision. However, to be maximally informative about accuracy, confidence judgments should incorporate information about ones broader decision tendencies, such as their propensity to favor specific alternatives. We distinguish bias-aware confiden...

When Deeper Analysis Weakens Aesthetic Experience: Behavioral and Brain Network Evidence

Ha, L., Sun, C., Tang,
R.

2026-08-12

1
min

200
words

BIORXIV NEUROSCIENCE

Summary: Analysis does not always enhance aesthetic experience. Philosophical accounts have long suggested that decomposing an aesthetic experience into determinate components may weaken it, yet this possibility has rarely been tested experimentally. To examine whether, when, and how analysis produces diverg...

Optogenetics: Pinpoint Light on Precise Neuromodulation

2025-11-06

1
min

137
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Optogenetics has emerged as a pivotal tool in neuroscience, enabling intricate modulation of targeted neurons within the nervous system. Despite its transformative potential, achieving high spatiotemporal resolution in neuromodulation remains a significant challenge, particularly in free-behaving an...

Emerging Noninvasive Approaches for the Suppression of Pathological Tremor

2025-12-16

1
min

215
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Pathological tremor affects over 40 million people worldwide, significantly impairing daily activities and quality of life. Pharmacological treatments show limited efficacy, with up to 30% discontinuation rates, while surgical interventions like deep brain stimulation achieve significant tremor redu...

Assistive Trajectory Planning for Lower Limb Exoskeletons: Strategies From Laboratory-Optimized Gait to Environmentally-Adaptive Locomotion Through Multimodal Parameter Awareness

2025-12-30

1
min182
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Lower limb assistive exoskeletons (LLEs) show great potential to reduce metabolic cost, improve walking performance, and correct abnormal gait patterns. Among their core control architectures, assistive trajectory planning is key to determining system responsiveness and effectiveness under varying l...

Decoding Spikes From Multiunit Data

2026-01-22

1
min250
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Communication and control in biological systems is mediated by the timing of discharges –spikes– from excitable cells such as neurons and muscle fibers. Each spike is associated to a characteristic waveform that can be captured by sensors. The waveform's characteristics depend on the cell's biophysi...

BIORXIV NEUROSCIENCE

Summary: Motor systems controlling locomotion must generate repetitive rhythmic activity, while also still retaining the ability to generate a diverse range of outputs. How motor systems monitor, regulate, and promote diversity of their own outputs is not well understood. Here, we perform single-step, variab...

Cold-acclimation, not motor inactivity, attenuates GABA signaling in the respiratory network of bullfrogs in response to overwintering

Filogonio, R., Yaseen, H., Santin, J.

2026-08-20

1
min

199
words

BIORXIV NEUROSCIENCE

Summary: Neural circuits produce reliable activity even after environmental disturbances. This occurs because neurons respond to perturbations in a compensatory manner, a process termed homeostatic plasticity. Bullfrogs undergo prolonged periods underwater during winter, when lung ventilation and its neural ...

Sex differences in diverse conditioned fear behaviors following systemic naloxone administration

Greiner, E. M., Shansky, R. M., Laine, M. A., Fourte, J.

2026-08-20

1
min212
words

BIORXIV NEUROSCIENCE

Summary: Fear conditioning studies have historically relied on freezing as the primary measure of conditioned fear despite evidence that defensive responding is behaviorally diverse and sexually dimorphic. The endogenous opioid system, particularly mu-opioid receptor (MOR) signaling, is known to regulate fea...

Tracking the hidden dynamics of proprioception

Villavicencio, P. S., Straub, D., Ziman, M., Will, M., Klatzky, R., de la Malla, C., Tsay, J. S.

2026-08-20 1 min 131 words

BIORXIV NEUROSCIENCE

Summary: Every movement unfolds with a simple question: Where is my body? The nervous system answers through proprioception - the sense of limb position (static position sense) and movement (dynamic proprioception). Although position sense has been well characterized, dynamic proprioception has remained diff...

Precise Functional Localization of the Foveolar Representation in Anesthetized Macaque Visual Cortex

Qian, M., Chen, M., Barczak, A., Zhang, X., Li, P., Roe, A. W.

2026-08-20 1 min 214 words

BIORXIV NEUROSCIENCE

Summary: The foveola-the central $\sim 1^\circ$ of the visual field-supports the highest-acuity spatial vision, yet localizing its cortical representation in the primate brain is technically demanding, particularly under anesthesia where gaze cannot be behaviorally controlled. Here we describe a hierarchical, m...

Neural Signatures of Conscious Experience During Sleep: A Serial Awakening Study Using High-Density EEG

Selte, A., Haworth, S. E., Vannasse, T. J., Alauddin, T., Gjini, K., Philibert-Rosas, S., Brace, C., Sevak, B., Riedner, B., Kalkach-Aparicio, M., Tononi, G., Boly, M., Struck, A. F.

2026-08-20 1 min 150 words

BIORXIV NEUROSCIENCE

Summary: Identifying neural signatures of consciousness remains a central challenge in neuroscience. Sleep offers a tractable model for comparing brain activity in the presence or absence of subjective experience while minimizing behavioral responsiveness confounds. Using overnight 256 electrode high-density...

Cortical encoding of probabilistic temporal predictions during speech perception

Deyna, L., Albouy, P., Trebuchon, A., Schon, D., Morillon, B., Guilleminot, P. H.

2026-08-20

1 min 215 words

BIORXIV NEUROSCIENCE

Summary: The temporal structure of speech has traditionally been characterized by the rhythmicity of its canonical linguistic units (phonemes, syllables, words), each summarized by a mean occurrence rate. While valid, this view overlooks whether speech carries a finer, context-dependent and probabilistic tem...

Brain-Language Alignment During Naturalistic Reading and Its Disruption by Mind-Wandering

Sun, H., Jangraw, D.
C.

2026-08-19

1
min

218
words

BIORXIV NEUROSCIENCE

Summary: Encoding models offer a principled framework for linking computational representations of language to neural activity, but most electroencephalography (EEG) evidence for brain--language alignment comes from tightly controlled, word-by-word reading paradigms. Whether such alignment is detectable duri...

How the eyes move, not where they land, predicts what we remember across the lifespan

Schommartz, I., Choksi, B., Roig, G., de Haas, B., Shing, Y. L.

2026-08-19

1 min

153 words

BIORXIV NEUROSCIENCE

Summary: Where and how we move our eyes through a natural scene depends jointly on the scene and on the viewer. How the spatial and temporal organization of viewing changes across the lifespan, and whether those changes relate to memory, remains unclear. We recorded eye movements from a lifespan cohort (N = ...

AAV-Mediated Overexpression of Prdm12 in Knee-Innervating Afferents Reduces Inflammatory Joint Pain and Neuronal Hyperexcitability in Female Mice

Dannawi, M., Pattison, L. A., Cloake, A., Bellefroid, E. J., Smith, E. S. J.

2026-08-19

1
min

248
words

JOURNAL NEUROSCIENCE CURRENT

Summary: Inflammatory joint pain features in numerous musculoskeletal disorders that affect millions globally. The *Prdm12* gene encodes a conserved zinc finger transcriptional regulator expressed selectively in the nervous system. In humans, *PRDM12* mutations can cause congenital insensitivity...

Defensive antinociception and antipredatory responses in prey threatened by distinct odoriferous cues from *Felis silvestris catus*.

2026-06-15

1

min

191

words

BEHAVIORAL NEUROSCIENCE

Summary: Fear, an adaptive response to danger situation, is vital for the survival of both human beings and rodents. Predator odor-related cues and contextual fear work as valuable models for studying neurobiological circuits, providing insights into unconditioned and conditioned fear-related behavioral and ...

Reinforcing Nicotine Doses Activate Supramammillary VGlut2 Neurons in Mice

Arima, Y., Min, X., Getachew, B., Nicolas, L., Gillespie, A., Armenta Vega, A., Johnson, S. T., Bi, G., Ye, Z., Ikemoto, S.

2026-08-18 1 min 183 words

BIORXIV NEUROSCIENCE

Summary: Background: Although nicotine reinforcement is often attributed to mesolimbic dopamine neurons in the ventral tegmental area, accumulating evidence indicates that additional brain circuits contribute to its reinforcing effects. Aims: The hypothalamic supramammillary region (SuM) has been implicated ...

Biological sex and normative cognitive aging across spatial learning, flexibility, and working memory in Fischer 344 rats.

2026-06-15 1 min 257 words

BEHAVIORAL NEUROSCIENCE

Summary: Aging is associated with decline in spatial learning, cognitive flexibility, and working memory, yet the extent to which biological sex modulates changes in cognitive function remains unresolved. While sex differences are evident in pathological brain aging, sparse insights from healthy aging popula...

Oxytocin prevents cocaine-induced high-affect 50-kHz vocalizations in female rats.

2026-05-04

1
min255
words

BEHAVIORAL NEUROSCIENCE

Summary: Cocaine's reinforcing properties are a key factor underlying the broad prevalence of cocaine use disorder. Few behavioral measures are capable of assessing cocaine-induced euphoria in murine models, limiting effective treatment options. However, positive affective states can be measured in rats by a...

Treatment of cisplatin-induced olfactory aversion based on selection logic: A novel approach.

2026-05-04

1
min198
words

BEHAVIORAL NEUROSCIENCE

Summary: Aversion can arise from a combination of unconditioned stimuli that induce physical discomfort, such as pain and nausea. Chemotherapy-induced side effects, including taste and olfactory aversion, can persist even after treatment has ended, thereby reducing the quality of life. Currently, however, no...

Characterization of behaviors during food consumption under novelty and threat learning in male and female rats.

2026-07-06

1
min

258
words

BEHAVIORAL NEUROSCIENCE

Summary: Fear and anxiety are related but distinct responses to imminent versus uncertain threat. Suppression of eating under novelty is an evolutionarily conserved, cross-species model of anxiety, and it is beneficial to determine if this behavior can predict individual differences in fear learning and memo...

Hippocampal communication with the anterior olfactory nucleus is necessary for context-dependent odor memory.

2026-06-15

1
min

166
words

BEHAVIORAL NEUROSCIENCE

Summary: The hippocampus plays a critical role in contextual learning and memory processes. The ability to associate memories and behaviors with the learning context likely involves interactions between the hippocampus and other brain regions where the basic elements of the memory may be encoded. Here, we ex...
