Physical bacteria–neuron proximity and early cellular responses: a conceptual perspective

Rosa Rivero
Guillén

2026-06-23

1
min

263
words

FRONTIERS NEUROSCIENCE

Summary: Recent experimental observations obtained in reduced in vitro systems have reported direct proximity between bacteria and neuronal cells associated with intracellular Ca²⁺ dynamics and transcriptomic alterations. In particular, studies involving *Lactiplantibacillus plantarum* and primary cortical neu...

Improving P300 morphology through single-trial latency realignment: a comparative study of template-matching approaches

Ilaria Quattrocioni, Valentina Caracci, Emanuela Rotondo, Emma Colamarino, Floriana Pichiorri, Angela Riccio, Febo Cincotti, Jlenia Toppi and Laura Astolfi

2026-06-16 1 min 291 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Trial-to-trial latency variability—well known as latency jitter—is a major source of distortion in event-related potential (ERP) analysis, particularly for late cognitive components such as the P300. Several template-matching algorithms have been proposed to estimate single-trial latency ...

Maximizing the fidelity of a photovoltaic subretinal prosthesis for human patients

Nathan Jensen, Keith Ly, Anna Kochnev Goldstein, Quentin Devaud and Daniel Palanker

2026-06-16 1 min 257 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. PRIMA subretinal implants provide prosthetic vision to patients blinded by age-related macular degeneration, with acuity closely matching the sampling limit of the pixel pitch: a single 100 μ m pixel per line of a letter corresponds to 20/420 acuity. Decreasing the pixel size in the same f...

Recalibration of implantable brain–computer interfaces to enable long-term independent use—a systematic review

Eleanor Swanson, Esmee Dohle, Luke Bashford, Hugo Layard Horsfall, Luka Jovanovic, William R Muirhead and Jamie F M Brannigan

2026-06-22 1 min 300 words

JOURNAL NEURAL ENGINEERING

Summary: Background. Implantable brain–computer interfaces (iBCIs) decode neural signals to generate command signals for effector devices to restore lost functions, such as movement or speech. However, maintaining device performance over time requires recalibration of decoding algorithms due to inherent inst...

HRGNN: hierarchical region-aware graph neural network for interpretable EEG-Based emotion recognition

Yufan Yi, Yan Tian, Yiping Xu and Bo Yang

2026-06-22

1 min

243 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Electroencephalography (EEG)-based emotion recognition has increasingly adopted graph neural networks (GNNs) to model functional connectivity. However, most existing approaches operate at the electrode level without explicitly incorporating functional brain region priors, leading to limit...

Aperiodic exponent ceases to track changes in propofol dose at deep surgery-level hypnotic depths

Boncompte, G., Pedemonte, J. C., Cortinez, L. I., Ibacache, M., Calderon, N., Biggs, D.

2026-06-22

1
min

247
words

BIORXIV NEUROSCIENCE

Summary: Background: Accurately tracking hypnotic depth during surgery is key to deliver personalized and precise anaesthesia. The aperiodic exponent of electroencephalographic (EEG) data has shown great promise as a marker of the balance between excitatory and inhibitory cortical activity and of hypnotic de...

Fluorogenic labelling for tracking extracellular vesicle nanocarriers in the brain

Rinaldi, A., Catalano,
M.

2026-06-22

1
min

209
words

BIORXIV NEUROSCIENCE

Summary: Background: Reliable tracking of extracellular vesicles (EVs), key biological nanocarriers in nanomedicine, remains a major technical challenge due to the limitations of conventional lipophilic dyes, including aggregation, micelle formation, and nonspecific background signals that compromise biodist...

Interaction forces reflect the perception of texture during active exploration

Darabi, N., Delhayé, B. P., Bensmaïa, S. J., Palmer, S. E., Sobinov, A.
R.

2026-06-22

1
min

174
words

BIORXIV NEUROSCIENCE

Summary: We are constantly exploring the world around us through touch. Active touch depends on coordination of movement and force, yet the forces used during natural exploration and their relationship with perception is largely unexplored. Here we measured exploration forces together with fingertip motion w...

Ovarian hormonal state at exercise initiation interacts with nigrostriatal circuitry to determine long-term voluntary exercise behavior

Tanner, M. K., Korth, K. M., Hohorst, A. A., Freund, J. R., Westerman, J. D., Sanchez Mendoza, C., Greenwood, B. N.

2026-06-22 1 min 244 words

BIORXIV NEUROSCIENCE

Summary: Despite the well-established health benefits of exercise, adherence to physical activity remains low, highlighting the need to identify biological factors that regulate the initiation and persistence of exercise behavior. Here, we tested whether ovarian hormone state at the onset of voluntary wheel ...

Distributed representations of chemosensory valence in a naive vertebrate brain

Jenkins, B., Frank,
T.

2026-06-22

1
min

175
words

BIORXIV NEUROSCIENCE

Summary: Chemical cues guide essential behaviors by signaling food, danger, and social information. A major dimension of chemosensory processing is valence, which biases animals toward approach or avoidance, yet its brain-wide organization in vertebrates remains unclear. Here, we used larval zebrafish to map...

BIORXIV NEUROSCIENCE

Summary: The aperiodic, 1/f-like component of electrophysiological activity is increasingly recognized as a meaningful feature of neural function, rather than background noise. In parallel, many EEG studies report transient changes in oscillatory power following stimulus onset and interpret these effects as ...

Environmental color statistics shape the anisotropic geometry of human color discrimination

Hedjar, L., Morimoto, T., Akbarinia, A., Bartsch, M. V., Strumpf, H., Hopf, J.-M., Gegenfurtner, K. R.

2026-06-22

1
min

147
words

BIORXIV NEUROSCIENCE

Summary: Hue is a powerful cue for object discrimination, but human color discrimination is anisotropic: hue thresholds are lower than chroma thresholds for orangish colors, but nearly equal for purplish colors. Here we show that this asymmetry reflects environmental color statistics rather than being a fixe...

Searchlight Optimization Using Representational Similarity Analysis for Subject-Level Voxel Selection in Emotional State Decoding

Wang, X., Zweerings, J., Lührs, M., Cong, F., Mathiak, K., Linden, D. E. J., Goebel, R., Ciarlo, A., Mehler, D. M. A.

2026-06-22 1 min 243 words

BIORXIV NEUROSCIENCE

Summary: Identifying informative voxels is a critical, yet challenging step in functional magnetic resonance imaging (fMRI), particularly for multivariate analyses involving multiple related conditions. Existing approaches often rely on predefined regions of interest (ROIs) or activation-based criteria, whic...

Parental transport induces a dormant state while maintaining oxytocin recruitment in poison frog tadpoles

Antunes, D. F., Liu, Z., Ringler, E.

2026-06-22 1 min 199 words

BIORXIV NEUROSCIENCE

Summary: Parental care can have pervasive effects on offspring neurodevelopment. Parent-offspring interactions are often modulated by the neuropeptide oxytocin, which is responsible for the development of social bonds. The development of the oxytocinergic system is dependent on the quality of parental care d...

Analysis of the off-target interaction of amyloid PET tracers with human brain sulfotransferases

Miccoli, L., Fullone, R., Delli Pizzi, S., Tomaiuolo, F., Sensi, S. L., Floresta, G., Granzotto, A.

2026-06-21

1
min228
words

BIORXIV NEUROSCIENCE

Summary: Positron emission tomography (PET) tracers targeting amyloid- β ($A\beta$) are central to the diagnosis and staging of Alzheimer's disease (AD). However, growing evidence indicates that these tracers can engage off-target molecules, complicating signal interpretation. Sulfotransferases (SULTs) ha...

words

BIORXIV NEUROSCIENCE

Summary: Loss of a sensory modality can enhance performance in the remaining senses. However, the circuit mechanisms by which such cross-modal compensation can improve cognitive functions, including learning, are unknown. Here, we show that compromising olfaction in both larval and adult *Drosophila* enhances ...

Ask HN: Due to spam on GitHub, what platforms can I move my projects?

ciwolex

2026-06-20

1
min55
words

HACKER NEWS

Summary:

I have a few projects on Github. I am receiving a lot of spam PRs and requests from vibe coders and bots. Most of them to prop up their profiles. The stars are obviously exaggerated too.

What other platforms are you using for your projects?

BIORXIV NEUROSCIENCE

Summary: Rare variants in NEK1, encoding a serine/threonine kinase, are amongst the most consistently implicated genetic contributors to amyotrophic lateral sclerosis (ALS), reported in approximately 2-3% of cases. Yet, whilst recent studies have characterised the cell biological consequences of NEK1 loss-of...

Terminal Schwann Cells Regulate Presynaptic Vesicle Homeostasis but Not Neuromuscular Junction Integrity in Mice

Kim, H., Kim, S.-Y., Yoo, K., Choi, S.-Y., Kong, Y.-Y.

2026-06-19

1
min

184
words

BIORXIV NEUROSCIENCE

Summary: Terminal Schwann cells (tSCs) are specialized glial cells persistently residing at the neuromuscular junction (NMJ), where they are widely postulated to participate in synaptic transmission and maintenance. However, elucidating their precise in vivo roles has been hindered by a lack of tSC-specific ...

REM sleep protects against emotional distractor interference in young adults independent of lucid dreaming induction.

2026-05-14

1
min239
words

DREAMING

Summary: REM sleep is essential for emotional regulation and memory consolidation. Lucid dreaming (the awareness of dreaming while asleep) has been proposed to enhance REM sleep's emotional processing function, yet its effects on mood and emotion-related cognition remain unclear. Eighty young adults (M...

Lucid dreaming and sleep characteristics in posttraumatic stress disorder.

2026-05-18

1
min253
words

DREAMING

Summary: Lucid dreaming, a type of dreaming where individuals are aware that they are dreaming and may control their dreams, was examined in adults with chronic posttraumatic stress disorder symptoms. The study explored the relationship between sleep metrics and lucid dreaming, analyzing 168 nights of sleep ...

Measurement differences in the Harmonized Cognitive Assessment Protocol across ethnicity and language in the United States.

2026-02-09

1
min

225
words

NEUROPSYCHOLOGY

Summary: Objectives: The Harmonized Cognitive Assessment Protocol (HCAP) is a neuropsychological assessment for dementia that is used to derive national dementia prevalence estimates through a substudy of the Health and Retirement Study. We aimed to evaluate the degree of measurement invariance of the HCAP a...

381
words

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: Introduction Human neural oscillations are organized according to golden ratio ($\phi = 1.618$) mathematics: frequencies follow $f(n) = f_0 \times \phi^n$ where $f_0 \approx 7.6$ Hz. This architecture manifests as spectral peak depletion at integer n positions (band boundaries) and enrichment at half-integer positions (band centers...

Regulation of Schwann Cell-Axon Interactions in Nerve Development: The Role of Slit2 in Axonal Sorting

Porrello, E., Hoerner, M., Gioia, A., Del Carro, U., Farina, C., Srinivasan, S., Bolino, A., Pini, V., Sicardi, S., Podini, P., Quattrini, A., Geng, J.-G., Previtali, S. C.

2026-06-17 1 min 246 words

JOURNAL NEUROSCIENCE CURRENT

Summary: Radial sorting of axons is a critical process in nerve development, ensuring proper segregation of axons to form myelinated and unmyelinated Schwann cell–axon units. This process is regulated by signals mediating communication between Schwann cells and the extracellular matrix, with laminin...
