Multi-dimensional characterization and tracking of motor unit action potentials

Lara McManus, Jérémy Liegey and Madeleine M Lowery

2026-04-15

1 min

279 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Decomposition of high-density surface electromyography (HDsEMG) signals allows identification of individual motor unit firing times and provides a spatiotemporal image of their action potential waveforms. The ability to reliably match and track motor unit action potentials (MUAPs) from th...

words

BIORXIV NEUROSCIENCE

Summary: Friedreich ataxia (FA) is one of the most common inherited autosomal recessive neurodegenerative disorder, caused by a GAA repeat expansion in the FXN gene, leading to frataxin deficiency and progressive sensory and spinocerebellar ataxia. FA is characterized by selective vulnerability of propriocep...

Show HN: Pu.sh – a full coding-agent harness in 400 lines of shell

 nahimn  2026-04-30  1 min  255 words

HACKER NEWS

Summary:

I originally was just messing with pi-autoresearch. Gave it a sample task to build the most portable coding agent.

First cut was 6 KB of shell. Great for one-shots, unusable interactively. I was shocked it actually worked.

Started building up -- adding features — but with a self-imposed rule:...

Complement Dysregulation During the Early Phases of Synucleinopathy

 Khan, H., Gifford, M., Kordbacheh, A., Bury, A., Panoushek, S., Cole-Strauss, A., Kemp, C. J., Luk, K. C., Steece-Collier, K., Khun, N. C., Kanaan, N. M., Sortwell, C. E., Patterson, J. R., Benskey, M. J.

 2026-04-30  1
min

 296
words

BIORXIV NEUROSCIENCE

Summary: Parkinsons disease (PD) is characterized by progressive degeneration of nigrostriatal dopamine neurons and synucleinopathy, which is the accumulation of aggregated alpha-synuclein (a-syn). Increasing evidence implicates a-syn-associated neuroinflammation as a contributor to PD pathogenesis; however,...

Coherence from Context - Two-Point Neuron Models for Contextual Integration in Visual Information Processing

 Schmid, D., Neumann, H.

 2026-04-30  1 min

 244 words

BIORXIV NEUROSCIENCE

Summary: The integration of contextual information is crucial for coherent perception and cognition. The morphology and conductance properties of cortical pyramidal cells suggest that they operate as "two-point neurons" (TPNs), asymmetrically combining driving sensory input at basal dendrites with modulating...

Divergent molecular and circuit mechanisms underlie light entrainment of retinal and suprachiasmatic nucleus circadian clocks

 Jandot, A., Calligaro, H., Dianak-Shoori, A., Tartour, K., Sandu, C., Haddjeri, N., Ribelayga, C. P., Ananthasubramaniam, B., Padmanabhan, K., Felder-Schmittbuhl, M.-P., Dkhissi-Benyahya, O.

 2026-04-30  1 min  213 words

BIORXIV NEUROSCIENCE

Summary: The circadian system aligns behavior and physiology with the 24-hour environmental cycle through a distributed network of clocks including the master pacemaker in the suprachiasmatic nucleus (SCN) and an autonomous retinal clock critical for local retinal physiology and function. Although both clock...

Volumetric functional ultrasound imaging in macaques

 Fitzgerald, N. E., Montaldo, G., Froesel, M., Urban, A., Vanduffel, W.

 2026-04-30  1 min

 150 words

BIORXIV NEUROSCIENCE

Summary: Linking circuit-level activity to larger-scale functional organizations requires methods combining high spatial resolution, broad coverage, and single-trial sensitivity. We present volumetric functional ultrasound imaging (3D-fUS) in behaving macaques, a method fulfilling these criteria. 3D-fUS enab...

words

BIORXIV NEUROSCIENCE

Summary: ABSTRACT The prefrontal cortex (PFC) is a heteromodal association area critical for higher-order cognitive functions. Its protracted maturation extends through adolescence into early adulthood, a period characterized by extensive remodeling of neuronal networks and synaptic architecture. This height...

Incorporating motor preparation time transforms micro-offline gains into micro-offline losses

Ahmed, N. I., Suresh, T., Hussain, S. J., Freedberg, M.

2026-04-29

1 min

175 words

BIORXIV NEUROSCIENCE

Summary: During explicit sequence learning (ESL), micro-offline gains (MOGS) occur during brief rest periods. MOGS are calculated as the difference in keypresses-per-second (KPS) between the first sequence of one trial and the last sequence of the preceding trial. To date, all studies evaluating MOGS have ca...

A Unifying Mechanism for Synaptic Amyloid beta Toxicity Beta Adrenergic Potentiation of the Ca²⁺ Channel CaV1.2 by Amyloid beta

Bartels, P., Rouge, S., Scriptor, J. D., Zeng, Z., Estrada-Tobar, Z. M., Price, J., Jacobi, A., Berumen, R.,
 Ho, S.-Y., Avedisyan, A., Xiang, Y. K., Chen, C.-Y., Nieves-Cintrón, M., Navedo, M. F., Horne, M. C.,
Hell, J. W.

 2026-04-29  1 min  118 words

BIORXIV NEUROSCIENCE

Summary: Amyloid beta peptides (Ab) trigger Alzheimers disease (AD) but how has remained elusive. Ab stimulates the B2 adrenergic receptor (B2AR), which forms a unique signaling complex with the L-type Ca²⁺ channel (LTCC) CaV1.2. LTCCs have been implicated in the etiology of dementia and AD. We show that Ab ...

Tuning the brain at 40 Hz: Synergistic effects of combined tACS and auditory steady-state response

Masina, F., Pezzetta, R., Genero, N., Tonin, A., Arcara, G., Mapelli, D.

2026-04-28

1 min

178 words

BIORXIV NEUROSCIENCE

Summary: Gamma oscillations are altered in several conditions such as schizophrenia, Alzheimer's Disease, and Mild Cognitive Impairment. Both 40-Hz transcranial alternating current stimulation (tACS) and 40-Hz auditory steady-state stimulation can entrain gamma oscillations and improve cognitive outcomes, bu...

Chromosome 2q31.2 Deletion Impairs Neuronal Plasticity through Integrated Stress Response Activation

Nakamura, B. N., Sedighi, S., Das, D., Joshi, R. M., Neman, J.

2026-04-28

1 min

158 words

BIORXIV NEUROSCIENCE

Summary: Rare genomic deletions disrupt gene networks essential for neural development and synaptic plasticity, yet their mechanistic effects remain poorly understood. Here, we investigated the impact of a chromosome 2q31.2 deletion using induced pluripotent stem cell (iPSC) derived neural models from an aff...

Morphological differences along the radial gradient of hippocampal area CA2 pyramidal neuron dendrites

Raslain, I., Therreau, L., Robert, V., El Hariri, H., Chevaleyre, V., Jedlicka, P., Cuntz, H., Piskorowski, R. A.

2026-04-28

1
min

203
words

BIORXIV NEUROSCIENCE

Summary: Hippocampal area CA2 has recently emerged as a critical region for social recognition memory. Furthermore, this understudied region has been implicated in psychiatric diseases and neurodegenerative diseases. There has been accumulating evidence indicating that the pyramidal neurons (PNs) in area CA2...

When More Is Not Better: Increased Motor Cortex Recruitment In Older Adults Is Associated With Performance Decline During High-Demand Cognitive-Motor Tasks

Keime, M., Ranglani, S., Harvey, M., Sampaio-Baptista, C.

2026-04-28

1
min

250
words

BIORXIV NEUROSCIENCE

Summary: Age-related changes in brain structure and function lead to reorganisation in neural activity during cognitive-motor tasks. A central question is whether increased brain activity in older adults reflects compensatory mechanisms that help maintain performance, or inefficient recruitment due to neural...

The selective OX1R antagonist 1-SORA-51 reduces binge-like feeding behavior in male and female mice without detectable changes in dopamine.

 DiLeone, R., Trinko, J. R., Atangana, E., Diaz, D., Ashkenazi, A., Foscue, E. P., Kong, E. M.

 2026-04-28  1 min  207 words

BIORXIV NEUROSCIENCE

Summary: Binge eating disorder (BED) is characterized by episodic overconsumption of palatable food and involves dysregulated motivational and arousal processes. The orexin (hypocretin) system, through its widespread projections to mesolimbic circuits, has been implicated in cue-driven reward seeking and esc...

Normal Aging Limits Cortical Network Reorganization and Behavioral Recovery after Experimental Stroke

Albertson, A. J., Bowen, R. M., Ayoub, K., Leon-Alvarado, R. A., Wang, B., Patti, R., Bauer, A. Q., Lee, J.-M.

2026-04-28

1
min

307
words

BIORXIV NEUROSCIENCE

Summary: Stroke is the leading cause of chronic disability in the United States, and advancing age is associated with worse recovery. Despite this, relatively little is known about how aging influences the repair and reorganization of neural circuits and large-scale cortical networks after stroke. To address...

Vesicular acidification modulates the synaptic current: a hybrid diffusion reaction model analysis

Bar-on, R., Greger, I. H., Holcman,
D.

2026-04-28

1
min

232
words

BIORXIV NEUROSCIENCE

Summary: Glutamate synaptic vesicles co-release protons, producing a brief acidification of the synaptic cleft that could modulate AMPA receptor (AMPA) operation. To evaluate the extent of receptor acidification, we develop a diffusion reaction model that couples vesicle-evoked proton and glutamate transie...

Implicit learning of melodic structure: A role for pitch?

 2024-01-22  1 min  180 words

PSYCHOMUSICOLOGY

Summary: Growing evidence suggests that pitch influences musical processing, with melodic processing being enhanced in higher pitch ranges (e.g., Fujioka et al., 2005) and rhythmic processing being enhanced in lower pitches, and these effects may have a basis in elementary properties of the auditory system (...)

TMEM106B C-terminal fragments drive nucleocytoplasmic transport failure and TDP-43 mislocalization in the aging human brain

 Tilahun, K., Parameswaran, J., Dudley, M., Pun, D., Ma, F., Zhang, J., Bolds, T. O., Jiang, J.

 2026-04-27  1 min  221 words

BIORXIV NEUROSCIENCE

Summary: TMEM106B is a lysosomal membrane protein and major genetic modifier of multiple neurodegenerative diseases, including frontotemporal lobar degeneration, Alzheimer's disease, and amyotrophic lateral sclerosis. Proteolytically generated C-terminal fragments of TMEM106B assemble into amyloid fibrils th...

Motor sequence analysis as a sensitive biomarker of dopaminergic degeneration in a non-human primate model of parkinsonism

 Pedrosa, L. R. R., Leal, L. C. P., Muniz, J. A. P. C., Silva, A. G., Souza-Monteiro, D., Lima, R. R., Gomes, B. D., Krejcova, L. V.

 2026-04-27  1 min  289 words

BIORXIV NEUROSCIENCE

Summary: Parkinson's disease is characterized by progressive dopaminergic degeneration, yet motor symptoms emerge only after substantial neuronal loss - a dissociation that challenges the sensitivity of conventional behavioral endpoints in preclinical models. Here, we present a proof-of-principle study estab...

Resting State Somatomotor Functional Brain Networks using Empirical Mode Decomposition and Hilbert Transformation

Kaur, T., Yadav, S., Jain, N.

17

2026-04-27

1

min

173

words

BIORXIV NEUROSCIENCE

Summary: The goal of the resting-state functional connectivity studies is to determine the inherent dynamics of the brain networks while the body is at rest. These networks get differentially activated when the brain is involved in various tasks such as processing of sensory inputs, initiating motor activiti...
