Early life stress alters lifespan trajectories of amygdala development: a cross-species model of amygdala burnout

Sheppard, M., Toledo, J. R., Trujillo Villarreal, L. A., Litwinczuk, M. C., Moran, K. L., McManus, E., Elliott, R., Duncan, N. W., Garza-Villarreal, E. A., Banaschewski, T., Barker, G., Bokde, A. L., Bruhl, R.,  Desrivieres, S., Flor, H., Grigis, A., Heinz, A., Nees, F., Papadopoulos Orfanos, D., Poustka, L., Smolka, M. N., Holz, N. E., Vaidya, N., Walter, H., Whelan, R., Wirsching, P., Schumann, G., IMAGEN Consortium,, Muhlert, N.

 2026-09-08  1 min  298 words

BIORXIV NEUROSCIENCE

Summary: Early-life stress is associated with alterations in amygdala volume, but findings vary across studies and species. Rodent models typically report increased amygdala volume, whereas human studies often find reductions or mixed effects. We propose the amygdala burnout hypothesis, which suggests that e...

Sensory Feedback for Upper-Limb Amputees by Noninvasive Electrical Stimulation and Its Performance Assessment

 2026-03-20
  1 min
  253 words
 [TRANSACTIONS HAPTICS](#)

Summary: Most commercial prostheses lack a function of natural and intuitive sensory feedback, which is one of the reasons for their high rate of abandonment. Transcutaneous Electrical Nerve Stimulation (TENS) has been proved as an effective approach to evoke sensations for limb amputees. This paper aims to ...

A Direction-Dependent Mechanotransduction Model to Convert Fingertip Forces Into Neural Spike Trains for Tactile Feedback

 2026-03-20  1 min  235 words

TRANSACTIONS HAPTICS

Summary: Microneurography studies have shown that human mechanoreceptor (MR) activity is directionally sensitive to shear forces, enabling fine tactile perception and object manipulation. However, existing computational mechanotransduction models largely neglect this directional tuning, limiting their biolog...

Psychophysical Effects of Grasping Conditions of a Handheld Device on Vibrotactile Perceptions

 2026-03-19  1 min  180 words

TRANSACTIONS HAPTICS

Summary: Tactile perception varies between individuals and the state of the grasp. To investigate the psychophysical effects on vibrotactile perceptions influenced by grasp type and strength of a handheld device, perceived intensities were tested against various grasp strengths and stimulus levels using 40 a...

Lightweight Wearable Fingertip Haptic Device With 3-DOF Directional Force Feedback Based on Fingernail Stimulation

 2026-02-25  1 min  150 words

TRANSACTIONS HAPTICS

Summary: Wearable haptic devices face a trade-off between providing rich feedback and preserving natural fingertip sensation. Current multi-DOF systems encumber the fingerpad, interfering with fingerpad sensory capabilities, while lightweight devices offer limited 1-DOF feedback. To address this, we present ...

Hippocampal CA1 neurons are crucial for sleep-associated memory formation in humans: The role of theta power during NREM sleep

Hanert, A., Kurz, E.-M., Weber, F. D., Doebling, J., Pedersen, A., Burgalossi, A., Born, J., Bartsch, T.

2026-09-08

1 min

249 words

BIORXIV NEUROSCIENCE

Summary: The formation of long-term memory during sleep depends on the reactivation and redistribution of recently acquired mnemonic information during non-rapid eye movement (NREM) sleep. Animal studies suggest that hippocampal memory replay during slow-wave sleep is coordinated through the interaction of s...

Higher cortical beta oscillatory power before balance perturbations is associated with worse balance in older adults with Parkinson's Disease, but not in age-matched older adults

Monaghan, A. S., Mirdamadi, J. L., Protzak, J., Payne, A., Borich, M. R., Ting, L. H.

2026-09-08

1
min

236
words

BIORXIV NEUROSCIENCE

Summary: Elevated beta activity is hypothesized to reflect reduced flexibility in updating motor and sensory states, which may impair the rapid integration of sensory information required for balance. Therefore, we predicted that higher cortical beta power immediately before balance perturbations would be as...

BIORXIV NEUROSCIENCE

Summary: The supramammillary nucleus (SuM) is known to promote active, approach-oriented behaviors by engaging ventral tegmental area (VTA) dopamine neurons projecting to the nucleus accumbens (NAc), primarily via a glutamatergic SuM[->]medial septum (MS) pathway. However, the role of other SuM projection...

PNAS NEUROSCIENCE

Summary: Proceedings of the National Academy of Sciences, Volume 123, Issue 36, September 2026.
Significance Glycosylation is a common modification of membrane proteins, yet the functional roles of individual endogenous glycans remain poorly understood. Here, we show that a single N-linked glycan on the...

Effect of a peer-led meditation club on adolescents' well-being, empathy, and compassion.

 2024-09-09  1 min  197 words

CLINICAL NEUROSCIENCE

Summary: Many studies have examined the effect of meditation sessions led by experienced teachers on personal benefits for adults. The present study investigated the effect of broad-based mindfulness practices with an adolescent peer facilitator on prosocial outcomes in addition to individual gains. The 20 s...

Differentiable Forward and Back-Projector for Rigid Motion Estimation in X-Ray Imaging

2025-12-12

1

min

213

words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: In this work, we propose a framework for differentiable forward and back-projector that enables scalable, accurate, and memory-efficient gradient computation for rigid motion estimation tasks. Methods: Unlike existing approaches that rely on auto-differentiation or that are restricted to ...

A Sparse Constrained Optimization Method for Resolving Coincident Single-Cell Events in Microfluidic-Based Impedance Sensing

 2025-12-12  1 min  219 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: Label-free electrical impedance-based single-cell detection has been widely applied in cell sorting, electrical phenotyping, and monitoring of cell growth status. However, when high-concentration cell suspensions pass through the sensing region simultaneously, coincident events frequently...

Interleaved Imaging and Actuation for Real-Time MRI During Active Control of a Magnetically-Actuated Robotic Catheter

 2025-12-10  1 min  232 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: Magnetic Resonance Imaging (MRI)-guided robotic catheter interventions offer improved safety, visualization and control. Catheter actuation with current-carrying microcoils offers fast and responsive actuation without friction and backlash. However, actuation of this type of catheter lead...

A Deep Learning Model for Heart Sound Classification Fusing Time-Frequency Features

 2025-12-10  1 min  237 words

TRANSACTIONS BIOMEDICAL ENGINEERING

Summary: Objective: Cardiovascular diseases (CVDs) are a leading global health threat. The automatic classification of phonocardiogram (PCG) signals is crucial for their early diagnosis, yet existing models are often limited by analyzing features from only a single domain (time or frequency), failing to fuse...

Dysregulation of LINGO1 expression in the SOD1(G93A) mutant mice during symptomatic stages of the disease and early postnatal oligodendrogenesis

 Zahaf, A., Bourseguin, J., cobret, L., Kassoussi, A., Moussaed, M., Raoul, C., Traiffort, E., Morisset-Lopez, S.

 2026-09-05  1 min  270 words

BIORXIV NEUROSCIENCE

Summary: Oligodendrocytes play an essential role in axonal metabolic support and myelination, and their dysfunction is associated with amyotrophic lateral sclerosis (ALS). LINGO1 is a major inhibitor of oligodendrocyte differentiation and axonal regeneration, identified as a promising therapeutic targeted fo...

Show HN: Moadim.io – A scheduler for agents

 tupe12334  17 2026-09-04  1 min  224 words

HACKER NEWS

Summary:

Why can't we get an agent scheduler that supports all of the following:

- git compatible
- agent agnostic
- 100% open source
- os and system-agnostic
- multi-runner support
- support mcp/ui/http
- unlimited routines/crons

So I built one, moadim.io is a local Rust daemon you instal...

Early-onset parkinsonism as a presenting feature of suspected type 1 Gaucher disease with two pathogenic GBA1 variants: a case report

Yunli

Yu

2026-09-03

1

min

256

words

FRONTIERS NEUROSCIENCE

Summary: Parkinson's disease (PD) is a common neurodegenerative disorder, and pathogenic variants in GBA1 are among its most frequent genetic risk factors. Biallelic pathogenic GBA1 variants cause Gaucher Disease (GD). In patients with parkinsonism and two detected GBA1 variants, the absence of biochemical c...

Summary: Objective: The transentorhinal cortex (tErC), which includes the medial portion of the perirhinal (PrC) and the anterolateral portion of the entorhinal cortices (alErC), is among the first brain regions affected by Alzheimer's disease (AD). Yet, its precise cognitive role remains controversial. Rece...

Strain and recovery activities over a week predict short-term changes in processing speed measured in everyday environments: A survey response-time study in workers from a large internet panel.

 2026-07-06  1 min  279 words

NEUROPSYCHOLOGY

Summary: Objective: Both recovery and strain are highly relevant to worker productivity and cognitive performance. Prior research suggests that survey response times (RTs) may serve as an approximation of everyday processing speed. We examined associations between strain-related experiences and recovery beha...

Hill-Type Models of Skeletal Muscle and Neuromuscular Actuators: A Systematic Review

2025-09-12

1
min200
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Backed by a century of research and development, Hill-type models of skeletal muscle, often including a muscle-tendon complex and neuromechanical interface, are widely used for countless applications. Lacking recent comprehensive reviews, the field of Hill-type modeling is, however, dense and hard-t...

Geometric reshaping of task-relevant representations in the primary visual cortex supports perceptual decisions

 Corbo, J., Caglar, L. R., Erkat, O. B., Polack, P.-O.

 2026-09-03

 1 min

 207 words

BIORXIV NEUROSCIENCE

Summary: Discriminating between two stimuli requires that their neural representations become separable by downstream readouts. This can be achieved geometrically, by disentangling the manifolds that population responses form in neural state space. Such reorganization has been observed in associative and mot...

Principles of NMDA receptor co-agonism at cortical fast-spiking GABAergic interneurons in the adolescent prefrontal cortex

 Souza, I. N. d. O., Lecouflet, P., Okur, Z., Maldera, S., Potier, B., Pollegioni, L., Scheiffele, P., Mothet, J.-P.

 2026-09-03  1 min

 225 words

BIORXIV NEUROSCIENCE

Summary: N-methyl-D-aspartate receptors (NMDARs) populate fast-spiking (FS)-parvalbumin-positive (PV+) GABAergic interneurons (INs), where they play a critical role in shaping circuit motifs and memory. However, it is largely unknown whether and how NMDARs at FS-PV+INs are gated by their co-agonists and the...

A cognitive representation in primary visual cortex modulated by vision

Lee, K. H., Adenekan, P., Gao, F., Zhou, J., Hernandez, J., Yorita, A., Haque, R., Kay, K., Scanziani, M., Frank, L.

2026-09-03

1 min

125 words

BIORXIV NEUROSCIENCE

Summary: Primary visual cortex (V1) is a critical substrate for mammalian vision. Traditionally, visual inputs are thought to be the main drivers of V1 activity, with internal signals playing a modulatory role. Here we show that this relationship is inverted for a large fraction of V1 neurons. In rats comple...

Distinct tDCS montages act via dissociable lateralization mechanisms to enhance motor function in chronic stroke

 Yaqian Li, Ying Zhang, Shupejiao, Jiewei Lu, Chunfang Wang and Ningbo Yu

 2026-08-27

 1 min

 265 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. The imbalance in interhemispheric functional connectivity following stroke fundamentally impedes motor recovery. Although transcranial direct current stimulation (tDCS) effectively modulates neuroplasticity, the acute effects of distinct stimulation montages on lateralized brain networks ...

JOURNAL NEURAL ENGINEERING

Summary: Objective. Sensory processing dysfunction (SPD) not only affects most individuals with autism spectrum disorder (ASD), but at least 5% of children without ASD also experience SPD. Our understanding of the relationship between sensory dysfunction and resting state brain activity is still emerging. Th...

The sound of manufactured music: Reviewing the role of artificial stimuli in music cognition research.

2024-01-22

1
min

259
words

PSYCHOMUSICOLOGY

Summary: Having participants listen and react to musical stimuli is one of music cognition's foundational methods. Whereas most researchers have used stimuli adapted from existing musical traditions in such work, others have incorporated artificial stimuli (i.e., stimuli generated specifically for research t...

Preferred music listening does not affect cognitive inhibition in young and older adults.

2023-10-12

1
min227
words

PSYCHOMUSICOLOGY

Summary: Previous literature has found links between music listening and cognitive performance. Specifically, background music may play a role in modulating cognitive inhibition. However, determining what type of background music affects cognitive inhibition throughout the lifespan has not been studied. The ...

Absolute pitch: A literature review of underlying factors, with special regard to music pedagogy.

 2023-07-10  1 min  202 words

PSYCHOMUSICOLOGY

Summary: Absolute pitch (AP) is a fairly rare and special phenomenon that has relevance for musicology, psychology, genetics, and neuroscience. AP possessors are able to identify the pitch of an isolated sound or to produce that sound without a reference point. The authors' aim is to review the literature on...

Capturing coordination and intentionality in joint musical improvisation.

 2023-08-03  1 min  217 words

PSYCHOMUSICOLOGY

Summary: Humans collaborate with each other on a wide variety of tasks that are often largely improvised and unscripted. In this study, we investigated the dynamics of coordination in a joint musical improvisation task, what the effect of intentions is on coordination, and how musicians propagate these inten...
