Predation risk reweights reward preference through coordinated amygdala-prelimbic dynamics

Kim, E. J., Jeong, J. H., Choi, J.-S., Kim, J. J.

2026-09-06

1 min

150 words

BIORXIV NEUROSCIENCE

Summary: A fundamental challenge for animals and humans is resolving competing survival demands under naturalistic threat, yet circuit-level mechanisms remain poorly understood. We developed a paradigm recapitulating a predator-prey encounter: Long-Evans rats emerged from a nest to forage in an open arena, c...

Alternative splicing plasticity of the neurexin family of synaptic adhesion molecules in human sensory neurons

Yoo, J. J., Copits, B. A.

2026-09-06

1 min

228 words

BIORXIV NEUROSCIENCE

Summary: Plasticity within somatosensory circuits enables adaptations to environmental changes, however these can become maladaptive following injury and lead to chronic pain states. Presynaptic neurexins (Nrxns) are key organizers of synapse function that bind to a wide variety of postsynaptic proteins in a...

Cortico-cerebellar beta-band dynamics predict flexible motor timing

Zandvoort, C. S., Wissing, C. C., Winter, J., Kowalczyk, A., Jensen, O., Miall, R. C., Narain, D., Kornysheva, K.

2026-09-06 1 min 191 words

BIORXIV NEUROSCIENCE

Summary: Flexible motor control requires that movements adapt to changing temporal contexts. Here, we test whether flexible timing is driven by context-dependent encoding across cortico-cerebellar circuits and how neural dynamics within these circuits enable accurate performance. To overcome the signal-to-no...

Dysregulation of LINGO1 expression in the SOD1(G93A) mutant mice during symptomatic stages of the disease and early postnatal oligodendrogenesis

Zahaf, A., Bourseguin, J., cobret, L., Kassoussi, A., Moussaed, M., Raoul, C., Traiffort, E., Morisset-Lopez, S.

2026-09-05
1
min270
words

BIORXIV NEUROSCIENCE

Summary: Oligodendrocytes play an essential role in axonal metabolic support and myelination, and their dysfunction is associated with amyotrophic lateral sclerosis (ALS). LINGO1 is a major inhibitor of oligodendrocyte differentiation and axonal regeneration, identified as a promising therapeutic targeted fo...

Low-Dose Interleukin-2 Resolves Stress-Induced Chronic Sensitization Independent of Opioid Receptor Signaling

Simoes, R. R., Kraus, S., Zhang, J., Do Nascimento, L. F., Tosh, D. K., Unsinger, J., Hotchkiss, R. S., Che, T., Jacobson, K. A., Cao, Y.-Q.

2026-09-05 1 min 244 words

BIORXIV NEUROSCIENCE

Summary: Stress is a common trigger of headache and widespread somatic pain. Repeated exposure to stress establishes latent sensitization that is tonically suppressed by endogenous inhibitory systems. Using brain-penetrating and peripherally restricted receptor antagonists in a mouse model of repetitive rest...

A Human Neuronal Cell Model of Endogenous TDP-43 A315T Reveals Altered Protein Dynamics and Disease-Relevant Cellular Dysfunction

Cicardi, M. E., Antonini, S., Martorell Serra, I., Muench, M., Kinney, N., Girdhar, A., Cristofani, R., Poletti, A., Sternecker, J., Crippa, V., Bordi, M., Pasinelli, P., Guo, L., Tigano, M., Trotti, D.

2026-09-05 1 min 220 words

BIORXIV NEUROSCIENCE

Summary: TAR DNA-binding protein 43 (TDP-43) aggregation is the defining pathological hallmark of nearly all cases of amyotrophic lateral sclerosis (ALS), yet physiologically relevant human models that faithfully recapitulate disease-associated TDP-43 proteinopathy and dysfunction remain limited. To cover th...

Shank3 mutation disrupts affective touch encoding in the dorsal medial prefrontal cortex of Beagle dogs

Zhou, Y., He, Y., Dan, M., Jia, L., Guo, K., Fang, Y., Hu, L., Yu, X., Wang, J., Xing, D., Zhang, Y. Q.

2026-09-05 1 min 148 words

BIORXIV NEUROSCIENCE

Summary: Individuals with autism spectrum disorder (ASD) often show aversion to affective touch (AT). However, the neural mechanism of this abnormality in cortices remains poorly understood probably due to the lack of effective animal models. Here, we used a canine model to address this issue by leveraging t...

The sphingosine-1-phosphate receptor functional antagonist fingolimod exacerbates neuroinflammation and tau pathology in a mouse model of tauopathy

Rudman, M. D., Litvinchuk, A., Smith, C., Remolina Serrano, J., Manis, M., Bao, X., Yuede, C. M., Ulrich, J. D., Holtzman, D. M.

2026-09-05 1 min 246 words

BIORXIV NEUROSCIENCE

Summary: Objective: T cells are increased in the brain in Alzheimer's disease (AD) and primary tauopathies where they correlate with tau pathology. In mouse models, T cells exacerbate tau-related neuroinflammation and neurodegeneration, and depletion of T cells is neuroprotective. Here, we investigate whethe...

The lncRNA Statera regulates synaptogenesis by repressing the retrotransposon copia in Drosophila

Wang, S., M'Angale, P., Xiao, C., Alegre, G., Simkin, A., Malinkevich, A., Thomson, T.

2026-09-05

1 min 184 words

BIORXIV NEUROSCIENCE

Summary: Retrotransposons are mobile genetic elements that can impair genome integrity, and their insertions and dysregulation have been implicated in various diseases. However, growing evidence suggests that retrotransposons may play important physiological roles. At the Drosophila larval neuromuscular junc...

VLM-guided retrieval augmented generation (RAG) for robot action prediction

Aleš
Ude

2026-08-25

1
min

165
words

FRONTIERS NEUROROBOTICS

Summary: Reliable action prediction is essential for robotic electronic-waste disassembly, where device diversity and damage make preplanned sequences impractical. Vision-language models (VLMs) offer broad visual and semantic knowledge, but zero-shot predictions can be unreliable, while fine-tuning requires ...

A single-nucleus regulatory atlas links transposable elements to adult hippocampal neurogenesis

Cakir, U., Mantovani, F., Abadi, S. Y., Butt, U. J., Bansal, V., Kawaguchi, R., Geschwind, D., Nave, K.-A., Ehrenreich, H., Singh, M.

2026-09-04

1
min

199
words

BIORXIV NEUROSCIENCE

Summary: Adult hippocampal neurogenesis can be enhanced or even triggered by extrinsic stimuli, but the lineage-specific regulatory changes that accompany a stimulated neurogenic response remain undefined. We used recombinant human erythropoietin (rhEPO), a defined influencing factor that enriches newly form...

Decision Confidence Neuron in Echo State Network for Continual Evaluation of EEG Motor Imagery Classification Quality

Lemoine, E., Lenfesty, B., Mudavath, U. K. N., Bhattacharyya, S., Wong-Lin, K.

2026-09-04

1 min 109 words

BIORXIV NEUROSCIENCE

Summary: Echo state networks (ESNs) are efficient, neuro-inspired computational frameworks well suited to time-series data. However, ESN decision confidence is typically quantified in limited ways. We propose an explicit decision-confidence readout neuron, trained from decision readout outputs, to continuous...

Principles of NMDA receptor co-agonism at cortical fast-spiking GABAergic interneurons in the adolescent prefrontal cortex

Souza, I. N. d. O., Lecouflet, P., Okur, Z., Maldera, S., Potier, B., Pollegioni, L., Scheiffele, P., Mothet, J.-P.

2026-09-03

1
min

225
words

BIORXIV NEUROSCIENCE

Summary: N-methyl-D-aspartate receptors (NMDARs) populate fast-spiking (FS)-parvalbumin-positive (PV+) GABAergic interneurons (INs), where they play a critical role in shaping circuit motifs and memory. However, it is largely unknown whether and how NMDARs at FS-PV+INs are gated by their co-agonists and the...

PSYCHOMUSICOLOGY

Summary: Humans collaborate with each other on a wide variety of tasks that are often largely improvised and unscripted. In this study, we investigated the dynamics of coordination in a joint musical improvisation task, what the effect of intentions is on coordination, and how musicians propagate these inten...

DREAMING

Summary: We compared the self and relationship themes in dream sessions of 10 U.S. and 10 Korean female college students. Preliminary analyses showed that the two samples were similar in terms of dream salience, but the U.S. sample scored higher in terms of session outcome (session evaluation, gains in dream...

Layer 5 and 6b Extratelencephalic Neurons Encode Distinct Sound Features in Auditory Cortex

Ghimire, M., Williamson, R.
S.

2026-09-02

1
min

212
words

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Extratelencephalic (ET) neurons in layers (L)5 and 6b of the auditory cortex (ACtx) provide major corticofugal outputs to subcortical structures and contribute to auditory learning and experience-dependent plasticity. Although both ET subtypes innervate overlapping downstream targets, they differ...

Unpacking Ventral Pallidum GABA Neuron Contributions to Opioid Drug Reward in Rats

Butcher, G. M., Ramirez, E. M., Ruiz, C. M., Castillo, E., Farrell, M. R., Martinez, M. X., Mahler, S. V.

2026-08-26 1 min 246 words

JOURNAL NEUROSCIENCE CURRENT

Summary: <p>Addiction is a heterogeneous disorder, and the specific psychological processes and neural mechanisms involved are hard to parse in humans. However, animal models allow the biological substrates of addiction-relevant behaviors to be examined one at a time. Ventral pallidum GABAergic neurons (VP<s...

Auditory neural entrainment: frequency-specific functional roles and emerging applications in neurological and psychiatric disorders

Jing Lu 2026-09-02 1 min 232 words

FRONTIERS HUMAN NEUROSCIENCE

Summary: Among sensory inputs, auditory information plays a significant role. Neural entrainment may establish a bridge for the brain's perception of rhythmic sound signals. It refers to the synchronization of ongoing neuronal activity with internal and external rhythmic stimuli, demonstrating the brain's pl...

min

258
words

FRONTIERS HUMAN NEUROSCIENCE

Summary: The neuro-endocrine-immune (NEI) network is a key regulatory network that maintains organismal homeostasis and participates in stress responses. Its function depends on the dynamic coupling among the nervous, endocrine, and immune systems. Astrocytes, as abundant and functionally diverse glial cells...

Motor unit decomposition detects altered trunk neural output during seated postural maintenance after stroke

Hiroki Hanawa, Keisuke Hirata and Taku
Miyazawa

2026-09-01

1
min

240
words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Trunk control after stroke is clinically important, yet the neural output supporting seated postural maintenance remains poorly characterized. This limits not only the physiological interpretation of trunk dysfunction but also the development of neuromodulation technologies. We therefore ...

Suggestibility and psychedelics: From therapeutics to social context.

2024-12-12

1
min

175
words

CLINICAL NEUROSCIENCE

Summary: Suggestibility is an important aspect of the psychedelic experience that merits greater attention in the expanding field of psychedelic research. This article provides a comprehensive road map for exploring the critical questions and issues at the intersection of suggestion, suggestibility, and psyc...

Evaluating dispositional emotion-related factors in the effect of acceptance on affect reactivity: A secondary analysis of an experimental study.

2024-12-30

1
min

257
words

CLINICAL NEUROSCIENCE

Summary: Acceptance as a self-regulation strategy has beneficial effects on affect reactivity in response to stressors via reducing negative affect and state anxiety as well as improving positive affect. However, dispositional emotion-related factors, namely, experiential avoidance, emotional dysregulation, ...

OMICON: a community resource for studying gene coexpression networks in normal and neoplastic human brain samples

Eliscu, R., Kang, G., Schupp, P. G., Brody, D. J., Hariharan, N., Shamsian, S., Oldham, M. C.

2026-09-01

1
min150
words

BIORXIV NEUROSCIENCE

Summary: Genome-wide coexpression analysis of intact tissue samples is a powerful approach for identifying reproducible signatures of cell types and states, since it can survey vast numbers of individuals, cells, and transcripts. However, it can be difficult to optimize gene coexpression network construction...

Increased activity in the somatosensory and insular cortex during the transition from acute to chronic neuropathic pain

Moosa, S., Murphy, E. D., Gupta, N., Elias, W. J., Farzad, F., Sun, C., Kapur, J., Joshi, S.

2026-09-01 1 min 198 words

BIORXIV NEUROSCIENCE

Summary: Pathophysiological mechanisms underlying the transition from acute to chronic neuropathic pain remain incompletely understood. The somatosensory and insular cortices are key cortical components of the pain matrix. We examined changes in activation of these cortical regions during the transition from...

How to pour a cup of coffee

Midlagajni, N., Fleming, R. W., Rothkopf, C. A.

2026-09-01 1 min 151 words

BIORXIV NEUROSCIENCE

Summary: Pouring a drink feels deceptively trivial, yet it requires guiding a boundary-free fluid into a vessel without spilling, overflowing, or toppling it -- a task at which robots remain notoriously brittle. How humans achieve this so effortlessly is unknown, as motor control has predominantly been studi...

Stronger brain responses to acute stress reflect greater everyday stress variability

Kördel, M., Kühnel, A., Kimmig, A.-C. S., Beinbauer, S., Kogler, L., Sundström-Poromaa, I., Henes, M., Kroemer, N. B.

2026-09-01 1 min 181 words

BIORXIV NEUROSCIENCE

Summary: Laboratory stress tasks are widely used to assess individual differences in acute stress reactivity, yet it remains unclear how these responses correspond to stress experienced in everyday life. Here, we combined the Montreal imaging stress task (MIST) with ecological momentary assessment (EMA) over...

Predictability and controllability shape aversive learning and stress responses through independent computational mechanisms

Rajput, D., Felmingham, K., Sophie Lin, C.-H., Garrido, M.

2026-09-01 1 min 237 words

BIORXIV NEUROSCIENCE

Summary: BACKGROUND: An individual's adaptation to threatening environments under uncertainty is reflected in stress responses. Predictability (the ability to anticipate events) and controllability (the ability to control outcomes) are central to how one adapts, yet their joint influence on aversive learning...

Profiling and modulating astrocyte borders at injected biomaterials in mice

DuBois, E. M., Li, K., Kulaga, P., Hassan, L. F., Adewumi, H. O., Herrick, I. C., Dunson, K., O'Shea, T. M.

2026-09-01 1 238
min words

BIORXIV NEUROSCIENCE

Summary: Astrocyte border formation is a conserved neuroprotective response to neural tissue disruption, yet astrocyte border states at implanted biomaterials remain less well characterized than injury responses. Here, we developed the Astrocyte Border Characterization (ABC) Tool, which leverages a shear-thi...

The role of mu opioid receptors on excitatory and inhibitory neurons in the rostral ventromedial medulla in neuropathic pain

Moffa, J. C., Gao, A., Kalyanaraman, V., Heitmeier, M., Copits, B. A.

2026-09-01

1
min

150
words

BIORXIV NEUROSCIENCE

Summary: Descending projections from the brain to the spinal cord can regulate painful stimulus processing and are modulated by endogenous and exogenous opioids. We investigated the role of mu opioid receptors (MORs) in GABAergic vs. glutamatergic neurons of the rostral ventral medulla (RVM) in a mouse model...
