Repetitive anatomical patterns for thalamocortical projections of higher-order thalamic nuclei

Huth, A., Kuner,
T.

2026-06-28

1
min

203
words

BIORXIV NEUROSCIENCE

Summary: Cortico-thalamo-cortical circuits entail extensive trans-thalamic connectivity between cortical areas, yet their structural organization and function remain poorly understood. Here, the thalamocortical projections of several higher-order thalamic nuclei were characterized by retrograde tracing from ...

Opportunities and pitfalls in preclinical cerebral blood flow mapping using arterial spin labelling MRI: insights from multicentre data

Pires Monteiro, S., Dunkwu, D., Reynolds, S., Figueiredo, P., Shemesh, N. N., Ohene, Y., Christie, I. N.

2026-06-26

1
min199
words

BIORXIV NEUROSCIENCE

Summary: Cerebral blood flow (CBF) is a quantitative metric for mapping perfusion. While the prototypical MRI approach arterial spin labelling (ASL) is well-validated in humans, the reproducibility of rodent ASL mapping remains poor, limiting translational impact. To address this gap, we used both newly acqu...

JOURNAL NEURAL ENGINEERING

Summary: Objective. The human brain consists of multiple interacting neuronal networks that interleave at fine spatial and temporal scales. This complexity presents a challenge for scalp EEG and other noninvasive mapping techniques to accurately identify seizures and abnormal current patterns from background...

Coherent scene context accelerates and reshapes neural object representations

Javadi, A., Soltanian-Zadeh, H., Rajaei, K.

2026-06-26

1
min

198
words

BIORXIV NEUROSCIENCE

Summary: Coherent scenes facilitate object recognition, but the representational basis of this facilitation and its temporal evolution in the brain remain unclear. We tested this question using EEG and multivariate pattern analysis while 15 participants categorized objects from five semantic categories after...

147
words

BIORXIV NEUROSCIENCE

Summary: As neurons grow, they must regulate intrinsic excitability to maintain an appropriate level of spiking based on synaptic inputs. Using gene knockouts, phosphoproteomics, and electrophysiology we show PTEN regulates neuronal growth and intrinsic excitability through separable downstream mechanisms. P...

Robust neural face identity codes in the Super-Recogniser brain

Ventura, M., Grootswagers, T., Cottier, T., Varlet, M., Dunn, J. D., White, D., Quek, G. L.

2026-06-26

1 min 247 words

BIORXIV NEUROSCIENCE

Summary: Super-Recognisers show exceptional ability in face recognition, providing a natural model of how perceptual systems optimise for individuating visually similar stimuli in variable viewing conditions. However, the neural representations supporting this extreme perceptual expertise are unknown. Here, ...

A p53-ΔNp73 signaling axis drives selective motor neuron degeneration in spinal muscular atrophy

Carlini, M. J., Hu, X., Sowoidnich, L., Yadav, A., Garcia, J., Savin, M., Sumner, C. J., Menon, V., Simon, C. M., Pellizzoni, L.

2026-06-25

1
min216
words

BIORXIV NEUROSCIENCE

Summary: Selective neuronal vulnerability is a hallmark of many neurodegenerative diseases, yet how ubiquitous genetic insults cause highly selective neuronal loss remains poorly understood. In spinal muscular atrophy (SMA), reduced SMN levels trigger degeneration of specific motor neuron pools. Although non...

ST3GAL3 loss-of-function disrupts synaptic integrity and excitatory/inhibitory cortical dynamics

Diouf, D., Tsounis, D. L., Pishva, E., Vanmierlo, T., van den Hove, D., Lesch, K.-P.

2026-06-25

1 min 224 words

BIORXIV NEUROSCIENCE

Summary: This study examined the role of ST3GAL3 as a regulator of excitatory/inhibitory (E/I) synaptic homeostasis using a human iPSC-based model. Neurodevelopmental disorders (NDDs) are increasingly linked to disruptions in the E/I balance, yet the molecular determinants remain poorly defined. ST3GAL3, a s...

Stimulus and circuit contributions to the information geometry of neural manifolds

Goedeke, S., Kautz, J. K., Leibold, C.

2026-06-25

1 min 228 words

BIORXIV NEUROSCIENCE

Summary: Understanding how network connectivity shapes neural representations is central to systems neuroscience. While dimensionality reduction methods uncover low-dimensional manifold structure in population recordings, a rigorous framework connecting manifold geometry to network mechanisms and information...

ERP BOOT CAMP

Summary:

We are disappointed to announce that we will not be holding a regular 10-day ERP Boot Camp this summer.

We have held Boot Camps nearly every summer since 2007, supported by a series of generous grants from NIMH that allowed us to provide scholarships for all attendees. Unf...

The Clinician's Veto: Navigating Trust, Liability, and Uncertainty in Autonomous AI Prescribing

Eleanor LaRocco, Sarah Tan, Adarsh Subbaswamy, Anne Andrews, Andrew Taylor, Cree Gaskin, Chirag Agarwal

2026-06-25 1 min 254 words

ARXIV CS HC

Summary: arXiv:2606.25108v1 Announce Type: cross Abstract: Autonomous AI systems are transitioning from advisory to autonomous roles for medication prescriptions. Recent United States bill H.R. 238 and Utah's prescription-renewal pilot both authorize AI to prescribe medications in an agentic capacity. While...

Modeling multiscale neural dynamics for EEG-based emotion recognition using an attentive wavelet–transformer framework

P.

Thangaraj

2026-06-09

1
min

209
words

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: Electroencephalography (EEG)-based emotion recognition faces challenges such as signal noise, non-stationarity, inter-subject variability, and class imbalance, limiting its practical application in affective computing and clinical diagnostics. This study introduces the Attentive Wavelet-Transformer ...

DREAMING

Summary: This study aimed to investigate whether emotional suppression tendency is related to the discontinuity between wakeful emotions and dream emotions. Screening and diary surveys were conducted, and a total of 76 participants completed the study. The screening survey measured aspects of dreaming using ...

REM sleep protects against emotional distractor interference in young adults independent of lucid dreaming induction.

2026-05-14

1
min239
words

DREAMING

Summary: REM sleep is essential for emotional regulation and memory consolidation. Lucid dreaming (the awareness of dreaming while asleep) has been proposed to enhance REM sleep's emotional processing function, yet its effects on mood and emotion-related cognition remain unclear. Eighty young adults (M...)

COGNITIVE NEUROSCIENCE

Summary: Decisions are often thought of as an intermediary between perception and action, but the degree to which this assumption is integrated into different parts of cognitive neuroscience theory and practice varies. After examining these variations on the causal relationship between decisions and actions,...

Network Models of Neurodegeneration: Bridging Neuronal Dynamics and Disease Progression

2026-01-16

1
min

196
words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Neurodegenerative diseases are characterized by the accumulation of misfolded proteins and widespread disruptions in brain function. Computational modeling has advanced our understanding of these processes, but efforts have traditionally focused on either neuronal dynamics or the biological processes...

Thalamic Activity Regulates Interneuron Density in the Developing Visual Thalamus

Huerga-Gomez, I., Torres-Romero, D., Castellano-Ruiz, P., Wilson, E. S., Martini, F. J., Lopez-Bendito, G.

2026-06-17 1 min 169 words

JOURNAL NEUROSCIENCE CURRENT

Summary: Neural activity is a fundamental driver of early circuit assembly, yet how it shapes the distribution of inhibitory neurons across sensory networks remains poorly understood. Establishing an appropriate balance between excitation and inhibition is essential for effective sensory processing, but t...

Compelling People to Move: Recent Progress in Haptic Technologies for Human Motion Induction in IEEE Transactions on Haptics

2026-05-18

1
min164
words

TRANSACTIONS HAPTICS

Summary: Inducing human motion through haptic feedback is a long-standing objective in haptics research. Traditionally, such interaction has relied on mechanical systems that physically apply forces to the body using motors, linkages, or grounded devices. However, recent studies published in IEEE Transaction...

THE SUBTHALAMIC NUCLEUS IS INVOLVED IN SOCIAL MEMORY IN MALE RATS

Vielle, C., Vignal, L., Williams, M., Maurice, N., Pelletier, F., Pecchi, E., BAUNEZ, C.

2026-06-22

1 min 153 words

BIORXIV NEUROSCIENCE

Summary: Human social behavior depends on complex socio-cognitive abilities, many of which are disrupted in neuropsychiatric disorders. We previously found that subthalamic nucleus (STN) lesions abolish familiarity-based modulation of social reward in rats, implicating the STN in social recognition. Here, we...

A population readout of extrastriate activity reveals biased and smoothed temporal representations across saccades

Poursadegh, A., Zekri, M., Weng, G., Akbarian Aghdam, A., Clark, K., Rabbani, H., Noudoost, B., Nategh, N.

2026-06-22 1 min 201 words

BIORXIV NEUROSCIENCE

Summary: Perception of visual time is transiently distorted around saccadic eye movements, yet the neuronal mechanisms constructing perisaccadic representations of time remain unclear. Here, we investigate how perisaccadic temporal information is encoded and read out in extrastriate cortex, by combining elec...

words

BIORXIV NEUROSCIENCE

Summary: The ability to seek reward and avoid punishment is a fundamental survival instinct. In natural environments, however, the statistics of rewards and punishments can change independently of one another. In addition, individuals experiencing anxiety and depression may be selectively biased to process r...

min

213
words

BIORXIV NEUROSCIENCE

Summary: Whether and how various visual sensory areas contribute to the perceived location of visual stimuli remains unknown. To test the role of neurons in extrastriate area V4 in generating alterations in spatial perception during saccadic eye movements (saccades), we examined perisaccadic mislocalization-...
