min177
words

BIORXIV NEUROSCIENCE

Summary: Parkinson's disease (PD) exhibits substantial genetic heterogeneity, yet how combinations of rare variants converge on disease-relevant cellular mechanisms remains unclear. Here, we generated human induced pluripotent stem cell-derived dopaminergic neurons from PD patients carrying rare variants in ...

The Temporal Constraints of the Cerebellum's Timekeeping

 Hoogervorst, K., Andersen, L. M.

 2026-04-10  1 min  196 words

BIORXIV NEUROSCIENCE

Summary: The cerebellum plays a central role in generating temporal predictions from past sensory regularities, yet the temporal boundaries of this predictive capacity remain unclear. Using magnetoencephalography (MEG), we investigated somatosensory and cerebellar responses to omissions within rhythmic somat...

BIORXIV NEUROSCIENCE

Summary: Schizophrenia is a serious mental disorder that changes the way people think, perceive, and manage daily life. Getting the diagnosis right is critical for proper treatment, but in practice it is often difficult. Current evaluations depend mostly on a judgment of clinicians, and the overlap of sympto...

A “personality test” for rats reveals subtle but distinct effects of sex and early life inflammation on brain and behavior.

2026-01-19

1
min

258
words

BEHAVIORAL NEUROSCIENCE

Summary: Early life inflammation has long been associated with increased risk of later neuropsychiatric developmental disorder (NDD) diagnosis in humans. However, despite converging lines of evidence implicating the immune system in NDD etiology combined with reported sex differences in NDD diagnosis rates a...

A multi-omic atlas in the African turquoise killifish reveals increased glucocorticoid signaling as a hallmark of brain aging

 Williams, R. G., Teefy, B. B., Lemus, A. J. J., Lee, E. H., Bhala, R., Kim, M., Zhou, H., Adler, A., Kashyap, A., Cardenas, G. M., McCarroll, S. A., Tower, J., Benayoun, B. A.

 2026-04-10  1 min  194 words

BIORXIV NEUROSCIENCE

Summary: Aging is the leading risk factor for cognitive impairment and neurodegeneration, yet molecular changes that unfold in the brain over time, and how they drive this vulnerability, remain unclear. The naturally short-lived African turquoise killifish (*Nothobranchius furzeri*) offers a powerful model to ...

Cell-type-specific circadian and light-responsive transcriptional dynamics in adult *Drosophila* neurons

Berglund, G., Ojha, P., Ivanova, M., Perez-Torres, M., Rosbash, M.

17

2026-04-10

1

min

231

words

BIORXIV NEUROSCIENCE

Summary: The *Drosophila* adult central brain contains 240 circadian neurons, of which there are more than 25 different neuron subtypes based on connectomic data. Recent single cell RNA-seq (scRNAseq) characterization of these neurons "around the clock" also indicates a similar number of molecular subtypes of ...

Multiple Oscillatory Neural Rhythms Support Metacognitive Access of Working Memory

 Di, Y., An, X., Li, H.-
H.

 17 2026-04-09

 1
min

 187
words

BIORXIV NEUROSCIENCE

Summary: Working memory enables the maintenance of information to guide behavior, yet its representations are inherently noisy and variable. To act effectively, observers must track the uncertainty of their own memory. However, the neural mechanisms supporting uncertainty representations in working memory re...

Human brains implicitly and rapidly distinguish AI from human voices before decoding prosodic meaning

Chen, W., Pell, M., Jiang,
X.

2026-04-09

1
min

246
words

BIORXIV NEUROSCIENCE

Summary: People encounter AI voices daily. Existing behavioral studies suggest listeners rely on prosodic cues such as intonation and expressiveness to detect audio deepfakes, reporting that AI voices sound prosodically less rich than human voices. To test whether prosodic processing drives deepfake discrimi...

Evidence for predictive computations in a brain hierarchy during a visual search task

Pinotsis, D., Bastos, A., Miller, E.
K.

2026-04-09

1
min

231
words

BIORXIV NEUROSCIENCE

Summary: Many lines of evidence suggest that the cortex functions fundamentally as a predictive system, compressing high-dimensional sensory inputs into low-dimensional representations that support internal models of the environment. These models generate top-down signals that shape and filter incoming senso...

Mapping developmental patterns of intrinsic timescale

Shafiei, G., Bagautdinova, J., Sydnor, V. J., Bassett, D. S., Barch, D. M., Cieslak, M., Fan, Y., Flook, E.,
 Franco, A. R., Kiar, G., Luo, A. C., Milham, M., Parkes, L., Salo, T., Somerville, L. H., Tong, T. T.,
 Shinohara, R. T., Satterthwaite, T. D.

 2026-04-09  1 min  181 words

BIORXIV NEUROSCIENCE

Summary: Intrinsic timescale is a commonly used measure of spontaneous neural dynamics that quantifies the temporal window of processing of neuronal populations. Intrinsic timescale displays a hierarchical cortical organization across multiple species and imaging modalities, with shorter timescales in sensor...

Sequestration of growth cone surface proteins by cytoplasmic Lrrtm2 induces de novo amygdala innervation by cerebral cortex associative neurons

 Tillman, D. E., Durak, O., Veeraraghavan, P., Froberg, J. E., Wheeler, G., Budnik, B., Macklis, J. D.

 2026-04-09  1 min  312 words

BIORXIV NEUROSCIENCE

Summary: Precise establishment of distinct cerebral cortex circuits is essential for sensorimotor function, high-level cognition, and cross-modality integration and association. Although an increasing set of molecular controls over subtype-specific cortical wiring have been identified, much less is known abo...

A brain-penetrant P2X7R antagonist mitigates Alzheimer's disease pathology

 Turcu, A. L., Oken, A. C., Grinan-Ferre, C., Durner, A., Sierra Marquez, J., Hinz-Kowalik, S., Nagel, J., Lee, S.-D., Tzortzini, E., Georgiou, K., Bhol, M., Baz, Z., Llop, J., Schneider, M., Barbaraci, C., Kim, G.-R., Barniol-Xicota, M., Val, C., Brea, J., Loza, M. I., Perez, B., Naesens, L., Kolocouris, A., Kim, Y. C., Müller, C. E., Nicke, A., Pallas, M., Mansoor, S. E., Vazquez, S.

 2026-04-09  1 min  196 words

BIORXIV NEUROSCIENCE

Summary: The ATP-gated P2X7 receptor (P2X7R) activates inflammatory signaling pathways in the central nervous system. In particular, P2X7Rs drive chronic glia-mediated neuroinflammation, which is increasingly recognized as a key contributor to Alzheimer's disease, a neurodegenerative disorder that lacks effe...

HIV-exposure related disruptions in functional and structural connectivity in the central auditory system in adolescence

Madzime, J. S., Jankiewicz, M., Meintjes, E. M., Torre, P., Laughton, B., Holmes, M.

J.

2026-04-09

2
min

514
words

BIORXIV NEUROSCIENCE

Summary: Background: Children who are HIV-exposed but uninfected (CHEU) face elevated risks of hearing loss and language deficits compared to HIV-unexposed peers. The central auditory system (CAS) undergoes substantial maturational changes during adolescence, yet no neuroimaging study has examined its struct...

The Incremental Cluster Threshold-Free Cluster Enhancement Algorithm for Functional Connectivity Analysis

Cravo, F., Rodriguez, R., Nieto-Castanon, A., Noble, S.

2026-04-09

1 min

226 words

BIORXIV NEUROSCIENCE

Summary: Threshold-free cluster enhancement (TFCE) is one of the most used statistical inference methods in neuroimaging, but its computational cost limits some of its applications. The current implementations recompute clusters at each threshold step, creating computation costs that poorly scale with precis...

REVIEWS BIOMEDICAL ENGINEERING

Summary: Communication and control in biological systems is mediated by the timing of discharges –spikes– from excitable cells such as neurons and muscle fibers. Each spike is associated to a characteristic waveform that can be captured by sensors. The waveform's characteristics depend on the cell's biophysi...

The central amygdala integrates exogenous glucagon-like peptide 1 signals

Duran, M., Zeng, N., Cutts, E. J., Habegger, K., Hardaway, J. A.

2026-04-08

1 min

249 words

BIORXIV NEUROSCIENCE

Summary: Nuclei within the limbic system like the central amygdala (CeA) play a critical role in mediating fear, motivation, reward, and appetitive behavior. Although previous reports demonstrate the presence of the glucagon-like peptide-1 receptor (GLP-1R) in limbic nuclei, how limbic neurons mediate the ac...

NeuralVisionNet: a probabilistic neural process model for continuous visual anticipation

 Xia Chen  2026-03-24  1 min  146 words

FRONTIERS COMPUTATIONAL NEUROSCIENCE

Summary: The ability to anticipate future events continuously is a hallmark of biological vision, yet standard deep learning models often struggle with long-term coherence due to the rigid discretization of time. In this paper, we propose NeuralVisionNet, a probabilistic framework that models visual anticipa...

Redox imbalance dictates dependence on GOT1 versus GOT2 for rod photoreceptor health during aging and stress

Chen, M., Weh, E., Goswami, M., Weh, K. M., Hager, H., Sajjakulnukit, P., Weingarten, A.,

 Subramanya, S., Miller, N., Chaudhury, S., Piraino, E., Chandel, N. S. M., Ryals, R., Lyssiotis, C. A., Wubben, T. J.

 2026-04-07  1 min  250 words

BIORXIV NEUROSCIENCE

Summary: Photoreceptor (PR) loss causes vision loss in many blinding diseases, and effective therapies to prevent this cell loss are lacking. Aspartate aminotransferases (GOTs), located in the cytosol (GOT1) and mitochondria (GOT2), are key components of the malate-aspartate shuttle, which transfers reducing...

Acute exposure of mouse and human hippocampal slices to tau oligomers reversibly impairs sharp-wave ripples

Vassiliou, C., Hochmair, J., Sankar, R., Odebrecht Vergne de Abreu, A. C., Onken, J., Sauvigny, T.,

 Fidzinski, P., Wegmann, S., Dean, C.

 2026-04-07  1 min  173 words

BIORXIV NEUROSCIENCE

Summary: Sharp-wave ripple (SWR) oscillations are crucial for memory consolidation and deteriorate in Alzheimer's disease (AD). Tau oligomers are suggested to lead to synaptic and neuronal degeneration in AD, but their effects on SWRs are unknown. To study this, we prepared mouse and human hippocampal slices...

words

BIORXIV NEUROSCIENCE

Summary: Infection and systemic inflammation have been identified as major risk factors for pediatric stroke; however, the immune mechanisms underlying these clinical observations remain poorly understood. Here, we utilized an LPS-sensitized photothrombotic stroke model (LPS/PT) to investigate the contributi...

words

BIORXIV NEUROSCIENCE

Summary: Purpose: Glycolytic production of HDO from the metabolism of perdeuterated glucose provides a means for metabolic imaging with 2H MRI. The present study compared HDO production from a cost-efficient [2,3,4,6,6-2H5]glucose with [2H7]glucose in vitro and in vivo. Methods: 2H NMR spectroscopy was perfo...

Patient-Derived PSEN1 Cerebral Organoids Revealed Parallel Development of Amyloid- β Accumulation and Network Dysfunction

 Angelovski, A., Hribkova, H., Sedmik, J., Liscakova, B., Svecova, O., Cesnarikova, S., Amruz Cerna, K., Pospisilova, V., Kral, M., Kolajova, M., Klimes, P., Bohaciakova, D., Marketa, B.

 2026-04-06  1 min  160 words

BIORXIV NEUROSCIENCE

Summary: Alzheimers disease (AD) is a neurodegenerative disorder characterised by progressive dementia, brain atrophy, and ultimately death. Using cerebral organoids derived from human induced pluripotent stem cells (hiPSCs) carrying the familial PSEN1 A246E variant, we investigated the temporal relationship...

Important Changes to the 2024 ERP Boot Camp

 Steve Luck  2024-03-05  2 min  444 words

ERP BOOT CAMP

Summary:

We are disappointed to announce that we will not be holding a regular 10-day ERP Boot Camp this summer.

We have held Boot Camps nearly every summer since 2007, supported by a series of generous grants from NIMH that allowed us to provide scholarships for all attendees. Unf...

Exploration of using 'distance-to-bound' to manipulate the difficulty during motor imagery BCI training after stroke—a clinical two-cases study

 Jonatan Tidare, Martin Johansson-Alvarez, Jeanette Plantin, Susanne Palmcrantz and Elaine Astrand

 2026-03-27  1 min  349 words

JOURNAL NEURAL ENGINEERING

Summary: Objective. Motor imagery-based Brain–Computer interfaces (MI-BCIs) is a promising technology for neurorehabilitation after stroke. However, many face challenges in using a BCI because they fail to produce discriminable patterns in their brain activity. Personalizing the BCI task difficulty could hel...
