Dual pathway architecture in songbirds enables robust sensorimotor learning

 Sankar, R., Suryawanshi, A., Rougier, N. P., Leblois, A.

 2026-05-08

 1 min

 247 words

BIORXIV NEUROSCIENCE

Summary: The acquisition of sensorimotor skills critically depends on basal ganglia (BG)-thalamo-cortical circuits. Prevailing theories propose that the BG optimize motor output through reinforcement learning (RL), using internal performance evaluations to approximate stochastic gradient ascent. However, thi...

Individual differences reveal distinct age and pubertal contributions to the refinement of the functional cortical hierarchy during adolescence

 Serio, B., Dinkelbach, L., Marsiglia, M., Waite, L., Hoffstaedter, F., Margulies, D. S., Eickhoff, S. B., Valk, S. L.

 2026-05-07  1 min  147 words

BIORXIV NEUROSCIENCE

Summary: The development of the functional cortical hierarchy, spanning sensorimotor to association systems, is exclusively studied as a function of age. During adolescence, this overlooks puberty as a major neurodevelopmental driver and source of variability. We studied sensorimotor-association axis refinem...

When a Man Says He Is Pregnant: Event-related Potential Evidence for a Rational Account of Speaker-contextualized Language Comprehension

 2026-03-12  1 min  296 words

COGNITIVE NEUROSCIENCE

Summary: Spoken language is often, if not always, understood in a context formed by the identity of the speaker. For example, we can easily make sense of an utterance such as “I’m going to have a manicure this weekend” or “The first time I got pregnant I had a hard time” when spoken by a woman, but it would ...

The Experience of Deciding: An Electroencephalography Study

 2026-03-12  1 min  150 words

COGNITIVE NEUROSCIENCE

Summary: How free our actions are and how responsible we are for them partly depends on how well we are aware of what influences those actions. One way to investigate this is to compare what we are aware of and what happens in our brain before we act. Previous studies compared the onset of awareness of a dec...

Neurocognitive Dynamics Underlying Penalty-induced Boosting of Proactive Metacontrol and Its Influence on Reactive Metacontrol

 2026-03-12  1 min  221 words

COGNITIVE NEUROSCIENCE

Summary: Metacontrol states involve adapting cognitive control to contextual demands—being more flexible in frequent task-switching environments or more stable in those with infrequent switching. While these metacontrol states can be engaged proactively in anticipation or reactively in response to specific c...

Tracking the Unconscious: Neural Evidence for the Retention of Unaware Information in Visual Working Memory

 2026-03-12  1 min  207 words

COGNITIVE NEUROSCIENCE

Summary: This study investigates the retention of visual information in visual working memory (VWM) when individuals are unaware of it, aiming to provide clear-cut evidence for an unconscious VWM effect. To explore the underlying neural mechanisms, we monitored a critical ERP component, specifically the cont...

Visual Working Memory Representations Selectively Drop in Contralateral Visual Cortex but Remain Decodable in Parietal Cortex after Eye Movements

 2026-03-12  1 min  207 words

COGNITIVE NEUROSCIENCE

Summary: It has been suggested that our visual system does not only process stimuli that are directly available to our eyes but also has a role in maintaining information in visual working memory (VWM) over seconds. However, two critical questions remain unresolved. First, are VWM representations spatially s...

BIORXIV NEUROSCIENCE

Summary: Microglia continuously survey the brain and shape neuronal activity, but their contribution to experience-dependent synaptic plasticity is unclear. Levodopa-induced dyskinesia (LID) is a disabling complication of late-stage Parkinson's disease (PD) that is linked to maladaptive striatal remodeling a...

  444 words

ERP BOOT CAMP

Summary:

We are disappointed to announce that we will not be holding a regular 10-day ERP Boot Camp this summer.

We have held Boot Camps nearly every summer since 2007, supported by a series of generous grants from NIMH that allowed us to provide scholarships for all attendees. Unf...

Age Differences in Hippocampal Neural Timescales During Movie-Viewing

Bouffard, N. R., Delarazan, A. I., Karagoz, A. B., Zacks, J. M., Reagh, Z. M.

2026-05-07

1 min

226 words

BIORXIV NEUROSCIENCE

Summary: Episodic memory requires integrating information across multiple scales, a process theorized to be supported by a gradient of neural timescales along the anterior-posterior axis of the hippocampus that enables both coarse- and fine-grained representations. Aging is associated with changes in hippoca...

Hippocampal Glucuronyl C5-epimerase promotes stress resilience by directly engaging PI3K through a non-enzymatic mechanism

 Chen, M., Huang, L., Yao, S., Li, J., He, F., Xiong, M., Fang, J., Li, Y., Zhang, Y., Liao, W., Du, Z., Guo, F., Li, T., Duan, J., Nie, J., Zhang, Y., Jin, C., Xu, Y., Li, Y., Li, X., Wang, Y., Liu, J., Ding, K.

 2026-05-06  1 min  151 words

BIORXIV NEUROSCIENCE

Summary: Major depressive disorder (MDD) seriously affects human physical and mental health and causes global socioeconomic burdens. Stress-induced depressive etiology is linked to dendritic atrophy in the hippocampus, however, the underlying mechanism was poorly understood. Here, we identify that glucuronyl...

Use of anodal transcranial direct current stimulation for improving motor performance in healthy adults: A systematic review and meta-analysis

 Sasaki, A., Ideriha, T., Matsuoka, A., Goto, Y., Yoshimura, N., Hagura, N.

 17 2026-05-06  1 min

 250 words

BIORXIV NEUROSCIENCE

Summary: Purpose: Transcranial direct current stimulation (tDCS) can noninvasively modulate activity in targeted brain regions. It is well established that the excitability of motor-related regions can increase when the target region is located beneath the anode (anodal tDCS), suggesting its potential to inc...

Cortical and spinal contributions to remote interlimb facilitation in humans

Sasaki, A., Kato, T., Kaneko, N., Masugi, Y., Milosevic, M., Nakazawa, K.

2026-05-06

1 min

238 words

BIORXIV NEUROSCIENCE

Summary: Voluntary contraction in one limb can facilitate motor output in a distant limb, a phenomenon commonly referred to as the remote effect. However, the neural mechanisms underlying this remote interlimb facilitation remain unclear. This study investigated cortical and spinal contributions to the remot...

Inhibition of IL-6 signaling with tocilizumab improves stroke outcomes in aged mice but requires sex-specific dosing

 Hudobenko, J., Lee, E. A., Delevati Colpo, G., Atadja, L., Goodman, G., Huang, S., Couture, L. E., Chauhan, A., McCullough, L. D.

 17

2026-05-06

 1 min

 193 words

BIORXIV NEUROSCIENCE

Summary: Post-stroke inflammation contributes to poor outcomes in both clinical and experimental studies. Interleukin-6 (IL-6) is a key inflammatory mediator in ischemic stroke, and higher circulating IL-6 levels are associated with greater stroke severity and worse clinical outcomes. Targeting IL-6 signalin...

An Information-Theoretic Analysis of Category Maps and Target Preservation

Dahl, C.
D.

2026-05-05

1
min

196
words

BIORXIV NEUROSCIENCE

Summary: Categorisation is often treated as a form of compression: a high-dimensional stimulus space is reduced to a smaller set of behaviourally or cognitively useful classes. However, compression alone does not determine whether a category map is useful. The present manuscript develops an information-theor...

Network Models of Neurodegeneration: Bridging Neuronal Dynamics and Disease Progression

 2026-01-16  1 min  196 words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Neurodegenerative diseases are characterized by the accumulation of misfolded proteins and widespread disruptions in brain function. Computational modeling has advanced our understanding of these processes, but efforts have traditionally focused on either neuronal dynamics or the biological processes...

Neural coding of arm and hand actions is spatially organized in motor cortex

 Chehade, N. G., Gharbawie, O.

 2026-05-05  1 min  248 words

BIORXIV NEUROSCIENCE

Summary: Primate motor cortex (M1) contains distinct zones with dense projections to the spinal circuits of arm and hand muscles making them critical substrates for manual behavior. But how does neural activity encoding manual actions map in space and time onto these zones? We addressed this question by reco...

Decoding Spikes From Multiunit Data

 2026-01-22  1 min  250 words

REVIEWS BIOMEDICAL ENGINEERING

Summary: Communication and control in biological systems is mediated by the timing of discharges –spikes– from excitable cells such as neurons and muscle fibers. Each spike is associated to a characteristic waveform that can be captured by sensors. The waveform's characteristics depend on the cell's biophysi...

Multi-omics profiling reveals MAGEL2-driven defects in human corticogenesis shared across Prader-Willi and Schaaf-Yang syndromes.

Buecking, J., Güler, B. E., Eibl, M., Ali, A. S., Walczuch, T., Beschauner, T., Theiss, S., Spanjaard, M.,

 Hinderhofer, K., Herrmann-Sim, F., de Esch, C. E., Tai, D. J. C., Talkowski, M. E., Krijgsveld, J., Schaaf, C. P., Lausch, M.

 2026-05-05  1
min

 185
words

BIORXIV NEUROSCIENCE

Summary: The human cortex acquires its advanced cognitive capacity through tightly regulated developmental programs, disruption of which underlies neurodevelopmental disorders such as Schaaf-Yang syndrome (SYS) and Prader-Willi syndrome (PWS). While SYS results from pathogenic variants in the imprinted gene ...

DREAMING

Summary: Demonic attacks in nightmares index more severe nightmares. We collected measures of sleep and dream reports (including nightmares) from 124 volunteers, with 61 wearing the Drem 3 headband, across a 2-week period. We subjected dream reports to qualitative thematic analyses and identified 16 dream r...
